

BSN TO DNP: PSYCHIATRIC NURSE PRACTITIONER TRACK

The Psychiatric Mental Health Nurse Practitioner (PMHNP) program prepares advanced practice psychiatric nurses to provide care in a wide variety of settings: hospitals, outpatient clinics, private practices, intensive outpatient settings, substance use, and extended care facilities. Students learn to care for individuals suffering from a variety of mental health problems and psychiatric disorders. Patients range in age from children throughout the lifespan and are from diverse ethnic and socio-economic groups. Students learn to assess, diagnose, treat, and evaluate outcomes. Holistic trauma-informed care, integrated care, telehealth care, and psychotherapy are important components of the curriculum. We place students in clinical practice sites that span the state with seasoned PMHNPs. The DNP Psychiatric Nurse Practitioner track requires 78 credits of coursework and completion of a DNP Project.
