A Message from the President

Dear Student,

Welcome to Fairfield! We are fortunate to have a remarkable learning community here at Fairfield, and we are pleased you have joined us.

As a Fairfield University student, you join one of the oldest and most successful academic traditions in the world: the Jesuit educational community, which has been forming leaders in the arts, sciences, humanities, and business for almost 500 years.

The essence of our approach, which has always been at the core of Jesuit education, is that we form and develop the whole person. We are committed to unlocking human potential; your potential.

Our first-rate faculty will help you identify where your passions lie and guide you as your interests come into focus, leading you toward an exciting future. At the same time, Fairfield offers almost limitless opportunities for you to grow as a person: by studying abroad, learning a new language, joining one of over 80 student clubs, and by living in a close-knit residential community where you will make friends that will remain alongside you for the rest of your life.

We are also fortunate to be located in one of the most beautiful towns in New England; a thriving beach town just over an hour from New York City. This means our students have access to internships, research, and job opportunities at some of the world's most dynamic corporations, arts and cultural institutions, and universities. Because we have earned a reputation for excellence in all that we do, 98 percent of our undergraduate alumni are employed or in post-graduate study or meaningful volunteer work within six months of receiving their Fairfield degree, while our post-graduate students are eagerly sought after by employers.

Fairfield has much to offer and we believe that you have much to offer us. Have a look through this course catalog to learn more about how Fairfield can be the key to your future. Don't hesitate to contact us if you have any questions along the way.

With warmest regards,

Mark R. Nemec, PhD
President
FAIRFIELD UNIVERSITY
UNDERGRADUATE OVERVIEW

Founded in 1942, Fairfield University is a Jesuit and Catholic University that is rooted in one of the world’s oldest intellectual and spiritual traditions. Fairfield prepares students for leadership and service in a constantly changing world through broad intellectual inquiry, the pursuit of social justice, and cultivation of the whole person: body, mind, and spirit. Students choose Fairfield because of its integrated approach to learning which results in graduates who are intellectually prepared and adaptable to face the ever-changing issues of the 21st century.

Located in the coastal town of Fairfield, Connecticut, the University’s 200-acre campus is just one hour outside New York City, in the heart of a region with the largest concentration of Fortune 500 companies in the nation. Fairfield has a student population of approximately 5200 students; 4100 undergraduates and 1100 graduate students. Students represent 39 states and 65 countries and are enrolled in the University’s five schools; the College of Arts and Sciences, Dolan School of Business, Graduate School of Education and Allied Professions, School of Engineering, and The Marion Peckham Egan School of Nursing and Health Studies.

Fairfield offers a wide range of opportunities for research, internships, service, civic engagement, and personal enrichment through a comprehensive core curriculum, over 45 undergraduate majors, 20 interdisciplinary minors, 40 graduate programs, 20 Division I athletic teams, and over 100 student clubs and organizations. A significant achievement for Fairfield University is that over 67 graduates have been tapped as Fulbright scholars since 1993.

In addition to a four-year honors program, five-year combined degree programs, and part-time study opportunities, Fairfield offers its own study abroad programs in seven different countries and is affiliated with more than 60 other study abroad programs on 5 continents.

When considering an applicant for admission, Fairfield looks at measures of academic achievement, students' curricular and extracurricular activities, their life skills and accomplishments, and the degree to which they have an appreciation for Fairfield’s mission and outlook. Students are challenged to be creative and active members of a community in which diversity is encouraged and honored.

Fairfield University has developed a unique educational model to ensure that students receive the motivating guidance they need to reach their fullest potential. The integration of living and learning is at the heart of a Fairfield education. Students learn what it means to be a fully engaged member of the campus community by participating in a living and learning community based on their interests. With an impressive 12:1 student to faculty ratio, Fairfield’s faculty get to know their students as individuals and encourage them to develop and follow their passion through internships, volunteer and research opportunities, and a course of study that deepens and expands their knowledge. Full integration of all learning opportunities helps students discern how they want to put their gifts and education to work in the world. As a result of this holistic model of education and focus on career-oriented activities and internships, Fairfield University graduates have been highly successful in gaining admission to selective graduate schools, while others go on to achieving successful and satisfying careers.

Surveys returned from Fairfield’s Class of 2017 reveals that within six months 98% are either employed, attending graduate school or participating in volunteer service.

University Mission

Fairfield University, founded by the Society of Jesus, is a coeducational institution of higher learning whose primary objectives are to develop the creative intellectual potential of its students and to foster in them ethical and religious values, and a sense of social responsibility. Jesuit education, which began in 1547, is committed today to the service of faith, of which the promotion of justice is an absolute requirement.

Fairfield is Catholic in both tradition and spirit. It celebrates the God-given dignity of every human person. As a Catholic university, it welcomes those of all beliefs and traditions who share its concerns for scholarship, justice, truth, and freedom, and it values the diversity that their membership brings to the University community.

Fairfield educates its students through a variety of scholarly and professional disciplines. All of its schools share a liberal and humanistic perspective, and a commitment to excellence. Fairfield encourages a respect for all the disciplines - their similarities, their differences, and their interrelationships. In particular, in its undergraduate schools, it provides all students with a broadly based general education curriculum with a special emphasis on the traditional humanities as a complement to the more specialized preparation in disciplines and professions provided by the major programs. Fairfield is also committed to the needs of society for liberally educated professionals. It meets the needs of its students to assume positions in this society through its undergraduate and graduate professional schools and programs.

A Fairfield education is a liberal education, characterized by its breadth and depth. It offers opportunities for individual and common reflection, and it provides training in such essential human skills as analysis, synthesis, and communication. The liberally educated person is able to assimilate and organize facts, to evaluate knowledge, to identify issues, to use appropriate methods of reasoning, and to convey conclusions persuasively in written and spoken word. Equally essential to liberal education is the development of the aesthetic dimension of human nature, the power to imagine, to intuit, to create, and to appreciate. In its fullest sense, liberal education initiates students at a mature level into their culture, its past, its present, and its future.

Fairfield recognizes that learning is a lifelong process and sees the education that it provides as a foundation upon which its students may continue to build within their chosen areas of scholarly study or professional development. It also seeks to foster in its students a continuing intellectual curiosity and a desire for self-education that will extend to the broad range of areas to which they have been introduced in their studies.

As a community of scholars, Fairfield gladly joins in the broader task of expanding human knowledge and deepening human understanding, and to this end it encourages and supports the scholarly research and artistic production of its faculty and students.

Fairfield has a further obligation to the wider community of which it is a part, to share with its neighbors its resources and its special expertise for the betterment of the community as a whole. Faculty and students are encouraged to participate in the larger community through service and academic activities. But most of all, Fairfield serves the wider community.
by educating its students to be socially aware and morally responsible people.

Fairfield University values each of its students as an individual with unique abilities and potentials, and it respects the personal and academic freedom of its members. At the same time, it seeks to develop a greater sense of community within itself, a sense that all of its members belong to and are involved in the University, sharing common goals and a common commitment to truth and justice, and manifesting in their lives the common concern for others which is the obligation of all educated, mature human beings.

**Diversity Vision Statement**

As a Jesuit and Catholic institution, Fairfield University’s commitment to the God-given dignity of the human person requires that we create an environment that promotes justice and fosters a deep understanding of human and cultural diversity. Fairfield is committed to encouraging dialogue among those with differing points of view in order to realize an integral understanding of what it means to be human. The University recognizes that transcending the nation’s political and social divisions is a matter of valuing diversity and learning respect for individuals, in their similarities and their differences. Fairfield will continue to integrate diversity in all facets of University life: academic, administrative, social, and spiritual, as together the community seeks to realize a vision of common good that is rooted in genuine human solidarity.

Fairfield University defines diversity in the broadest sense, reflecting its commitment to creating a more inclusive community that is reflective of the richly diverse global community of which we are part. Diversity encompasses not only racial, ethnic, and religious diversity, but also diversity of socioeconomic contexts, cultural perspectives, national origins, sexual orientation, gender identity, age, physical ability, and educational backgrounds.

### Academic Policies and General Regulations

**Philosophy of Education**

Fairfield University has, as its primary objective, the development of the creative intellectual potential of its students within a context of religious commitment.

Fairfield believes in the particular excellence of a liberal education. In an effort to achieve this objective, it requires each student to take courses from five areas of knowledge: mathematics and the natural sciences, history and the social and behavioral sciences, philosophy and religious studies, English and the arts, and modern and classical languages. Thus assured of a basic, well-rounded education, students are free to pursue a major field of study in preparation for scholarly or professional pursuits.

To assist the student in the quest for truth, the University promotes dialogue between teacher and student, between student and student, between teacher and teacher. This dialogue takes place in an environment of absolute freedom of inquiry.

### Normal Academic Progress

**Academic Year**

The academic year begins in early September and ends in late May, with recess periods at Christmas and in the spring. It is divided into two semesters, each extending over a period of about 15 weeks. The
semester hour is the unit of instructional credit. The class day begins at 8:00am and is divided into class periods of 50, 75, or 150 minutes and laboratory periods of two, three, or four hours.

**Admission Expectations**

Undergraduate students admitted into the University on a full-time basis have the benefit of co-creating a premiere educational opportunity, one that attends to their educational, spiritual, vocational, and civic development across an intentional four-year course of study. We seek, of course, to expand students’ awareness, during their time at Fairfield, of the many possibilities a Fairfield education makes available to them.

Undergraduate students admitted into the University on a full-time basis are expected to remain full-time until they graduate.

In the College of Arts and Sciences, the Dolan School of Business, the Egan School of Nursing and Health Studies, and the School of Engineering, consultation with the appropriate dean is required for a full-time student to switch to part-time status. Rules and their financial implications for movement from full-time to part-time will be clear at the time of matriculation. Reasons to switch may include personal hardship, such as a documented medical condition that requires a reasonable accommodation, unexpected and substantial family responsibilities, the first semester of return from an academic or medical leave of absence, fifth year seniors, etc.

Unexpected emergency situations that arise during a term would be handled through the normal withdrawal process. Part-time status may be an alternative to a full educational leave of absence.

**Full-Time Status**

The normal course load for a matriculated student is five courses per semester, equivalent to 15 to 20 credit hours. To maintain full-time status, a matriculated student must be registered for a minimum of 12 credit hours each semester.

**Credit Hours**

Three-credit courses at Fairfield University meet for 150 minutes per week, equally divided over one, two, or three meetings. Four credit courses meet a minimum of 200 minutes per week in various configurations.

**Classification System**

Student classification is based on total credit hours earned.

<table>
<thead>
<tr>
<th>Class</th>
<th>Credit Hours Earned</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>First-year</td>
<td>0 through 29</td>
<td>1</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 through 59</td>
<td>2</td>
</tr>
<tr>
<td>Junior</td>
<td>60 through 89</td>
<td>3</td>
</tr>
<tr>
<td>Senior</td>
<td>90 through 120</td>
<td>4</td>
</tr>
</tbody>
</table>

**Course Load**

Fairfield University desires to see all undergraduate students make normal progress toward graduation. For full-time students, the normal rate of work is defined as five courses per semester, each bearing three or four credit hours. The minimum rate of work for full-time students is four courses (minimum 12 credit hours) per semester.

**Degree Requirements**

At the time of graduation, a student must have earned a minimum of 120 credits and completed at least 38 three- or four-credit courses, depending on the course of study. However, no simple accumulation of credits is sufficient in itself to qualify for a degree from Fairfield University. Rather, students are expected to have completed with success all of the assigned courses that constitute the curriculum of their choice. The curriculum consists of courses that fall into the required categories of core curriculum, major, and electives. A second major, minor, and concentration are also an option. Students must have a minimum grade average of 2.0 (C) or better overall and in their major. Students must abide by the terms of the University's residency requirement, set forth below. In addition, students are expected to complete their undergraduate degrees within 10 years of beginning their studies.

**Residency Requirement**

To merit a Fairfield University degree, at least 60 credits must be taken at Fairfield. Furthermore, the final 30 credits must be earned at Fairfield University.

**Registration Requirement**

All matriculated full-time undergraduate students must register for classes by December 1 for the following spring semester, and by May 1 for the following fall semester. If a student is not registered by these dates, the University will presume him or her to be withdrawn at the end of the current semester. At that time, all residence hall and financial aid commitments will be terminated.

**Graduation Information**

Diplomas are awarded in January, May, and August. All students who have been awarded diplomas within the year are invited to participate in the May graduation ceremony.

Students who do not complete all of the requirements for their undergraduate degree may be granted permission by their Dean to participate in the Undergraduate Commencement ceremonies if they meet the following criteria:

- End of spring term major GPA and overall GPA: Student must have a minimum overall grade point average of 2.0 and must meet the appropriate major GPA, which is 2.0 unless otherwise stated.¹
- Year GPA: Students whose major GPA is contingent on end of term grades will be notified of the approval or denial of their request when grades are posted.

¹ Students whose GPA is contingent on end of term grades will be notified of the approval or denial of their request when grades are posted.

**Attendance**

**Class Attendance**

All students are expected to attend every regularly scheduled class session. The impact of attendance on grading is specified in the syllabus for each course. Unexcused absences may be reported to the appropriate academic dean.

Faculty members should have a policy for dealing with student absence on the syllabus for each course. If a student will miss a class due to an illness/injury, the professor should be notified according to the policy on the syllabus. If a student will miss an exam, quiz or in class presentation due to illness/injury or another type of emergency, the professor should
be contacted beforehand. A faculty member may request that the student provide verification of the absence from a health care provider. It is within the purview of the faculty member to determine when or whether a student absence will be excused.

For further information regarding student absences, please see the Policies and Procedures section of the Student Handbook.

**Released Time**

A student participating in a University-sponsored event has the right to be excused without penalty or grade jeopardy from exams, student presentations, attendance, and other classroom events during that time, provided the student makes up the required work in the fashion mutually agreed upon by the professor and the student.

Students participating in such University-sponsored events will be allowed to make up any major exams, tests, or quizzes they miss in a course when they are involved in a scheduled event provided that participating students, or the faculty moderator, inform all their professors in writing at the beginning of the semester, or as soon thereafter as possible, once scheduling is confirmed. University-sponsored events covered by this policy are defined as follows:

- Athletics
  - all varsity sporting events, including post season tournaments
- Others
  - concerts, plays, or other group performances where the absence of a member would detract from the overall performance
- Departmental Clubs are not included in this policy.

**Grading System**

**Grades**

The quality of student performance in coursework is graded according to the official marks of A, B, C, D, and F. These marks have the following meanings:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Grade Points</th>
<th>Numerical Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Outstanding achievement</td>
<td>4.00</td>
<td>93-100</td>
</tr>
<tr>
<td>A-</td>
<td>Superior level of achievement</td>
<td>3.67</td>
<td>90-92</td>
</tr>
<tr>
<td>B+</td>
<td></td>
<td>3.33</td>
<td>87-89</td>
</tr>
<tr>
<td>B</td>
<td></td>
<td>3.00</td>
<td>83-86</td>
</tr>
<tr>
<td>B-</td>
<td></td>
<td>2.67</td>
<td>80-82</td>
</tr>
<tr>
<td>C+</td>
<td>Acceptable level of achievement with course material</td>
<td>2.33</td>
<td>77-79</td>
</tr>
<tr>
<td>C</td>
<td></td>
<td>2.00</td>
<td>73-76</td>
</tr>
<tr>
<td>C-</td>
<td></td>
<td>1.67</td>
<td>70-72</td>
</tr>
<tr>
<td>D</td>
<td>Minimal achievement, but passing</td>
<td>1.00</td>
<td>60-69</td>
</tr>
<tr>
<td>F</td>
<td>Unacceptable level of achievement; course must be repeated to obtain credit</td>
<td>0.00</td>
<td>0-59</td>
</tr>
</tbody>
</table>

Each course has a syllabus that details the evaluative components of the course and their weighting in determining the final grade.

The form of the final, end-of-semester comprehensive evaluation (written examination, take-home, oral exam, paper, etc.) must appear on the syllabus at the beginning of the semester. No form of the final evaluation is to be due prior to the date assigned by the Registrar for that course’s final examination. Students are not required to take more than two exams in any final exam day.

In addition to the foregoing academic grades, which indicate the quality of student performance, the notations I (Incomplete) or W (Withdrawal) may appear on a student’s grade report.

**Grade Point Value**

The official mark or final letter grade earned in a course is assigned grade points. The grade points per credit hour and numerical equivalency for letter grades are as follows:

Each semester’s course grades are computed into a weighted average. To determine a weighted grade point average, the number of credits per course is multiplied by the grade points earned per course. The total number of grade points for all courses is then divided by the number of credits attempted.

**Academic Alert System**

The academic progress of undergraduate students, specifically first year students and NCAA athletes, is monitored through a comprehensive Academic Alert System administered through the Academic and Career Development Center in collaboration with the academic deans’ offices. A month into the semester, faculty are encouraged to report Early Alerts for undergraduate students, defined as academic and/or behavioral concerns that present obstacles to student success. At the midpoint of each semester, faculty report Midterm Estimates, defined as grades of C-, D, or F, for all first year students and for upper-level students as deemed appropriate. The Academic Alert System remains open throughout the academic year and provides a seamless interface for reporting students of concern while also streamlining academic support processes and providing a holistic approach to supporting student development and engagement. Although not part of a student’s official academic record, academic alerts raised are designed to allow faculty advisors and professional staff to review a student’s academic progress throughout the year. Each student who receives an academic alert receives comprehensive information and an opportunity to meet with an academic administrator. The goal is to connect students who may be having difficulty or who are academically at-risk to appropriate academic and student support resources. Early intervention with students on the
part of professors, faculty advisors, and campus personnel can improve students’ persistence, engagement, and success.

**Grade Reports**
Grades are available to all students by accessing the student web portal (my.Fairfield) at the end of each semester.

**Incomplete**
A grade of "I" is issued when, due to an emergency situation such as illness, a student arranges with the professor to complete some of the course requirements after the semester ends. All course work must be completed within 30 days after the beginning of the next regular semester. Any incomplete grades still outstanding after the 30-day extension will become Fs. This policy applies only to courses taken at Fairfield University. It does not apply to courses taken in Study Abroad programs. Please refer to the Study Abroad (p. 32) section for additional information.

**Repeat Course Policy**
When a student repeats a course that was failed, the new grade will be recorded. Grade point values will be averaged into the cumulative average, and the credits will count toward the degree. The original grade will remain on the transcript and be calculated into the cumulative average. When a student repeats a course for which the student has previously obtained a passing grade, the new course and grade will be recorded on the transcript with the notation, repeat course. The original grade and the repeated grade will be averaged into the GPA. The credit for the repeat course will not count toward the degree. The original grade will remain on the transcript.

**Transfer Credit**
When students begin their university studies at other institutions and subsequently transfer to Fairfield University, the University accepts transfer credit under the following conditions:

- No courses with grades less than C will qualify for transfer.
- Credit will be granted only for specific work completed at regionally accredited institutions whose quality and course content have been approved by the University.
- Only credit hours, not grades, will transfer.
- Credits earned more than 10 years previous to a credit transfer request may not be accepted.

All transfer credit must be approved by an undergraduate student’s academic dean or an authorized representative of the Academic and Career Development Center. Every transfer student is required to complete at least 60 credits of undergraduate study at Fairfield in order to receive a Fairfield University bachelor’s degree.

**Withdrawal from Courses**
Students who wish to withdraw from a course after the initial add/drop period may do so through the end of the tenth week of a traditional semester provided that the student's academic dean, in consultation with the course instructor, finds withdrawal to be in the student's best interest (note that a student must maintain 12 credit hours for full-time status). After the tenth week in the semester, course withdrawal will only be granted in highly unusual circumstances, such as a documented health emergency. Withdrawal after the tenth week will not be permitted simply to prevent receipt of a grade that might not meet the student’s satisfaction. Students who wish to withdraw from a winter or summer intersession course or an ASAP course may do so by the mid-point of the course. Students who have violated the academic honor code may not be eligible for withdrawal. In all approved cases, the University Registrar will record a grade of W (withdrawal) on the student's permanent record. To initiate a request to withdraw from a course, a student must complete a Course Withdrawal Form and meet with an authorized representative of their academic dean's office or the Academic and Career Development Center. A withdrawal may not be granted after final grades have been submitted except in very rare cases, during which an instructor must file a change of grade form.

**Disruption of Academic Progress**

**Academic Probation**
Academic records will be formally reviewed at the end of the fall, spring, and summer terms. Students who do not meet the stated requirements will be placed on Academic Probation. The purpose of academic probation is to alert the student and the institution to the problems associated with the student’s academic performance and to recommend or implement strategies for improvement. The continuation of poor academic performance will result in the dismissal of the student. Faculty advisors are notified of all advisees placed on academic probation.

A student placed on academic probation will remain on academic probation until the overall GPA is at or above the requirements specified below. A student will be removed from academic probation when the overall GPA is equal to or greater than the requisite GPA according to credits earned.

A student on academic probation is ineligible to participate in extracurricular or co-curricular activities. A student on academic probation may petition the Office of the Provost for the right to participate in extra- or co-curricular activities. The appeal must contain a valid and compelling reason why restriction of extra- or co-curricular activities is inappropriate, and must demonstrate effectively that the activity will contribute an improvement in academic performance.

First semester, first-year students with a GPA below 1.90 will not be placed on academic probation for their second semester, but they will lose their right to participate in extracurricular or co-curricular activities.

- **Students with 29 or fewer credits** earned by the end of the second semester, or the first year at Fairfield, will be placed on academic probation if the overall GPA is below 1.90.
- **Students with 30-59 credits earned** will be placed on academic probation if the overall GPA is below 1.90.
- **Students with 60 or more credits earned** will be placed on academic probation if the overall GPA is below 2.00.

**Academic Dismissal**
Students meeting any of the following conditions will be dismissed from the University.

- A student who, regardless of academic standing, has received the grade of F in three or more 3- or 4-credit courses during the preceding 12 month period inclusive of all grades earned.
- A student with 29 or fewer credits earned, who regardless of incompletes, while on academic probation proceeds to earn a semester GPA below 1.90.
- A student with 30-59 credits earned, who regardless of incompletes, while on academic probation, proceeds to earn a semester GPA below 1.90.
A student with 60 or more credits earned, who regardless of in completes, while on academic probation proceeds to earn a semester GPA below 2.00

Students are removed from registered courses based on the date of their dismissal letter. Students who have been dismissed from the University for reason of academic failure are expected to remain away for at least a full semester (fall or spring) before seeking readmission. Such individuals lose all entitlement to institutionally funded financial aid. Except in extraordinary circumstances, students who are academically dismissed a second time will not be considered for readmission.

**READMISSION AFTER AN ACADEMIC DISMISSAL**

Prior to formally requesting readmission after an academic dismissal, students should consult with their Academic Dean’s Office. Formal request for readmission should be made at least three weeks before the start of the semester in which the student seeks to resume enrollment.

**Note:** Students are expected to remain away for at least a full semester (fall or spring) before seeking readmission. Except in extraordinary circumstances, students who are academically dismissed a second time will not be considered for readmission.

1. The student seeking readmission must write a letter stating the rationale for the request including why the student is ready to resume study. The letter should be sent in advance to the Dean of Academic and Career Development, located in the Kelley Center, or by email (acdc@fairfield.edu). The letter should include the student’s name, ID, address, phone, current school and major, new school and major (if requesting a change), returning semester, choice of full- or part-time studies and intention to live on campus or commute.

2. After formal review of the student’s request, the Academic Dean’s Office will recommend whether the student should or should not be readmitted. Recommendations for readmission are forwarded to the Academic and Career Development Center, where a final decision will be rendered.

3. The Academic and Career Development Center will send an official letter of acceptance or denial to the student, inclusive of any contingencies as deemed appropriate by the Academic Dean’s Office. The student may not register for classes or be assigned University-housing until the official letter of readmission is reviewed and processed.

4. Residency: Students who were academically dismissed from Fairfield University and are readmitted as full time students will need to specifically request on-campus housing, and that request is subject to the review and approval of the Office of the Dean of Students.

Additional questions or concerns can be directed to the Academic Dean’s Office.

**Voluntary Withdrawal from University**

To apply for a voluntary withdrawal, a student must complete the following steps:

1. To discuss voluntarily withdrawing (for non-medical reasons); contact the appropriate Academic Dean’s Office. This meeting is necessary to facilitate the withdrawal process and to discuss any future plans to return to the University.

   a. **Academic and Career Development Center, Kelley Center, x2222 (undecided students)**
   b. **College of Arts and Sciences, CNS 100, x2227**
   c. **Dolan School of Business, DSB 1125, x3230**

   **Egan School of Nursing and Health Studies, NHS 401, x4150**
   **School of Engineering, BNW 167, x4147**

2. The student must submit a written request for withdrawing from the University, including the reasons for the withdrawal. Voluntary withdrawals from the University are subject to the following conditions:

   a. There are no pending student conduct issues.
   b. The student is not liable for academic withdrawal due to insufficient progress or excessive absence.
   c. The student has settled all financial obligations to the University.
   d. Voluntary withdrawals cannot be granted retroactively.

Note: If a student wants to withdraw when classes during the traditional semesters are not in session, the student must still submit a letter to the Academic Dean’s Office. Students scheduled to live in University housing should send a copy of that letter to the Office of the Dean of Students.

3. After meeting with an administrator in your Academic Dean’s office, all resident students must set up a meeting with an administrator in the Office of the Dean of Students to discuss non-academic-related issues (housing, financial aid, Stag Card, student account, etc.) pertaining to the student’s withdrawal from the University. Failure to set up this meeting will result in continuation of your financial obligation to the University. The Office of the Dean of Students is located in BCC 408, x4211.

**READMISSION AFTER A VOLUNTARY WITHDRAWAL**

Prior to formally requesting readmission after a voluntary withdrawal, students should consult with their Academic Dean’s Office and Office of the Dean of Students. Formal request for readmission should be made at least three weeks before the start of the semester in which the student seeks to resume enrollment.

1. The student seeking readmission must write a letter stating the rationale for the request including why the student is ready and wants to resume study. The letter should be sent in advance to the Dean of Academic and Career Development, located in the Kelley Center, or by email (acdc@fairfield.edu). The letter should include the student’s name, ID, address, phone, current school and major, new school and major (if requesting a change), returning semester, choice of full- or part-time studies and intention to live on campus or commute.

2. After formal review of the student’s request, the Academic Dean’s Office and the Office of the Dean of Students will assess whether the student should or should not be readmitted. Recommendations for readmission are forwarded to the Academic and Career Development Center, where a final decision will be rendered.

3. The Academic and Career Development Center will send an official letter of acceptance or denial to the student, inclusive of any contingencies as deemed appropriate by the Academic Dean’s Office and/or the Office of the Dean of Students. The student may not register for classes or be assigned University-housing until the official letter of readmission is reviewed and processed.

Residency: Students who voluntarily withdrew from Fairfield University and are readmitted as full time students are expected to live on campus and will be assigned a residential space on campus by the Office of Residence Life at the time their readmission request is approved.

Additional questions or concerns can be directed to the Academic Dean’s Office or the Office of the Dean of Students.
Medical Withdrawal from the University

A medical withdrawal is an extraordinary remedy and is reserved for all full-time and part-time matriculated students, as well as non-matriculated students, who have been presented with circumstances of a physical or mental health condition preventing the student from remaining enrolled at the University. While each request for a withdrawal will be considered on its own merits, students should be aware that the following do not constitute circumstances which will support a request for a medical withdrawal:

- failing to attend class
- insufficient academic performance
- financial difficulties
- dissatisfaction with course materials or offerings
- change of interest or major
- inability to meet all curricular and extracurricular commitments

Medical withdrawals cannot be granted retroactively.

The following process applies to students who wish to withdraw from Fairfield University for medical reasons.

1. To discuss withdrawing as a student for medical reasons, contact the Office of the Dean of Students (x4211, BCC 408), the Student Health Center (x2241, Dolan Hall), or Counseling and Psychological Services (x2146, Dolan Hall). Information from personal or private physicians or psychologist is subject to review by the University, which has final decision making authority on the withdrawal request.

2. A request for a medical withdrawal (whether physical or mental health based) must include at a minimum:
   - An explanation of why the student is unable to perform the essential academic functions of a student.
   - Complete and timely documentation from a physician or other appropriate health care provider who is competent to provide an opinion as to the nature, severity, and duration of the illness, and has provided treatment for, and in relation to, the condition(s) which form the basis for the requested withdrawal. These documents should be sent to the Director of the Student Health Center or the Director of Counseling and Psychological Services.
   - Authorization from the requesting student to allow the director of the Student Health Center or the director of Counseling and Psychological Services to contact the attending medical or health care provider if, after review of the documentation provided, it is determined that more information is required.

3. If the request is granted, a student must arrange for the return of their StagCard and establish a move-out time and return of keys (if student lives on-campus) with the University. The institutional refund policy applies.

4. Students are expected to remain away for at least a full semester (fall or spring) after a medical withdrawal before seeking readmission, unless deemed otherwise by the director of the Student Health Center or Counseling and Psychological Services.

Readmission to the University After a Medical Withdrawal

Prior to requesting readmission after a medical withdrawal, all full-time and part-time matriculated students, as well as non-matriculated students, should consult with the Office of the Dean of Students. Requests for readmission are strongly encouraged to be submitted by August 1 for fall semester, December 15 for spring semester, and April 15 for summer term.

1. To seek readmission following a medical withdrawal, the student must submit a letter stating the rationale. A copy of the letter must be sent to the Dean of Academic and Career Development, located in the Kelley Center (or by email (acd@fairfield.edu)), and to the Office of the Dean of Students via email (dosoffice@fairfield.edu). The letter should include the student’s name, ID, address, phone, current school and major, new school and major (if requesting a change), returning semester, choice of full- or part-time studies and intention to live on campus or commute.

2. Students must submit a completed Post-Medical Withdrawal Readmission form to the Student Health Center (when medical situation is physical in nature) or Counseling and Psychological Services (when medical situation is psychological in nature). The requesting student may be asked to provide authorization allowing the director of the Student Health Center or the director of Counseling and Psychological Services to contact the student’s medical or health care provider if, after review of the documentation provided, it is determined that more information is required.

3. The Office of the Dean of Students will ask the Student Health Center or Counseling and Psychological Services for their evaluation of the request. Upon receipt of that information, the Office of the Dean of Students will contact the student to arrange an appointment in-person, if at all possible, or over the phone, if necessary, to review the request.

4. After formal review of the student’s request for readmission, the Office of the Dean of Students and the academic dean’s office will assess whether the student should be readmitted or not. Recommendations for readmission are forwarded to the Academic and Career Development Center, where a final decision will be rendered.

5. The Academic and Career Development Center will send a notification regarding the student’s request for readmission. If readmission is granted, it may include directives as deemed appropriate by the student’s academic Dean’s office and/or the Office of the Dean of Students. The student may not register for classes or be assigned University housing until the official letter of readmission is issued.

Quick Overview of Process

1. Student submits request for readmission to the Dean of Academic and Career Development and Dean of Students.
2. Dean of Academic and Career Development and Dean of Students confirm receipt of request; instruct student to submit requisite information to Student Health Center or Counseling and Psychological Services.
3. Student Health Center or Counseling and Psychological Services determines whether or not to endorse the student’s request and provides recommended parameters or directives, if necessary; determination and recommendation sent to the Dean of Students.
4. Dean of Students and student’s Academic Dean’s office provide readmission recommendation and any accompanying parameters or directives to the Academic and Career Development Center.
5. Academic and Career Development Center sends student decision letter.
6. If granted readmission, student contacts academic advisor or academic Dean’s office to register for courses.
7. If on-campus housing is requested and approved, student contacts Office of Residence Life to make arrangements.

Educational Leave of Absence
Matriculated students may apply for an educational leave of absence for a fall or spring semester or for a full academic year in order to study abroad or for the Washington, DC, semester. Educational leaves are granted by the associate/assistant dean of the student’s school or college. To be eligible for an educational leave of absence, a Fairfield University student must have an overall GPA of 2.80 or better at the time of application. In addition, the student must have a record of good academic and social standing for the semester immediately preceding application. Students who wish to be granted educational leave of absence must complete all official paperwork with the study abroad coordinator by Feb. 1 for the following year.

All students granted educational leaves by Fairfield University will be charged a fee for maintenance of their matriculation at Fairfield. Furthermore, students who study elsewhere in non-affiliated programs lose their entitlement for institutional financial aid for the period of the leave.

Credits from Other Institutions
Matriculated students may be permitted to take courses for degree credit at another institution with pre-approval by the dean of the student’s school. Only credits (not grades) are transferable. For each approved course taken at another institution, credits will be accepted in transfer only if the student has earned a grade of C or better. Official transcripts should be forwarded to the student’s academic dean upon completion of pre-approved coursework at other institutions.

Students are cautioned that deans will grant permission to take courses elsewhere only when the student can demonstrate compelling reasons to do so or to take advantage of a special curriculum offered at another U.S. institution. Students are expected to complete graduation requirements including Major and Core courses at Fairfield University. Students participating in a study abroad program while on approved Educational Leave of Absence should consult with the Study Abroad Office prior to departure to obtain course pre-approval.

In all cases, the following restrictions apply:
• Of the 120 or more credits required for the bachelor’s degree, a minimum of 60 of those credits must be earned at Fairfield University.
• Students are permitted to take no more than two courses at another regionally-accredited U.S. institution during a summer or winter intersession and no more than 5 courses (post-matriculation) will be applied toward degree completion.
• The last 30 credits earned toward a student’s degree must be completed at Fairfield University or through a program that issues Fairfield University course credit.

Advanced Placement
While in high school, some students pursue one or more college-level Advanced Placement courses. Fairfield University will award three or four hours of credit toward graduation for each AP course taken by a student, provided that the student has taken an Advanced Placement Test prepared by the CEEB program and obtained a test score of four or five. It is the discretion of college/school officials to determine if such AP credits can be used to exempt students from specific University courses or requirements. Normally, AP credit will not exempt a student from requirements in his/her major. No student will be awarded more than a total of 15 AP credits by Fairfield University.

Below is a partial list of AP tests submitted by students for advanced placement, along with their Fairfield University equivalent.

Academic Freedom and Responsibility

The statement on academic freedom, as formulated in the 1940 Statement of Principles endorsed by the AAUP (American Association of University Professors) and incorporating the 1970 interpretive comments, is the policy of Fairfield University. Academic freedom and responsibility are here defined as the liberty and obligation to study, to investigate, to present and interpret, and to discuss facts and ideas concerning all branches and fields of learning. Academic freedom is limited only by generally accepted standards of responsible scholarship and by respect for the Catholic commitment of the institution as expressed in its mission statement, which provides that Fairfield University "welcomes those of all beliefs and traditions who share its concerns for scholarship, justice, truth, and freedom, and it values the diversity which their membership brings to the university community."

Freedom of Expression

As an academic institution, Fairfield University exists for the transmission of knowledge, pursuit of truth, development of students, and the general well-being of society. Free inquiry and free expression are indispensable to the attainment of these goals. Fairfield University recognizes that academic freedom, freedom of expression, and responsibility are required to realize the essential purposes of the University. Academic freedom and responsibility (distinguished from freedom of expression) are herein defined as the liberty and obligation to study, to investigate, to present, interpret, and discuss facts and ideas concerning all branches and fields of inquiry.

Student Rights

As constituents of the academic community, students should be free, individually and collectively, to express their views on issues of institutional policy and on matters of general interest to the student body.

The professor in the classroom and in conference should encourage free discussion, inquiry, and expression. Student performance should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards. This means that students are free to take reasoned exception to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled. Students in professional programs are expected to understand and uphold the standards required in their profession.

Students bring to the campus a variety of interests previously acquired and develop many new interests as members of the academic community. They should be free to organize and join associations to promote their common interests. Students and student organizations should be free to examine and discuss all questions of interest to them and to express opinions publicly and privately. Students should be allowed to invite and to hear any person of their own choosing. Those procedures required by an institution before a guest speaker is invited to appear on campus should be designed only to ensure that there is orderly scheduling of facilities and adequate preparation for the event, and that the occasion is conducted in a manner appropriate to an academic community. Guest speakers are subject to all applicable laws, and to the University policies on harassment and discrimination. Students' freedom of expression extends to their ability to express their opinions in
writing or through electronic means, and to distribute and post materials expressing their opinions. Any restrictions should be designed only to ensure the orderly use of space and facilities, to provide reasonable restrictions on commercial messages, to comply with applicable fire, health or safety codes, to comply with the University's Non-Discrimination and Harassment Policy, or to comply with state or federal law. Students should always be free to support causes by orderly means which do not disrupt operations of the institution. At the same time, it should be made clear to the academic and larger community that in their public expressions or demonstrations, students or student organizations speak only for themselves and not the institution.

**Student Responsibilities**

Freedom of expression enjoyed by students is not without limitations. The rights set forth herein must be balanced against and considered in the context of the following responsibilities:

- Students have the obligation to refrain from interfering with the freedom of expression of others.
- Students have the responsibility to respect the rights and beliefs of others, including the values and traditions of Fairfield University as a Jesuit, Catholic institution.
- Students have the responsibility to support learning, and when learning, to engage others in a respectful dialogue, to never threaten the safety or security of others, and to comply with all University policies prohibiting harassment, hate crimes, and discrimination.

All policies in this catalog and the actions taken under them must support Fairfield University’s Mission Statement and the Statement on Academic Freedom.

**Honor Code**

Fairfield University’s primary purpose is the pursuit of academic excellence. This is possible only in an atmosphere where discovery and communication of knowledge are marked by scrupulous, unqualified honesty. Therefore, it is expected that all students taking classes at the University adhere to the following Honor Code:

"I understand that any violation of academic integrity wounds the entire community and undermines the trust upon which the discovery and communication of knowledge depends. Therefore, as a member of the Fairfield University community, I hereby pledge to uphold and maintain these standards of academic honesty and integrity."

**Academic Honesty**

All members of the Fairfield University Community share responsibility for establishing and maintaining appropriate standards of academic honesty and integrity. As such, faculty members have an obligation to set high standards of honesty and integrity through personal example and the learning communities they create. Such integrity is fundamental to, and an inherent part of, a Jesuit education, in which teaching and learning are based on mutual respect. It is further expected that students will follow these standards and encourage others to do so.

Students are sometimes unsure of what constitutes academic dishonesty. In all academic work, students are expected to submit materials that are their own and are to include attribution for any ideas or language that are not their own. Examples of dishonest conduct include, but are not limited to:

- Falsification of academic records or grades, including but not limited to any act of falsifying information on an official academic document, grade report, class registration document or transcript.
- Cheating, such as copying examination answers from materials such as crib notes or another student’s paper.
- Collusion, such as working with another person or persons when independent work is prescribed.
- Inappropriate use of notes.
- Falsification or fabrication of an assigned project, data, results, or sources.
- Giving, receiving, offering, or soliciting information in examinations.
- Using previously prepared materials in examinations, tests, or quizzes.
- Destruction or alteration of another student’s work.
- Submitting the same paper or report for assignments in more than one course without the prior written permission of each instructor.
- Appropriating information, ideas, or the language of other people or writers and submitting it as one’s own to satisfy the requirements of a course - commonly known as plagiarism. Plagiarism constitutes theft and deceit. Assignments (compositions, term papers, computer programs, etc.) acquired either in part or in whole from commercial sources, publications, students, or other sources and submitted as one’s own original work will be considered plagiarism.
- Unauthorized recording, sale, or use of lectures and other instructional materials.

In the event of such dishonesty, professors are to award a grade of zero for the project, paper, or examination in question, and may record an F for the course itself. When appropriate, expulsion may be recommended. A notation of the event is made in the student’s file in the academic dean’s office. The student will receive a copy.

**Student Academic Grievance Procedure**

**Purpose**

Procedures for review of academic grievances protect the rights of students, faculty, and the University by providing mechanisms for equitable problem solving.

**Types of Grievances**

A grievance is defined as a complaint of unfair treatment for which a specific remedy is sought. This procedure is concerned solely with academic grievances. It excludes circumstances that may give rise to a complaint for which explicit redress is neither called for nor sought, or for those for which other structures within the university serve as an agency for resolution.

Academic grievances relate to procedural appeals, academic dishonesty appeals, or quality of work appeals.

Procedural appeals are defined as those seeking a remedy in which no issue of the quality of a student’s work is involved. For example, a student might contend that the professor failed to follow previously announced mechanisms of evaluation.

Academic dishonesty appeals are defined as those seeking a remedy because of a dispute over whether plagiarism, cheating, or other acts of academic dishonesty occurred. Remedies would include but not be limited to removal of a file letter, change of grade, or submitting new or revised work.
Quality of work appeals are defined as those seeking a remedy, following the completion of a course, because the evaluation of the quality of a student's coursework is alleged to be prejudiced or capricious.

**Time Limits**

The procedure herein defined must be initiated by the end of the subsequent fall or spring semester after the event that is the subject of the grievance. If the grievance moves forward, all subsequent steps of the informal process must be completed and the formal process must be initiated before the end of the second semester subsequent to the event that is the subject of the grievance.

**Informal Procedures**

1. The student attempts to resolve any academic grievance with the faculty member. If, following this initial attempt at resolution, the student remains convinced that a grievance exists, she or he advances to step two.

2. The student consults with the chair or program director, bringing written documentation of the process to this point. If the student continues to assert that a grievance exists after attempted reconciliation, she or he advances to step three.

3. The student presents the grievance to the dean of the school in which the course was offered, bringing to this meeting documentation of steps one and two. After conversation with the instructor of record and the department chair/program director, the dean will inform the student whether or not the grade shall be changed by the instructor of record. If the student is dissatisfied with the outcome, the dean will inform the student of the right to initiate formal review procedures.

**Formal Procedures**

1. If the student still believes that the grievance remains unresolved following the informal procedures above, she or he initiates the formal review procedure by making a written request for a formal hearing through the dean to the Provost. Such a request should define the grievance and be accompanied by documentation of completion of the informal process. It should also be accompanied by the dean's opinion of the grievance.

2. The Provost determines whether the grievance merits further attention. If not, the student is so informed. If, however, the grievance does merit further attention, the Provost determines whether it is a procedural appeal, an academic dishonesty appeal, or a quality of work appeal.

For procedural appeals and academic dishonesty appeals, the Provost will convene a Grievance Committee according to the process described below, providing the committee with the written documentation resulting from the previous steps in the appeal process.

For quality of work appeals, the Provost will request that the chair of the department through which the course is taught, or if the chair is the subject of the grievance a senior member of the department, assemble an ad hoc committee of three department/program members to review the appeal, providing the committee with the written documentation resulting from the previous steps in the appeal process.

3. For procedural appeals and academic dishonesty appeals, the Grievance Committee takes whatever steps are deemed appropriate to render a recommendation for resolving the grievance. The committee adheres to due process procedures analogous to those in the Faculty Handbook.

For quality of work appeals, the department committee shall make itself available to meet and discuss the appeal with the student, and shall discuss the appeal with the instructor of record for the course. If the final consensus of the department committee is that the academic evaluation that led to the course grade was neither prejudiced nor capricious, the appeals process ends here.

4. For procedural appeals and academic dishonesty appeals, the recommendation from the Grievance Committee is forwarded to the Provost in written form, accompanied, if necessary, by any supporting data that formed the basis of the recommendation. Should the Grievance Committee conclude that a change of grade is warranted, the two faculty members on the Grievance Committee will recommend an appropriate grade. In case of disagreement between the two faculty members, the dean chairing the Grievance Committee will decide which of the two recommended grades to accept. The recommended grade change shall be included in the report.

For quality of work appeals, if the final consensus of the department committee is that the academic evaluation that led to the course grade was prejudiced or capricious, the department committee will recommend an alternative course grade. If the instructor of record agrees to change the grade to that recommended by the committee, the appeals process ends here. If the instructor of record declines to change the grade, the department committee shall prepare a written report, including the department committee's recommended grade. The report will be forwarded to the Provost and the instructor of record, who may send the Provost a written response to the report.

5. For procedural appeals and academic dishonesty appeals, the Provost renders a final and binding judgment, notifying all involved parties. If such an appeal involves a dispute over a course grade given by a faculty member, the Provost is the only university official empowered to change that grade, and then only to the grade recommended by the Grievance Committee.

For quality of work appeals, if the Provost agrees with the department committee that the academic evaluation that led to the course grade was prejudiced or capricious, she or he is authorized to change the course grade to the grade recommended in the department committee's report.

**Structure of the Grievance Committee**

The structure of the Grievance Committee will be as follows:

- Two faculty members to be selected from the Student Academic Grievance Board. The faculty member against whom the grievance has been directed will propose four names from that panel, the student will strike two of those names, and the two remaining faculty members will serve.
- Two students to be selected from a standing pool of eight students elected by the student government. The student filing the grievance will propose four names from that panel, the faculty member will strike two of those names, and the two remaining students will serve.

In the event that any faculty member or student selected through the foregoing process is unable to meet, another elected member of the panel will serve as an alternate.

The Grievance Committee will be chaired by a dean (other than the dean of the school in which the course was offered) to be selected by the Provost. The dean so selected will have no vote except in the event of a tie, and will be responsible for overseeing the selection of the Grievance Committee, convening and conducting the committee
meetings, and preparing the committee's report(s) and other appropriate documentation.

**Due Process Procedure**

1. Both the student and the faculty member shall have the right to be present and to be accompanied by a personal advisor or counsel throughout the hearing.
2. Both the student and the faculty member shall have the right to present and examine witnesses and to cross-examine witnesses.
3. The administration shall make available to both the student and the faculty member such authority as it may possess to require the presence of witnesses.
4. The Grievance Committee shall promptly and forthrightly adjudicate the issues.
5. The full text of the findings and conclusions of the Grievance Committee shall be made available in identical form and at the same time to both the student and the faculty member. The cost shall be met by the university.
6. In the absence of a defect in procedure, recommendations shall be made to the Provost by the Grievance Committee as to possible action in the case.
7. At any time should the basis for an informal hearing appear, the procedure may become informal in nature.

**Grievance Process Complaints**

Fairfield University endeavors to resolve all grievances, complaints and disputes in a timely and fair manner. In the event a student believes a complaint remains unresolved after the conclusion of Fairfield University’s grievance and/or dispute resolution processes (including all appeals), the student may request that the complaint be reviewed by the State of Connecticut Office of Higher Education. The Office of Higher Education is responsible for quality review of independent colleges and will investigate complaints concerning matters within its statutory authority. For more information or to file a complaint, contact:

Office of Higher Education (http://www.ctohe.org/studentcomplaints.shtml)
61 Woodland Street
Hartford, CT 06105-2326
Phone: 800-842-0229

Fairfield University is accredited by the New England Association of Schools and Colleges (NEASC). Students may contact:

NEASC (https://cihe.neasc.org)
3 Burlington Woods Drive
Suite 100
Burlington, MA 01803
Phone: 855-886-3272

**Resources and Services**

**Academic Resources**

All members of the faculty share personally and actively in the responsibility for providing students with educational, career, and personal guidance. One of the hallmarks of a Jesuit education is the personal interest each professor takes in students; the professor tries to know each student’s strengths and weaknesses. This tradition is basic to Fairfield. Classes are not large, and there are ample opportunities for close student-teacher relationships. Members of the faculty make themselves available for informal discussions, advice, and encouragement well beyond their published office hours.

**Academic Advisor**

Students who have a declared major are assigned a faculty advisor in that academic discipline. Undeclared students are also assigned a faculty advisor. However, when these students declare a major, they will be reassigned to an advisor in the academic discipline chosen. Advisors are available to meet regularly with students, monitor progress, advise students at registration time, and discuss courses and programs of study, co-curricular involvement, and high-impact learning opportunities such as study abroad, capstones, and internships. Fairfield’s faculty advisors, along with professional advising staff and peer mentors, promote a holistic approach to academic advising that encourages students to be actively engaged and to make thoughtful choices regarding their current and future plans.

**Academic and Career Development Center**

The Academic and Career Development Center serves Fairfield University students seeking academic and vocational support services through comprehensive support services, programming and resources. This integrated approach addresses the diverse developmental stages of a student’s academic career and positions Fairfield University as a leader in providing tailored services supporting personal development, academic excellence, and career readiness. The distinctiveness of this holistic approach is grounded in our Catholic, Jesuit mission and supports a transformative learning experience. For more information, please contact the Academic and Career Development Center at 203-254-4081 or acdc@fairfield.edu, or visit the website (http://www.fairfield.edu/acdc).

**Academic Support and Advisement**

The Academic and Career Development Center provides individual and group services aimed at facilitating student transition and increasing student engagement and academic success. The Center supports a strong faculty advising model with supplemental resources aimed at elevating the importance of student mentoring and advising. Services are provided for first-year students transitioning to Fairfield University, undergraduate students who are undeclared, changing majors and/or schools and students seeking additional guidance as they develop their academic and professional goals. The Center supports and monitors students’ academic progress, offers tutorial programs and learning support resources, and coordinates with faculty advisors, deans’ offices, and campus resources to assist students in achieving academic success. Using a holistic advising model, the staff assist students in meeting their academic, personal, and professional goals through comprehensive and integrated academic support services and resources.

**Accessibility**

Fairfield University is committed to providing qualified students with disabilities an equal opportunity to access the benefits, rights, and privileges of its services, programs and activities in an accessible setting. In compliance with Section 504 of the Rehabilitation Act, the Americans with Disabilities Act, and applicable state law, the University provides reasonable accommodations to reduce the impact of disabilities on academic functioning or upon other major life activities. The Academic and Career Development Center is responsible for evaluating and coordinating appropriate academic and campus life accommodations for students with disabilities. Students with disabilities or temporary impairments seeking accommodations because of a disability or temporary impairment must contact the Academic and Career Development Center as early as possible in the semester to complete
the registration process for accommodations. Once a student with a disability has registered and has been approved for accommodations, the student is responsible for providing his or her accommodation letter to each of his or her professors. Students with accommodations are encouraged to set up a meeting with their professors at the beginning of the semester to discuss how their accommodations will be implemented. If a student with a disability feels discriminated against on the basis of their disability or feels that they have been denied access or accommodations they are legally entitled to, they are encouraged to review the University’s disability grievance procedure located in the Students with Disabilities section of the Student Handbook. Students can also contact the Academic and Career Development Center to learn more about the disability grievance procedure.

Career, Leadership, and Professional Development
Fairfield University is committed to helping undergraduate and graduate students and alumni throughout their career development process. Comprehensive services are available through the Academic and Career Development Center including career counseling, career readiness programs, leadership and professional development offerings, and on and off-campus recruiting opportunities.

Project Excel
Project Excel is a TRiO Student Support Services (SSS) Program funded by the US Department of Education for first-generation college students, students whose families meet the federal guidelines for income, or individuals with disabilities. The program’s overall objectives are to increase and support the retention of participants, ensure that participants are in good academic standing at the University and to have participants graduate in a timely way. Project Excel works to accomplish its objectives by providing an array of support services including academic advising and mentorship, academic tutoring, assistance with financial aid and scholarship searches, financial aid and economic literacy education, and graduate and professional school planning assistance.

Academic Support Programs
• Academic Skills Development and Tutoring: The Academic and Career Development Center, located in the Kelley Center, offers individual sessions and group workshops on academic skills development and learning support resources. The Office also manages the tutoring program and recruits students who are proficient in their major concentration and/or other subjects and trains them to serve as peer tutors. Peer tutoring is group based, free of charge, and open to all students. Additional tutoring services are available through the University’s individual schools in select subject areas.

• Bannow Science Center: The Rudolph F. Bannow Science Center houses advanced instructional and research facilities that foster the development of science and engineering learning communities, engage students in experiential learning, and invite collaborative faculty and student research in biology, chemistry, computer science, engineering, mathematics, physics, and psychology.

• Culpeper Language Resource Center: The Charles E. Culpeper Language Resource Center, located in Canisius 207, is designed to support and promote the study and instruction of foreign languages and their cultures. Students work interactively with computer and web-based materials. This allows them to take ownership of their learning experience and become lifelong learners. We provide one-on-one assistance in finding materials, and in accessing the online components of languages courses.

• Math Center: The Math Center, located in Bannow 122, offers free tutoring for core mathematics courses, including Precalculus, Calculus I and II, and Statistics. This is provided via individual and small group tutoring sessions. For more information or to schedule an appointment, please visit the website (https://www.fairfield.edu/mathcenter).

• Writing Center: The Writing Center, located on the lower level of the DiMenna-Nyselius Library, offers writing assistance and resources to all students. Tutors work with students on any writing project and at any stage of the project’s development. For more information or to schedule an appointment, please visit the website (https://www.fairfield.edu/writingcenter).

Aloysius P. Kelley, S.J. Center
Located on Loyola Drive, the Kelley Center houses the offices of Undergraduate and Graduate Admission, Financial Aid, Registrar, and the Academic and Career Development Center.

Arts and Minds Programs
Fairfield University serves as an important hub for students and visitors from the region seeking entertaining and inspiring cultural events and activities.

• The Regina A. Quick Center for the Arts houses the Aloysius P. Kelley, S.J. Theatre, the Lawrence A. Wien Experimental Theatre, and Fairfield University Museum’s Thomas J. Walsh Art Gallery.

• Fairfield University Museum is comprised of the Thomas J. Walsh Art Gallery in the Quick Center and the Bellarmine Gallery, located in Bellarmine Hall. A showcase for significant art objects and rotating exhibits, the Fairfield University Museum displays a rich and varied collection of paintings, sculpture and decorative arts objects and serves as a learning laboratory for students and members of the regional community.

• The PepsiCo Theatre is home base for Theatre Fairfield, the University’s performing arts club, and provides another venue for theatre and dance in an intimate setting.

In addition, various departments host exhibitions, lectures, and dramatic programs throughout the academic year, including the popular lecture series Open Visions Forum. These events are open to all members of the University community and many are free. All Fairfield students receive free or discounted tickets for arts events. For a cultural calendar, visit our website (http://www.fairfield.edu/arts).

DiMenna-Nyselius Library
The University Libraries are the intellectual heart of Fairfield University’s academic community and serve as a creative partner in the development and dissemination of knowledge that serves to connect ideas, people, and information across the Fairfield Community. The University Libraries provide access to over 1.3 million items and 59,370 journal subscriptions. The beautiful DiMenna-Nyselius Library is a signature building located at the heart of Fairfield’s physical campus. Carrels and tables, leisure seating, 20 reservable collaboration spaces, a café, and a 24/7 computer lab offer a variety of tech-savvy spaces for both individual study and collaborative work for up to 900 students. Workstations for the physically disabled are available throughout the library building. The building also houses a 90-seat auditorium.

Whether on or off campus, the Libraries’ comprehensive website (https://www.fairfield.edu/library) provides access to curated resources from any desktop or mobile device. Research assistance is available in-person
For more information on Information Technology Services, please visit our website.

During the fall and spring semesters, library hours are:

- Monday through Thursday: 7:45am to 12:00am
- Friday: 7:45am to 10:30pm
- Saturday: 9:00am to 9:00pm
- Sunday: 10:30am to 12:00am

The library building is open 24/7 during final exam periods.

Co-located in the library building are the ITS Help Desk, the Center for Academic Excellence, and the Writing Center.

Early Learning Center

The Center provides an early care and education program based on accepted and researched theories of child development; individualized programs designed to meet the needs of each child; a curriculum that is child-oriented; and teaching staff who have specialized educational training in child development and developmentally appropriate practice with young children, including health, safety, and nutritional guidelines.

The Center is open all year from 7:30am to 5:30pm for children aged 6 weeks to 5 years. Children may be enrolled on a full- or part-time basis depending upon space availability. Registration takes place every March. For tuition details, registration requirements, or other information, call the Center at 203-254-4028 or visit the website (http://www.fairfield.edu/elt).

Information Technology Services

The Information Technology Services (ITS) department offers networking, wireless and computer technology resources for the entire Fairfield University community.

Our goal is to maximize the use of technological innovations not in only the learning environment but in all of our business processes as well. ITS is responsible for managing the Banner platform, which securely houses all information on each individual student academic record as well as my.Fairfield, a web-based portal from which most university online resources can be accessed. The portal provides single sign-on capability so each student will need to log in only once from my.Fairfield to access course registration, review filing requirements, accept financial aid awards, participate in the housing processes, view/print academic schedules and grades, complete surveys, access student Gmail accounts, and access OrgSync and other student-related functions.

ITS maintains approximately 75 general-use classrooms across campus, as well as specialized instructional spaces and a number of public-use computer labs. The public labs, including a 24/7 Mac and Windows facility in the library, are accessible to all students with a valid StagCard. Our goal is to consistently furnish cutting-edge technology to support a collaborative teaching and learning environment, and to provide as much compatibility as possible across all platforms and devices that students might own.

For more information on Information Technology Services, please visit our website (http://fairfield.edu/its).

Academic Computing

Through one-on-one and group collaboration, research into general and discipline-specific tech tools, the creation of documentation and training videos, visits to class meetings to assist students with assigned technology, and a wide variety of workshops offered in conjunction with the Center for Academic Excellence, Academic Computing supports instructors and students not just in the incorporation of computer- and mobile-based applications into teaching and learning, but also promote sound 21st-century pedagogical practices.

Blackboard

Academic Computing manages and supports the Blackboard Learn course management system, which offers a wide range of teaching tools.

- Blackboard Login Page (https://fairfield.blackboard.com)
- Blackboard Resource Page (https://www.fairfield.edu/its/services/academiccomputing/blackboardresources) (including FAQs, resource guides, etc.)

Faculty/Staff and Student Networks

ITS is responsible for the maintenance and upgrades of both the student and faculty/staff networks on campus.

Help Desk

The ITS4U Help Desk provides free technology support for issues like wireless connectivity, warranty-covered hardware replacements (HP and Apple), malware prevention/cleanup, and limited software/hardware support for student-owned computers.

Location: DiMenna-Nyselius Library, Room 215 (Main Floor)
Phone: 203-254-4069 | E-mail (itshelpdesk@fairfield.edu) | Wiki (https://wiki.fairfield.edu)

Academic Year Hours: Monday-Friday, 8:30am-7:00pm, Sunday 4:00pm-8:00pm
Summer Hours: Monday-Thursday, 8:00am-6:00pm, Friday 8:00am-12:00pm

my.Fairfield

All students use their NetID to access my.Fairfield, a secure web portal used to view course schedules, access library services remotely, register for classes and parking permits, view and pay tuition bills, print unofficial transcripts, and much more.

NetID

A Fairfield University NetID is your username/password combination that provides access to a variety of online resources and services, including my.Fairfield and your student Gmail account. Your NetID is obtained through the claim process found here (https://wiki.fairfield.edu:8443/x/FQCD). You will need to claim your NetID in order to access all Fairfield online resources.

Note: All official university communications are sent to students’ University Gmail accounts. No personal email accounts should be used. Your email address follows the format netid@student.fairfield.edu. For example, if your name is Lucas F. Stag and your NetID is lucas.stag, your email address is lucas.stag@student.fairfield.edu.

International Students

International students are served through the Office of Student Engagement, located in the lower level of the Barone Campus Center.
This department sponsors a specialized orientation program for international students and provides assistance with legal forms and other documentation.

**Student Handbook**

For information about Compliance Statements and Notifications, Student Resources, Policies and Procedures, Student Conduct Code, Residential Guidelines, and Clubs and Organizations, please see the Student Handbook (http://www.fairfield.edu/studenthandbook).

**Accreditations**

Fairfield University is fully accredited by the New England Association of Schools and Colleges, which accredits schools and colleges in the six New England states. Accreditation by one of the six regional accrediting associations in the United States indicates that the school or college has been carefully evaluated and found to meet standards agreed upon by qualified educators.

**Additional Accreditations**

- AACSB International - The Association to Advance Collegiate Schools of Business (Charles F. Dolan School of Business)
- Accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).
  - BS in Computer Engineering
  - BS in Electrical Engineering
  - BS in Mechanical Engineering
  - BS in Software Engineering
- American Chemical Society
  - College of Arts and Sciences
    - BS in Chemistry
- Commission on Accreditation of Marriage and Family Therapy Education
  - Graduate School of Education and Allied Professions (GSEAP)
    - Marriage and Family Therapy program
- Connecticut State Department of Higher Education
  - GSEAP
- Council for Accreditation of Counseling and Related Educational Programs (CACREP)
  - GSEAP
  - Counselor Education and School Counseling programs
- Council for the Accreditation of Educator Preparation Programs / National Council for the Accreditation of Teacher Educators (CAEP/NCATE)
  - Elementary Education
  - Secondary Education
  - School Psychology
  - Special Education
  - Teaching English to Speakers of Other Languages (TESOL)
- Commission on Collegiate Nursing Education
  - Marion Peckham Egan School of Nursing and Health Studies
    - Undergraduate Nursing programs
    - Masters Nursing programs
    - Doctoral programs
- Council on Accreditation of Nurse Anesthesia Educational Programs (COA)
  - Nurse Anesthesia Program
- Accreditation Commission for Midwifery Education (ACME)
- Nurse Midwifery program (pre-accredited)

**Program Approvals**

- Connecticut State Office of Financial and Academic Affairs for Higher Education
  - Elementary and Secondary Teacher certification programs
  - Graduate programs leading to certification in specialized areas of education
  - School of Nursing programs
- Connecticut State Department of Education Bureau of Educator Standards and Certification
  - Elementary and Secondary Teacher certification programs
- Connecticut State Department of Education and Council for the Accreditation of Educator Preparation Programs and National Council for the Accreditation of Teacher Educators (NCATE/CAEP)
- Connecticut State Board of Examiners for Nursing
  - Undergraduate Nursing programs
  - Council on Accreditation of Nurse Anesthesia Educational Programs

**Institutional Memberships**

- America East Athletic Conference
- American Association for Employment in Education
- American Association of Colleges for Teacher Education
- American Association of Colleges of Nursing
- American Council for Higher Education
- American Council on Education
- American Society for Engineering Education
- APPA: Leadership in Educational Facilities
- Association for Information Communications Technology Professionals in Higher Education
- Association for Student Affairs at Catholic Colleges and Universities
- Association for the Advancement of Sustainability in Higher Education
- Association for University and College Counseling Center Directors
- Association of American Colleges and Universities
- Association of Catholic Colleges and Universities
- Association of College Unions International
- Association of Governing Boards
- Association of Higher Education Campus Television Administrators
- Association of International Education Administrators
- Association of Jesuit Colleges and Universities
- Association to Advance Collegiate Schools of Business
- Campus Compact
- Catholic Campus Ministry Association
- Connecticut Association of Colleges and Universities for Teacher Education
- Connecticut ACE Women’s Network
- Connecticut Conference of Independent Colleges
- Connecticut Council for Higher Education
- Connecticut Distance Learning Consortium
- Connecticut Education Network
- Connecticut Library Consortium
• Council for Opportunity in Education
• Council of Connecticut Academic Library Directors

Compliance Statements and Notifications

Catalog
The provisions of this catalog are not to be regarded as an irrevocable contract between Fairfield University and the students. The University reserves the right to change any provision or any requirement at any time. The course listings represent the breadth of the major. Every course is not necessarily offered each semester.

Compliance Statements and Notifications
For information about student rights under the Family Education Rights and Privacy Act (FERPA), the University's Non-Discrimination Statement, and the Jeanne Clery Disclosure of Campus Security Policy
ADMISSION

Admission Policies and Procedures
Fairfield University admits without discrimination students of any sex, race, color, marital status, sexual orientation, gender identity, religion, national or ethnic origin, or handicap to all the rights, privileges, programs, and activities generally accorded or made available to students of the University.

First Year Admission
Successful candidates for admission should have received a high school diploma from a recognized high school or preparatory school and should have acquired no less than 15 units in college-preparatory studies. The unit is commonly understood as a measure of credit assigned for the successful completion of a high school course that meets four or five times each week throughout the year; college-preparatory units are those usually found in the high school curriculum that explicitly prepare students for college. No vocational, commercial, or industrial units are considered to be preparatory to the work of the liberal arts college.

Candidates for admission must take units chosen from the areas listed below.

Basic Requirements

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics</td>
<td>4</td>
</tr>
<tr>
<td>Laboratory Science</td>
<td>3 to 4</td>
</tr>
<tr>
<td>Foreign Language</td>
<td>2 to 4</td>
</tr>
<tr>
<td>History/Social Science</td>
<td>3 to 4</td>
</tr>
</tbody>
</table>

Candidates interested in mathematics, engineering, business, and the sciences are urged to pursue a fourth unit of lab science and mathematics, preferably pre-calculus or calculus. Candidates for nursing must have one laboratory course in chemistry.

In addition to the basic requirements, applicants must present evidence to indicate interest in and competence for college studies. To that end they must submit a complete record of high school studies, together with other supporting materials as described in the admission application form.

The admission process at Fairfield University is Test Optional. Students may choose whether or not to submit the results of the SAT or ACT. Students should indicate on the Common Application whether or not it is their intention to have their scores considered in the admission process. Students who choose not to submit their test scores are strongly encouraged to schedule a personal interview.

The deadline for regular decision applicants to have all application materials (application, high school transcript, and guidance counselor recommendation) postmarked is January 15. The University also strongly recommends a campus visit including a tour, information session, and/or an (optional) personal interview.

Students who speak English as a second language should take the Test of English as a Foreign Language (TOEFL) if they have resided in the United States for fewer than five years. The University may, at its discretion, admit students who do not meet the regular published entrance requirements.

Early Action and Early Decision Admission
Students who consider Fairfield University to be among their top choices for their undergraduate education and who would like to have their application reviewed early may apply under our Early Action Program. Applicants for Early Action must submit all application materials, including the Common Application, high school transcript, and guidance counselor recommendation by November 1. Students may choose whether to submit the results of their ACT or SAT exams. Early Action candidates who are interested in arranging a campus interview should make that request by the end of November. Early Action candidates will be notified of their admission decision before January 1. Early Action admission is non-binding, and students have until May 1 to make their college selection. Fairfield University also offers two Early Decision Admission Programs. Early Decision I and II are binding agreements. If a student is admitted under the Early Decision guidelines, he/she must agree to withdraw any pending college applications and confirm enrollment at Fairfield. The deadline for Early Decision I admission is November 15, and students will receive notification of the decision by December 15. The deadline for Early Decision II admission is January 15, and students will receive notification of the decision by February 15. Superior students who have completed a four-year high school program at the end of three years may apply for admission to the University.

Academic Scholarships
A number of academic scholarships are available to outstanding students. The Magis Scholarship is a $25,000 annual award, renewable for four years providing a student maintains a 3.0 grade point average. Additional merit scholarships ranging from $9000 to $25,000 are available. All students who apply for admission are automatically considered for a merit scholarship. Successful candidates will be students with outstanding academic records, as well as strong records of achievement and engagement outside of the classroom.

Wait List
First Year applicants to Fairfield will receive one of three decision letters: admit, deny, or a wait list offer. Wait list students who are serious in their intent to remain on the wait list are asked to confirm their place on the waitlist via the waitlist confirmation option on their online portal.

Alumni Relatives
One of the strongest endorsements an educational institution can receive is to have alumni send their children to their alma mater. At Fairfield we believe that such candidates can contribute significantly to enhancing the tradition and the spirit that are an important part of a Fairfield education. In light of this, it is our practice to consider a student's legacy connections to Fairfield when reviewing a candidate's application for admission.
Deferred Admission
Occasionally, a student who has been admitted to the University will seek to defer their admission for a variety of reasons. Students may defer for one semester, or up to two years. In order to defer, students must pay the confirmation deposit to hold their place in the class, and make the request to defer admission in writing. In order to defer admission, a student must agree to not take more than 11 college credits during the deferral period. Any merit scholarship that a student was awarded will be honored when the student enrolls. However, a student who defers will be required to re-apply for need-based financial assistance.

Transfer Admission
The University welcomes qualified students who wish to transfer to Fairfield from other accredited colleges. Students interested in transferring normally have accumulated at least 15 credits and have maintained at least a 2.5 grade point average (the Charles F. Dolan School of Business requires at least a 2.8 GPA). Transfers are not accepted into the full-time program for a Bachelor of Science in nursing. Please note that the GPA is simply a guideline, and not a guarantee of admission. To apply, students must submit, in addition to the required application forms, a high school transcript, college records, a recommendation form, and a personal statement explaining current academic and/or work activities and reasons for transferring. Students must also submit a statement from the dean of students office from all colleges attended indicating they are in good standing and eligible to return. Students may choose whether or not to send the results of their SAT or ACT exams.

Every transfer student is required to complete a minimum of 60 credits at Fairfield University in order to receive a Fairfield University bachelor’s degree. Applications should be directed to the Office of Undergraduate Admission. The priority application deadline for September admission is April 11; the priority deadline for January admission is November 15.

Articulation Agreements
School of Engineering (for the completion of the Bachelor of Science)
• Gateway Community College
• Housatonic Community College
• Manchester Community College
• Naugatuck Valley Community College
• Norwalk Community College
• Three Rivers Community College

International Students
Matriculating international students must attend Fairfield University on a full-time basis (minimum of 12 credits per semester). Degree-seeking (freshman or transfer) students should contact the Office of Admission for further information. To be eligible to attend Fairfield the student must:

1. Provide a complete and certified listing of all academic institutions attended, including dates of entry, grades, termination, and title of the certificate or diploma received. Include rank in class if available. These documents should be prepared in English or with an official English translation.
2. Demonstrate proficiency in the English language. A minimum score of 550 (paper-based), 213 (computer-based), or 80 (Internet-based) on the Test of English as a Foreign Language is the preferred documentation.
3. Prove sufficient financial support for the period of the student's stay at Fairfield, including tuition, room and board, and transportation.
4. Obtain an F-1 student visa (required for entry into the United States for the purpose of studying full-time at Fairfield) after receiving an I-20/DS-2019 from the University. The visa is issued by the U.S. Embassy or Consulate in one's own country.

Non-matriculated international students may attend Fairfield University for a semester or academic year. All students must be enrolled on a full-time basis (minimum of 12 credits per semester). Such students are accepted into the academic programs at Fairfield and are treated as regular members of the student body. They are usually full-fee-paying students. Visit international students should contact the Office of International Student Services, 203-254-4000 x2445.

Part-Time and Continuing Studies Admission
Fairfield offers a wide variety of opportunities for learners seeking to pursue their educational goals on a part-time basis. For these students, the University offers opportunities for bachelor degree completion, traditional bachelor's degrees, certificate programs, as well as credit and non-credit courses that can be taken on a part-time basis for professional and personal enrichment. Students may apply and enroll as a part-time matriculated student (seeking a bachelor's degree) or register for courses as a non-matriculated student (not seeking a degree from Fairfield).

Bachelor's Degree Seeking Part-Time Students
The University welcomes students to apply for admission and enroll on a part-time basis to earn a bachelor's degrees offered through the College of Arts and Sciences, the Dolan School of Business, the School of Engineering, and the Egan School of Nursing and Health Studies (RN to BSN and Second Degree Nursing Program only). Classes are offered in a variety of day, evening, online, and accelerated formats throughout the year which provide the flexibility and convenience that many busy part-time students are seeking. Tuition is offered on a per-credit basis at a part-time rate (p. 34).

The Bachelor's Degree in Liberal Studies (p. 156), offered through the College of Arts and Sciences, provides part-time students a flexible, individualized and multidisciplinary bachelor's degree completion program that can accept, upon review, up to 75 transfer credits and offers a slightly modified core curriculum. It also offers opportunities to turn life experience and specific knowledge into credit through portfolio assessment and CLEP tests, respectively.

Admission
Students seeking to start or complete a bachelor's degree as a part-time student must first apply for admission through Fairfield University's online application (https://www.fairfield.edu/part-time-and-continuing-studies/admission) and be admitted into a bachelor's degree program. Applications are accepted on a rolling basis, with no deadlines. Part-time students may enroll in up to three 3-credit courses and one 2-credit lab per semester, for a maximum total of 11 credits taken in any one semester which includes summer, fall, and spring semesters. Part-time students may enroll in one 3-credit course during the winter intersession.

Enrollment counselors in the Part-Time and Continuing Studies Admission Office can assist prospective students with their online application. They can also provide enrollment advice prior to application regarding major and degree options that will help students achieve their academic, personal, and professional goals. As needed, faculty are available for questions regarding specific details of a major or academic program.

After being admitted, part-time students who have accumulated credits from other accredited colleges or universities will have their official
transcripts reviewed and approved for transfer credits by their school’s Deans Office. Admitted students must submit to the Office of Part Time and Continuing Studies a comprehensive list of courses with a grade of C or better they would like reviewed for credit transfer to Fairfield. Included with the list is the course description and course syllabi. Like all other students at Fairfield, part-time matriculated students are assigned to a faculty advisor who will provide ongoing assistance in their course selection to fulfill major and core requirements toward completion of their bachelor’s degree.

Financial Aid
Financial aid is available to part-time students who are enrolled in a degree program and taking a minimum of two courses (6-credits) per semester. All part-time matriculated students are welcome to utilize the services and expertise on financing their education offered by the Office of Financial Aid (https://www.fairfield.edu/part-time-and-continuing-studies/financial-aid-and-tuition).

Maintaining Status
To be considered an active part-time matriculated student, a student must have been enrolled in at least one course within eight consecutive semesters (approximately two years). Those semesters include summer, fall, winter intersession, and spring. After that time, if there has been no course registration or enrollment, the part-time student is considered “inactive,” will be unable to register for classes, and will have to seek readmission by contacting the Office of Part-Time and Continuing Studies Admission to request reactivation of their student record.

STUDENT STATUS FROM PART-TIME TO FULL-TIME
After a part-time student has been enrolled for several semesters and accumulated approximately 18 credits, they can request from the Dean’s Office to have their status changed from part-time to full-time enabling the student to take four to five courses per semester. The student’s academic record will be evaluated and a decision made on the status change. When the status change is approved, the student’s tuition will be changed from a course per credit charge to a full-time semester tuition and the student can register for up to five courses. Once full-time status is granted, if a future change back to part-time is requested and granted, tuition will be calculated on the full-time to part-time credit hour rate.

University Policies for Part-Time Students
Many of the university academic and curricular policies that are listed in the Undergraduate Catalog are applicable to all part-time students as appropriate. This includes course withdrawal and refund policies, medical withdrawal and readmission after a medical withdrawal, and many other policies. The Student Handbook (https://www.fairfield.edu/handbook) also provides information on the University’s student code of conduct, resources and services for all students, including part-time students.

Non-Matriculated Visiting Part-Time Students
Fairfield University offers opportunities for students to register and enroll in undergraduate credit and non-credit courses as a visiting non-matriculated student (those not seeking a bachelor’s degree from Fairfield University).

There are several types of non-matriculated visiting students:

• College students from other institutions who take credit courses at Fairfield University during any semester (up to three courses in spring, summer and fall, one in winter) with a goal to transfer those credits to another academic institution.

• Students seeking to start or complete their bachelor’s degree by taking credit courses in any semester (up to three per term) as a part-time, non-matriculated, visiting student.

• Individuals taking a credit course (or a non-credit course) in subject area of interest for personal or professional enrichment.

• High school students seeking college credit courses for either future college or high school credit.

A part-time non-matriculated student can enroll in up to three courses (11 credits) per semester, with a limit of six courses or 18 credits overall. A wide variety of three-credit courses are offered during the summer, fall, winter, and spring terms in classroom, hybrid, and online formats. Course delivery is varied, with traditional 15-week courses and accelerated one-, four-, five-, or seven-week course offerings.

Course descriptions and course schedules are found online. A complete schedule of courses that are offered each semester is updated regularly on the university website as well as information about how to register online as a visiting non-matriculated student (https://www.fairfield.edu/part-time-and-continuing-studies/course-registration).

CERTIFICATES, PROFESSIONAL DEVELOPMENT, AND PERSONAL ENRICHMENT
Fairfield University offers part-time students a number educational opportunities beyond degrees through certificate programs (https://www.fairfield.edu/part-time-and-continuing-studies/courses-and-programs/certificate-programs) and access to academic courses for those seeking personal or professional enrichment. Descriptions of a wide variety of part-time studies offerings can be found on the University’s website (https://www.fairfield.edu/part-time-and-continuing-studies/courses-and-programs).

Visiting High School Students
Eligible high school juniors and seniors are encouraged to explore taking credit courses at Fairfield University. Some courses may require proof of prerequisite high school coursework and faculty approval in advance of registration and enrollment.

There is a full range of online and classroom courses available in the summer, fall, and spring semesters to give the visiting high school student a real college academic experience, while earning credits which may be applied towards high school completion or future college credit (as determined and approved by individual high schools and future colleges and universities).

The summer semester offers the greatest variety of accelerated classes (i.e. one-, four-, five-, and seven-week formats). Course descriptions can be found in this online undergraduate course catalog and course schedules by semester can be found updated on the University’s website (https://www.fairfield.edu/undergraduate/academics/schools-and-colleges/course-catalogs-and-schedule).

High school students should provide:

• An official or unofficial High School Transcript. This requirement is to ensure that high school students have the necessary relevant classroom experience to enroll and be successful in a rigorous college course. If a course requires prerequisites, the transcript will also verify that the student’s academic background is suitable. Students should have a cumulative GPA of at least 3.2.

• Once the student’s transcript has been reviewed and criteria to take a college-level course have been met, a member of the Part-Time and
Continuing Studies Admissions Office will contact the student about the next steps to enroll.

All inquiries and high school transcripts in advance of taking courses Fairfield by high school students should be directed to the Office of Part-Time and Continuing Studies Admission at 203-254-5532 or ptadmiss@fairfield.edu.

STUDENT HOLDS
There are two situations in which a hold will be placed the record of a non-matriculated student, preventing them from further course registration.

Completion of 18 Credits
When a non-matriculated student has accumulated 18 credits on their student record, a registration hold will be placed on that record and future course registration is restricted. The student will be required to discuss their future academic plans at Fairfield with an enrollment advisor in the Office of Part-Time and Continuing Studies Admission.

Failing Grades
If a non-matriculated visiting student accumulates three failing grades on their Fairfield University transcript, a hold will be placed on their student record preventing further course registration until there is discussion with an enrollment advisor in the Office of Part Time and Continuing Studies Admission.
CURRICULA

Introduction
The various curricula at Fairfield University are arranged into five general categories. The first three categories, core curriculum, electives, and majors, represent coursework that all students are required to complete. The remaining categories, second majors and minors, designate optional coursework. In addition, special features such as an honors program, interdisciplinary learning communities or clusters, independent studies, and internships are available to students.

Pathways to Integration
As a Catholic Jesuit university characterized by academic rigor, integrative ways of thinking, knowing and doing, civic engagement and social responsibility within the humanistic tradition, our mission is to educate our students to become competent, compassionate professionals who will live lives of personal integrity and contribute to the common good.

Choice of Curriculum
Descriptions of the various curricula will be found in the college and school sections and, where appropriate, under the discipline heading. For students who desire a curriculum involving an ordered sequence of courses (natural sciences, accounting, mathematics, engineering), the initial choice of program is important; for other students, first-year and sophomore courses provide a solid basis and background for any subsequent decision to major in such areas as economics, English, history, languages, and visual and performing arts.

Students will fulfill the curriculum requirements that are in place at the time the student matriculates. Once changes are in effect, students have the option of remaining with the requirements in effect at the time of their matriculation.

Core Curriculum
The goal of a Fairfield education is to develop the whole person: an intellectual being who can think clearly, accurately, dispassionately; a social being who cares about others and takes one's place in the world with them; a physical being who knows the laws, limitations, and beauty of the natural world; a spiritual being who seeks to make one's life express the truths of religion and philosophy.

Because Fairfield believes that a liberal education can achieve this goal, the General Faculty has developed a core curriculum that all undergraduates must take to acquire a broad background in all academic areas. During their years at Fairfield, students, regardless of major or field of specialization, take from two to five courses in each of five areas.

Within the framework of these five areas, students have a number of options so that fulfilling the requirement can become a stimulating and enjoyable experience while providing the breadth of knowledge necessary for further studies and for life as a well-educated human being.

Options within the Core Curriculum

Area I: Mathematics and Natural Sciences
- Two semesters of mathematics.
  - At least one semester must be a calculus course: MA 0016, MA 0119, MA 0120, MA 0145, MA 0146, MA 0171, MA 0172, MA 0221, MA 0245, or MA 0273.
- Two semesters of a natural science.
  - Any two courses in any of the natural sciences, as well as AY 0110, AY 0115, or PY 0261, fulfill this requirement.

Note: Psychology majors cannot use PY 0261 to fulfill this core science requirement.

Area II: History and the Social and Behavioral Sciences
- Two semesters of history: One 100-level history course is required, plus one 200- or 300-level course.
- Two semesters of anthropology (except for AY 0110 and AY 0115), communication¹, economics, politics, psychology (except for PY 0261), or sociology. Both courses may be in the same department or they may be in two different departments. Also includes ED 0241 for Educational Studies minors only.

¹ The following communication courses may be used toward the core requirement in Social and Behavioral Sciences: CO 0100, CO 0130, CO 0200, CO 0202, CO 0220, CO 0233, CO 0238, CO 0239, CO 0240, CO 0241, CO 0242, CO 0246, CO 0248, CO 0323, CO 0338, CO 0340, CO 0341, CO 0343, CO 0347, CO 0348, HS 0200.

Area III: Philosophy, Religious Studies, and Applied Ethics
- Two semesters of philosophy: PH 0101 is required, plus one 200-level course.
- Two semesters of religious studies: RS 0101 is required, plus one 200-level course.
- One additional course in philosophy, religious studies, or applied ethics.

Area IV: English and Visual and Performing Arts
- Three semesters of English: EN 0011 and EN 0012 are required, plus one 100-level English literature course.
  - Writing courses (ENW) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement; see listings under Classical Studies (p. 86) as well as Modern Languages and Literatures (p. 163).
- Two semesters of visual and performing arts.
• One semester must be in the area of art history; film, television, and media arts history; music history; or theatre history. ( Attribute: VPCH)

• The other semester may be selected from any of the three-credit course offerings in art history; film, television & media arts; music; studio art, and theatre. (Attribute: VPCH or VPC2)

Area V: Modern and Classical Languages

• Two semesters at the intermediate level of any language listed among the offerings of the Department of Modern Languages and Literatures (p. 163) or the Classical Studies Program (p. 86).

Diversity Requirements

U.S. Diversity

In order to help students develop a critical consciousness of self and society, all undergraduates are required to take one course that gives significant treatment to aspects of diversity and pluralism in U.S. society. Such courses will explore, in a systematic manner, connections among race, class, and gender, and will examine issues of privilege and difference in U.S. society. Additional aspects of diversity — including religion, sexual orientation, and ethnicity — may also be considered. Approved courses will be designated by a special symbol in each semester’s course schedule booklet. This requirement will not add credit hours or an extra course to a student’s degree program; students will be able to select a designated diversity course from among core requirement courses, major courses, or electives.

World Diversity

In addition to the U.S. diversity course, a world diversity course is required of all undergraduates. This course focuses on a non-Western culture or society, exclusive of Europe and the United States, and their literary, artistic, musical, religious, philosophical, political, economic, or scientific traditions. Though courses primarily emphasizing North American and European topics will not count toward this requirement, courses focusing on Native American, Russian, and Pre-Columbian or Latin American cultures can meet the requirement. Core language courses do not meet this requirement while literature and culture courses may satisfy it. Moreover, such a course will not emphasize international relations or business relations vis-à-vis Europe or the United States. A study abroad experience may satisfy this requirement if it meets with the spirit and letter of this mission statement.

Notes

• Most core courses are taken within the first two years at Fairfield University. However, precisely when students should take various core courses depends, in part, upon their major. The faculty advisor will assist students in selecting a schedule that meets all core requirements. Normally, English (EN 0011 and EN 0012), mathematics, and modern and classical languages are included in the student’s first-year schedule.

• Students with majors in the Dolan School of Business are required to take specific courses as part of their core curriculum and may take two semesters of language at any level in fulfillment of the Area V language requirement. See the Dolan School of Business Core (p. 259) section for such course details.

• School of Engineering students are exempt from the Area V language requirement and can take EG 0130 Engineering Graphics I as one of the courses in fulfillment of the Area IV Visual and Performing Arts requirement. Engineering students also take EC 0011 Introduction to Microeconomics as one of their Area II Social and Behavioral Science electives and AE 0287 Engineering Ethics for their Area III Applied Ethics elective.

• Marion Peckham Egan School of Nursing students take specific courses as part of their core curriculum and are required to complete either the visual and performing arts or the modern language requirement.

Major

The major is central to a student’s program of study at Fairfield University. It represents an area of specialization consisting of a cluster of related courses drawn from a single department, more than one department, or an interdisciplinary program. Normally, a student must pursue a minimum of 30 credit hours of coursework to complete a major. The course requirements for each major offered by the College of Arts and Sciences are set forth within each departmental section of this catalog; information on individually designed majors is also in this section. Likewise, the requirements for majors within the Dolan School of Business, the Egan School of Nursing, and the School of Engineering are found in those sections of this catalog. In all cases, the selection of courses for a particular major must be done in consultation with a faculty advisor from one’s major department or school. In each college or school, the proper work of the major is concentrated in the junior and senior years; where preparatory courses are needed, they are taken in the freshman and/or sophomore year. Majors are usually selected at the end of the freshman year or during the sophomore year. Students declare majors by going to the office of the dean of the appropriate college or school. When a major is declared, the student is assigned a faculty advisor from the major area. To change from one major to another in one’s school requires completion of a Change of Major form. The Change of Major form can be obtained from the office of the dean of the student’s current school. The form must be signed by the chairperson/coordinator of the major in which the student is currently enrolled, the chairperson/coordinator of the major that the student desires, and the dean of the school. The form is then forwarded to the University Registrar.

Second Major (Double Major)

A student has the option of pursuing a second major at Fairfield University. The courses that constitute a second major must meet the stated requirements for a major program and must be approved by the department or interdisciplinary program in which the second major is located. Students declare second majors by completing a Double Major form that is available in the dean’s office of their school. A double major does not constitute a double degree.

Minor

In addition to carrying a major, a student may exercise the option of selecting a minor outside the area of specialization. A minor is a cluster of thematically related courses drawn from one or more departments, usually in the range of 15 to 18 credits. Students electing a minor are still required to fulfill the core requirement. In addition to department-based minors, many interdisciplinary minors are also available at Fairfield: American Studies; Applied Ethics; Asian Studies; Black Studies; Catholic Studies; Classical Studies; Environmental Studies; Health Studies; Humanitarian Action; International Studies; Irish Studies; Islamic World Studies; Italian Studies; Judaic Studies; Latin American and Caribbean Studies; Peace and Justice Studies; Russian, East European, and Central Asian Studies; and Women, Gender, and Sexuality Studies.

Because the minor is considered to be a supplement to the student’s major program of study, its completion in a given case may not have the same priority as that of a major. In order to select a minor, a student
must submit a request and gain approval by the Chair or Program Director of the prospective minor no later than the Spring registration period of the student's junior year. The completion of a minor is subject to the availability of the courses selected.

Electives

All students in BA and BS programs should have a minimum number of free electives. These electives may be chosen in any area of study, presuming prerequisites are met, and cannot be determined or required by any department or school. These electives may, of course, be part of a student's minor or second major. All students in BA programs must have a minimum of eight free electives; students in BS programs must have a minimum of four free electives, except in the Egan School of Nursing, where two are required.

University Honors Program

The Honors Program at Fairfield University is an interdisciplinary course of study open to invited freshmen and sophomores from all of the University's undergraduate schools. Since the program offers a curriculum of team-taught courses and small seminars, it is highly selective. Students who pursue Honors study at Fairfield are highly motivated, passionate about learning, and willing to engage their professors and fellow students in lively discussions about the great ideas that have shaped our culture and world cultures. Honors students at Fairfield also are invited to attend intellectual and cultural events outside the classroom such as Broadway plays, guided museum tours, operas, and faculty-led colloquia on a variety of topics. Though students from all schools participate in the Program, a detailed description can be found under the Honors Program (p. 149) section.

Cornerstone Courses

The Cornerstone Program accelerates and intensifies the academic engagement of undergraduate first year students into the living and learning community of Fairfield University. The Cornerstone Program is designed to increase academic engagement for first year students by promoting active and collaborative learning with peers and greater interaction with faculty in the first semester of college. Through foundational core and major courses, the Cornerstone Program intensifies the intellectual experience, impacts positively students’ academic success and retention, and promotes campus community based on academics. Cornerstone courses promote faculty and student interaction around scholarly and creative inquiry, foster active and collaborative learning, and connect students to enriching educational experiences across the curriculum.

Independent Studies

The independent study option is available in most departments to students who wish to examine a subject in depth for which no course is available. Such guided studies are designed and pursued by students under the tutelage of a faculty member. This option is restricted to students in their junior and/or senior years of study.

Students should apply to the professor under whose direction they wish to study no later than the normal registration period of the preceding semester. The Independent Study Application form, available from the office of the college dean, must be completed and filed with the Registrar before the project may begin.

For projects of less than a semester's equivalent course work, one or two credit hours may be assigned. For projects of a semester's equivalent coursework, three credit hours, or, with a laboratory component, four credit hours may be assigned.

If students undertake more than one independent study project during their college careers, the total credit hours for all projects may not exceed nine credit hours toward the undergraduate degree.

Student Internships

Students at Fairfield University have an opportunity to earn academic credit and gain practical, on-site work experience by pursuing internships in their major fields of study. Through placements in appropriate businesses, corporations, laboratories, law firms, government offices and agencies, nonprofit organizations, etc. students apply and test principles and theories they have acquired in their coursework. In a typical internship carrying three semester credits, students work 10 to 15 hours per week on site. Internships are coordinated by Fairfield University faculty and on-site supervisors. Through such experiences students can enhance their learning and explore potential careers. Upon graduation, students are frequently offered positions with corporations and agencies sponsoring their internships.

Internships are available on the University's job and internship platform, Stags4Hire. Stags4Hire offers opportunities for undergraduate students, graduate students, and alumni of the University. Internships may be secured through Stags4Hire or independent networking and may be undertaken for credit, for pay, or for both credit and pay. When pursuing an internship for academic credit, students must be in good academic standing and must meet all prerequisites prescribed by the major department (e.g. GPA, prior coursework). To register for an internship, a student must obtain prior approval from the faculty member who coordinates the internship program in his/her major department.

A maximum of six academic credits can be earned for internship experience. An internship will not substitute for any other stated course(s) in the student's major field. Further information about specific internship opportunities can be obtained from the departmental chair or the internship coordinator of the specific department.

Options for Graduate Level Courses

Fairfield University undergraduates with permission from their faculty advisor and from the Dean of the school in which the course is offered may take a graduate course for undergraduate credit and as part of their undergraduate load, appearing on their undergraduate transcript. A student may later petition to have those courses provide advanced standing in their graduate program and it would be up to the faculty to determine if the credits should apply to the graduate program at that time. Students might receive credit for these courses as part of a graduate program if the student did not apply the credits to complete the undergraduate degree.

An undergraduate student who has advanced beyond degree requirements and also has permission from the Dean of the school in which the course is offered may take a graduate level course for graduate credit as part of their regular undergraduate load. The number of graduate courses a full time undergraduate may take is limited to two. The five year pre-structured programs follow their own required sequence.

Registration for graduate courses is on a space available basis, with preference given to graduate students. Undergraduates with permission to enroll in a graduate course may petition to register in late August for the fall and early January for the spring.
Fifth-Year Master's Programs
Fairfield offers several dual or integrated degree programs for undergraduate students who are interested in studying toward a master's degree while an undergraduate, with an additional year at Fairfield for continued graduate coursework after the student has completed their bachelor's degree. Interested students should discuss and determine coursework options with their academic advisor during their sophomore year so that the required admission process and course selection can begin. More detailed information can be found on specific 5th Year Programs in the school sections of this undergraduate course catalog.

College of Arts and Sciences and the Graduate School of Education and Allied Professions (Fifth-Year Programs in Partnership)
More details about these programs may be found in the College of Arts and Sciences section of this catalog.

- Five-Year Integrated Bachelor and Master of Arts in Elementary Education with Initial Certification (p. 105)
- Five-Year Integrated Bachelor and Master of Arts in Secondary Education with Initial Certification (p. 106)
- Five-Year Integrated Bachelor and Master of Arts in Industrial/Organizational Psychology (p. 204)

School of Engineering
More details about these programs may be found in the School of Engineering section of this catalog.

- Electrical and Computer Engineering Five-Year Dual-Degree Program (p. 312)
- Management of Technology Five-Year Dual-Degree Program (p. 314)
- Mechanical Engineering Five-Year Dual-Degree Program (p. 320)
- Software Engineering Five-Year Dual-Degree Program (p. 306)

One-Year Master's Programs
Undergraduate students in the Dolan School of Business who excel academically are strongly urged to consider applying to one of the school's graduate programs in business (MBA, MS in Accounting, Business Analytics, or Finance). Beginning the application process and sitting for the standardized entrance exam (GMAT or GRE) can occur as early as the summer prior to the start of one's senior year of undergraduate study. If accepted, and contingent on first completing one's undergraduate degree, a student can begin the Master's program immediately after Commencement in the summer (MBA, MS Accounting) or in the following fall (MS Finance).

- MBA degree: Students who excel in their undergraduate business core courses may be able to finish the MBA degree on a full-time basis in one year. The MBA provides both a greater breadth of knowledge in key business disciplines, as well as advanced studies in at least one area of concentration.
- MS in Accounting: This one year, full-time cohort program begins each summer, at the end of May and concludes at the end of the following spring semester. One of the major benefits of the program is the opportunity for the student to amass additional course credits in order to be “150 ready” for public accounting positions.
- MS in Finance: This highly specialized program of study can be completed on a full-time basis in one year, beginning each fall semester. Students seeking both advanced theory and practical applications/skill sets within the field of finance are strongly encouraged to consider this degree.

Students interested in any of these programs are encouraged to make an appointment with the Associate Dean and Director of DSB Graduate programs (x2843).

Scholastic Honors

Dean's List
To qualify for the Dean's List at the conclusion of each semester's work, a student must have completed a minimum of 12 credit hours, have no outstanding or incomplete grades for that semester, and have attained a semester grade point average of 3.50 or better.

Graduation with Honors
Honors at graduation are awarded for the following weighted grade point averages computed on four years' work:

<table>
<thead>
<tr>
<th>Honor</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summa Cum Laude</td>
<td>3.85</td>
</tr>
<tr>
<td>Magna Cum Laude</td>
<td>3.70</td>
</tr>
<tr>
<td>Cum Laude</td>
<td>3.50</td>
</tr>
</tbody>
</table>

Alpha Sigma Nu
Alpha Sigma Nu, the national Jesuit honor society, serves to reward and encourage scholarship, loyalty, and service to the ideals of Jesuit higher education. To be nominated for membership, undergraduate students must have scholastic rank in the top 15 percent of their class, demonstrate a proven concern for others through involvement in extracurricular activities and service to the University, and manifest a true concern and commitment to the values and goals of the society. The Fairfield chapter was reactivated in 1981 and includes outstanding seniors who are encouraged to reflect scholarship, promote service to the University, and provide greater understanding of the Jesuit ideals of education within the University community.

Beta Gamma Sigma
Beta Gamma Sigma is an international honor society recognizing the outstanding academic achievements of students enrolled in collegiate business programs accredited by AACSB International - The Association to Advance Collegiate Schools of Business. With more than 440,000 members worldwide, the Society's membership comprises the brightest and best of the world's business leaders. At Fairfield University, the top 7 percent of juniors, the top 10 percent of seniors, and the top 20 percent of graduate students are eligible for membership in the University's Beta Gamma Sigma chapter, which was established in 1998. Each spring, an induction ceremony is held at the Charles F. Dolan School of Business to welcome new members into the Society.

Phi Beta Kappa
Phi Beta Kappa is the oldest and most widely recognized national academic honor society in the United States. Founded in 1776 at the College of William and Mary in Virginia, the society's aim is to encourage academic excellence in the broad range of the liberal arts. Membership is restricted to students who complete most of their coursework in the liberal studies curriculum; typically those are students who pursue B.A. or B.S. degrees in the College of Arts and Sciences. Fairfield's Zeta Chapter of Phi Beta Kappa was established in 1995. Each spring it installs new members from among the most academically talented upper-class students. Election to this chapter is based on scholastic standing and academic accomplishments and is limited to seniors and a highly select group of juniors.
Sigma Theta Tau

Sigma Theta Tau was founded by innovative thinkers who looked forward to a profession that recognizes and uses knowledge and learning to lead in service to others. Founded in 1922 by six students of nursing at Indiana University in the United States, the honor society began with one chapter and six members. During the past 85 years, it has evolved to more than 480 chapters across the globe, with more than 125,000 active members. As one of the most distinctive organizations in professional nursing, the honor society influences and changes the health of people by engaging the intellectual capital of nurses around the globe. By developing and building connections with diverse people and entities, we enable nurses to collectively and individually develop, create, use and apply their knowledge to make a difference for the greater good of people’s well being.

Other National Honor Societies

Discipline-based national and international honor societies with chapters at Fairfield University include:

- Alpha Epsilon Delta - pre-medical
- Alpha Kappa Delta - sociology
- Alpha Mu Gamma - foreign languages
- Alpha Sigma Lambda - adult higher education
- Beta Alpha Psi - financial information
- Chi Sigma Iota - counseling, academic and professional (international)
- Lambda Pi Eta - communication
- Omicron Delta Epsilon - economics
- Phi Alpha Theta - history (international)
- Pi Mu Epsilon - mathematics
- Pi Sigma Alpha - politics
- Psi Chi - psychology
- Sigma Iota Rho - international studies
- Sigma Pi Sigma - physics
- Sigma Tau Delta - English (international)
- Sigma Tau Theta - nursing
- Sigma Xi, The Scientific Research Society - scientists and engineers (international)
- Theta Alpha Kappa - religious studies
STUDY ABROAD

An international experience is an invaluable part of a complete undergraduate education. Fairfield offers exceptional learning opportunities for students beyond the classroom including semester abroad, faculty-led programs, internships, community volunteer work, academic excursions, and events that make their abroad experience enjoyable and meaningful. The Fairfield University Office of Study Abroad assists students in navigating the wide array of international study choices. Students in every major have the opportunity to find a program that complements their academic studies and provides a life-changing experience. Visit the Study Abroad website (http://www.fairfield.edu/studyabroad) for more detailed information.

All students considering an international experience are strongly encouraged to plan ahead to maximize program opportunities and to ensure optimal match of major, minor, previous language studies and intended destination. To ensure an optimal experience students need to discuss their program with both the academic department of their major as well as the Office of Study Abroad. Information sessions on Study Abroad are provided across the campus throughout the year including the Study Abroad Fair each September.

All students must apply through the Office of Study Abroad for approval to study abroad. All applications will be considered, but students may not always receive acceptance for their desired program. Students must meet the admission requirements of both Fairfield and the selected program. Study abroad is intended to build upon and enhance majors and minors. For this reason, program choices will be carefully reviewed with each student to ensure a good fit between academics and destination. Students are encouraged to be flexible about when and where they will study abroad.

Admissions decisions are made in collaboration with the partner institution and are based on a variety of factors the first of which is academic compatibility. In addition, a student must be in good standing with the Dean of Students at the time of application and maintain that status from acceptance through program completion. Students with unresolved conduct issues may not be approved for study abroad, such applications will be considered on a case by case basis. An overall GPA of 2.8 is required to study abroad for all programs, including short-term and summer. Certain programs have their own criteria and may require higher a GPA. Students studying in a non-English speaking country for a semester or year must take one course on local language and culture while abroad. Students with advanced language skills may choose to take a content course taught in the local language to satisfy the language and culture course requirement.

Students who study abroad through Fairfield University on an approved program for a semester or year are charged regular Fairfield tuition. Housing and meal charges will vary by location. All Fairfield scholarships and aid, including federal funds, may be used towards study abroad expenses for one semester with the exceptions of athletic scholarships, tuition remission, FACHEX, tuition exchange, and work-study monies. With the approval of the Director of Study Abroad, students who major in Modern Languages, International Business, or International Studies may use Fairfield University financial aid for two semesters abroad for select programs.

Credits for studying abroad will only be granted for academic work successfully completed at approved international programs. All coursework must receive pre-approval (coordinated through the Office of Study Abroad). Only pre-approved courses, taken at an approved program location, will be transcripted and accepted into a student’s curriculum.

Fairfield University administers its own programs (https://fairfield.studyabroad.com/index.cfm?FuseAction=Programs.FeaturedPrograms) in Florence, Italy; Galway, Ireland; London, England; Managua, Nicaragua; Aix-en-Provence, France; Brisbane and Sydney, Australia; and Madrid, Spain. All academic coursework completed at a Fairfield University-administered program is considered Fairfield University resident credit, and the grades are calculated into the student’s grade point average.

The University also has a variety of affiliated programs throughout the world including Europe, Asia, Africa, and Latin America through other Jesuit universities and organizations such as Council on International Educational Exchange (CIEE), College Year in Athens (CYA), and School for Field Studies (SFS). Not every program in every location is approved for Fairfield University students; please consult with a study abroad advisor or visit the study abroad website for the list of approved programs. In addition to affiliated programs, the University also has numerous exchange offerings in locations such as South Korea, the Netherlands, Spain, Ireland, Australia, Japan, and Brazil. Students participating in affiliated or exchange programs earn transfer credit (with pre-approval of coursework), meaning that grades earned will not appear on your Fairfield transcripts. Students must earn a C or better for credit to transfer.

In addition, Fairfield faculty members conduct short-term study abroad programs during Winter Intersession, spring break, and summer. Prior programs have been conducted in English literature in Ireland, art history in Florence, language studies in Russia, area studies in Nicaragua, and many more. These programs carry credit in various disciplines and can be used for core or major or minor requirements. Short-term programs change each year; please consult with a study abroad advisor (studyabroad@fairfield.edu) or visit the study abroad website (http://www.fairfield.edu/studyabroad) for current offerings.

While studying abroad, Fairfield University academic and student conduct policies remain in effect. Participants are expected to follow and adhere to these policies as enumerated in the Undergraduate Catalog and Student Handbook. From time to time deviations from these published documents may be required due to differences in law, practice or custom abroad. Students are also required to adhere to all local laws. Students who violate the code of conduct while abroad will be required to meet with staff from the Dean of Students Office by phone or Skype to address the violation. Infractions will become part of their student record and serious violations may result in the dismissal of the student from the program. If a student is dismissed due to code of conduct violations no credit or transcript will be awarded and no program fees will be refunded.

For academic grievances, the normal procedure for informal resolution as specified in the catalog is modified as follows. Students must first file a written appeal with the instructor, followed by a written appeal to the program if the first level appeal does not resolve the matter. If the second step also fails to resolve the matter, students have the option of filing a third step grievance through the Director of Study Abroad. After conversation with the instructor of record and/or program, the Director will inform the student whether or not the grade shall be changed by the instructor of record. If the student is dissatisfied with the outcome, the Director will inform the student of the right to initiate formal review procedures. However, if the overseas institution does not offer an appeal
process, or does not provide a response to the appeal, participants will be unable to file a formal grievance of their grades.

Withdrawal from a study abroad program after the start date must be done with approval from Fairfield University. Early withdrawal from any program could cause the student to forfeit all courses, grades, transcripts, and program fees. If a student requests a withdrawal for medical reasons the medical reason must be verified by our medical insurance provider prior to departure from the program for support and benefits to apply. If the student does not comply with the medical verification and withdraws from the program without approval, no credit or transcript will be awarded and no program fees will be refunded. If a student requests a withdrawal for personal reasons Fairfield University will require verification and may request additional documentation in order to approve the withdrawal. If a student does not comply with the request for verification and withdraws from the program without approval, no credit or transcript will be awarded and no program fees will be refunded.

Fairfield University is not required to approve withdrawal requests. If Fairfield University authorizes a withdrawal, a meeting will be required of the student upon their return to the States to discuss whether or not any course work is recoverable and how to proceed. Fairfield University cannot guarantee the completion of all courses interrupted by an early return. All requests will be handled on a case by case basis. Approval of withdrawal does not imply or guarantee that any courses, grades, or transcripts will be awarded or that any program fees will be refunded.

Planning ahead is essential to ensure a successful experience. Fairfield has programs for students at all academic levels. For First Year Students: it’s not too early to consider destinations and start planning. Talk with your academic advisor about study abroad so you can take appropriate courses both here at Fairfield University and your destination. Be sure to attend the Study Abroad Fair in September, attend information sessions, and meet with a Study Abroad Advisor to get information about the application process and the steps required before your departure. Learn about your options and discuss them with your academic advisor, faculty, and family. For fall/spring/summer programs check the study abroad website for application deadlines and requirements. For Juniors: you may study abroad during the fall of your Senior year at Fairfield programs for which grades as well as credits are recorded. To learn more about all our semester, summer, spring break and intersession programs, consult with a study abroad advisor or visit the study abroad website for the current offerings.

Study Abroad through Fairfield University: We create pathways that reflect well on your major course of study. We encourage you to consider the many choices Fairfield offers to spend a semester, a year, a month, or just ten days abroad earning academic credit and gaining the kind of knowledge only an international experience can provide.
TUITION, FEES, AND FINANCIAL AID

Application Fee (non-refundable) $60

Full-Time Undergraduates
Tuition (12 to 20 credits per semester) $47,650 per year
General Fee $700 per year

Tuition is payable on or before August 1 for the fall semester and January 1 for the spring semester. A tuition acceptance deposit (non-refundable and credited toward the fall semester’s tuition) of $200 is paid upon acceptance of the notice of admission.

Resident Student Fees
Residence Halls and Meals $14,710
Townhouse (Room Only) $12,330
Apartment Complex (Room Only) $12,330
Room Deposit $400

1 Payable on or before August 1 for the fall semester and January 1 for the spring semester.
2 Not refundable if reservation is voluntarily canceled. Credited when graduating or leaving the school or University housing.

Part-Time Undergraduates
Matriculation Fee $60
Summer Session & Intersession Terms $725 per credit
Tuition (less than 12 credits) (Fall & Spring) $725 per credit
Tuition (12 credits or more) (Fall & Spring) $23,825 per semester
Tuition (Full-Time Undergraduates going Part-Time) $1,750 per credit
Tuition (Adult Nursing, RN to BSN) $675 per credit
Tuition (Second Degree Nursing) $775 per credit
Registration Fee $35 per semester

Special Fees
Orientation Fee (First Year Students) $300
Orientation Fee (Transfer Students) $125
Engineering Lab Fee $80 per course
Finance Lab Fee (FI 0101) $110 per course
Science Laboratory Fee $60 per course
Studio Arts Materials Fee $60 or $110 per course
Extra Course (above 20 credits for FT Undergrads) $1,750 per credit
Automobile Registration Fee $150
Returned Check Fee $30

Graduation Fee $175
Academic Transcript $5

Nursing Student Costs
Nursing Lab and Clinical Fee $110 per semester
ATI Testing Fee $115 per semester
Castle Branch (one-time fee for background check and health document manager) Approximately $100

Transportation to clinical experiences and parking fees are the responsibility of the student.

The Trustees of the University reserve the right to change tuition rates and to make additional charges whenever they believe it to be necessary.

The University reserves the right to charge a late fee on amounts past due 30 days or more. The late fee is 2% per semester with a minimum of $100 per semester.

International students who are admitted must make known to the University the source of their financial support for their college education. They will be expected to make a deposit before a certificate of eligibility (I-20) is issued.

The University makes available a monthly payment plan as well as federal and private loan programs. Information on the payment plan and the loan programs are available to all students. Please contact the Office of the Bursar for additional information.

No degree will be conferred and no transcripts will be issued until all financial obligations to the University have been met.

Refund Policy

Refunds, as the result of official withdrawal through the University Registrar’s Office, will be made according to the following schedule for full-time students. General and special fees are not refundable.

<table>
<thead>
<tr>
<th>Official Withdrawal Date</th>

Refunds take two to three weeks to process.

Financial Aid

Financial Aid Policy

Fairfield University administers a comprehensive financial aid program offering assistance on the basis of need and merit, with funds derived from University, state and federal government, and private student aid programs. Need-based funds are distributed following a thorough analysis of a family’s ability to pay for educational expenses. The amount of need-based assistance provided to a student will vary from year to year depending on the student’s need and the availability of funds. Merit-based awards are offered to academically talented students as entering first year students and can be renewed for their remaining three years of enrollment if students meet the academic requirements.
Assistance funded by the University is credited toward tuition unless otherwise indicated. Renewal of any type of assistance is contingent on the recipient making satisfactory academic progress and on filing the Free Application for Federal Student Aid (FAFSA) and CSS Profile applications on time every year.

Students who demonstrate need will receive a financial aid package that may consist of grants, scholarships, student employment, and student loans. Although the University invests a significant amount of its own resources in its student aid programs, funds are limited; it is usually not possible to meet a student’s full need. In the instances when a family needs additional resources, the University will recommend a payment plan and loan options. Financial aid awards are usually offered to prospective first year students during March, assuming the appropriate applications have been filed on time. Returning students who apply for financial aid will receive their award notifications in mid-May through University email and in their my.Fairfield account. Financial Aid administrators are available throughout the year to answer questions and to provide assistance. The Office of Financial Aid is located at the Kelley Center and the staff can be reached at 203-254-4125 or finaid@fairfield.edu.

Application Procedures
To apply for financial aid, all undergraduate students must complete the Free Application for Federal Student Aid (FAFSA) and the CSS Profile Form on an annual basis; forms must be submitted to the respective processing centers by University deadlines. The Noncustodial Parent Profile, in some instances, may also be required. Prospective first-year students are required to complete the FAFSA, CSS Profile, and the Noncustodial Parent Profile by January 15; Early Action and Early Decision I candidates must complete the FAFSA, CSS Profile, and Noncustodial Parent Profile by December 1 and Early Decision II candidates must complete the FAFSA, CSS Profile, and Noncustodial Parent Profile by January 15.

Returning students must apply by April 15 and Transfer students must apply by June 1 for fall semester and December 1 for Spring semester.

Students may file the FAFSA (http://fafsa.ed.gov) and CSS Profile (http://www.collegeboard.org) online. Fairfield’s FAFSA code is 001385 and the CSS Profile code is 3390. By accepting any financial aid, you obligate yourself to verify the application information if selected for verification by either the federal processing center or the Office of Financial Aid. Financial aid awards are estimated until the Office of Financial Aid confirms eligibility. If a student is selected for the verification process, the Office of Financial Aid will provide notification of the required documentation in order to complete the file review and confirm aid eligibility. Documentation required for verification is due no later than August 1. Financial aid awards may change based on verification results. Failure to comply with verification requirements in a timely manner will result in cancellation of need-based aid.

Returning student financial aid applicants that feel as though completing a subsequent CSS Profile form presents a financial hardship, may request a CSS Profile form waiver from the Office of Financial Aid by writing or emailing the Office of Financial Aid by April 15 to request such a form waiver. CSS Profile form waivers are granted at the discretion of the Office of Financial Aid.

Part time matriculated students may apply for federal financial aid by completing the Free Application for Federal Student Aid (FAFSA). While there is no published deadline by which to apply, it is recommended that the FAFSA be submitted for processing and review at least six weeks prior to the start of the semester for which you will be enrolling.

Renewal of Financial Aid Awards
Need-based awards of University grants and scholarships will be renewed provided that the recipient reappears for aid by University deadlines, continues to demonstrate sufficient need and maintains satisfactory academic progress standards. Need-based awards may be adjusted depending on changes in a student’s need. Renewal of state and federal award funds will depend on a student’s continued eligibility and on the availability of funds. Merit-based awards will be renewed at the same amount received as in the first year as long as the required minimum grade point average is earned for renewal.

Financial Aid Disbursements
Federal and university financial aid disburse on Mondays and Wednesdays of every month with some exceptions. Financial aid does not disburse on scheduled University holidays. Federal loans do not disburse during the monthly reconciliation period from approximately the 25th of each month and the first Monday after the first Saturday of the next month. Final disbursement days and financial aid processing days for each semester are published on the academic calendar each year.

Standards for Satisfactory Academic Progress
For students to be eligible for federal, state or university need-based financial aid, they must be in good academic standing and must make Satisfactory Academic Progress (SAP) toward a degree. SAP is measured at the end of each academic year and is based on both pace of enrollment and academic performance at the time of measurement. Pace is determined by the total number of credit hours completed as a proportion of those attempted. Incomplete grades, repeated courses and course withdrawals that occur after the drop/add period are counted in the credit hours attempted. If the student has transfer credits, the credit hours are counted in both the credit hours completed and attempted.

Academic performance is measured by GPA including grades earned only in Fairfield University courses. In order to make SAP, students advancing from the first year to the sophomore year are expected to have a weighted cumulative GPA of 1.90 or better. At the end of the sophomore year, students are expected to have a weighted cumulative GPA of 1.90 or better. At the end of junior year, students should have an weighted cumulative GPA of 2.0 or better. For the purposes of both pace and academic performance, summer courses will be included as the trailing term of the academic year.

Pace of enrollment is measured by the percentage of attempted credit hours that are completed. Students must complete at least 67% of the credit hours attempted in a year in order to receive financial aid in the following year. Overall, students are eligible for university-based aid for up to eight semesters of enrollment; students may receive federal financial aid up to 150% (typically 6 years) of the normal time to degree completion. Repeated courses will be counted as part of the attempted and completed courses, and part of the 150% of normal time to completion.

Students who lose eligibility for financial aid as a result of failure to make satisfactory academic progress may appeal to be placed on financial aid probation. This appeal must include the reasons for the lack of progress and the student’s anticipated steps for improvement. In order to consider the appeal, the student will need to submit an
approved academic plan that will lead to achievement of SAP standards. 
If during the probation period the student has not successfully achieved 
satisfactory academic progress, the student may appeal with a modified 
academic plan. Probation may last for up to one academic year, unless 
there are extraordinary circumstances. While on probation, a student’s 
progress will be monitored at the end of each semester.

**Notification**
The Office of Financial Aid will notify all students who fail to maintain 
satisfactory academic progress. Students will be notified of their SAP 
status by mail and university email.

**Reinstatement of Financial Aid**
To have financial aid eligibility reinstated, a student may make up the 
credit hour and/or grade point index deficiencies in a subsequent term 
without receipt of financial aid for that term. University aid is only offered 
(if the student maintains eligibility) for eight consecutive 
semesters.

**Appeal Process**
A student who believes his/her failure to meet SAP standards was due to 
exigent circumstances beyond his/her control may appeal in writing to 
the Appeals Committee. Some examples of exigent circumstances are:

- A student’s serious illness or accident
- Death or serious illness in the student’s immediate family
- Cancellation/discontinuation of a class by the University
- Other unforeseeable circumstances beyond the control of the student 
  that caused the student to fall below the satisfactory progress 
  standards

Students should submit the SAP Appeal Form (https://www.fairfield.edu/
media/fairfielduniversitywebsite/documents/admission/
fa_sap_appeal.pdf), including a personal letter, explaining the reason for 
the request and reason for their current academic status. In addition, an 
approved Academic Plan must be completed by the student and by an 
administrator from the appropriate Dean’s Office. The Academic Plan 
(http://www.fairfield.edu/media/fairfielduniversitywebsite/documents/
accommodation/academic_plan.pdf) can be obtained in the Dean’s 
Office of any school, or printed online. The appeal form, personal letter, 
Academic Plan, and any other supporting documentation (if desired), 
.must be submitted to the student’s financial aid counselor (http://

If an appeal for one semester of probationary financial aid is approved, 
a student’s progress will be monitored at the end of each semester. If 
after the financial aid probation period the student has not successfully 
achieved the required minimum GPA for reinstatement of the full financial 
aid award, the student may submit an appeal letter to request an 
extended probationary period of financial aid. Financial aid probation may 
last for up to one year, unless there are extraordinary circumstances.

Appeals must be submitted to the Office of Financial Aid by July 1, or 
by other stated deadlines as provided by the Office of Financial Aid. If 
reinstatement of aid is sought for summer sessions, the appeal must 
be submitted prior to the first day of classes for that term. It is the 
responsibility of the student to initiate an appeal before a specified SAP 
Appeal deadline.

**Estimate of Expenses**
The student cost of attendance used in determining financial aid 
eligibility includes direct charges from the University as well as other 
expenses incurred by a student during the course of the academic year. 
The cost of attendance for a full time resident student, for the 2017-18 
academic year, is as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>

**Academic Withdrawal**
Those who are asked to withdraw from the University for academic failure 
will lose entitlement to financial aid. Students who are later readmitted to 
the University may appeal for reinstatement of some financial aid, but aid 
is not automatically reinstated. Students’ satisfactory academic progress 
(SAP) status will be reviewed if a student is reinstated to the University. 
Students may be asked to complete the SAP appeal process as part of 
the re-determination of financial aid eligibility.

**University Merit or Need-Based Aid Policy for Withdrawals**
Students are approved for voluntary or medical withdrawal by taking 
the appropriate steps as prescribed in the Academic Policies section of 
this catalog. Students that are receiving University financial aid will have 
their University need-based and merit-based aid prorated based on the 
following schedule:

<table>
<thead>
<tr>
<th>Official Withdrawal Date</th>
<th>% of University Aid Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before first scheduled class</td>
<td>0</td>
</tr>
<tr>
<td>Before second scheduled class</td>
<td>40</td>
</tr>
<tr>
<td>Before third scheduled class</td>
<td>60</td>
</tr>
<tr>
<td>Before fourth scheduled class</td>
<td>80</td>
</tr>
<tr>
<td>After fourth scheduled class</td>
<td>100</td>
</tr>
</tbody>
</table>

Note: For courses meeting for less than a full semester (15 weeks), 
financial aid entitlement will be adjusted accordingly.

**Federal Return of Title IV Funds Policy**
The Financial Aid Office is required by federal statute to recalculate 
federal financial aid eligibility for students who withdraw, drop out, are 
dismissed, or take a leave of absence prior to completing 60 percent of 
a payment period or term. Federal Title IV financial aid programs must 
be recalculated in these situations. You must begin enrollment in the 
semester in order to be eligible for a federal student aid disbursement. 
Withdrawal before the semester start will result in cancellation of federal 
aid.

If a student leaves the institution prior to completing 60 percent of a 
payment period or term, the Financial Aid Office recalculates eligibility 
for Title IV funds. Recalculation is based on the percentage of earned aid 
using the following Federal Return of Title IV funds formula: percentage 
of payment period or term completed equals the number of days 
completed up to the withdrawal date, divided by the total days in the
If a student earned less aid than was disbursed, the institution would be required to return a portion of the funds, and the student would be required to return a portion of the funds. Keep in mind that when Title IV funds are returned, the student borrower may owe a debit balance to the institution. If a student earned more aid than was disbursed, the institution would owe the student (or parent in the case of a PLUS loan) a post-withdrawal disbursement which must be paid within 180 days of the student’s withdrawal. Students (or parents in the case of a PLUS loan) due a post-withdrawal disbursement will be emailed and mailed a notice to reply no later than 14 days of the notice to confirm or refuse the disbursement. No reply will indicate a refusal of the disbursement. The institution must return the amount of Title IV funds for which it is responsible no later than 45 days after the date of the determination of the date of the student’s withdrawal. Refunds are allocated in the following order:

1. Unsubsidized Direct Loans
2. Subsidized Direct Loans
3. Federal Perkins Loans
4. Federal Direct PLUS Loans
5. Federal Pell Grants for which a return of funds is required
6. Federal Supplemental Opportunity Grants for which a return of funds is required
7. Federal TEACH Grants for which a return of funds is required
8. Iraq and Afghanistan Service Grant for which a return of funds is required

**Example**

The Spring semester begins on January 16, 2018. Sarah Smith began the official withdrawal process with her dean and it was determined that her official withdrawal date would be March 7, 2018. The total number of days in the Spring semester are 107. Sarah completed 51 days of the semester or 47.7%. Sarah had a total federal aid disbursement of $4,357.00. Seeing that Sarah only completed 47.7% of the Spring semester, she also earned only 47.7% of her Spring financial aid ($4,357.00 x 47.7% = $2,078.29). The amount of Title IV aid to be returned is calculated:

$4357.00 - $2,078.29 = $2,278.71

Next, the institution must also determine the percentage of unearned charges based on the total semester charges for the period in which the student will withdraw. First, add the total semester charges. For this example, Sarah's total semester charges is $23,245.00. Sarah did not attend the full semester (100%). To determine the portion of the semester that Sarah attended, subtract her percentage completed from the total: 100% - 47.7% = 52.3%. To determine Sarah’s unearned charges, the school would calculate unearned charges in the following manner:

$23,245.00 x 52.3% = $12,157.14

Compare the amount of Title IV aid to be Returned above to the amount of unearned charges. The lesser amount is the total of unearned aid that the school is responsible to return. The amount returned is based on the amount disbursed (which may vary by students) and in accordance with the schedule above. If the amount returned in direct loans is less than the total amount in direct loans disbursed to the student, resulting in earned loan funds or in unearned loan funds that the school is not responsible for repaying or both, Fairfield University will notify the loan holder of your withdrawal and withdrawal date. The resulting loan must be repaid in accordance with the terms of the student’s promissory note. Fairfield University will return the loan funds within 45 days of notification from the University Registrar of a student’s withdrawal.

Students will be mailed a notice of withdrawal from the Office of Financial Aid which will include a copy of the student’s withdrawal calculation indicating the amount returned by Fairfield University and the amount that is the responsibility of the student.

**Reinstatement of Financial Aid Upon Readmission to the University**

Students who are later readmitted to the University may appeal for reinstatement of some financial aid, but aid is not automatically reinstated. A student’s satisfactory academic progress (SAP) status will be reviewed once the student is reinstated to the University. The student may be asked to complete the SAP appeal process as part of the re-determination of financial aid eligibility upon readmission to the University.

**Merit Scholarship**

All merit scholarships awarded by Fairfield University are renewable for eight consecutive semesters of study provided the recipient earns the required minimum GPA for renewal. The GPA renewal requirement, which varies by level of award, is included in the initial award letter provided at the time of the student’s admission to Fairfield and is measured at the end of each academic year.

Students who lose eligibility for merit scholarship as a result of failure to meet the minimum GPA requirement may appeal to be placed on merit scholarship probation. Students must submit the SAP Appeal Form (https://www.fairfield.edu/media/fairfielduniversitywebsite/documents/admission/fa_sap_appeal.pdf), including a personal letter, explaining the reason for the request and reason for their current academic status. The appeal form, personal letter, and any other supporting documentation (if desired), must be submitted to the student’s financial aid counselor (http://www.fairfield.edu/finaid) in the Office of Financial Aid.

If an appeal for probationary merit scholarship status is approved, a student will be permitted up to two (2) consecutive semesters after the status has been granted, to obtain the required cumulative GPA for renewal. The appeal form, personal letter, and any other supporting documentation (if desired), must be submitted to the student’s financial aid counselor (http://www.fairfield.edu/finaid) in the Office of Financial Aid.

If an appeal for reinstatement of financial aid upon readmission to the University is sought for summer sessions, the appeal must
be submitted prior to the first day of classes for that term. It is the responsibility of the student to initiate an appeal before a specified SAP Appeal deadline.

**Fairfield University Grant**

In addition to scholarships, a number of need-based grants are awarded by the University. Amount and availability of each grant is dependent upon the current status of revenues from which they are drawn. Demonstrated financial need, as well as academic performance and potential, are the criteria used in determining the awards. Fairfield University provided $76 million of its own resources in 2017-18 for financial aid. Most scholarships and University grants are offered with other types of federal or state aid. Students receiving University grants or scholarships are eligible to receive such assistance for eight consecutive semesters from the date of enrollment as a first year student. Semesters spent in a study abroad program (whether Fairfield or that of another institution) are included in the eight consecutive semester limit whether or not a student receives University aid during the semesters. The eight consecutive semester limit is pro-rated for transfer students.

**Federal Grants**

**Federal Pell Grant**

A federal entitlement program that provides grants of up to $6095 to eligible students in the 2018-19 academic year who are pursuing their first baccalaureate degree.

**Federal Supplemental Educational Opportunity Grant**

Grants from federal funds are made available to students who demonstrate exceptional financial need. Funding for the program is very limited. Priority is given to Federal Pell Grant recipients.

**State Scholarships and Grants**

All financial aid applicants should research the opportunities that exist in their home state for other scholarships or grants. Students should contact their state board or commission for higher education or consult their high school guidance counselor for information.

**Loan Programs**

**Federal Perkins Loan**

A campus-based federal loan program for students with exceptional need. Recipients are selected by the University. No payments of principal or interest are required until after the borrower completes his or her education, at which time repayment at 5% interest is assessed. Repayment may extend up to 10 years, depending on the amount borrowed. Funding for the program is very limited.

**Federal Nursing Loan**

A campus-based federal loan program for nursing majors with need. Recipients are selected by the University. No payments of principal or interest are required until after the borrower changes majors or completes his or her nursing degree, at which time repayment at 5% interest is assessed. Repayment may extend up to 10 years, depending on the amount borrowed. Funding for the program is very limited.

**Direct Loan**

Federal Direct Loans may be obtained online (http://studentloans.gov/myDirectLoan/index.action). Up to $5500 per academic year for first year students (max $3500 subsidized), $6500 per academic year for sophomore-level students (max $4500 subsidized), or $7500 per academic year for junior- and senior-level students (max $5500 subsidized) may be borrowed. Repayment begins six months after a student ceases to enroll at least half-time (six credits or more). Students must file a FAFSA before a Direct Loan can be processed. The FAFSA will determine if the student is eligible for a subsidized loan (the federal government pays interest while student is enrolled) or unsubsidized loan (student pays or allows interest to accrue while enrolled full-time). The interest rate for loans disbursed July 1, 2017 through June 30, 2018 is fixed at 4.45%. Interest rates on loans disbursed after July 1, 2018 have not been determined as of the date of publication of this catalog. The Direct Loan funds sent to the University on the student’s behalf will be reduced by an origination fee. The origination fee is determined by the Department of Education and is subject to change October 1 of each year. The current origination fee on loans disbursed prior to October 1, 2018 is 1.066%. The interest rate and origination fee both change annually. For current Direct Loan origination fees and interest rates, please visit the Direct Loans website (https://studentaid.ed.gov/sa).

**Direct PLUS Loan**

This is a loan program for parents of dependent undergraduate students. A parent may borrow up to the cost of education minus any financial aid received during any one academic year. Students must file a FAFSA for parents to be eligible to borrow a PLUS loan. Parents and students must meet general eligibility requirement and parents must pass a credit check to be eligible to borrow a PLUS loan. Parents can apply online (https://studentloans.gov/myDirectLoan/index.action). Repayment begins 60 days after disbursement of the loan. The interest rate for PLUS loans disbursed July 1, 2017 through June 30, 2018 is fixed at 7.00%. Interest rates on loans disbursed after July 1, 2018 have not been determined as of the date of publication of this catalog. The Direct PLUS Loan funds sent to the University on the student’s behalf will be reduced by an origination fee. The origination fee is determined by the Department of Education and is subject to change October 1 of each year. The current origination fee on PLUS loans disbursed prior to October 1, 2018 is 4.264%. Both the interest rate and origination fee changes annually. For current Direct PLUS Loan origination fees and interest rates, visit the Direct Loans website (https://studentaid.ed.gov/sa).

**Alternative Loans**

It is recommended that students borrow the maximum in Direct Loans before considering an alternative student loan. Direct Loans tend to be less expensive with fixed interest rates and provide various options for repayment. The Office of Financial Aid will certify any alternative loan at the request of any borrower, provided they are approved; however, it is the responsibility of the borrower to determine which alternative loan best fits their borrowing needs.

Alternative student loans are available to help students cover any financial gap that may exist between their educational costs (cost of attendance) and the amount of financial aid they are receiving. There are many types of alternative student loans, each are calculated with different interest rates and repayment terms, which vary, depending on the borrower and co-borrower's credit-worthiness. Fairfield University does not have a preferred lender list for alternative loans. Additional information may be found at our website (http://www.fairfield.edu/finaid). Students and families should research what alternative loan suits
their borrowing needs. Most, if not all, undergraduate students usually require a credit-worthy co-borrower in order to obtain the best interest rate(s) and benefits. If you need assistance with any loans, please email (finaid@fairfield.edu) the Office of Financial Aid or call 203-254-4125.

**Tuition Payment Plan**
The University offers a tuition payment plan, an interest-free, semester based payment plan for educational expenses. Please contact the Office of the Bursar for more information.

**Campus Employment**

**Federal Work Study Program**
Federal Work Study (FWS) may be offered to students who demonstrate financial need as determined by the FAFSA and university policy. Eligible students can seek employment on or off campus with participating offices and/or agencies. Whenever possible, students may also consider employment that relates to their field of study. For more information regarding Fairfield’s FWS program, visit our website (http://www.fairfield.edu/fws).

**University Employment**
Students who do not qualify for participation in the Federal Work-Study Program, but would like to work part-time to earn money for college expenses, may obtain employment in the cafeteria, the bookstore, and several other campus locations. It is recommended that students contact the offices/departments in which they are interested in working.

**Veterans**
Veterans may apply educational benefits to degree studies pursued at Fairfield University. Veterans should consult with the Office of Financial Aid regarding the process and eligibility for possible matching funds through Fairfield’s Veterans Pride Program. Information about the program, including free tuition for some veterans, is available on our website (https://www.fairfield.edu/veterans). The University Registrar’s Office will complete and submit the required certification form for all veteran benefits.

**Consumer Information**
Fairfield offers a Net Price Calculator, an additional resource to help students and their families estimate merit-based and need-based aid for which they may qualify for at Fairfield University. For access to the calculator and more information, visit our website (https://www.fairfield.edu/undergraduate/financial-aid-and-tuition/net-price-calculator).

**Scholarships**
Through the generosity of individuals, corporations, and foundations, a number of scholarships have been made available to students at the University. These gifts continue the rich tradition of philanthropy that characterizes American life, and it is through the donors’ generosity that Fairfield is able to offer these scholarships. The University is pleased to be a beneficiary of that tradition and commitment. Students applying for financial aid are considered automatically for the named scholarships listed here, which are administered by the Office of Financial Aid in accordance with the wishes of the donors.

For more information about financial aid at Fairfield University, please contact the Office of Financial Aid at 203-254-4125 or finaid@fairfield.edu. For more information about billing or tuition, please contact the Office of the Bursar, 203-254-4000, x2165, x4191, x4102, or x2410. Inquiries can also be sent to either office at Fairfield University, 1073 North Benson Road, Fairfield, CT 06824-5195.

**70s Women Reaching Out**
Established by Joellin Comerford ’74 in 2012 to provide financial aid to an undergraduate student with demonstrated financial need. Additional support was provided by alumnuae from the 1970s. Preference is given to economically disadvantaged young women from the inner cities of America.

**AJM Family Scholarship**
Established in 2013 by Andrew ’89 and Jennifer ’89 McMahon to provide financial aid for deserving students with financial need.

**Alumni Association Athletic Scholarship**
A scholarship established by the Fairfield University Alumni Association to provide financial aid to junior or senior student-athletes with demonstrated need who have made significant contributions to their teams.

**Alumni Multicultural Scholarship**
A fund established with the proceeds from the annual Alumni Association Awards Dinner to help meet financial needs of minority students.

**Michael R. Andrews ’89 Memorial Scholarship**
A scholarship established by several former teammates and classmates of Mike Andrews with the intention of providing financial aid to a student with demonstrated need. Mike’s passion and spirit will live on through those who receive this scholarship.

**Arthur Anderson Scholarship**
Established by the family of the late Dr. Arthur L. Anderson, a professor of Sociology and Anthropology, to honor his memory. The scholarship provides financial aid to an undergraduate student who intends to pursue a career that will promote cultural diversity in society.

**Margaret M. Atwell Scholarship**
A scholarship established through the generosity of Bill and Peggy Atwell P’08, this fund gives preference to a female student enrolled in the Charles F. Dolan School of Business who has demonstrated financial need.

**The Atwell Family Scholarship**
A scholarship established by Bill and Peggy Atwell P’08 in 2013 to provide financial assistance to deserving students from the Charles F. Dolan School of Business.

**The Beckwith Family Scholarship**
A scholarship established by Mark ’80 and Patti Beckwith to provide assistance to students with financial need.

**Mark Beckwith ’80 Scholarship**
An athletic scholarship established by Mark Beckwith ’80 for a men’s basketball student-athlete.

**Beiersdorf Nursing Scholarship**
Scholarships

An endowed scholarship established in 1986 by Beiersdorf, Inc., of Wilton, Conn., the fund assists chemistry majors and offers an internship opportunity.

**Carl and Dorothy Bennett Scholarship**

A fund established by Mr. and Mrs. Carl Bennett to provide annual scholarships for Fairfield University students on a financial need basis.

**Joseph F. ’72 and Gail T. Berardino Scholarship**

Established in 2001 by alumnus and University Trustee Joseph F. Berardino, this need-based scholarship assists students in the Charles F. Dolan School of Business.

**Barbara M. Berchem Memorial Scholarship**

An endowed award established in 1988 by Robert M. Berchem ’62, to honor the memory of his mother. This scholarship has a preference for a student from a single-parent family, is the first generation of his/her family to attend college, and comes from Milford, Conn.

**Charlie and Eileen Berner Scholarship**

Established anonymously in 2010 to honor John ’88 and Eileen ’88 Berner. This scholarship provides financial aid to undergraduate students.

**David and Eunice Bigelow Scholarship**

To be used toward financial aid for undergraduate students who have demonstrated financial need. Preference is that it is granted to a student who is matriculated in the School of Business, is community-minded, and possesses an entrepreneurial spirit.

**James W. and Jean L. Birkenstock Scholarship**

This scholarship has been made possible through the estate of James W. Birkenstock, former University trustee. Preference will be given to students who demonstrate financial need.

**John and Jane Bohnsack Scholarship**

A scholarship fund established in 1985, to be awarded on the basis of financial need and divided equally between a nursing student and a business student.

**Salvatore F. Bongiorno Scholarship**

Established in 1993 in memory of a long time University faculty member and former chair of the Biology Department, this scholarship assists minority biology majors in their junior or senior years who plan further studies and careers in the life sciences.

**Mr. and Mrs. Charles A. Bott Scholarship**

Established by Mrs. Charles A. Bott and the late Mr. Bott of Huntingdon Valley, Pa., the fund provides assistance to students with financial need.

**Bouchard Family Scholarship**

Awarded to students with financial need with a preference for students majoring in communication or any major within the Dolan School of Business.

**John V. Brennan Scholarships**

A gift from John V. Brennan, former president of U.S. Underwriters, Inc., and parent of Paul F. Brennan ’89, provides scholarships to assist minority students with financial need.

**The Richard J. Brennen, III, Endowed Scholarship**

Established by Mr. and Mrs. Richard J. Brennen, Jr. P’06 in honor of their son. The scholarship supports students with demonstrated financial need.

**Brewer Family Scholarship**

Established by Richard Brewer ’69 in 2011 to provide financial aid to undergraduate students with demonstrated financial need.

**Marina Holder Brewster Memorial Scholarship Fund**

Established by Dr. and Mrs. John P. Sachs to provide financial assistance with a preference for nursing students.

**Ned John Briggs ’69 Memorial Scholarship**

Established in 1989 by the estate of his mother, Kathryn V. Briggs, this endowed scholarship perpetuates the memory of Ned John Briggs, who attended Fairfield in 1965 and 1966. It is awarded on the basis of academic potential and financial need.

**Gladys Brooks Foundation Asian Studies Endowed Scholarship**

The Gladys Brooks Foundation Scholarship in Asian Studies, a one-year award, recognizes a student who has excelled academically in this program.

**Gladys Brooks Foundation Scholarship**

Created in 1986 to enhance Fairfield’s ability to attract students of the highest quality. Recipients will be asked to assume a “moral obligation” to support the University after graduation by voluntary service and/or contributions. Criteria for scholarship recipients include secondary school class rank, scholastic aptitude test scores, extracurricular activities, and leadership potential.

**Professor Frank F. Bukvic Scholarship**

Established in 1997, the scholarship honors the memory of Dr. Bukvic, who taught German and German literature in the University’s Modern Languages Department for 35 years. Preference is given to a student with a major or minor in modern languages.

**Sophie Burger and Pauline Hagen Scholarship**

An endowed scholarship made possible by the generosity of Carl E. Hagen ’65 through the Chipman Union Foundation to provide financial aid assistance with a preference for students in the Charles F. Dolan School of Business.

**The Burger King Scholarship**

An endowed scholarship established by The Burger King Corp. to provide financial assistance with a preference for minority students.

**Rev. Vincent Burns, S.J., Scholarship**

A scholarship established by the Kara Foundation in honor of Fr. Burns. Preference is given to students with a minor in religious studies or ethics.

**Guido Britt Scholarship**
This scholarship was established anonymously in 2010 to provide financial aid to an undergraduate student who may, unless helped financially, need to drop out due to financial hardship as a result of factors such as job loss for their parent(s), death of a parent(s), etc.

**Anna Cain Scholarship**
A fund to support students who demonstrate financial need and strong academic qualifications. Established in 1978, the scholarship is a bequest of the late Anna Cain, an area educator who took many advanced courses at Fairfield.

**Louis Calder Foundation Scholarship**
The Louis Calder Foundation Scholarship was established in 1988. The Foundation’s initial award was designed as a challenge grant that ultimately encourage various other donors to create scholarships in support of students with residency in one of New York’s five boroughs. Additionally, these young people must demonstrate academic promise and have significant financial need.

**Margaret and Marjorie Campbell Scholarship**
A scholarship established to provide financial assistance with a preference for a student whose life has been affected by alcohol or drugs.

**Jonathan Neff Cappello ’00 Scholarship**
This scholarship, in memory of Jonathan Cappello who died in the World Trade Center tragedy on Sept. 11, 2001, was established by his family and friends. Preference is given to graduates of Garden City High School in New York who have demonstrated need.

**The Carlos M. Cardoso ’81 Scholarship**
An athletic scholarship established by Carlos Cardoso ’81 for a men’s soccer student with a preference for an individual who is a minority or is from another under-represented population.

**Carlucci Family Scholarship**
A scholarship established by Joseph and Mary Carlucci P’10/09 to provide financial assistance to an undergraduate student with financial need.

**Donna Rosanne Carpenter-Sederquest Memorial Scholarship**
A need-based scholarship established by family members and friends in memory of Donna Carpenter-Sederquest, who attended Fairfield University. Preference is given to communication and English majors in the top 10 percent of their high school classes and who are graduates of Fairfield Warde High School, Fairfield Ludlowe High School, or reside in Fairfield County. The scholarship is dedicated to the perpetuation of the academic, professional, and personal excellence Donna so well embodied.

**Alex Rafael Carrion Banco Popular Scholarship**
Renamed in 2006 in memory of Fairfield student Alex Rafael Carrion, this scholarship was established in 2004 by Banco Popular to provide financial assistance with a preference for students from Puerto Rico.

**The Susan and Frank Carroll Family Scholarship**
Established by Frank ’89 and Susan Carroll in 2013 to provide financial aid to students with demonstrated financial need. Preference for a student who is not a resident of CT, NY, NJ, or MA.

**Carl and Margaret Cascella Scholarship**
Established by Roberto Cascella ’80, this fund is to be awarded with a preference for undergraduate or graduate engineering students.

**Celanese Corporation Minority Scholarship**
A fund created by Hoechst Celanese Corp. to provide financial assistance with a preference for minority students from New Jersey who are in the Charles F. Dolan School of Business.

**JP Morgan Chase Scholarship**
An endowed scholarship fund that assists students on the basis of need and academic promise. Current restrictions limit this award, which was established in response to a challenge grant from the Louis P. Calder Foundation, to New York City residents.

**The Chiluisa Family Scholarship**
This scholarship was established in 2013 by Jorge ’89, MBA’06, P’21, and Tori Chiluisa, P’21, to provide financial aid for deserving students of Hispanic ancestry with a preference for those majoring in math, the sciences, or in business.

**Ciacci-Pascale ’65 Scholarship**
A fund established in 1985 in memory of Douglas Ciacci and Joseph Pascale, outstanding members of the Class of 1965. Preference is given to Connecticut student-athletes who have financial need and best demonstrate drive, compassion, courage, and leadership. Principal benefactors include J. Jeffrey Campbell ’65 and the Pillsbury Co., in addition to members of the Class of 1965.

**Ciola Family Scholarship**
A need-based scholarship which provides financial aid with a preference for Catholic students with academic promise.

**Citytrust Scholarship**
An endowed scholarship established in 1985, by Citytrust Bank, to provide financial aid assistance to Fairfield University minority students.

**John A. and Edna Connaughton Scholarship**
An endowed scholarship established in 1986 in memory of Mr. and Mrs. Connaughton by Mrs. Connaughton’s daughter, Mrs. Charles A. Bott of Huntingdon Valley, Pa. Preference will be given to students with financial need.

**Connecticut Post Scholarship**
Established by the Post Publishing Co. of Bridgeport, Conn., to provide financial aid assistance with a preference for minority students.

**Isabelle Johnson Conine and Margaret Morris Lee Memorial Dolan School of Business Scholarship**
Established by Dr. and Mrs. Thomas Conine in honor of their mothers, this scholarship provides financial assistance to students from the Charles F. Dolan School of Business.
Dr. Robert F. Conti '51 Scholarship

An endowed scholarship established in 1994 to provide financial assistance with a preference for students in the pre-medical program.

E. Gerald Corrigan Endowed Scholarship

This fund, established by E. Gerald Corrigan '63, a former member of the Fairfield University Board of Trustees, provides assistance with a preference for first generation, minority, or foreign students in good academic standing.

David and Lori Cowen Scholarship

An endowed fund established by Mr. and Mrs. David Cowen to provide annual scholarships for Fairfield University students on the basis of financial need.

Anne K. and Hugh F. Coyle Scholarship

Established in 2013 by Hugh F. Coyle III '88, Jane Coyle Ballentine '86, Jennifer A. Coyle, and Maryanne Coyle Andrews '93 in honor of their parents' commitment to education. The scholarship provides financial aid for students with demonstrated financial need. The recipient must also display high academic achievement, good character and diverse interests. Initial preference is for students from the greater Baltimore, MD or Washington, DC geographic regions. Special consideration is to be given to students who participate in Women's or Men's Lacrosse Club programs and meet all other criteria.

Arsene Croteau Family Scholarship

Provides financial assistance with a preference for a student majoring in French. The late Professor Croteau was a long-time member of the Department of Modern Languages and Literatures.

William Cummings and Brothers Scholarship

A scholarship fund established by Mary C. Cummings in January 1968. Preference is given to entering first year students from the Town of Fairfield.

James and Denise Daly Nursing Scholarship

An endowed fund, created in 1991 by Mr. and Mrs. James J. Daly, to provide financial aid with a preference for nursing students.

The Desmarais Family Scholarship

Established by Christopher '93 and Catherine '93 Desmarais in 2013 to provide financial aid to undergraduate students with demonstrated financial need.

Dennis and Marsha Dammerman Scholarship

An endowed fund created by Dennis and Marsha Dammerman to provide multicultural scholarships.

George E. Diffley Scholarship

Established in 2006 by Fairfield University, this need-based endowment honors the former vice president for advancement, who retired in 2006 after 31 years of service to the University.

Diversity Scholarship

Established in 2012 by an anonymous donor to provide financial aid to undergraduate students. Preference is given to multi-cultural students with socio-economic, religious, or sexual diversity.

David J. Dolan Memorial Scholarship

An endowed scholarship established by Mr. and Mrs. Charles F. Dolan, honoring the memories of Mr. Dolan's father and brother. Income will provide financial aid assistance to Fairfield University students.

Kim and Tim Donnelly Music Scholarship

This scholarship was established in memory of Kim and Tim Donnelly who were tragically killed in 2005. They were the parents of two Fairfield alumni, Eric '01 and Tara '03. The scholarship provides aid with a preference for a sophomore or junior who is a music major, music minor, or is actively involved in the music program at Fairfield University.

Rao Dukkipati Scholarship

An endowed scholarship established in the memory of Dr. Rao V. Dukkipati, a long-time faculty member in the School of Engineering. Provides financial aid to engineering students with demonstrated need.

E&F Construction Company Scholarship

A scholarship funded by the E&F Construction Company to assist students attending Fairfield University.

Rev. Anthony J. Eiardi, S.J., Scholarship

A fund created in 1986 by the estate of Dominic R. Eiardi, who left the bequest in honor of his brother, Fr. Eiardi, a retired member of the Fairfield University mathematics department faculty. The fund will provide scholarship opportunities for deserving undergraduate students.

Fairfield County ISA Endowed Scholarship

Established by the Fairfield County Instrument Society of America, this scholarship gives preference to engineering students from Fairfield County who have a GPA of 3.0 or greater.

Fairfield Jesuit Community Scholarship

An endowed fund established in 1983 by the Fairfield Jesuit Community to provide annual scholarships to Fairfield students on the basis of financial need.

Fairfield University Legacy Scholarship

A scholarship established by the Fairfield University Alumni Association to provide financial aid to an undergraduate student who is also the son, daughter, and/or grandchild of an alumnus/alumna of Fairfield University.

Helen T. Farrell Scholarship

A fund created in 1983 from the estate of Helen T. Farrell, who was a Westport, Conn., resident, to provide financial aid to undergraduate students.

Christian Felsmann Memorial Scholarship

An endowed scholarship, established by Maja Dubois, to provide an annual scholarship for a student with demonstrated financial need.

Mae B. Feracane Scholarship

A scholarship established in 1995 by an anonymous donor to provide financial aid to undergraduate students. Preference is given to students with demonstrated financial need.

Mae B. Feracane Scholarship

A scholarship established in 1995 by an anonymous donor to provide financial aid to undergraduate students. Preference is given to students with demonstrated financial need.
Established through a bequest from Mae Feracane, who was a secretary in the Psychology Department, to help needy and deserving students.

**Michael and Claudine Gibbons Ferrante Scholarship:**

An endowed scholarship established by these two alumni from the class of 1990 to assist students with demonstrated financial need.

nursing students who served in the U.S. Armed Forces and demonstrate academic promise and an interest in supporting the mental health needs of Veterans; or undergraduate or graduate nursing students who served in the U.S. Armed Forces.

**Wesley T. Wood Scholarship**

An endowed scholarship established in 1988 by Mr. and Mrs. Wesley T. Wood, whose two children are graduates of Fairfield University. Mr. Wood is a past member of the University’s Trustee Advisory Council. The fund benefits deserving students with demonstrated need.

**Dennis Yee/Patricia Farrell Family Foundation Scholarship**

This endowed fund was established in 2004 to provide financial assistance with a preference for Asian students. The scholarship is need based and recipients must maintain high academic standing.

**Stephen J. Zales ’81 Scholarship**

Established in 2006 by Stephen J. ’81 and Grace Zales. Preference is given to finance majors with demonstrated need and strong academic potential.

**The John and Mary Zandonella Memorial Charitable Gift Fund**

Established in 2012 by the Estate of John and Mary Zandonella, this fund provides financial assistance to students with demonstrated financial need and scholastic achievement who are residents of Connecticut and graduates of Connecticut high schools.

**Ernesto Zedillo Scholarship**

The Ernesto Zedillo Scholarship at Fairfield University was established by the Corrigan Foundation in 2004 as part of the University’s endowed Multicultural Scholarship Fund. The Zedillo Scholarship recognizes academic achievement for students in the College of Arts and Sciences pursuing their studies in the humanities or the behavioral and social sciences, students of Mexican heritage, and financial need. The Ernesto Zedillo Scholar will be an undergraduate entering his or her sophomore, junior, or senior year at Fairfield.
COLLEGE OF ARTS AND SCIENCES

A Message from the Dean

Welcome to the College of Arts and Sciences at Fairfield University. The College is a community of caring, engaged, and student-focused faculty and staff dedicated to invention, discovery, and the prospect of producing knowledge in the service of others. In addition to being the oldest of the University’s five schools, we are also the home to Fairfield’s Core Curriculum, the intellectual foundation of a Fairfield education, anchored in the liberal arts and deeply informed by the Jesuit values of academic excellence and service. We create authentic learning opportunities for students that allow for “exploring the complexities of the human condition, experiencing the wonders of artistic creation, investigating the intricacies of the universe, and reflecting on the mysteries of the sacred – so that we may all do our part to promote a just and peaceful world.”

With 14 departments and 20 interdisciplinary programs, the College values inspired teaching and innovative faculty research that makes Fairfield unique. With majors, minors, and interdisciplinary programs spanning a wide variety of subjects and areas of academic inquiry, the opportunities to explore are limitless and uniquely position our students for success in an increasingly competitive job market where key skills such as critical thinking and clear communication are highly valued. From taking the stage in a theatre production to studying the impact of pollution on marine life, the College of Arts and Sciences provides our students the space to explore their passions. Within easy reach of major metropolitan centers and countless companies and service organizations, our internship program further allows our students to put theory into practice in the real world as part of their studies in the College.

We are confident that your time with us will not only prepare you for a rewarding career but an inspired life of service. As the philosopher John Dewey observed, “education is not preparation for life; education is life itself.” It is our desire that you live and learn fully during your time at the College, that you are fully engaged. But always remember your responsibility to lead by sharing what you have learned with others. In the immortal words of Ignatius of Loyola, “Go forth and set the world on fire.”

Richard Greenwald, PhD
Dean, College of Arts and Sciences

College Overview

The oldest and largest of Fairfield’s five schools, the College of Arts and Sciences offers the bachelor of arts and the bachelor of science degree, as well as master’s degrees in American studies, communication, creative writing, mathematics and public administration. In recent years, the College has won numerous grants to support new and continuing programs. Examples include funding to enhance the core science curriculum, to broaden access to science education, to add courses in critical languages, to enhance diversity at the University, to bring geographic information systems technology to area high school classrooms, and to promote family literacy. Through various scholarships, grants, and internship programs, students in the College have had the opportunity to study and conduct research in Brazil, China, Nicaragua, Russia, and Tanzania, among other locations.

Students are encouraged to select a major by the end of their freshman year (essential in sciences) but no later than the end of the sophomore year. Pre-major students who are still exploring should consult with their faculty advisor, any of their professors, or the Academic and Career Development Center to help them choose a program of study. Selecting a major is not an irrevocable decision; the academic program at Fairfield is flexible enough to allow students to discover new interests or identify new goals. Any of the academic programs in arts and sciences will provide the broad foundations for success and flexibility in any career path.

Within each major field of study, courses range from introductory to highly specialized, with multiple opportunities for independent study and research. Students may also opt, with faculty advice and agreement, to design their own major. Double-majors and minors can also be arranged for students who want to combine the skills and perspectives of two or more disciplines. The core curriculum provides many opportunities to explore the vast territory of the liberal arts and to discover individual intellectual passions.

Degrees

Bachelor of Arts

The bachelor of arts is a liberal arts degree with emphasis in the arts, humanities, or social and behavioral sciences.

Major concentrations in the BA degree program include:

• American Studies (p. 53)
• Communication (p. 88)
  • Public Relations (p. 95)
• Economics (p. 97)
• English (p. 107)
  • Digital Journalism (p. 123)
• Environmental Studies (p. 127)
• History (p. 131)
• International Studies (p. 147)
• Individually Designed Major (p. 146)
• Modern Languages and Literatures (p. 163) (French, German, Italian, and Spanish)
• Philosophy (p. 179)
• Politics (p. 190)
• Psychology (p. 197)
• Religious Studies (p. 204)
• Sociology and Anthropology (p. 213)
• Visual and Performing Arts (p. 219)
  • Art History (p. 238)
  • Film, Television, and Media Arts (p. 240)
• Music (p. 242)
• Studio Art (p. 243)
• Theatre (p. 244)

Bachelor of Science

The bachelor of science is a liberal arts degree with an emphasis in the sciences.

Major concentrations in the BS degree program include:

• Biology (p. 63)
• Chemistry and Biochemistry (p. 78)
The Fairfield curriculum includes a number of majors and minors that are interdisciplinary in nature. Such programs permit students to combine coursework from more than one academic department, thereby examining a broad subject from a multiplicity of disciplinary perspectives. There are six interdisciplinary majors currently available to students in the College of Arts and Sciences:

- American Studies (p. 53)
- Biochemistry (p. 78)
- Environmental Studies (p. 127)
- International Studies (p. 147)
- Individually Designed Major (p. 146)
- Liberal Studies (p. 156)

The College also offers the following interdisciplinary minors:

- American Studies (p. 57)
- Applied Ethics (p. 60)
- Asian Studies (p. 62)
- Black Studies (p. 75)
- Catholic Studies (p. 77)
- Classical Studies (p. 86)
- Educational Studies (p. 102)
- Environmental Studies (p. 129)
- Graphic Design (p. 241)
- Health Studies (p. 130)
- Humanitarian Action (p. 145)
- International Studies (p. 150)
- Irish Studies (p. 151)
- Islamic World Studies (p. 152)
- Italian Studies (p. 153)
- Judaic Studies (p. 154)
- Latin American and Caribbean Studies (p. 154)
- Peace and Justice Studies (p. 178)
- Russian, East European, and Central Asian Studies (p. 212)
- Women, Gender, and Sexuality Studies (p. 245)

Honors Program
The College of Arts and Sciences participates in the University Honors Program (p. 143), an interdisciplinary course of study (20 credits) open to invited freshmen and sophomores and devoted to intellectual history, interdisciplinary studies, and advanced work in the student’s major field.

Liberal Studies
The bachelor of arts or bachelor of science in Liberal Studies (p. 156) is a flexible, individualized and interdisciplinary degree designed for non-traditional part time undergraduates (for example, students returning to college after a long hiatus, working professionals who seek career advancement with a respected university degree, etc.). This major consists of nine courses from at least two areas (humanities, social and behavioral science, mathematics and science, professional studies) as well as a capstone course. The degree offers many attractive features to returning students including a modified core curriculum, more liberal credit transfer policy, and the ability to receive credit through CLEP and portfolio review. More information is available under the Liberal Studies program section of the catalog.

Specialized Programs in Arts and Sciences
In addition to the traditional major concentrations, the College of Arts and Sciences offers specialized programs and academic services. A partial list follows:

Education
The College of Arts and Sciences, in collaboration with the Graduate School of Education and Allied Professions, offers a Five-Year Integrated Bachelor and Master of Arts Teacher Certification Program in Elementary Education (p. 105) or Secondary Education (p. 106). Secondary education tracks include English, science, math, social studies, and world language education. Students earn a BA or BS in their major. They minor in Educational Studies (p. 104) and take two to four additional teacher preparation courses as undergraduates, depending on the certification area. Students continue teacher preparation as graduate students, completing a 30-credit MA in Elementary or Secondary Education and eligibility for Connecticut teaching certifications.

Health Professions Program
Fairfield offers a challenging, competitive, and highly successful pre-medical/pre-dental/pre-health professional program. Students in this program pursue studies in a field or major of their personal interest while taking those courses necessary for admission to medical, dental, and veterinary school, as well as any of the professional schools for allied health careers, such as optometry, physical and occupational therapy, and podiatry.

All students who are considering the health professions as a career and were not registered for the program as admitted students should identify themselves and meet with the Health Professions Advisor as early as possible. A great deal of careful planning must be done in order to prepare a strong application for advanced study.

Students who apply to health professions schools need to have foundational knowledge in science. These foundations can be taken within a science major or added to a non-science major. Many pre-medical students elect to pursue a degree in biology that provides well beyond the minimum requirements recommended by the Association of American Medical Colleges for admission to medical school (similar to requirements for other health professions schools). However, students should also recognize that other majors - in the natural sciences and in non-science fields - are acceptable alternatives as long as the major is supplemented by a combination of courses that represent preparation for medical, dental, and allied health schools. The best preparation for medicine and a number of other health professions usually includes early completion of the following basic course sequences: MA 0119 and MA 0120; BI 0170 and BI 0171; CH 0111 and CH 0112; CH 0211 and CH 0212; PS 0115 and PS 0116. The choice and sequence of courses depend on the student’s personal and academic priorities; these should be discussed with the Health Professions Advisor and other academic advisors.

Internship opportunities are of special interest to students preparing for careers in medicine. Options available to Fairfield students include...
the Emergency Medicine Research Associates Program at St. Vincent’s Medical Center in Bridgeport and a wide variety of local, national, and international opportunities. Contact advisor Geoffrey Church, x2485, for more information.

Pre-Law Program
Fairfield’s pre-law program has been consistently successful during the past decade. No particular major is recommended for law school candidates. Pre-law students should elect courses that examine the social, economic, and political systems of which the law is a part. They should also select courses that help them develop competencies to read analytically, reason logically, write clearly, speak precisely, and think critically. Finally, students may wish to pursue coursework that examines the law from the perspective of disciplines such as politics, philosophy, psychology, sociology, and business. The program is closely supervised by faculty who serve as special advisors to pre-law students; supplementary advising is available through the the Academic and Career Development Center. Contact advisor Gwendoline Alphonso (galphonso@fairfield.edu), x2861, for more information.

Internships
Internships provide the opportunity for practical experience in a career field related to a student’s major. Most departments of the College of Arts and Sciences offer credit for internships in appropriate agencies and business firms in Fairfield, nearby communities, as well as in New York City and New Haven. Majors who wish to take advantage of these opportunities should consult their department chair or program internship coordinator about eligibility requirements and other details.

Minors
In addition to the major, a number of departments and interdisciplinary programs in the college offer optional minor concentrations. These concentrations are developed under faculty supervision within the context of departmental requirements and offerings. For further information, contact the department chair or program director.

Departmental Requirements and Options
Each department or program in the College of Arts and Sciences has specific academic requirements and options for earning a degree in its academic field. Those requirements and options are found in the departmental and program sections that are presented in alphabetical order on subsequent pages of this catalog.

Additional majors, concentrations, and programs housed in academic departments:
- Anthropology: see Sociology and Anthropology (p. 213)
- Art History: see Visual and Performing Arts (p. 219)
- Behavioral Neuroscience: see Psychology (p. 197)

- Studio Art: see Visual and Performing Arts (p. 219)
- Theatre: see Visual and Performing Arts (p. 219)

American Studies
The purpose of the American Studies program at Fairfield University is for students to engage the idea of America as it has been culturally imagined and contested throughout history, both within and beyond U.S. national borders. Students also consider their own place, engagement, and responsibilities as participants in the unfolding narratives of America within a global context. Interdisciplinary in its goal, the program draws from a wide range of courses in the arts, humanities, and social sciences in order to help students develop the ability to read America, in all its manifestations, as a rich and dynamic cultural artifact.

Offered as both a major and minor, our course variety allows you to create your own line of study, or a double major – combining American Studies with a traditional academic discipline – giving you some extra advantages towards future careers in business, law, education, public service or graduate studies.

Programs
- American Studies Major (p. 54)
- American Studies Minor (p. 57)

Courses

AS 0200 Roots of American Culture 3 Credits
Prerequisite: One American Studies Gateway course.
This course provides an introduction to the study of American culture. In familiarizing students with the variety of interdisciplinary ways to approach American Studies, students will examine the diverse experiences, intellectual traditions, and cultural touchstones that make American life a rich and fascinating object of study. Using a variety of sources, students will survey the following themes: race, ethnicity and immigration; expression and imagination; values and ethics; gender; institutional power and politics; and America as a global identity.

AS 0201 The American Intellectual Tradition 3 Credits
A seminar on major ideas and themes that have helped shape American life, this course makes a conscious effort to demonstrate the interaction between intellectual, social, and cultural dynamics in the formation of America.
AS 0350 Internship 1-3 Credits
The internship program allows students to gain on-site access experience in a wide variety of fields, including, but not limited to, law, marketing, magazine publishing. These positions are available upon recommendation of the program intern supervisor, under whose guidance the students assume the jobs, which require 10-15 hours a week. Students may take one internship for credit toward the American Studies major. Students may take a second internship for elective credit. Enrollment by permission of the program intern supervisor only.

AS 0361 American Civil War: Myth and Reality 3 Credits
Attributes: ASHI American Studies: History
This course exposes students to an interdisciplinary method of learning. While using standard historical texts to establish the facts regarding the American Civil War, this course explores the sometimes confusing and contradictory versions of the Civil War as depicted in literature, photography, feature films, documentary films, music, painting, and other modes of expression.

AS 0383 America in the 1930s: A Decade of Change 3 Credits
Attributes: ASHI American Studies: History
The Great Depression represents the catalytic agent in America’s extraordinary transformation in the 1930s, a decade during which the changes in the economic and political sectors provided the matter for American cultural life. This course acquaints students with the complexities of this pivotal period in American life through feature films and documentaries, popular and serious fiction, the American theatre of the time, popular music, public and private art, and mass circulation and little magazines, while introducing them to an interdisciplinary methodology.

AS 0389 Literature and Religion: The American Experience 3 Credits
This course surveys the relationship of literature to religion in the history of American letters. Beginning with the moral didacticism of early Puritan literature, American writers have manifested a persistent concern with religio-ethical matters as well as with the impact of religious institutions in shaping our social and cultural environment. Using literary texts by major American writers, the course evaluates the critical perspective and relevance of the imaginative writer’s treatment of religious questions.

AS 0399 Independent Research Project 3 Credits
During their senior year, each American studies major writes a research paper under the supervision of several participating faculty members. Students integrate different intellectual disciplines in the design and execution of their projects.

¹ Five courses, selected in consultation with advisor, must be housed within a thematic concentration:
  • Expression and Imagination in American Culture
  • Power, Politics, and Institutions in America
  • Race, Ethnicity and Immigration in American Society
  • Gender in American Society
  • Values and Ethics in American Culture
  • America and the World

² Majors may take AS 0350 Internship (3 credits) as one of their 10 courses.

Fairfield University also offers a Master of Arts degree in American Studies. The 400-level core and elective courses in that program are available to qualified senior undergraduate American Studies majors and minors with approval of the program director.

Established in 1980 by a grant from the National Endowment for the Humanities, the Program in Applied Ethics is an inter-school program reporting to the Office of the Provost. It operates in close coordination with the deans of the College of Arts and Sciences, the Dolan School of Business, the School of Engineering, and the Egan School of Nursing and Health Studies.

The Program integrates interdisciplinary courses, seminars, lectures, colloquia, and workshops in the fields of professional ethics (business, healthcare, science, law, engineering, education, and communication), ethics for the citizen (government, community, environmental concerns, war and peace), and global studies (ethical dimensions of global violence, global health, environmental policies, business practices, and humanitarian action). This unified approach to the theory and practice of ethical conduct in all fields raises student awareness of the moral dilemmas of their chosen fields of practice, of allied fields, and of society and the world. The Program offers a series of core-level and elective courses and seminars in service to various academic and professional programs, and a 15-credit minor.

### Patrick J. Waide Jr. Fund

In 2002, Patrick J. Waide Jr. ’59, a former University trustee and distinguished alumnus of Fairfield University, generously established a continuing fund to spend on invited speakers, course materials, and scheduled activities on topics of international affairs, global ethics, and public policy. The first major disbursement established the Resource Center for Global Studies, located in the central office of the Program on Applied Ethics and open to the University community during working hours.

### Programs

- Applied Ethics Minor (p. 62)
## Courses

### AE 0262 Ethics and the Community

**Attributes:** PJST Peace and Justice Studies  
**Prerequisite:** One course in Philosophy or Religious Studies.  
This course surveys the philosophical grounding of the organizations in contemporary society, examining structured human groups from the household, through the village (or religious/ethnic association), to the nation-state to understand their moral undertakings in their environment; to consider how they implement and balance rights and duties, rules and compassion, autonomy and common purposes. This course gives special attention to structural injustice in the treatment of those marginalized by gender, race, or socioeconomic deficit, and includes an effort to determine where new understanding may yield suggestions for structural modification. Students are provided the opportunity to research and present projects on contemporary social problems that illustrate the themes of the course.

### AE 0265 Ethics in Education

**Attributes:** EDCG Educational Studies Cognate, EDDV Educational Studies Diversity  
**Prerequisite:** One course in Philosophy or Religious Studies.  
This survey of the ethical issues that arise in the classroom, school, and school district also covers those issues, to a lesser extent, in the educational policies of the state and federal government. The course directly addresses issues of race, class, and gender in the educational system, addressing entitlement to education, access to education, discipline in the educational setting, multicultural issues in general, politics, accountability, assessment, and the ethics of respect as they pertain to teachers, students, and administrators.

### AE 0270 Ethical Dimensions of Global Violence

**Attributes:** WDIV World Diversity  
**Prerequisite:** One course in Philosophy or Religious Studies.  
A survey of the ethical implications of the new and alarming potentials for violence in a disorderly world. The new faces of violence - insurgency, terrorism inspired by religion, plans for mass destruction, children as warriors - will be examined in the context of Just War theory, the Christian commitment to social justice, and the emerging international order (and disorder). Fully half the course will explore the perspectives of the developing world, especially as violence occurs between factions from the developing world and the traditional wielders of force in the North and West.

### AE 0272 Ethics of Humanitarian Action

**Attributes:** One course in Philosophy or Religious Studies.  
This course provides students with principles and methods of ethics that they will apply to issues of humanitarian action. Examples of humanitarian action to be considered in this course include the international humanitarian system run by states, non-governmental organizations (NGOs), the United Nations and its lead agencies and, increasingly, the private sector. Students also will learn about the development of humanitarian codes of conduct, values and principles, which they will evaluate in terms of their ethical content.

### AE 0276 Ethical Dimensions of Global Business Practices

**Attributes:** HACA Humanitarian Action Minor Context Course, WDIV World Diversity  
**Prerequisite:** One course in Philosophy or Religious Studies.  
A survey of the ethical dimensions of contemporary business practice generally, with special emphasis on the ethical implications of global business enterprise. Topics include global employment practices, human and employee rights in a global economy, the implications of external debt for the economies of developing nations, the human costs and benefits of the changes in global agriculture and food provision generally, and the work of international agencies (the World Trade Organization, the International Monetary Fund, and the World Bank in particular) in guiding the economies of the world. A three-week unit will focus on the economic implications of natural and man made disasters and humanitarian crises.

### AE 0281 Ethics of Communications

**Attributes:** ENEC Digital Journalism Ethics Component  
**Prerequisite:** One course in Philosophy or Religious Studies.  
This course examines the moral dilemmas of media management, political propaganda, campaign promotions, public relations, and corporate communication. Topics include advertising and marketing practices, especially political advocacy and messages targeted to various audiences; truth and loyalty in public relations practices; the philosophical and constitutional bases of freedom of the press; and problems of media bias, systematic and otherwise.

### AE 0283 Environmental Justice

**Attributes:** EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, PJST Peace and Justice Studies, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
**Prerequisite:** One course in Philosophy or Religious Studies.  
This course offers a comprehensive study of the political impact of our global environmental crisis examined through the lens of the relationship of self to society. We study current scientific, religious, economic, and political perspectives that impact our ecological reality globally, including health, trade, population, and waste issues. Working in self-selected groups, students have the opportunity to report on alternative models and activists’ movements aimed at creating a global sustainable future.

### AE 0284 Environmental Ethics

**Attributes:** EVHU Environmental Studies: Humanities, EVPE Environmental Studies Elective, PJST Peace and Justice Studies  
**Prerequisite:** One course in Philosophy or Religious Studies.  
Students examine the environmental problems that arise in our attempts to reconcile the demands of human fulfillment and economic activity, and the requirements of ecological balance. Issues include the diverse perspectives of conservation, preservation, and deep ecology. Student projects cover the wise use of resources; pollution of land, air, and water; conservation of species and open space; global climatic change; and the future stewardship of oceans, forests, and the atmosphere.

### AE 0285 Ethics of Health Care

**Attributes:** HSTE Health Studies: Traditions, Delivery, and Ethics  
**Prerequisite:** One course in Philosophy or Religious Studies.  
This course considers the moral dilemmas of the healthcare setting. Topics include patients’ rights (medical paternalism and patient autonomy, informed consent to therapy, and participation in research); dilemmas of reproduction (technological assistance, abortion, cloning); dilemmas of life and death (assisted suicide, euthanasia, technological interventions for the dying); allocation of healthcare resources; and the special dilemmas of healthcare professionals caught in binds between HMO contracts and professional obligations.
AE 0287 Engineering Ethics 3 Credits
Prerequisite: One course in Philosophy or Religious Studies.
This course systematically explores the ethical dimensions of situations and tasks common to engineering practice. Issues include professionalism, codes of ethics, consumer risk and safety, employee loyalty and whistle-blowing, research and ownership of information, and the engineer’s responsibility to the natural environment.

AE 0291 Business Ethics 3 Credits
Prerequisite: One course in Philosophy or Religious Studies.
This course investigates ethical problems in business practice. Topics include the foundation of the free-market system, personal morality in profit-oriented enterprises; codes of ethics, obligations to employees and other stakeholders; truth in advertising, whistle-blowing, and company loyalty; self and government regulation; the logic and future of capitalism; and the changing responsibilities of the manager in a rapidly globalizing business environment.

AE 0293 Ethics of War and Peace 3 Credits
Attributes: PJST Peace and Justice Studies
Prerequisite: One course in Philosophy or Religious Studies.
This is a survey of issues relating to war and international conflict. Topics include Just War theory, human rights issues, the impact of war on women, the role of the United Nations Security Council, and the history of global attempts to proscribe and prevent aggression. The course also looks at related issues that have emerged in recent years, such as humanitarian intervention and economic sanctions.

AE 0295 Ethics in Law and Society 3 Credits
Prerequisite: One course in Philosophy or Religious Studies.
This course is an inquiry into the ethical dilemmas of making, enforcing, adjudicating, obeying and practicing the law. Topics include the nature of law and the province of jurisprudence, responsibility of the criminal bar (defense, prosecution, judicial), conflicts of interest, election or appointment of judges, the moral infrastructure of the Constitution, the limits of adjudication, and issues relating to investigative technique (torture and extreme confinement conditions).

AE 0299 Special Topics (Shell) 3 Credits
The course is an opportunity for the student to carry out a major project in Applied Ethics involving work in the community, derived from a previous Applied Ethics course.

AE 0391 Seminar in Business Law, Regulation, and Ethics 3 Credits
Prerequisites: Two courses in Philosophy or Religious Studies.
This seminar investigates ethical dilemmas of business management, primarily as encountered in real cases. Themes vary from year to year. Format: guest presentations by members of the business community, followed by discussion.

AE 0399 Special Topics in Applied Ethics 3 Credits
Students undertake an advanced program of course, field, and library work arranged with the instructor. Proposals for special topics must be approved by the director and the dean of the student’s school.

Note: Substitutions are possible as approved by the program director.

Asian Studies

The Asian Studies program focuses on a region that is home to fully half of humanity, the world’s most populous democracy, and one of the fastest growing economies in the world. The importance of Asia in global, political, and economic systems - and particularly its growing impact on the United States - demands a firm understanding of the history, cultures, politics, religions, and economics of Asian countries. Everyone, regardless of major or profession, will be affected by past, present, and future events and developments in Asia.

Combined with a major in a regular discipline, the Asian studies minor prepares the student for a career in international business or banking, journalism, teaching, the United States government, or in international organizations, or for further studies in graduate or professional school.

It is also possible, instead of pursuing the minor, for a student with at least a 3.0 GPA to create an Individually Designed Major in Asian Studies, Chinese Studies, or some other relevant focus in Asia-related study. For information, please consult the Individually Designed Major (p. 146) catalog section.

Programs

- Asian Studies Minor (p. 63)

Courses

AN 0301 Independent Study 1-3 Credits
Students undertake an individualized program of study in consultation with a director from the Asian studies faculty.
AN 0310 Asian Studies Seminar 3 Credits
This seminar examines selected topics concerning Asia. This course is taught in conjunction with another 100-300 level course from a rotation of course offerings. Consult the Asian Studies director to identify the conjoined course for a given semester. The seminar concentrates on topics within the parameters of the conjoined course syllabus but adds research emphasis. Students registered for this course must complete a research project, to include 300-level research, in addition to the regular research requirements of the conjoined course, and a 25-50 page term paper in substitution of some portion of the conjoined course requirements, as determined by the instructor. Open to juniors and seniors only.

Asian Studies Minor
For a 15-credit minor in Asian Studies, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AN 0310</td>
<td>Asian Studies Seminar 1,2</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Select four courses from the Asian Studies Elective list 3</td>
<td>12</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>15</td>
</tr>
</tbody>
</table>

1 Normally taken during the junior or senior year.
2 AN 0301 Independent Study may be substituted if the seminar is not offered or if program faculty approve a student proposal for independent study in lieu of the seminar. A designated 100-300 level course from a rotation of the course offerings also fulfills the requirement.
3 Study of an Asian language is not required for the minor, but is encouraged. Two language courses in the same language may be counted toward the minor.

Study Abroad in Asia is not required for this minor, but is strongly recommended. Some courses taken abroad may be counted toward the minor with the Asian Studies Director’s approval.

Biography
The Biology major prepares students for future professional work in the life and health sciences or advanced education in numerous specializations across all fields of Biology. In addition to a high success rate in placing graduates in medical school, physicians assistant programs, dental school and other health care professions, a significant number of our students also pursue graduate degrees (both Masters and PhD programs) in fields such as microbiology, physiology, cell biology and ecology. Many other students have been successful in careers in the
pharmaceutical industry, and also, importantly, as teachers in primary and secondary education programs.

Programs

- Biology Major (p. 72)
  - Concentration in Evolution, Ecology, and Biodiversity
  - Concentration in Health and Human Biology
  - Concentration in Marine Biology
  - Concentration in Molecular Biology
  - Biology Minor (p. 75)

Courses

**BI 0015 Fundamentals of Biology I**  3 Credits
This course, an introductory study of biology for the non-science major, familiarizes students with the general biological principles that govern the activities of all living systems. Concepts include the biochemical origin of life, cellular morphology and physiology, and human genetics. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

**BI 0016 Fundamentals of Biology II**  3 Credits
Students examine biological systems, such as the human organism, in detail, with an emphasis on pathophysiology, diversity of life, and evolution. Emphasis varies by instructor. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

**BI 0018 Human Biology: Form and Function**  3 Credits
Attributes: EDCG Educational Studies Cognate, HSST Health Studies: Science and Technology
This course, which provides a basic introduction to human anatomy and physiology, examines the major organ systems of the body, focusing on how each system functions and how all systems interact with one another. Genetics, disease and prevention, nutrition, current issues in public health, and environmental health problems that human populations face are discussed. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

**BI 0073 Contemporary Nutrition: Food for Thought**  3 Credits
Attributes: HSST Health Studies: Science and Technology
This course will introduce non-science majors to the core biological processes of nutrition, and contemporary nutrition concerns related to human growth and well-being throughout life. The course will include material on: food selection and preparation, sensory evaluation, human nutrition, diet analysis, and the relationship between diet and disease. Students will gain the knowledge and skill development necessary to achieve a nutritionally healthy lifestyle. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

**BI 0074 Biology of Food**  3 Credits
Attributes: EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
This course will introduce non-science majors to the biological processes behind the food that we produce and harvest as well as the environmental consequences of our diet choices. This course will include material on: the rise of agriculture, plant and animal growth requirements and life cycles, evolution, and a description and discussion of food organisms in the modern North American diet, techniques of food production and effects on the environment. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

**BI 0075 Ecology and Society**  3 Credits
Attributes: EVME Environmental Studies Major Elective, PJST Peace and Justice Studies
This course focuses on environmental issues raised by modern society’s conflicting needs for land, water, a livable environment, and renewable/nonrenewable resources. Students examine the available scientific evidence and are encouraged to draw their own conclusions concerning these environmentally sensitive issues, which are presented in lectures, readings, films, and occasional, off-campus field trips (by arrangement). This course is open to all except biology majors. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

**BI 0076 Environmental Science**  3 Credits
Attributes: EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective, PJST Peace and Justice Studies
The science of the environment is presented through examination of the interconnections among physical, chemical, and biological fields of inquiry. This course looks at how the global environment is altered by the human population, technology, and production of fuels and food. In this course, students will acquire a scientific understanding of current issues in environmental science and learn to evaluate claims about current environmental problems. Note: This course counts as a natural science core but does not satisfy requirements for the biology or chemistry major or minor.

**BI 0077 Identity and the Human Genome**  3 Credits
Attributes: BSSC Black Studies Component Course, BSSC Black Studies: Physical and Natural Sciences, WSGF Women, Gender, and Sexuality Studies: Gender Focused
This course introduces human genetics to the non-science major. Topics of discussion include the structure and function of genes, modes of inheritance, gene editing, sex and gender, race, and human genetic diversity. Special emphasis is placed on ethical, legal and social issues related to the knowledge and application of genetic information. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.
BI 0078 Introduction to Marine Science  
**Attributes:** EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective

This course introduces the non-science major and the marine science minor to the field of oceanography. Topics dealing with the geological, physical, chemical, and biological aspects of science underscore the interdisciplinary nature of world ocean study. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

BI 0088 Biomedical Science and Society  
**Attributes:** HSST Health Studies: Science and Technology

This course will engage students in inquiry-based scientific methodology through exploration of specific topics in biomedical science related to human health and disease. The course will explore four biomedical topics. Each topic will include approaches and contributions from chemistry and mathematics, so students appreciate the inherently interdisciplinary nature of science. The course will cover biomedical concepts, quantitative skills, the collection and analysis of data, and guided activities that utilize approaches from all three fields to address biomedical questions. The societal impact and implications of each topic will also be explored.

BI 0095 Philosophy and Biology of Evolutionary Theory  
**Attributes:** CAOT Catholic Studies: Non-Religious Studies

This course explores the question of evolutionary theory from the perspectives of philosophy and biology. From the biological perspective, the course focuses on genetics, adaptive evolution, neutral evolution, the genetic impact of selection on populations, the origin and maintenance of genetic variation, the importance of development in evolution, and the expression of variation. From the philosophical perspective, the course focuses on evolution as theory and ideology, the critique of the adaptationist program, evolution and contingency, typological versus population thinking, and the developmental systems critique. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

BI 0096 God and Modern Biology  
**Attributes:** HSST Health Studies: Science and Technology

This course introduces students to the dialogue between science and religion with a detailed consideration of recent advances in modern biological research that raise significant religious, theological, and ethical issues. The course emphasizes developing a practical understanding of the scientific method through interactive experiences and lecture material. Students consider how scientific breakthroughs and ideas can influence or be influenced by religious thought through assigned readings and in-class discussion groups and through the historically significant and most recent findings in the areas of evolution, biotechnology, and the neurosciences. Note: This course counts as a natural science core but does not satisfy requirements for the biology major or minor.

BI 0107 Human Anatomy and Physiology I  
**Attributes:** HSST Health Studies: Science and Technology  
**Corequisite:** BI 0107L

This course is required for nursing majors as a prerequisite for most nursing courses. A strong chemistry background is recommended. Homeostasis is the major theme of the course with form and function covered together each semester. This course introduces the student to anatomical terminology, homeostasis and feedback control, membrane physiology, and tissues followed by the integumentary, skeletal, muscular and nervous systems. Note: This course is not open to biology majors except where required for allied health sciences (chair approval required).

BI 0107L Human Anatomy and Physiology Lab I  
**Fee:** $60 Science Lab Fee  
**Corequisite:** BI 0107.

Laboratory work closely follows the BI 0107 lecture and includes microscopic anatomy (histology), use of anatomical models, human skeletons, and dissections for study of gross anatomy, and physiology experiments including muscle recruitment measurements, reflex tests and cranial nerve tests.

BI 0108 Human Anatomy and Physiology II  
**Attributes:** HSST Health Studies: Science and Technology  
**Corequisite:** BI 0108L

This course is required for nursing majors as a prerequisite for most nursing courses. A strong chemistry background is recommended. Homeostasis is the major theme of the course with form and function covered together each semester. This course continues with the endocrine, cardiovascular, lymphatic, respiratory, urinary, digestive, and reproductive systems. Note: This course is not open to biology majors except where required for allied health sciences (chair approval required).

BI 0151 Elements of Microbiology  
**Prerequisites:** BI 0107, CH 0084.

This microbiology course for nursing majors examines the structure and function of bacteria, viruses, yeasts, molds, antibiotics, and bacterial genetics as well as the mechanisms of microbial invasion and the body's immunological response. Note: This course is not open to biology majors.

BI 0151L Elements of Microbiology Lab  
**Fee:** $60 Science Lab Fee

BI 0170 General Biology I  
**Attributes:** HSST Health Studies: Science and Technology  
**Corequisites:** BI 0170L, BI 0170P

This introductory course for biology majors covers the molecular and cellular basis of life, including cell structure and function, cell communication, inheritance, gene expression and regulation, and developmental genetics. Students receive hands-on experience with a broad range of topics and techniques in the accompanying laboratory.

BI 0170L General Biology I Lab  
**Fee:** $60 Science Lab Fee

BI 0170P General Biology I PLG  
**Fee:** $0

BI 0171 General Biology II  
**Attributes:** HSST Health Studies: Science and Technology  
**Corequisites:** BI 0171L, BI 0171P

This introductory course for biology majors covers biochemistry, energy utilization, anatomy and physiology, and the structure and function of plants and animals. Students receive hands-on experience with a broad range of topics and techniques in the accompanying laboratory.

BI 0171L General Biology II Lab  
**Fee:** $60 Science Lab Fee

BI 0171P General Biology II PLG  
**Fee:** $0
BI 0172 General Biology III

**Corequisite:** BI 0172L.

This introductory course for biology majors covers organismal biology with an emphasis on evolution, biological diversity, ecology, and environmental science. Students receive hands-on experience with a broad range of topics and techniques in the accompanying laboratory.

**BI 0172L General Biology III Lab**

**Fee:** $60 Science Lab Fee

**BI 0201 Biology Teaching Practicum**

**Prerequisites:** BI 0170, BI 0171, BI 0172; successful completion of the assigned laboratory.

This series of courses represents opportunities (up to six semesters) for Biology majors to gain experience in teaching practices in the laboratory as classroom setting. Students will be paired with an instructor, and assist in instruction, grading and overall successful running of a laboratory section. Strong prior performance in the laboratory to which the student will be assigned is required. Selection will be made by the biology department, after a general call is put out to all students who may be interested in the opportunity. Enrollment by permission only.

**BI 0202 Biology Teaching Practicum**

**Prerequisites:** BI 0170, BI 0171, BI 0172; successful completion of the assigned laboratory.

This series of courses represents opportunities (up to six semesters) for Biology majors to gain experience in teaching practices in the laboratory as classroom setting. Students will be paired with an instructor, and assist in instruction, grading and overall successful running of a laboratory section. Strong prior performance in the laboratory to which the student will be assigned is required. Selection will be made by the biology department, after a general call is put out to all students who may be interested in the opportunity. Enrollment by permission only.

**BI 0203 Biology Teaching Practicum**

**Prerequisites:** BI 0170, BI 0171, BI 0172; successful completion of the assigned laboratory.

This series of courses represents opportunities (up to six semesters) for Biology majors to gain experience in teaching practices in the laboratory as classroom setting. Students will be paired with an instructor, and assist in instruction, grading and overall successful running of a laboratory section. Strong prior performance in the laboratory to which the student will be assigned is required. Selection will be made by the biology department, after a general call is put out to all students who may be interested in the opportunity. Enrollment by permission only.

**BI 0204 Biology Teaching Practicum**

**Prerequisites:** BI 0170, BI 0171, BI 0172; successful completion of the assigned laboratory.

This series of courses represents opportunities (up to six semesters) for Biology majors to gain experience in teaching practices in the laboratory as classroom setting. Students will be paired with an instructor, and assist in instruction, grading and overall successful running of a laboratory section. Strong prior performance in the laboratory to which the student will be assigned is required. Selection will be made by the biology department, after a general call is put out to all students who may be interested in the opportunity. Enrollment by permission only.

**BI 0205 Biology Teaching Practicum**

**Prerequisites:** BI 0170, BI 0171, BI 0172; successful completion of the assigned laboratory.

This series of courses represents opportunities (up to six semesters) for Biology majors to gain experience in teaching practices in the laboratory as classroom setting. Students will be paired with an instructor, and assist in instruction, grading and overall successful running of a laboratory section. Strong prior performance in the laboratory to which the student will be assigned is required. Selection will be made by the biology department, after a general call is put out to all students who may be interested in the opportunity. Enrollment by permission only.

**BI 0206 Biology Teaching Practicum**

**Prerequisites:** BI 0170, BI 0171, BI 0172; successful completion of the assigned laboratory.

This series of courses represents opportunities (up to six semesters) for Biology majors to gain experience in teaching practices in the laboratory as classroom setting. Students will be paired with an instructor, and assist in instruction, grading and overall successful running of a laboratory section. Strong prior performance in the laboratory to which the student will be assigned is required. Selection will be made by the biology department, after a general call is put out to all students who may be interested in the opportunity. Enrollment by permission only.

**BI 0206 Introductory Principles of Epidemiology**

**Prerequisite:** BI 0108 or BI 0171.

Epidemiology is the foundation for public health research, with applications in several other disciplines. This course is designed to introduce students to the core principles of epidemiology, and familiarize students with the applications of biostatistics in health research. During the course, students will learn about the historical origins of the field of epidemiology, as well as concepts for study design and data interpretation.

**BI 0218 Vertebrate Zoology**

**Prerequisites:** BI 0108 or BI 0171.

Fish, frogs, flamingoes and ferrets. What unites them? A backbone. This course addresses how these very diverse groups of animals actually relate and differ - in physiology, morphology and behavior. Students will discuss the advantages and disadvantages of being a member of each group, and compare across groups the things that set these groups apart from each other. The course will consist of group discussions based on the required reading in the text, supplemented extensively by direct examples (preserved and live specimens, tissues and samples) showing how the diversity of vertebrates makes them an incredibly interesting group. Formerly BI 0318.

**BI 0218L Vertebrate Zoology Lab**

**Fee:** $60 Science Lab Fee

**Prerequisite:** BI 0218.

This lab focuses on the development of a vertebrate research project at the Connecticut's Beardsley Zoo, which currently houses over 130 species of animals, a number of which are currently listed as endangered. As a participant in the Species Survival Plan (SSP) program, the zoo's mission is to promote the preservation of such endangered species as well as provide the best possible enclosures for many of the zoo's other residents. You will be engaged in the design, execution, analysis and presentation of research, which will ultimately be used by the Connecticut's Beardsley Zoo to enhance their care and protection of vertebrates. (*indicates concurrency allowed)
BI 0251 Human Nutrition 3 Credits
Attributes: HSST Health Studies: Science and Technology
Prerequisites: BI 0107 and BI 0108 or BI 0170, BI 0171, and BI 0172.
This course offers a comprehensive study of the fundamental principles of human nutrition. The course emphasizes the role diet plays in the prevention of disease and promotion of health. Students will integrate the fundamentals of digestion, absorption, and metabolism as they apply to nutrient intake. Major topics include: weight management as it relates to the physiology, metabolism, and behavioral psychology of energy balance; the nutritional needs of humans at various stages of the life cycle; how scientific evidence has shaped the current dietary guidelines and the food environment.

BI 0260 Ecology 4 Credits
Attributes: EDCG Educational Studies Cognate, EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
Corequisite: BI 0250L.
Prerequisites: BI 0170, BI 0171, BI 0172, CH 0111, CH 0112.
This course is designed as an overview of the science of ecology - the study of interactions between organisms and their environment. This course uses a hierarchical approach to describe organisms, populations, communities, and ecosystems. We discuss the types of questions ecologists ask, and the methods ecologists use to answer questions.

BI 0260L Ecology Lab 0 Credits
Fee: $60 Science Lab Fee

BI 0261 Genetics 4 Credits
Attributes: EDCG Educational Studies Cognate
Corequisite: BI 0261L.
Prerequisites: BI 0170, BI 0171, BI 0172.
This course offers a comprehensive study of the fundamental principles of classical and molecular genetics. Major topics include transmission (Mendelian) genetics, gene linkage and mapping, fundamentals of molecular biology, molecular approaches to genetic analysis, genetic engineering and recombinant DNA technology, microbial genetics, regulation of gene expression, and genomics.

BI 0261L Genetics Lab 0 Credits
Fee: $60 Science Lab Fee

BI 0262 Human Physiology 4 Credits
Corequisite: BI 0262L.
Prerequisites: BI 0170, BI 0171, BI 0172, CH 0111, CH 0112.
This course considers homeostasis in humans by means of a comprehensive survey of the morphology and physiology of human organ systems. Special emphasis is given to organ systems associated with water and electrolyte balance, respiration, digestion, movement, and neurological control.

BI 0262L Human Physiology Lab 0 Credits
Fee: $60 Science Lab Fee

BI 0296 Special Topics in Biology 3 Credits
This course requires library research and the writing of a scholarly paper on a special topic. Students discuss topics with and must obtain consent from an appropriate professor prior to registration.

BI 0310 Community Nutrition 4 Credits
Attributes: HSST Health Studies: Science and Technology, UDIV U.S. Diversity
Corequisite: BI 0310L.
Prerequisites: BI 0107 and BI 0108 or BI 0170, BI 0171, and BI 0172.
This course will introduce students to the fundamental applications of nutrition in a public health setting. Students will learn the theory behind health behavior change, community assessment, intervention planning, and program management. Students will also have an opportunity to practice the skills necessary to carry out these activities through laboratory exercises, in-class activities and assignments. During the course, students will create a nutrition brochure, conduct a focus group, and produce a video Public Service Announcement. By the end of this course, students will have a deeper understanding of how public health professionals identify nutritional risk in the community, and design programs to prevent the development of disease. This course satisfies Core II elective requirements for the Biology major or minor.

BI 0310L Community Nutrition Lab 0 Credits
Fee: $60 Science Lab Fee

BI 0314 Endocrinology 3 Credits
Prerequisites: BI 0170, BI 0171, BI 0172, CH 0111, CH 0112, CH 0211.
This course examines the glands of internal secretion and their location, anatomy, and function, including the mechanisms of their secretions and cell signaling importance in the regulation of body functions.

BI 0315 Anatomy: Form and Function 3 Credits

BI 0317 Biostatistics for Health Research 3 Credits
Attributes: HSST Health Studies: Science and Technology
Corequisite: BI 0317L.
Prerequisites: BI 0108 or BI 0171; MA 0217.
Biostatistics is the foundation for many forms of health research with applications in several other disciplines. This course is designed to introduce students to the core principles of statistical practices used in the Public Health research setting, and familiarize students with the applications of biostatistics in health research. During the course, students will practice applied biostatistics by using a statistical programming package (SAS) to complete data analysis of a public health dataset.

BI 0317L Biostatistics for Health Research Lab 1 Credit
Fee: $60 Science Lab Fee
BI 0319 Zoology Field Experience 3 Credits

Attributes: EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science Fee: $60 Science Lab Fee

Prerequisite: BI 0218 or BI 0365. As a supplement to BI 0218 or BI 0365, students will take part in an exciting field-trip experience to Brazil, where they will interact directly with research biologists doing field experiments in the Atlantic Coastal Rainforest and surrounding ecosystems of Brazil. While in Brazil, students will work in the field collecting data on a particular specialized topic, and work closely with the Brazil research team in analyzing and presenting these data in a scientifically appropriate format. Upon return to Fairfield, the semester will be spent perfecting techniques in data organization, analysis and presentation including a formal paper, poster and/or talk. Enrollment by permission only.

BI 0319L Zoology Field Experience Lab 3 Credits

Attributes: EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science Fee: $60 Science Lab Fee

Prerequisite: BI 0218 or BI 0365. As a supplement to BI 0218 or BI 0365, students will take part in an exciting field-trip experience to Brazil, where they will interact directly with research biologists doing field experiments in the Atlantic Coastal Rainforest and surrounding ecosystems of Brazil. While in Brazil, students will work in the field collecting data on a particular specialized topic, and work closely with the Brazil research team in analyzing and presenting these data in a scientifically appropriate format. Upon return to Fairfield, the semester will be spent perfecting techniques in data organization, analysis and presentation including a formal paper, poster and/or talk. Enrollment by permission only.

BI 0324 Biochemistry I 3 Credits

Prerequisite: CH 0212. This course will investigate the fundamentals of life - chemistry. The structures and functions of biomolecules, including proteins, DNA, RNA, lipids, and carbohydrates will be covered in depth. The concepts behind biological processes will be discussed, including enzyme kinetics and regulatory strategies, membrane functions, signal transduction, and an overview of metabolism.

BI 0324L Biochemistry Lab 1 Credit

Fee: $60 Science Lab Fee

Corequisite: BI 0324 or BI 0325 or CH 0324 or CH 0325. This course will investigate classic and most current methodology used in biochemistry. A semester project will be used to introduce techniques used in biochemistry to investigate the structure and function of a protein. In characterizing this protein, the analysis of DNA, lipids and carbohydrates will also be covered.

BI 0325 Biochemistry II 3 Credits

Prerequisites: CH 0211, CH 0212. This course focuses on the structure and function of eukaryotic cells. Students explore the relationship between gene expression and protein synthesis, and discuss how different proteins coordinate a complex array of important biological tasks in the cell. The course covers the biochemical interactions that occur within and between cells that sustain viability and mediate cell communication. Topics include gene expression and protein production, enzyme structure/function, protein to protein interactions, cytoskeleton and extracellular matrix, mechanisms of transport, signal transduction, cell cycle, and apoptosis. Laboratories include analysis of cell morphology, RNA and protein expression, and assays to study the growth, differentiation, and death of eukaryotic cells in response to their environment.

BI 0327 Cell Biology 4 Credits

Attributes: EDCG Educational Studies Cognate

Corequisite: BI 0327L. This course focuses on the structure and function of eukaryotic cells. Students explore the relationship between gene expression and protein synthesis, and discuss how different proteins coordinate a complex array of important biological tasks in the cell. The course covers the biochemical interactions that occur within and between cells that sustain viability and mediate cell communication. Topics include gene expression and protein production, enzyme structure/function, protein to protein interactions, cytoskeleton and extracellular matrix, mechanisms of transport, signal transduction, cell cycle, and apoptosis. Laboratories include analysis of cell morphology, RNA and protein expression, and assays to study the growth, differentiation, and death of eukaryotic cells in response to their environment.

BI 0327L Cell Biology Lab 0 Credits

Fee: $60 Science Lab Fee

BI 0330 Nutrient Metabolism 3 Credits

Prerequisites: BI 0170, BI 0171, BI 0172, CH 0111, CH 0112, CH 0211, CH 0212. This course is designed to provide students with an in-depth understanding of nutrient metabolism in humans. This course will examine the digestion, absorption, and metabolism of macronutrients: carbohydrate, lipid and protein, in addition to the essential biological functions of vitamins and minerals. The emphasis of this course will be on the interrelationship and control of nutrient utilization by various organ systems in the body, building upon principles of human physiology and biochemistry. This course cannot be taken as a biology block elective if BI 0325 lecture has been taken previously.

BI 0342 Developmental Biology 4 Credits

Attributes: EDCG Educational Studies Cognate

Corequisite: BI 0342L. This course explores how the transition from a single-celled, fertilized egg to a multicellular animal is accomplished, emphasizing the dynamic interactions that occur on the molecular level to tightly control developmental processes. Topics include mechanisms of cell fate and differentiation, the molecular basis of differential gene expression, analysis of the molecular cues regulating body axis formation, and the development of various specific structures in different experimental organisms. The laboratory for the course consists of experiments that focus on the influence of gene function on development. We will do experiments that allow us to observe expression patterns of important genes in development and we will study the effects of perturbing gene function during development.

BI 0342L Developmental Biology Lab 0 Credits

Fee: $60 Science Lab Fee
BI 0352 Fundamentals of Microbiology 4 Credits
Attributes: EDCG Educational Studies Cognate
Corequisite: BI 0352L.
Prerequisites: BI 0170, BI 0171, BI 0261, CH 0211, CH 0212.
This comprehensive introduction to microbiology includes microbial cell structure, physiology, genetics, evolution and taxonomy, diversity, ecology, and applied microbiology. Lab sessions introduce microbiological techniques (aseptic technique, microscopy, bacterial staining, culture techniques), and other research methods. Students use skills acquired in the lab to design and conduct independent investigations.

BI 0352L Fundamentals of Microbiology Lab 0 Credits
 Fee: $60 Science Lab Fee

BI 0354 Molecular Biology 3 Credits
Prerequisites: BI 0170, BI 0171, CH 0211, CH 0212.
This introduction to molecular biology examines protein structure, DNA structure, RNA structure, the roles of DNA and RNA in protein synthesis, and the replication and repair of DNA and RNA in eukaryotic and prokaryotic cells. Relates the effects of mutations to DNA, RNA, and proteins.

BI 0356 Immunology 3 Credits
Prerequisites: BI 0170, BI 0171, CH 0211, CH 0212.
This introduction to immunology covers the humoral and cellular basis of immune response, emphasizing antigens, the structure and function of immunoglobulins, antibody formation, and living/experimental manifestations of the immune response.

BI 0357 General Virology 3 Credits
Prerequisites: BI 0170, BI 0171.
This introductory course covers the field of virology, with a special emphasis on animal viruses. Coverage centers on the physical, biochemical, and biological aspects of bacteriophages and animal viruses. Discussion stresses viral morphology, replication and assembly; pathogenesis of viral infections; and the epidemiology, prevention, and control of viral diseases.

BI 0362 Marine Invertebrate Zoology 4 Credits
Attributes: EDCG Educational Studies Cognate
Corequisite: BI 0362L.
Prerequisites: BI 0170, BI 0171, CH 0211, CH 0212.
Students study the phylogeny, ecology, morphology, and physiology of the major marine invertebrate groups with emphasis on local fauna. The laboratory component includes field trips to various habitats in Long Island Sound to collect specimens for identification and study.

BI 0362L Marine Invertebrate Zoology Lab 0 Credits
 Fee: $60 Science Lab Fee

BI 0364 Freshwater Ecology 4 Credits
Attributes: EDCG Educational Studies Cognate, EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
Corequisite: BI 0364L.
Prerequisites: BI 0170, BI 0171, CH 0211, CH 0212.
Students learn the applied and theoretical concepts of the field of ecology using examples from freshwater aquatic systems. In the laboratory, students learn the major groups of organisms present in aquatic systems and conduct experiments involving ecological concepts such as predation and competition.

BI 0364L Freshwater Ecology Lab 0 Credits
 Fee: $60 Science Lab Fee

BI 0365 Evolutionary Biology 4 Credits
Attributes: EDCG Educational Studies Cognate
Corequisite: BI 0365L.
Prerequisites: BI 0170, BI 0171, CH 0211, CH 0212.
The course begins with an examination of the intellectual origins of biological thought and includes a study of the historical factors that contributed to Charles Darwin's development of the theory of evolution. Topics include the evidence for evolution, the forces affecting evolution (e.g., mutation, migration, genetic drift, and selection), and natural selection as the basis of adaptation, as well as the philosophical and practical aspects of defining species and reconstructing phylogenetic relationships. Students critique (individually and in groups) current papers in evolutionary biology on topics such as punctuated equilibrium theory, Darwinian medicine, human origins, co-evolutionary arms races, systematics and biodiversity, and the evolution of sex.

BI 0365L Evolutionary Biology Lab 0 Credits
 Fee: $60 Science Lab Fee

BI 0366 Ornithology 4 Credits
Attributes: EDCG Educational Studies Cognate, EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
Corequisite: BI 0366L.
Prerequisites: BI 0170, BI 0171, CH 0211, CH 0212.
This upper-level lecture, laboratory, and field course on avian biology has an emphasis on ecology and evolution. The course familiarizes students with the staggering diversity of birds and the adaptations that have contributed to their success. Laboratory activities include: 1) a multi-week student investigation of avian diversity of form and function, and 2) a series of field trips that emphasize unique adaptations and means of identification of birds found in Connecticut.

BI 0366L Ornithology Lab 0 Credits
 Fee: $60 Science Lab Fee

BI 0372 Environmental Toxicology 4 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective
Corequisite: BI 0372L.
Environmental toxicology is the study of the nature, properties, effects and detection of toxic substances in the environment and in any environmentally exposed species, including humans. Fundamental toxicological concepts will be covered including dose-response relationships, absorption of toxicants, distribution and storage of toxicants, biotransformation and elimination of toxicants, target organ toxicity, teratogenesis, mutagenesis, carcinogenesis, and risk assessment. The course will include an overview of chemodynamics of contaminants in the environment including fate and transport. The effects of these contaminants will then be explored on a series of scales: the molecular level (biochemical pathways of metabolism and detoxification); the organismal level (target organs, behavioral effects); and the ecosystem level (nutrient cycling and ecosystem services).

BI 0372L Environmental Toxicology Lab 0 Credits
 Fee: $60 Science Lab Fee
This course requires a research thesis involving laboratory investigation. Seniors and qualified juniors obtain the consent of the professor supervising their research interest area prior to registering for this program. Past topics include aquatic ecology, bacterial ecology and physiology, biochemistry, cell-wall biosynthesis, evolution of marine invertebrates, genetic regulation of animal development, mammalian physiology, plant biostimulants, plant/insect ecology, population and disease dynamics of shellfish, and signal transduction/gene regulations.

BI 0399A Senior Capstone Seminar: Biology of Cancer 3 Credits
Attributes: BICP Biology Major Capstone Course
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Molecular Block, senior standing.
This seminar requires students to draw on nearly all of their training as biology majors to understand the disease of cancer in great detail. Topics include the genetic/cellular basis for the disease, physiological effects of tumor progression and metastasis, environmental influences, treatment modalities, and the personal, familial and societal impacts of the disease. Students read extensively for the course and summarize and formally present current research in the field in an effort to develop their scientific communication skills. Numerous short reviews of research articles are also produced by students. Formerly BI 0381A.

BI 0399B Senior Capstone Seminar: Molecular Mechanisms of Human Disease 3 Credits
Attributes: BICP Biology Major Capstone Course
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Molecular Block, senior standing.
This seminar covers the molecular and cellular events that underlie complex human diseases. Students learn to critically analyze and interpret primary literature on the molecular aspects of such diseases as cancer, diabetes, heart disease, Alzheimer’s, and AIDS. Students summarize and present selected articles at each meeting and use these acquired skills to investigate a particular topic of their choice in the form of a grant proposal for their final project. Formerly BI 0381B.
BI 0399C Senior Capstone Seminar: Bacterial Pathogenesis  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Molecular Block, senior standing.  
This seminar examines the role of prokaryotes in disease, with an emphasis on the genetics and physiology of disease mechanisms. Topics include aspects of the human immune response, host-parasite relationships, and the epidemiology and evolution of infectious disease. Formerly BI 0381C.

BI 0399D Senior Capstone Seminar: Nutritional Epigenetics  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Molecular or Physiology Block, senior standing.  
This seminar will cover emerging topics in nutritional epigenetics - the mechanisms by which nutrients regulate gene expression. Emphasis will be placed on genes regulated by essential dietary compounds (e.g., carbohydrates, lipids, vitamins and minerals) within the context of conditions such as cardiovascular disease, diabetes and cancer. Students will analyze and present scientific literature and write a grant proposal. Formerly BI 0381D.

BI 0399E Senior Capstone Seminar: Reproductive Tactics  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Physiology Block, senior standing.  
This seminar explores the ways animals have evolved creative mechanisms, physiological and behavioral, to maximize their reproductive success. Topics will include mate choice and sexual conflict, paternity, variability in reproductive anatomy, mechanisms for successful fertilization, sperm competition and sperm choice. Course format: A reading extensive course. Students will read from a source text for foundation ideas, then will each find and present to the entire class, scientific research papers from the primary literature. Formerly BI 0382A.

BI 0399F Senior Capstone Seminar: Coral Reef Ecology  3 Credits  
Attributes: BICP Biology Major Capstone Course, EVME Environmental Studies Major Elective  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Ecology Block, senior standing.  
Students study the complex ecological relationships found in coral reef ecosystems. Topics include discussions of reef development, coral symbiosis and growth, reef trophic dynamics, ecology and behavior of coral reef fish and invertebrates, and effects of natural and human disturbance on coral reef communities. Course format: seminar in which students read, analyze, and present scientific research papers from the primary literature. Formerly BI 0383A.

BI 0399G Senior Capstone Seminar: Ecology of the North Atlantic Coast  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Ecology Block, senior standing.  
This seminar examines the processes that generate ecological patterns in North Atlantic coastal ecosystems with a focus on the ecology of salt marshes, tidal rivers, sandy beaches, and rocky shores, and the human impact on these systems. The course centers on student-led discussions of readings from scientific literature. Formerly BI 0383B.

BI 0399H Senior Capstone Seminar: Principles of Aquaculture  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Ecology Block, senior standing.  
This seminar introduces students to the rapidly-growing science of aquaculture or fish farming. Using a comprehensive approach, the course includes discussions of the following topics: historical development, culture and rearing techniques, diseases, regulations, and permitting and marketing of aquatic plants and animals. Course format: seminar in which students read, analyze, and present scientific and technical papers from the primary literature. Field trips to nearby aquaculture facilities may be included. Formerly BI 0383C.

BI 0399I Senior Capstone Seminar: Topics in Evolutionary Biology  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Physiology Block, senior standing.  
Evolution is the theme that unites all fields of biology. The broad objective of this course is to encourage students to integrate all the knowledge they have acquired as a biology major to critically interpret and analyze questions from an evolutionary perspective. In this seminar, we will read and discuss the current literature on major evolutionary topics, which have revolutionized the way in which we think about genomics, sex and reproduction, and our own human beginnings. We will also address important contemporary but controversial topics such as evolutionary medicine and evolutionary psychology. The course centers on student led discussions, presentations and literature critiques. Formerly BI 0383D.

BI 0399J Senior Capstone Seminar: Pathophysiology of Bone and Cartilage  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Physiology Block, senior standing.  
This seminar will focus on the biochemistry and physiology of human bone and cartilage. Emphasis will be placed on the normal development and healing of these tissues along with an introduction to common skeletal tissue disorders such as osteoporosis and arthritis. Students will be expected to analyze and present scientific literature while integrating the material with basic knowledge acquired from previous courses.

BI 0399K Senior Capstone Seminar: Ichthyology  3 Credits  
Attributes: BICP Biology Major Capstone Course  
Prerequisites: BI 0170, BI 0171, BI 0172, one course from the Physiology Block, senior standing.  
This seminar will explore the diversity of fishes, the largest group of vertebrates. Topics for discussion will include feeding, locomotion, metabolism, and sensory systems of fishes. Students will analyze and present scientific literature and write a grant proposal.

1 Various upper-level courses may be double-counted toward the departmental concentrations in evolution, ecology and biodiversity, health and human biology, marine science or molecular biology.

Biology Block Electives and Additional Requirements

After completion of the General Biology sequence (BI 0170, BI 0171, BI 0172), a minimum of six biology courses and a capstone experience (described below) are required. To ensure breadth of exposure, at least one course must be taken from each of the following three blocks. The three remaining biology course electives may be any 200- or 300-level courses listed below. Four of the six courses taken during the sophomore (second semester) through senior years must include a laboratory component.

The choice of block electives, advanced biology electives, and general electives inside or outside the department varies according to a student's career objective and interest. Students make their choices after consultation with appropriate department advisors. Students interested in molecular biology may, for example, take advanced courses to fulfill a concentration in molecular biology.

Students interested in graduate, medical, dental, or allied health schools may select electives that meet the requirements for admission to graduate or professional schools. Students interested in science writing or teaching in biology may choose to earn minors in English or education.

Capstone Seminar
During their capstone experience, students connect the diverse experience and knowledge they have acquired as biology majors, focusing these skills on examining in depth, a specific topic. In a small class setting (10-12 students maximum), students and the professor delve deeply into the chosen topic, assessing the peer-reviewed literature and most current trends around the particular subject. Students bring their breadth of knowledge to the discussion, and apply what they have learned over the course of their academic training to critically analyze the arguments and experiments presented in the literature. In most cases, students will be responsible for presenting a paper to the class, driving the content of discussion and debate with their fellow students and instructor. The capstone is a reading extensive experience, and, by definition, shows that the biology major is able to synthesize and apply their knowledge to examine interesting questions. Students enroll in this capstone seminar course (BI 0399) during their senior year. See course descriptions (p. 64) for topics.

Research and Internship Experience
Faculty research specializations provide opportunities for qualified students to participate in laboratory research, field research or library investigations in their chosen interest areas under a professor's guidance. Internships at off-campus institutions can also be arranged for qualified students. These opportunities expand and enhance the biology program's numerous possibilities for individualization.

Students intending to continue their studies in graduate school should consider participating in two or more terms of research. All on-campus research experiences require pre-arrangement with a faculty research advisor.

Off-campus research or internship experiences require an on-campus faculty mentor and approval from the department chair or internship director. Prior consultation is required to assure that the particular activity meets the requirements of the biology major curriculum.

The following research and internship experiences are extra courses and do not count towards the biology major degree requirements:

Biology Major with a Concentration in Evolution, Ecology, and Biodiversity
This concentration is intended for the cohort of students interested in pursuing academic and career paths in evolution, ecology, or conservation biology. Interested students should consult with Dr. Tod Osier for advisement and completion of appropriate paperwork.

As part of the six electives noted, students take four courses in the following areas:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BI 0260</td>
<td>Ecology</td>
<td>4</td>
</tr>
<tr>
<td>BI 0365</td>
<td>Evolutionary Biology</td>
<td>4</td>
</tr>
<tr>
<td>Select one biodiversity course from the following:</td>
<td>3-4</td>
<td></td>
</tr>
<tr>
<td>BI 0218</td>
<td>Vertebrate Zoology</td>
<td></td>
</tr>
<tr>
<td>BI 0362</td>
<td>Marine Invertebrate Zoology</td>
<td></td>
</tr>
<tr>
<td>BI 0366</td>
<td>Ornithology</td>
<td></td>
</tr>
<tr>
<td>Select one capstone course related to a topic in ecology, evolutionary biology, or conservation/diversity, or any other Ecology, Evolution, and Environmental Science Block course</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 14-15

Biology Major with a Concentration in Health and Human Biology
This concentration may be of interest to pre-health students, most of whom already select this set of courses as prerequisites or highly recommended courses for post-graduate programs (i.e. medicine, dentistry, veterinary science, pharmacy, physical therapy, physician's assistant, etc). Interested students should consult with Dr. Anita Fernandez for advisement and completion of appropriate paperwork.

As part of the six electives noted, students take four courses in the following areas:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BI 0107</td>
<td>Human Anatomy and Physiology I</td>
<td>3-4</td>
</tr>
<tr>

Select one course in cell biology or genetics: 4

BI 0261 Genetics
BI 0327 Cell Biology

Select one course in immunity and infection: 3

BI 0352 Fundamentals of Microbiology
BI 0356 Immunology
BI 0357 General Virology

BI 0324 Biochemistry I
BI 0325 Biochemistry II
BI 0330 Nutrient Metabolism

Total Credits 13-14

Biology Major with a Concentration in Marine Science

As part of the six electives noted, students take four courses from the marine sciences biology block. Interested students should consult with Dr. Diane Brousseau for advisement and completion of appropriate paperwork.

Select four courses from the following: 12

BI 0078 Introduction to Marine Science
BI 0362 Marine Invertebrate Zoology
BI 0399F Senior Capstone Seminar: Coral Reef Ecology
or BI 0399G Senior Capstone Seminar: Ecology of the North Atlantic Coast
or BI 0399H Senior Capstone Seminar: Principles of Aquaculture
BI 0391 Biology Research I
BI 0392 Biology Research II
BI 0393 Biology Research III
BI 0394 Biology Research IV
BI 0395 Biology Research V
BI 0396 Biology Research VI
BI 0397 Internship
BI 0398 Internship

Total Credits 12

Biology Major with a Concentration in Molecular Biology

As part of the six electives noted, students take four courses from the molecular, cell, and developmental biology block. BI 0325 Biochemistry II and BI 0356 Immunology may also be accepted. Interested students should consult with Dr. Phyllis Braun for advisement and completion of appropriate paperwork.

Biology Major with a Minor in Educational Studies and the Five-Year Teacher Education Program

Biology majors who elect a minor in Educational Studies and who have been admitted to the 5-year Integrated Bachelors-Masters Degree and Teacher Certification program should consult with Dr. Olivia Harriott, education advisor, and Dr. Ryan Colwell, director of the 5-year certificate program, to ensure that appropriate thought and reflection on their choices for upper division biology curriculum be made in assuring the best outcome for this unique 5-year program.

2 Various upper-level courses may be double-counted toward the departmental concentrations in molecular biology or marine science.

## Biology Minor

### Requirements

For an 18-20 credit minor in biology, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BI 0170 &amp; 0170L</td>
<td>General Biology I and General Biology I Lab</td>
<td>4</td>
</tr>
<tr>
<td>BI 0171 &amp; 0171L</td>
<td>General Biology II and General Biology II Lab</td>
<td>4</td>
</tr>
<tr>
<td>BI 0172 &amp; 0172L</td>
<td>General Biology III and General Biology III Lab</td>
<td>4</td>
</tr>
<tr>
<td>Any two 3- or 4-credit biology courses numbered 200 or greater from the biology block electives.</td>
<td>6-8</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18-20</td>
</tr>
</tbody>
</table>

Double counting is not allowed.

*Please note that many upper level biology courses require four semesters of Chemistry as prerequisites.*

### Black Studies

Black Studies is an interdisciplinary field that explores Africa and the African Diaspora (the global dispersion of people of African ancestry), including the Americas, Britain, and Europe. Thus, African Americans, Afro Caribbeans, Afro Asians, Afro Latinos, and Afro Europeans are among those whose histories and contributions are included in Black Studies. As an interdisciplinary program, Black Studies is devoted to scholarship on the histories, political and cultural movements, institution-building, and identities of people of African ancestry. It includes the exploration of the rich cultural heritage, legacy of resistance to oppressive structures, and unique perspectives on human rights supplied by peoples of African descent. The Black Studies curriculum includes courses in the humanities, social sciences, and natural sciences to provide students with an understanding of the far-reaching impacts of race and ethnicity across continents. By engaging in a comparative and theoretical examination of Africa and the African Diaspora, students will be equipped to undertake an interdisciplinary scholarly analysis of various complex global questions.

## Programs

### Courses

#### BL 0101 Black Lives Matter 3 Credits

**Attributes:** ASGW American Studies: Gateway, BSFC Black Studies Focus Course, BSSS Black Studies: Social and Behavioral Sciences, PJST Peace and Justice Studies, UDIV U.S. Diversity

In the context of Ferguson, Charleston, and other national crises, this course responds to the call of students from our campus community to raise questions about and critically reflect upon the failures of democracy to recognize the value of Black Life. This course employs collective thinking, teaching, and research to focus on questions surrounding race, structural inequality, and violence. It examines the historical, geographical, cultural, social, and political ways in which race has been configured and deployed in the United States. Various faculty will bring to bear their respective scholarly lenses so that students understand race and racism across intellectual disciplines.

#### BL 0398 Independent Study 1-3 Credits

**Attributes:** BSCP Black Studies Capstone Course

Upon request and by agreement with a professor in the program, a Black Studies minor may conduct a one-semester independent study on a defined research topic or field of study.

Catholic Studies

Catholic Studies is an interdisciplinary inquiry into the intellectual tradition, history and culture, both "high" and popular, of the Catholic Christian tradition. While the field of study includes religious questions and theological issues, it primarily follows a "cultural studies" model. In addition to courses on the Catholic Church and issues in Catholic theology, it examines the role of the Catholic tradition in history, in literature and the arts, in the history of science, and in cultural and ethical issues related to many fields of professional practice. Its purpose is to raise awareness of the distinctive contributions of the Catholic Church to religious, cultural intellectual issues throughout the last two thousand years.

The minor in Catholic Studies will explore the texts, traditions, themes, teachings, and cultural role of the Catholic Church from its inception to its contemporary expression. Particular attention will be paid to its place in contemporary America. This interdisciplinary program will enable students to study the Catholic tradition, its ethos, identity, and mission, as made tangible in history, philosophy, literature, theology, the visual and performing arts, the social and behavioral sciences, and the natural sciences.

Chemistry and Biochemistry
Modern chemistry is an interdisciplinary subject that integrates its own knowledge with that of physics and mathematics, and applies the result to solve problems in a wide variety of areas including the biological sciences and technology. The curriculum for chemistry majors emphasizes fundamental principles and applications. Courses develop critical thinking, problem-solving skills, and experimental technique in order to provide ample preparation for future study at the graduate level or in professional programs.

A bachelor of science in chemistry is a very flexible undergraduate major. In addition to a career in chemistry, this degree provides a base for study and practice of medicine, environmental science, forensic science, pharmacology, materials science, business, law, and more. A student pursuing a chemistry degree has many career options.

The Department of Chemistry and Biochemistry and its curriculum are certified by the Committee on Professional Training of the American Chemical Society (ACS). Certified programs are defined by high quality faculty, deep and broad curriculum, modern facilities, and modern instrumentation.

Programs
The bachelor of science degree in chemistry or biochemistry, with or without ACS certification, can be achieved by following the appropriate course sequence listed below. The first sequence describes the basic BS degree in chemistry. The second sequence is the preferred track for students seeking employment in the chemical industry or pursuing a Ph.D. in chemistry and includes ACS certification. The third major sequence is the BS in biochemistry, recommended for students interested in the pharmaceutical industry, medical or dental school, and the pursuit of a Ph.D. in biochemistry or related fields. The biochemistry sequence can also be ACS certified with the additional course work described. The ACS certified sequences feature more in-depth laboratory work and/or a greater emphasis on research.

<td>This course provides an introduction to the scientific techniques used for the analysis of common types of physical evidence encountered at crime scenes. Using critical thinking and laboratory experiences, students become crime scene investigators. They are charged with the task of solving a mock crime. The investigations include fabric analysis, ink analysis, blood analysis, DNA analysis, fingerprint analysis, ballistics, and/or blood alcohol analysis. The lecture part of the course focuses on exploring the underlying chemical principles behind the techniques and includes discussion of historical case studies. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor.</td>

<td>This course introduces basic chemical concepts, such as the atom, molecules, chemical reactivity and energy, as well as integrating fundamental biological concepts including cell structure and basic anatomy. Further explored, on a chemical level, are the structure and function of basic nutritional components: proteins, carbohydrate, lipids, vitamins, and minerals. With a scientific foundation established, topics pertaining to nutrition and human evolution, the life cycle, and exercise will be discussed. Current social and health issues such as obesity, food technology, and fad dieting will be incorporated throughout the course. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor.</td>

<td>This course provides an introduction to the scientific techniques used for the analysis of common types of physical evidence encountered at crime scenes. Using critical thinking and laboratory experiences, students become crime scene investigators. They are charged with the task of solving a mock crime. The investigations include fabric analysis, ink analysis, blood analysis, DNA analysis, fingerprint analysis, ballistics, and/or blood alcohol analysis. The lecture part of the course focuses on exploring the underlying chemical principles behind the techniques and includes discussion of historical case studies. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor.</td>
<td></td>
</tr>
<tr>
<td>CH 0072</td>
<td>Philosophy and Biochemistry of Food and Eating Practices</td>
</tr>
<tr>
<td>Prerequisite: PH 0101.</td>
<td></td>
</tr>
<tr>
<td>An essential component of our daily lives, food offers itself as one of the most interesting topics of cultural and scientific discussion. This course is designed to analyze food and eating practices from the twofold perspective of philosophy and biochemistry. The intersections of philosophy and biochemistry will be highlighted in topics such as &quot;Food as Art&quot; (juxtaposing the aesthetic and biomolecular properties of food) and &quot;Food in Culture&quot; (contrasting how societies prepare and eat food with the nutrition and technology of food science). The course combines lecture with activities such as trips to museums, guest lectures, and in-class laboratory activities. Note: Students may take either CH 0033 or CH 0072 as a core science requirement, but not both.</td>
<td></td>

</tbody>
</table>
CH 0076 Environmental Science 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
The science of the environment is presented through examination of the interconnections among physical, chemical, and biological fields of inquiry. This course looks at how the global environment is altered by the human population, technology, and production of fuels and food. In this course, students will acquire a scientific understanding of current issues in environmental science and learn to evaluate claims about current environmental problems.

CH 0083 Survey of Chemistry 3 Credits
This one-semester course presumes no previous chemistry and fulfills a science requirement. The course consists of an introduction to atomic and molecular structure and the correlation of structural models to observable phenomena. The course discusses topics of historical and current relevance to society, including environmental issues, energy sources, natural products, and the application of chemistry in industry and medicine. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor.

CH 0084 General Chemistry for Health Science 3 Credits
Attributes: EDCG Educational Studies Cognate, HSST Health Studies: Science and Technology
Corequisite: CH 0084L.
This course introduces the general principles of chemistry (matter and measurement, atomic and molecular structure, energetics, acids and bases, oxidation, and reduction) in a manner that prepares students to relate to properties of organic materials and biologically relevant substances such as carbohydrates, lipids, peptides, proteins, and nucleic acids. The course focuses on general principles and introduces organic and biologically relevant substances. This course is directed to School of Nursing students and students in the Health Studies minor.

CH 0084L General Chemistry for Health Science Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0084.
This lab illustrates lecture concepts of CH 0084 and allows students to observe relevant physical systems.

CH 0085 Chemistry, Energy, and the Environment 3 Credits
Attributes: EDCG Educational Studies Cognate, EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
This course explores the flow of energy in modern society from the perspective of chemistry. Topics include the fossil fuels coal, petroleum, and natural gas, followed by an exploration of alternatives, including biomass, hydro, solar, tidal, wind, and nuclear energy sources. Students consider the source of energy, how it is harvested, and the short- and long-term environmental consequences of using each energy source and how these consequences are determined. The course uses the concepts of bonding, thermodynamics, kinetics, and work to investigate these and related ideas. The course also discusses economic and political forces that shape our use of energy. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor.

CH 0086 Chemistry and Art 3 Credits
Attributes: EDCG Educational Studies Cognate
This basic chemistry course with a strong orientation to the visual arts fulfills a core science requirement. Basic concepts include atoms, molecules, elements, compounds, the periodic table, chemical bonding and reaction, acids and bases, oxidation and reduction, and polymers. The lab employs these concepts to examine aspects of art media such as light, color, dyes, paint, metals, stone, ceramics, glass, plastics, paper, and fibers. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor.

CH 0087 Molecules of Life 3 Credits
This course explores the modern science of biologically relevant compounds and substances, which exist at the intersection of chemistry, biology, and medicine. We examine the major molecular components of the cell - proteins, nucleic acids, lipids, and more - and illustrate the application of chemical principles to understanding their structure and function. Since our lives are increasingly influenced by the availability of new pharmaceutical agents ranging from drugs that lower cholesterol to those that influence behavior, we develop insights needed to understand drug action and consider the design of new ways to intercede in the disease process. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor.

CH 0111 General Chemistry I 3 Credits
Corequisite: CH 0111L.
This course, the first in a two-semester sequence, covers atomic and molecular weights, the mole concept, Avogadro's number, stoichiometry, energy relationships in chemical systems, the properties of gases, the electronic structures of atoms, periodic relationships among the elements, chemical bonding, geometrics of molecules, molecular orbitals, liquids, solids, intermolecular forces, solutions, rates of chemical reactions, chemical equilibrium, free energy, entropy, acids and bases, aqueous equilibria, electrochemistry, nuclear chemistry, chemistry of some metals and nonmetals, and chemistry of coordination compounds.

CH 0111L General Chemistry I Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0111.
This lab offers the opportunity to explore and experience the rigors of an experimental physical science. Students make and record observations on simple chemical systems while learning fundamental laboratory manipulative and measurement skills. Experiments demonstrate and supplement concepts introduced in lecture. The first semester emphasizes weighing, filtering, titrating, using volumetric glassware, observing data, and recording and synthetic techniques. The second semester integrates these techniques in experimental procedures and explores physical properties and quantitative analysis of selected chemical systems.

CH 0112 General Chemistry II 3 Credits
Attributes: HSST Health Studies: Science and Technology
Corequisite: CH 0112L.
Prerequisite: CH 0111.
This course, the second in a two-semester sequence, covers atomic and molecular weights, the mole concept, Avogadro's number, stoichiometry, energy relationships in chemical systems, the properties of gases, the electronic structures of atoms, periodic relationships among the elements, chemical bonding, geometrics of molecules, molecular orbitals, liquids, solids, intermolecular forces, solutions, rates of chemical reactions, chemical equilibrium, free energy, entropy, acids and bases, aqueous equilibria, electrochemistry, nuclear chemistry, chemistry of some metals and nonmetals, and chemistry of coordination compounds.
CH 0112L General Chemistry II Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0112.
This lab offers the opportunity to explore and experience the rigors of an experimental physical science. Students make and record observations on simple chemical systems while learning fundamental laboratory manipulative and measurement skills. Experiments demonstrate and supplement concepts introduced in lecture. The first semester emphasizes weighing, filtering, titrating, using volumetric glassware, observing data, and recording and synthetic techniques. The second semester integrates these techniques in experimental procedures and explores physical properties and quantitative analysis of selected chemical systems.

CH 0211L Organic Chemistry I Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0211.
This lab emphasizes the manipulative techniques of separation, purification, analysis, and simple syntheses.

CH 0212L Organic Chemistry II Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0212.
This course is a continuation of CH 0211 and presents the chemistry of aromatic, carbonyl, acyl, and nitrogen compounds. The course relates the chemical properties of naturally occurring substances such as carbohydrates, lipids, proteins, and nucleic acids to those of simpler monofunctional compounds. Spectroscopic methods of structure determination are introduced early in the course and used throughout.

CH 0222L Chemical Analysis Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0222.
Students explore quantitative aspects of chemistry through the analysis of unknowns and the characterization of chemical equilibrium, and pursue classical and instrumental methods of analysis.

CH 0211 Organic Chemistry I 3 Credits
Corequisite: CH 0211L.
Prerequisite: CH 0112.
This course, an introduction to the chemistry of carbon compounds, discusses common functional groups from the perspective of molecular structure. Areas of emphasis include structure and characterization, preparation or organic synthesis, and the relations of physical and chemical properties to molecular structure. Stereochemical concepts introduced early in the course are used throughout.

CH 0212 Organic Chemistry II 3 Credits
Corequisite: CH 0212L.
Prerequisite: CH 0211.
This course is a continuation of CH 0211 and presents the chemistry of aromatic, carbonyl, acyl, and nitrogen compounds. The course relates the chemical properties of naturally occurring substances such as carbohydrates, lipids, proteins, and nucleic acids to those of simpler monofunctional compounds. Spectroscopic methods of structure determination are introduced early in the course and used throughout.

CH 0222 Chemical Analysis 3 Credits
Attributes: EVME Environmental Studies Major Elective
Corequisite: CH 0222L.
Prerequisite: CH 0112.
This course provides the theoretical basis for the required laboratory. Topics include statistics, chemical equilibria and their analytical applications (acid-base, oxidation-reduction, complex formation, precipitation), electroanalytical chemistry, spectroanalytical chemistry, and chemical separations.

CH 0261L Physical Chemistry I Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0261L.
This course is the first of a two-semester sequence, covering thermodynamics of gasses, pure liquids, and both electrolyte and non-electrolyte solutions. Additional topics include chemical equilibrium, transport phenomena, reaction kinetics, quantum mechanics, spectroscopy, and statistical mechanics and statistical thermodynamics.

CH 0262L Physical Chemistry II Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: CH 0262L.
This course is the second of a two-semester sequence, covering thermodynamics of gasses, pure liquids, and both electrolyte and non-electrolyte solutions. Additional topics include chemical equilibrium, transport phenomena, reaction kinetics, quantum mechanics, spectroscopy, and statistical mechanics and statistical thermodynamics.

CH 0261 Physical Chemistry I 3 Credits
Corequisite: CH 0261L.
Prerequisites: CH 0112, MA 0146 or higher, PS 0116.
This course is the first of a two-semester sequence, covering thermodynamics of gasses, pure liquids, and both electrolyte and non-electrolyte solutions. Additional topics include chemical equilibrium, transport phenomena, reaction kinetics, quantum mechanics, spectroscopy, and statistical mechanics and statistical thermodynamics.

CH 0262 Physical Chemistry II 3 Credits
Corequisite: CH 0262L.
Prerequisite: CH 0261.
This course is the second of a two-semester sequence, covering thermodynamics of gasses, pure liquids, and both electrolyte and non-electrolyte solutions. Additional topics include chemical equilibrium, transport phenomena, reaction kinetics, quantum mechanics, spectroscopy, and statistical mechanics and statistical thermodynamics.

CH 0324 Biochemistry I 3 Credits
Prerequisite: CH 0212.
This course will investigate the fundamentals of life - chemistry. The structures and functions of biomolecules, including proteins, DNA, RNA, lipids, and carbohydrates will be covered in depth. The concepts behind biological processes will be discussed, including enzyme kinetics and regulatory strategies, membrane functions, signal transduction, and an overview of metabolism.

CH 0324L Biochemistry Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: BI 0324 or BI 0325 or CH 0324 or CH 0325.
This course will investigate classic and most current methodology used in biochemistry. A semester project will be used to introduce techniques used in biochemistry to investigate the structure and function of a protein. In characterizing this protein, the analysis of DNA, lipids and carbohydrates will also be covered.
This course introduces students to the interdependence of chemical bonding, spectroscopic characteristics, and reactivity properties of coordination compounds and complexes using the fundamental concept of symmetry. The principles of coordination chemistry will be introduced after reviewing atomic structure, the chemical bond, and molecular structure. A basic familiarity with symmetry will be formalized by an introduction to the elements of symmetry and group theory. The students will use symmetry and group theory approaches to understand central atom hybridization, ligand group orbitals, and the construction of qualitative molecular orbital (MO) energy diagrams including both sigma and pi bonding contributions. The students will continue to utilize their understanding of group theory during an introduction of electronic spectroscopy and the use of correlation and Tanabe-Sugano diagrams. MO diagrams will then be used as a starting point for understanding the reactivity properties of coordination complexes.

Notes:

- Students intending to enter primary or secondary school teaching should consult annually with the chairs of the departments of Chemistry and Education to facilitate scheduling of these curricula.
- Students intending to enter medical or dental school should consult with the Chair of the Chemistry Department and the Health Professions Advisor for appropriate modifications of this curriculum, which will include taking BI 0170 and BI 0171 in their first year in place of PS 0115 and PS 0116, which are then taken in the sophomore year.
- Students may elect to take CH 0324 Biochemistry I or CH 0341 Advanced Inorganic Chemistry in their junior year.
- Note that CH 0398 Research and Seminar is a research elective to be coordinated with individual faculty members. It may be taken for one, two, or three credits. Students may elect to take CH 0398 in the fall, spring, or both semesters of their senior year.
- Students are encouraged to participate in summer research experiences on or off campus. At the discretion of the Chemistry Department, involvement in summer research such as National Science Foundation Research Experience for Undergraduate Programs may be counted toward the research requirement for American Chemical Society certification. Each case will be evaluated individually by the department.
- All research for credit will be consistent with the American Chemical Society Committee for Professional Training guidelines.

1 May be taken either third or fourth year.
2 1-3 credits per semester. May be taken in fall, spring, or both semesters of the fourth year.

Biochemistry Major

Requirements

The biochemistry sequence places a greater emphasis on biochemistry and the life sciences. Students pursuing this track will be well prepared for professional schools in the life sciences, graduate schools in biochemistry and the more traditional fields of chemistry, as well as employment in chemical, environmental, or health-related fields.

For a major in biochemistry, students complete the following:

<table>

</tbody>
</table>

**ACS Certified Curriculum**

For a BS in biochemistry certified by the American Chemical Society, a student must take both Chemistry electives: CH 0326 and CH 0341 with labs.

Due to the additional lab component of the biochemistry major, CH 0398 is recommended but not required for the BS with ACS certification.

| **Credits**     |                                                      | 13-18   |
Classical Studies

The Program in Classical Studies provides students with a broad background in the history and culture of the Graeco-Roman world, and in the study of Latin and Greek as languages of high culture during and beyond Classical Antiquity, and in the reception of the Classical tradition by later cultures, both as an aid to their general cultural education and to assist them in their own major fields. Courses are offered in Latin and Greek, and in English translation.

The program also makes available, as a general service to the University, courses in English and the original languages for those interested in specific aspects of classical antiquity.

Programs

The Program in Classical Studies offers two minors. The 24-credit minor in Classics is intended for students wishing to focus on the ancient languages. The 15-credit minor in Classical Studies is a broader program, consisting of courses drawn from the program’s offerings and from related courses in other departments.

- Classical Studies Minor (p. 88)
- Classics Minor (p. 88)

Students may also design a major in Classical Studies. For more information, please consult the Individually Designed Major (p. 146) catalog section.

Biochemistry Minor

Note: The biochemistry minor is not intended for chemistry majors.

Courses

Classical Civilization

CL 0106 Masterpieces of Greek Literature in English Translation 3 Credits
Attributes: E_BF English Literature Before 1800
This course surveys major works of ancient Greek literature, emphasizing the content of this literature as a key to understanding classical Greek civilization and as meaningful in a contemporary context. This course may be taken to fulfill the core requirement in English literature.

CL 0107 Masterpieces of Roman Literature in English Translation 3 Credits
Attributes: E_BF English Literature Before 1800
This course surveys major works of Roman literature of the republic and early empire, emphasizing the content of this literature as a key to understanding Roman civilization, and as meaningful in a contemporary context. This course may be taken to fulfill the core requirement in English literature.

CL 0108 Myth in Classical Literature 3 Credits
This course introduces students to classical mythology through an examination of the diverse ways in which myth and legend are treated in the literatures of ancient Greece and Rome. Students read texts in English translation; knowledge of Greek or Latin is not required. This course may be taken to fulfill the core requirement in English literature.

CL 0109 Greek Tragedy in English Translation 3 Credits
This course surveys major works of ancient Greek literature, emphasizing their effect on the historical process in the period down to the death of Alexander. Knowledge of Greek is not required. This course may be taken to fulfill the core requirement in History.

CL 0115 Greek Civilization 3 Credits
This course surveys major works of ancient Greek literature, emphasizing their effect on the historical process in the period down to the death of Alexander. Knowledge of Greek is not required. This course may be taken to fulfill the core requirement in History.

CL 0116 Roman Civilization 3 Credits
Attributes: ISIC Italian Studies: Italy Component
Roman civilization spanned more than 1,000 years of history and culture, and influenced western society in profound ways. This course traces Rome’s development from a small local tribe to a world power, examining how it expanded and conquered the Mediterranean and absorbed into its culture aspects of the peoples it defeated. Knowledge of Latin is not required. This course may be taken to fulfill the 100-level core requirement in History.

CL 0127 Romantic Love in Greek and Roman Literature 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
The course of true love never did run smooth. From Homer’s Penelope to Ovid’s Remedies of Love we will examine the permutations of romantic desire and its frustrations in the literature of Greece and Rome. Readings also include selections from Sappho’s poetry, Sophocles’ Women of Trachis, Euripides’ Hippolytos and Medea, comedies by Menander and Terence, Catullus poems to Lesbia, Vergil’s tale of Dido and Aeneas, selections from the elegies of Tibullus Sulpicia, Propertius and Ovide, and briefer excerpts from other authors. All readings are in English translation. This course may be taken to fulfill the core requirement in English literature.
CL 0199 Special Topics (Shell)  3 Credits
This course explores a specific topic in the interdisciplinary field of classical studies. Content will vary in successive offerings of this course.

CL 0221 Hellenistic World, 336-30 BCE  3 Credits
Attributes: H_BF History Before 1750, H_EU European History, H_NW Non-Western History, WDIV World Diversity
Prerequisite: CL 0115 or CL 0116 or HI 0010.
The course examines the Mediterranean world and the ancient near east from the late fourth to late first centuries BC. Focus is on: the career of Alexander the Great; the Greek kingdoms that emerge after the collapse of his empire; the interaction between local cultures and religions - e.g. Egypt, ancient Judaism - and Greek civilization; the social history of daily life in conquered lands under Greek rule; and the transformations in the Hellenistic world with the arrival of Roman rule.

CL 0222 The Roman Revolution  3 Credits
Attributes: H_BF History Before 1750, H_EU European History, ISIF Italian Studies: Italy-Focused
Prerequisite: CL 0115 or CL 0116 or HI 0010.
This course presents a comprehensive study of the political, social, artistic, literary, and military transformation of Rome from the middle of the second-century B.C. through the reign of Augustus, with special attention given to Rome's response to the cultural and governmental challenges imposed by its growing empire and how its responses forever changed the course of Western civilization.

CL 0223 The Roman World in Late Antiquity, 284-642 AD  3 Credits
Attributes: H_BF History Before 1750, H_EU European History
Prerequisite: CL 0115 or CL 0116 or HI 0010.
The course examines the Mediterranean world from the third to seventh centuries AD. Focus is on: the collapse of the Roman Empire in western Europe; the dramatic upheavals caused by the arrival in the Roman Empire of the Visigoths, Vandals, and other barbarian tribes; the survival of the Byzantine East through the early Islamic conquests; the rise of Christianity from a persecuted religion to the official religion of the Roman Empire, and the accompanying cultural transformations, including the rise of monasticism and the importance of the holy man.

CL 0224 Byzantine World  3 Credits
Attributes: H_EU European History
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course is an introduction to political and social history of Byzantine Empire. It also highlights what Byzantium's role as a bridge between Greco-Roman antiquity and modern European civilization. Course lectures will cover Byzantium's origins in the eastern half of the Roman Empire, Byzantium's middle period as a major Mediterranean power, and its late period as an increasingly shrinking city-state. The course will also introduce students to some of the major Byzantine historians and to methods of analysis using these sources, and train students to form historical arguments based on these analyses.

CL 0325 Athenian Democracy and Empire  3 Credits
Attributes: H_BF History Before 1750, H_EU European History
Prerequisite: CL 0115 or CL 0116 or HI 0010; CL 0115 or CL 0116 or one 200-level History course.
This history seminar provides an in-depth exploration of classical Athens at the height of its power in the fifth century BC. Its focus is on close reading of the primary sources describing the rise and fall of Athens in this period. It places particular emphasis on the parallel rise of Athenian democracy at home and the Athenian empire overseas. It places secondary emphasis on the nature of Athenian intellectual discourse in this period. A final research project will engage modern scholarly debates on the nature of fifth-century Athens.

CL 0399 Capstone Project in Classics  3 Credits
Prerequisite: At least seven courses in the individually designed major. Students completing an individually designed major in classical studies develop and carry out a major project that allows them to pull together the multiple threads of their interdisciplinary major.

Greek
GR 0111 Elementary Attic Greek  3 Credits
Students study the grammar of Attic Greek. The course employs readings in easier authors to develop a practical reading knowledge of ancient Greek.

GR 0210 Intermediate Greek Readings I  3 Credits
Prerequisite: GR 0111.
This course includes intensive reading of selected authors of moderate difficulty in various genres, with extensive readings in translation, to give a survey of classical Greek literature.

GR 0211 Intermediate Greek Readings II  3 Credits
Prerequisite: GR 0210.
This course, a continuation of GR 0210, includes intensive reading of selected authors of moderate difficulty in various genres, with extensive readings in translation, to give a survey of classical Greek literature. The two-semester course fulfills the core requirement in foreign languages.

GR 0325 Advanced Greek Readings I  3 Credits
Prerequisites: GR 0210, GR 0211.
Involves extensive readings of selected works of ancient Greek literature.

GR 0326 Advanced Greek Readings II  3 Credits
Prerequisites: GR 0210, GR 0211.
Involves extensive readings of selected works of ancient Greek literature.

GR 0327 Advanced Greek Readings III  3 Credits
Prerequisites: GR 0210, GR 0211.
Involves extensive readings of selected works of ancient Greek literature.

GR 0328 Advanced Greek Readings IV  3 Credits
Prerequisites: GR 0210, GR 0211.
Involves extensive readings of selected works of ancient Greek literature.

Latin
LA 0111 Basic Latin  4 Credits
The course presents an intensive study of Latin grammar. Students who complete this course continue in LA 0210 and LA 0211.

LA 0210 Readings in Latin Prose and Poetry I  3 Credits
For students with a high school background or the equivalent in Latin, this course fills out that background through extensive readings in the principal authors and genres not read in high school.

LA 0211 Readings in Latin Prose and Poetry II  3 Credits
Prerequisite: LA 0210.
A continuation of LA 0210, this course fills out that background through extensive readings in the principal authors and genres not read in high school.

LA 0321 Latin Poetry I  3 Credits
Prerequisite: LA 0211.
Involves extensive readings of selected authors of Latin poetry.

LA 0322 Latin Poetry II  3 Credits
Prerequisite: LA 0211.
Involves extensive readings of selected authors of Latin poetry.
LA 0323 Latin Prose I
Prerequisite: LA 0211.
Students undertake extensive readings of selected Latin prose authors in this course.

LA 0324 Latin Prose II
Prerequisite: LA 0323.
Students undertake extensive readings of selected Latin prose authors in this continuation of LA 0323.

</table>

Total Credits 24

Appropriate courses used for the minor in Classics may also be used to simultaneously fulfill the core requirements in History, Philosophy, Arts, English Literature, and/or Modern and Classical Languages.

Communication

Communication envelops our lives. It shapes our ideas and values, gives rise to our politics, consumption and socialization, and helps to define our identities and realities. Its power and potential is inestimable. From briefest of text messages to grandest of public declarations, we indeed live within communication and invite you to join us in appreciating its increasing importance in contemporary society. From Twitter and reality television to family relationships and workplace dynamics, communication is about understanding ourselves, our media, our relationships, our culture and how these things connect.

Programs

The Department of Communication offers two majors and minors: Communication and Public Relations.

• Communication Major (p. 94)
• Communication Minor (p. 95)
• Public Relations Major (p. 95)
• Public Relations Minor (p. 97)

Double Major and Minor Configurations

• Public Relations Major with Communication Minor: Students must complete all Public Relations major requirements, plus four additional Communication courses. CO 0200 must be completed. CO 0399 does
not count toward the four additional Communication courses. 45 credits total.

- Communication Major with Public Relations Minor: Students must complete all Communication major requirements, plus five additional courses. CO 0102, CO 0201, and CO 0324 are required if not taken as part of the Communication major. CO 0399 cannot be repeated. 45 credits total.

- Public Relations and Communication Double Major: Students must complete all Public Relations major requirements, plus eight additional Communication courses, including CO 0100 and CO 0200. CO 0399 cannot be repeated. 57 credits total.

### Independent Study and Internship Policies

The Department of Communication offers credit for independent study, CO 0397, to highly self-motivated communication and public relations majors in their junior or senior year of studies. Interested students must discuss and document their independent study proposals with a member of the communication faculty before registering for credit. As an elective course recommended only for the most motivated students, CO 0397 does not satisfy any requirements in the communication or public relations majors (or minors), but counts towards graduation.

The Department of Communication also sponsors an active internship program for qualified (2.8 overall GPA) junior and senior majors. Students may earn no more than six internship credits. One three-credit internship course, CO 0399, can be used in fulfillment of the final elective requirement in the Communication or Public Relations majors. Communication and public relations majors interested in applying for an internship complete the departmental internship application form before registering for CO 0399.

### Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO 0100 Human Communication Theories</td>
<td>3</td>
<td>This course introduces major theoretical perspectives that inform communication scholarship. This foundational course for the major emphasizes understanding human communication as a symbolic process that creates, maintains, and alters personal, social, and cultural identities. Students critique research literature in the communication field in this course, which is a prerequisite for the 200- and 300-level communication courses. This course counts in the social and behavioral sciences core curriculum for non-majors.</td>
</tr>
<tr>
<td>CO 0101 Argument and Advocacy</td>
<td>3</td>
<td>This introduction to public speaking and the advocacy process includes topic identification; methods of organization, research, selection, and arrangement of support materials; audience analysis and adaptation; patterns and fallacies of reasoning; uses of evidence; logical proof; and refutation. Students practice and critique informative and persuasive presentations in this course, which is a skill required in all 200- and 300-level communication courses.</td>
</tr>
<tr>
<td>CO 0102 Introduction to Public Relations</td>
<td>3</td>
<td>This course introduces public relations as a field of study and a practice. Through building critical thinking and considering ethical behaviors, this course will not only introduce you to the various types of public relations but will also help you to become a critical consumer of the public relations efforts taking place in the world around you while developing your own public relations tools and strategies.</td>
</tr>
<tr>
<td>CO 0130 Mass Media and Society</td>
<td>3</td>
<td>Attributes: GDCO Graphic Design: Communication. This media literacy course offers theoretical and practical tools to critically analyze media texts, as well as understand different ways in which audiences interact with them. Students will inquire into how the pervasive mediation of human experience through mass communication channels affects almost every aspect of socialization processes and people’s symbolic environment. The interplay between structural constraints conveyed in media’s messages and humans’ capacity to exercise interpretive agency is addressed through lectures, audiovisual examples, hands-on activities, and a variety of assignments aimed at discerning the elements that intervene in the construction and reception of media texts, beyond their apparent components. This course counts in the social and behavioral sciences core curriculum for non-majors.</td>
</tr>
<tr>
<td>CO 0200 Interpersonal Communication Theories</td>
<td>3</td>
<td>Prerequisite: CO 0100. An examination of one-to-one relationships from a variety of theoretical perspectives, this course focuses on the centrality of communication in building familial bonds, friendships, and work teams. Students examine factors influencing interpersonal communication such as language, perception, nonverbal behavior, power, status, and gender roles.</td>
</tr>
<tr>
<td>CO 0201 Persuasion</td>
<td>3</td>
<td>Prerequisite: CO 0100 or CO 0102. This course develops students’ understanding of the major theoretical approaches to the study of persuasion as a particular type of social influence, giving specific attention to the processes of interpersonal influence and the media’s role in changing social attitudes. Students construct communication campaigns to apply persuasion concepts and skills.</td>
</tr>
<tr>
<td>CO 0202 Small Group Communication</td>
<td>3</td>
<td>Prerequisite: CO 0100 or CO 0102. This course examines the basic characteristics and consequences of small-group communication processes in various contexts including family, education, and work groups. The course stresses interaction analysis and teambuilding. Because the course involves examining small groups in process, students do a substantial amount of group work.</td>
</tr>
<tr>
<td>CO 0220 Introduction to Organizational Communication</td>
<td>3</td>
<td>Attributes: BUEL Business Elective. Prerequisite: CO 0100 or CO 0102. Taking a historical and communication-centered approach to understanding how business and professional organizations function, this course addresses the analysis of upward, downward, and lateral communication; communication channels and networks; power and critical theory; organizations as cultures; internal and external public communication; and leadership. The course uses a case study approach.</td>
</tr>
<tr>
<td>CO 0231 Media Institutions</td>
<td>3</td>
<td>Attributes: ENDE Digital Journalism Elective Prerequisite: CO 0130. The course concentrates on the economic, political, and legal environment of U.S. mass media. Issues include examination of individual media industries, the economic structure of U.S. media markets, media law and regulation, media watchdogs, advocacy organizations, and media users’ forms of collective action. The course’s content is approached through an institutional analysis perspective, intended to facilitate students’ understanding of institutions as dynamic points of confluence for organizations, norms, and individual agents. As part of the course’s requirements, students conduct a research project exploring recent developments and/or decision-making processes within one of the major media institutions covered during the semester.</td>
</tr>
</tbody>
</table>
CO 0233 Information Technologies: Economics, Law, and Policy  3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: CO 0130.
An in-depth exploration of current issues and trends that shape the institutional environment of information industries and new media, both domestically and globally. By digesting and analyzing a diversity of scholarly sources, news reports, and materials generated by multiple stakeholders, students will gain a critical perspective on major economic, legal, and policy questions that affect the production, access to, circulation, and processing of digital content, such as broadband penetration, regulation of intellectual property, crowdsourcing, privacy, surveillance, net neutrality, emerging revenue models for information goods, and regulation and governance of the Internet.

CO 0236 Gender, Sexuality, and Media  3 Credits
Attributes: UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: CO 0130.
This course enables students to examine the relationship between the representation of women and the development of personal and social identity. Students explore issues of gender and reception, cultivating consumerism, body image, and developing relevant new images through theoretical readings as well as the analysis of various media, including television, film, magazines, and advertisements. The course also covers the experiences of women in a variety of media professions.

CO 0237 Sports, Media, and Culture  3 Credits
Prerequisite: CO 0130.
Sports have long played a vital yet complex role in culture and this course examines the intersection of sports, the mass media, and society. Drawing upon Durkheimian theory, we will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary films, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance - and deconstruct the hype - that accompanies modern sports.

CO 0238 Communication and Popular Culture  3 Credits
Attributes: ASCO American Studies: Communication
Prerequisite: CO 0130.
This course takes the cultural artifacts that engulf us, from fashion to television and from music to comic books, and removes these practices and texts from simply being "entertainment" or "diversion" and asks what these things mean, how they constitute power, and how they shape and reflect the lived experiences of consumers. This course takes very seriously those things that are typically discarded as lacking substance and instead suggests that the meanings and impact of popular culture have dramatic consequences for political, social, and cultural life in the United States.

CO 0239 Consumer Culture  3 Credits
Attributes: UDIV U.S. Diversity
Prerequisite: CO 0130.
This course explores how social meanings are constructed through commodities and material society, how consumer goods and practices create categories of social difference. In particular, the course focuses on the intersections of consumer practices and gender/sexuality, race and class, articulating the relationship between communication and consumption practices and social/cultural identities. Theoretical approaches include Marxism, Postmodernism, and other economic and social critiques, and explore research methods to empirically investigate questions of culture. Students reflect on questions of social justice in relation to an increasingly materialistic society as they seek to become citizens prepared to "consume with a conscience."

CO 0240 Intercultural Communication  3 Credits
Attributes: UDIV U.S. Diversity
Prerequisite: CO 0100 or CO 0102 or IL 0050.
This course deals with challenges to communication between people of different cultural backgrounds, emphasizing the ways communication practices reveal cultural values and the role of communication in creating and sustaining cultural identities. Students discuss how differences in value orientation, perception, thought patterns, and nonverbal behavior cause misunderstanding, tension, and conflict in business, education, and healthcare settings. Registration preference is given to Communication and International Studies majors.

CO 0241 Communication and Culture: East and West  3 Credits
Attributes: WDIV World Diversity
Prerequisite: CO 0100 or CO 0102 or IL 0050.
This course examines the dynamics of culture and communication focusing on the East-West dyad. It helps students gain a better understanding of why and how cultural issues influence our communication. The course explores the East-West cultural similarities and differences in values, communication processes, cognition, and relationships. It will enhance students' intercultural awareness and sensitivity in our increasingly globalized society.

CO 0242 Alcohol, Addiction and Culture  3 Credits
Attributes: HSSS Health Studies: Social Science
Prerequisite: CO 0100 or CO 0102.
From the time we are young children through our adult lives we are exposed to countless alcohol advertisements and engage in myriad alcohol-focused conversations with family, friends and coworkers. This course draws on perspectives from the personal to the institutional to critically examine the conversations on alcohol consumption, promotion, education and recovery from a health communication perspective. Through service learning opportunities with local high school seniors, students in the course reflect on the ways in which we talk about alcohol use, abuse, and alcoholism, and how that "talk" cultivates harmful and helpful perceptions and behaviors.
CO 0245 Identities, Discourse, and Social Change  3 Credits
Attributes: BSFC Black Studies Focus Course, BSSS Black Studies: Social and Behavioral Sciences, PJST Peace and Justice Studies, UDIV U.S. Diversity, WSGC Women, Gender, and Sexuality Studies: Gender Component
Prerequisite: CO 0100.
Grounded in the premise that identities are inseparable from communication, this course focuses on the negotiation of, and the discursive practices pertaining to, social identities by exploring the intersections of ethnicity-race, gender, sexuality, social class, ability and age. Given that individual-group differences matter, this course addresses social issues and concerns by concentrating on how structures of power and privilege shape understandings of salient social identities within the United States. Additionally, this course will raise questions about the role of communication research in fostering social change.

CO 0246 Family Communication  3 Credits
Attributes: UDIV U.S. Diversity; WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: CO 0100 or CO 0102.
In this course students come to understand how families are constituted through symbolic processes and interaction; explore the verbal and non-verbal communication behaviors that are preferred and differ in different kinds of families; learn various theories for understanding family interactions at the individual, dyadic, group, and systems levels; analyze family communication patterns using established theories and methods; connect family dynamics to social trends and processes including the roles of the mass media and popular culture; and explore ways culture, class, gender, and sexuality affect and are affected by family structures, roles, and communication patterns.

CO 0248 Health Communication  3 Credits
Attributes: HSSS Health Studies: Social Science
Prerequisite: Sophomore standing.
This course surveys the multidimensional processes used to create, maintain, and transform complex scientific information into everyday healthcare practices. A major emphasis is on the processes and complexities of communicating health information in a variety of settings (in hospitals, families, insurance companies, policy organizations, etc.) and through different channels (face-to-face, in medical records, through the mass media, etc.). We will study the verbal and non-verbal communication behaviors of providers, patients, families, insurers, and others in healthcare contexts, as well as health-related messages in the mass media, in order to understand effective and problematic communication about illness and health.

CO 0309 Research Projects in Communication: Capstone  3 Credits
Prerequisites: CO 0100 or CO 0102, CO 0101, CO 0130, CO 0200 or CO 0220, senior standing, and at least one intermediate or advanced course in student's area of concentrated study.
This course allows students to demonstrate their expertise as communication scholars through discussion and evaluation of contemporary research in communication. The course examines qualitative and quantitative methodologies in understanding the research design process. As members of research teams, students design and conduct research projects related to their areas of concentrated study. This is the required major capstone course.

CO 0321 Communication Processes in Organizations: Negotiation  3 Credits
Attributes: EVAP Environmental Studies: Applied Professional Skills
Prerequisites: CO 0220; junior or senior standing.
This course reviews and explores, through simulation and experiential learning, negotiation as a communication process in and among organizations. It focuses on core concepts and approaches to negotiation, and exercises the negotiative process in a contemporary context. In this course, which is open to majors and minors in communication and other disciplines related to the study of humans and their organizations in the work world, participants carry out individual and team work, and contribute on time and proportionately to team preparations and class simulations.

CO 0322 Leadership Communication  3 Credits
Prerequisites: CO 0220; junior or senior standing.
This course examines the processes and complexities of being a leader in today's dynamic organizational environment. The course explores the leadership styles, traits, and communication skills required of effective leaders. In addition, theories of leadership and the impact of culture and ethics, both historically and currently, will be studied. This course uses a combination of lecture, discussion, individual and group learning opportunities, including interviews of professional and community leaders, as well as a written and oral research projects to aid in students' assimilation of the material.

CO 0323 Gender and Organizing  3 Credits
Attributes: WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisites: CO 0220; junior or senior standing.
Gender is central to how we organize our lives. The way we communicate about gender can enhance or undermine all of our relationships. The purpose of this seminar is to augment, or even change, our understanding of the relationship between gender, communication, and organizations. Specifically, the goal for this course is to use a combination of scholarly essays and journal articles as well as popular news media to examine critically topics such as femininity, masculinity, and sexuality within the following contexts: education, sports, politics/government, leadership, the military, and other professions and organizations.

CO 0324 Crisis Communication  3 Credits
Attributes: HASM Humanitarian Action Minor Skills/Method Course
Prerequisites: CO 0200 or CO 0220; junior or senior standing.
This course discusses key concepts, principles, and best practices of crisis communication. Intersections with other areas of the communication field will also be addressed, including public relations and organizational and risk communication. Students will understand the role of strategic communication, power, stakeholders, and organizational culture play during a crisis. This course analyzes case studies of previous crises and will ask students to provide their own plans and critical assessments of recent crises.

CO 0325 Organizational Communication and Advertising  3 Credits
Prerequisites: CO 0220; junior or senior standing.
This course will highlight how organizations market, promote, and advertise their brands. The importance of advertising for organizations, consumers, and the U.S. economy will also be a central focus of this class. Furthermore, the critical roles of research, audience analysis, persuasion, and effective communication in altering consumers' perceptions will be explored from both theoretical and applied perspectives. The value of deconstructing ads from a consumer, brand manager, and advertiser's viewpoint will be stressed and explored. In addition, the historical and contemporary ethical implications of advertising, especially in health care and for children, will be closely examined.
CO 0326 Palliative Care Communication in the United States and Ireland  3 Credits
**Prerequisite:** Junior or senior standing.
This is an interdisciplinary, intercultural course that applies a bifocal (communication and healthcare) lens to the study of palliative care. The course is intended to explore this relatively new area of health care delivery (quality of life vs. cure) and the critical role communication plays in accomplishing the interdependent goals of providers, patients, and families in the United States and Ireland. Since palliative care should be for all chronically- and/or terminally-ill patients across the life cycle, students will critically examine, from both health care and communication perspectives, the differences in palliative care delivery in the United States and Ireland. Open to students with majors or minors in Communication, Health Studies, Nursing, Public Health, or Public Relations, as well as Health Professions students.

CO 0329 Contemporary Topics in Organizational Communication 3 Credits
**Prerequisites:** CO 0220; junior or senior standing.
This is an upper-level, undergraduate seminar for students in the Organizational Communication emphasis of the major. The course provides an opportunity to examine in depth particular theories of organizational communication, or to conduct research about communication in particular types of organizations. Emphasis is on contemporary theoretical and/or methodological approaches to the close analysis of interpersonal, group, and intercultural communication in organizational settings, or strategic communication practices of organizations with their external audiences/publics. Topics may include: Organizational Communication in the Global Economy; Communication in Healthcare Organizations; Gender and Communication in Organizations; and Communication in Organizational Crisis. Students may take this course up to two times with different topics.

CO 0330 Misinformation in Digital Media  3 Credits
**Prerequisites:** CO 0130; junior or senior standing.
This course critically examines the causes for, and the consequences of, the proliferation of false and misleading information in online spaces. While the ubiquity of false information online is often talked about as if it is random or inevitable, this class will detail the specific mechanisms by which false information is produced, spread, and consumed. More importantly, it will contextualize the practice within larger social, culture, and geopolitical environments and connect it to the larger history of misinformation and media technologies. Finally, the course will prepare students to combat false and misleading information encountered in their own media diets.

CO 0331 American Media / American History  3 Credits
**Attributes:** ENDE Digital Journalism Elective
**Prerequisites:** CO 0130; junior or senior standing.
This course explores the role of communication media in history, as well as the history of the media industries. From the earliest media of symbolic interaction to the newest technologies, the course examines why different media come into being, how they function in various societies, and their impact. Students come to understand how media have been influential in maintaining social order and as agents of change. The course pays attention to a variety of national media and international perspectives, with special emphasis on the evolution of American broadcasting.

CO 0332 Children as Media Consumers  3 Credits
**Prerequisites:** CO 0130; junior or senior standing.
This course aims to provide a forum for advanced Communication students to explore the patterns of children's media consumption, focusing primarily on children's use of the so-called "screen media" (television, videogames, and the Internet), and to investigate the multi-faceted consequences -- both positive and negative, social and individual -- of children's media consumption. Students will draw upon contemporary theories of communication to assess the content of children's media and its "effects" on children as a particular segment of the audience. Students will develop an informed understanding of children as media consumers, advocating for the production of "quality" content in children's media.

CO 0333 News Media and Democracy  3 Credits
**Attributes:** ENDE Digital Journalism Elective
**Prerequisites:** CO 0130; junior or senior standing.
The news media play an essential role in changing America and the world -- by bridging theory with practice, this course aims to equip students to become critical news consumers with a skilled understanding of how that works and politically literate about the big issues of our time. Through classic scholarly reflections as well as contemporary punditry, we will tackle the news media "critically" across three dimensions: learning about its indispensable function in mediating politics and democracy throughout history and today; studying and practicing the craft of opining writing and social advocacy; and evaluating and critiquing the performance of the press in these matters.

CO 0334 Comparative Media Systems  3 Credits
**Attributes:** ENDE Digital Journalism Elective
**Prerequisites:** CO 0130; junior or senior standing.
This course provides a comparative overview of the economic and regulatory structure of media industries worldwide. By exploring the ways in which different institutional frameworks, structural factors, and audiences' agency affect mass communication within and across regional borders, this course offers a comprehensive picture of common and interdependent processes underlying the individual development of media industries in each region. Students learn about emerging market and research trends concerning international media. Issues related to free flow of messages, social responsibility, universal access, intellectual commons, participatory communication, developmental communication, and cultural diversity in the global exchange of media messages through discussion of current, real-life cases, as well as through design and execution of an original research project.

CO 0335 Globalization, Media, and Culture  3 Credits
**Prerequisites:** CO 0130 or IL 0050; junior or senior standing.
Globalization, a complex and transformative process that influences our lives at every level, has produced the increased flow of goods, capital, people, knowledge, images, crime, pollutants, drugs, fashion, viruses, and beliefs across territorial and ideological boundaries of all kinds. This course focuses on the role of communication media (radio, television, film, computers) in the processes of globalization and examines the impact of globalization on cultural representations, cultural identity, and international relations.
CO 0336 Social Media 3 Credits
Prerequisites: CO 0130; junior or senior standing.
At the turn of this millennium, social media was still an unknown term; today, it is inescapably altering the landscape of our world and our lives in complex ways. This course examines social media by historicizing what is timeless about it and charting its new frontiers for humankind. Through a mix of scholarly, journalistic, and professional industry readings on social media, we will explore how culture, community, and identity are being reshaped alongside politics, business, and (what was once called) the mass communication industry.

CO 0337 Visual Communication 3 Credits
Attributes: GDCO Graphic Design: Communication
Prerequisite: CO 0130; junior or senior standing.
This course provides a broad introduction to the structure, conventions, and effects of visual communication with a theoretical emphasis on media ecology. The first half is devoted to understanding formal properties including examining the basics of vision, techniques for visual persuasion, and the language of cinematography and editing. The second half surveys more controversial issues like digital manipulation and violence and sex in media. Course material and assignments will be drawn from media domains including advertising, photo/video journalism, and video games. Students will read both theoretical contributions to and empirical investigations of the field.

CO 0338 Media Audiences 3 Credits
Attributes: UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: CO 0130; junior or senior standing.
This course has three related aims: to introduce the theoretical and academic study of media audiences, to introduce students to qualitative field research methods, and to prepare students to engage with the current media industry through an examination of applied audience research. Recognizing that the study of media audiences is an important theoretical as well as practical endeavor, we will consider how audiences have been studied historically, in the academy, and within media industries.

CO 0339 Topics in Media Theory and Criticism 3 Credits
Prerequisites: CO 0130; junior or senior standing.
This course provides an opportunity to examine in depth particular media theories or to conduct careful media analysis and criticism. The course emphasizes contemporary theoretical and/or methodological approaches to the close analysis of television, radio, newspaper, the Internet, and/or magazine texts so as to understand the ways meaning is constructed and situated within the larger social context. Topics may include mass media and the public sphere; television criticism; sex, lies, and videos; and children and the media. Students may take this course up to two times with different topics.

CO 0340 Conflict Communication 3 Credits
Prerequisites: CO 0200 or CO 0220; junior or senior standing.
Conflict is a natural part of human life that has a variety of potential consequences. Although conflict can be disruptive and destructive, it can also be constructive and lead to improved adjustment and better decisions. The course is designed to offer you opportunities to enhance and improve your techniques and skills in managing conflict and moving them in a productive direction. The course examines the dynamics of human conflict across a variety of settings from personal relationships to the workplace, with special attention to the communication processes that escalate, manage, and mediate conflict.

CO 0341 End of Life Communication 3 Credits
Attributes: HSSS Health Studies: Social Science
Prerequisites: Junior standing.
This course focuses on the only reality for every human being: death. However, in spite of its certainty, American culture tends to minimize or ignore discussions of death and provides little insight into effective communication strategies for healthcare providers, family members, friends, and lovers. The complexities of this unique communication will be assessed vis-à-vis an applied approach that includes a service-learning opportunity at a 51-bed hospice. In addition, the course will include self-reflection, autoethnography, an exploration of scholarly research in palliative communication, and scholarly interaction between undergraduate students in the classroom and the hospice setting.

CO 0342 Technoculture and Information Society 3 Credits
Prerequisites: CO 0130; junior or senior standing.
This course explores phenomena, trends, and theories related to emerging information and communication technologies (ICTs), as well as relationships among those technologies, socio-economic structures, “old” media institutions, media users, and culture. Through a combination of theoretical and practical explorations that emphasize historical, ethical, and critical thinking, the course introduces students to academic and non-academic perspectives on new media.

CO 0343 Ethics and Medical Marketing Communication 3 Credits
Attributes: HSSS Health Studies: Social Science
Prerequisites: Junior standing.
This course will explore the dialectical tensions between the need for safe and effective products/services and the expectations for corporations to generate profits and dividends for their stakeholders. This course will use an applied ethics lens to examine the organizational, marketing, advertising, and corporate communication to clients, consumers, vendors, and investors. The content and ethical implications of marketing communication (from a variety of organizational perspectives: healthcare, economics, cultural, etc.) on expected and unintended outcomes will also be discussed and analyzed.

CO 0344 Interracial Communication 3 Credits
Attributes: BSFC Black Studies Focus Course, UDIV U.S. Diversity
Prerequisite: CO 0200; junior or senior standing.
This course focuses on the ways in which communication theories and research can improve the existing state of race relations in the United States. Throughout the course, up-to-date issues that surface locally and nationally in the media that illustrate the relevance of improved interracial communication will be addressed through class discussion and linked to course assignments. Using case studies to explore interracial exchanges in close relationships, at the workplace, and reflected in social media, students will link theory with practical applications in an effort to better understand interracial communication.

CO 0345 Relational Communication 3 Credits
Prerequisites: CO 0200 or CO 0220; junior or senior standing.
Close relationships can bring us a great deal of joy, happiness, and love, but unfortunately they can also be sources of frustration, pain, and conflict. This course is designed to help us understand the critical role of communication in developing, maintaining, and terminating close relationships with romantic partners, friends, and family members. The course examines the most current research and theory on a variety of topics that are central to understanding and maintaining close relationships, with a focus on attraction, attachment, conflict, power, emotion, transgression, reconciliation, and termination.
CO 0346 Communication and Spirituality 3 Credits
Prerequisites: CO 0200; junior or senior standing.
This course engages a critical understanding of the way in which spirituality is constructed through communication. Using the unique perspectives and empirical tools of the communication discipline, the course seeks to familiarize students with the variety of ways in which spirituality has been studied both within and outside of religion. Examining various contexts that engage spiritual discourses, from interpersonal communication settings to organizational, health and mass mediated settings, students reflect on the potential for spiritual discourses to transform individuals and society, and consider their own participation in such discourses.

CO 0347 Communication in Healthcare Organizations 3 Credits
Attributes: HSSS Health Studies: Social Science
Prerequisites: Junior standing.
This course explores the organizational communication of modern U.S. healthcare organizations, including: Managed Care, Insurers, Healthcare Systems, and Medicare/Medicaid. The primary purposes of this course are to provide an understanding of how communication within, and from healthcare corporations impacts the organization, its employees, the health of its customers and U.S. healthcare delivery. This course will evaluate and explore the multidimensional processes involved in healthcare organizations and how communication is critical to their success or failure and to the health and well-being of their customers.

CO 0348 Health Risk Communication 3 Credits
Attributes: EVAP Environmental Studies: Applied Professional Skills
Prerequisites: Junior standing.
Risk Communication examines the communication theories and research that underlie the study of risky behaviors and the development of effective responses to perceived risks. This course provides an understanding of how communication impacts our assessment of risk, critical thinking and policy making about risk prevention and response, and the creation of preventive programs and campaigns. Students will evaluate and explore the multidimensional processes involved in researching and responding to sustained risks or emergency situations, utilize communication theory to develop appropriate campaigns, and assess their success or failure. Topics may focus on health and environmental risks, security, or disaster response.

CO 0349 Special Topics (Shell) 3 Credits
Prerequisites: CO 0200, CO 0220, CO 0240; junior or senior standing.
This course focuses on a specific context where social identities are negotiated through particular discursive practices, emphasizing the verbal and nonverbal communication behaviors that are appropriate in this context and through which people constitute and perform their identities. The course examines symbolic practices and communication norms in families, self-help groups, television talk shows, cyber communities, social movements, and genders/sexualities, using approaches such as symbolic convergence theory, social constructivism, ethnography of communication, and conversational analysis. Students may take this course up to two times with different topics.

CO 0397 Independent Study 1-3 Credits
Prerequisite: Junior or senior standing.
This course allows students to thoroughly investigate communication concepts, theories, or issues presented in a previously completed communication course. Independent study does not substitute for any other required course(s) in the communication program and students’ investigations must be scholarly in intent. An independent study may be taken no more than twice. Enrollment by permission only.

CO 0399 Internship 1-3 Credits
Prerequisite: Junior or senior standing.
Communication internships provide students with first-hand knowledge about the field of work, allow them to experience new professional activities and relationships, help them apply conceptual knowledge and skills in communication in the work environment, and allow them to experience the problems and successes of efficiently and effectively communicating within a complex organization. One three-credit internship course can be used toward the major. Students may take an internship twice for credit. Students must have a GPA of 2.8 or higher.

Communication Major

The study of Communication at Fairfield University focuses on the description and analysis of how humans acquire, process, and use information in a variety of contexts. As one aspect of a liberal education, undergraduate work in communication helps students:

- Become more aware of factors that influence and are influenced by human communication behavior and media practices.
- Develop intellectually by providing a basis from which to analyze, synthesize, and critically evaluate messages from varied sources, including the media.
- Learn techniques and strategies to propose policies, advocate positions, and persuasively express themselves in various contexts in the pursuit of a more just society.

Communication courses engage students actively in understanding interaction in interpersonal, organizational, public, mediated, and cultural contexts. Students who successfully complete the Communication major will be able to:

1. Recognize the centrality of communication in constructing, sustaining and transforming meaning, identities, relationships, communities and cultures.
2. Apply communication theories and concepts to everyday face-to-face and computer-mediated interactions.
3. Demonstrate critical thinking in argumentation, research, and message creation.
4. Demonstrate oral and written competencies in building and evaluating arguments, and designing, conducting, and reporting original communication content and research.

Requirements

To earn a 30-credit major in Communication, students follow a program of study designed to develop breadth and depth of knowledge about communication processes in a variety of contexts. The Communication major consists of ten three-credit courses. All Communication majors complete a set of five required courses known as Communication Foundations. With the aid of the Communication faculty, students have the ability to focus their studies in several areas of interest and to develop a personalized trajectory that best suits their theoretical and applied interests. Communication majors are strongly encouraged to complete minors related to their areas of interest, to continue their foreign language beyond the intermediate level, to study abroad, and to pursue internships that allow for applied learning of theoretical material.

Students are encouraged to meet with faculty advisors to design a comprehensive academic plan that takes advantage of the varied offerings in the Communication Department as well as from complementary majors, minors and programs across the University.

Possible interest areas that can be pursued through a major in communication include media studies, organizational communication, and the human condition, intercultural communication, critical and cultural studies, interpersonal communication, and other interest areas determined in consultation with a faculty advisor. Students should note that course offerings vary from semester to semester. Additionally special topics courses as well as new course offerings may be developed from semester to semester that would complement particular areas of interest. The Communication Department Handbook for Majors, available on the University website, provides more specific suggestions regarding courses relevant to specific areas of interest.

The requirements of the communication foundations and the areas of interest are detailed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO 0100</td>
<td>Human Communication Theories</td>
<td>3</td>
</tr>
<tr>
<td>CO 0101</td>
<td>Argument and Advocacy</td>
<td>3</td>
</tr>
<tr>
<td>CO 0130</td>
<td>Mass Media and Society</td>
<td>3</td>
</tr>
<tr>
<td>CO 0200</td>
<td>Interpersonal Communication Theories</td>
<td>3</td>
</tr>
<tr>
<td>CO 0309</td>
<td>Research Projects in Communication: Capstone</td>
<td>3</td>
</tr>
</tbody>
</table>

**Communication Foundations**

All majors must select five additional Communication courses, at least one of which must be a 300-level course (that does not include internships, independent studies or capstone experiences).

**Total Credits** 30

1. CO 0100 and CO 0101 are the foundational courses in the communication major. Students should plan to take both courses during the same semester, preferably during their first or second year. CO 0100 and CO 0101 should be completed before taking the 200- and 300-level communication courses.
2. Students should plan to enroll in CO 0130 and CO 0200 after successful completion of CO 0100 and CO 0101. CO 0130 and CO 0200 need not be taken during the same semester.
3. Students complete CO 0309, the required capstone course, during their senior year.

**Notes**

- With the approval from the Department Chair, double majors may "double count" up to two courses from their second major as communication electives. Some second major and minor programs may also choose to "double count" communication courses to satisfy the second major or minor requirements. Students should check with those second major or minor chairs for approval.
- CO 0399 Internship may be counted toward the major one time only. Although two internships can be completed for academic credit (up to six credits), only three credits will count toward the communication major.
- Independent studies do not count toward the communication major.
- Special topics courses (CO 0329, CO 0339, and CO 0349) can each be taken twice for credit if the titles of the courses are different.

**Communication Minor**

To earn a 15-credit minor in Communication, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO 0100</td>
<td>Human Communication Theories</td>
<td>3</td>
</tr>
<tr>
<td>CO 0101</td>
<td>Argument and Advocacy</td>
<td>3</td>
</tr>
<tr>
<td>CO 0130</td>
<td>Mass Media and Society</td>
<td>3</td>
</tr>
<tr>
<td>CO 0200</td>
<td>Interpersonal Communication Theories</td>
<td>3</td>
</tr>
<tr>
<td>One additional 200- or 300-level Communication course</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits** 15

1. Communication minors may not enroll in CO 0397 Independent Study or CO 0399 Internship.

Note: Communication majors receive priority registration for all Communication courses.

**Public Relations Major**

The study of Public Relations at Fairfield University focuses on clear, effective and ethical communication that creates change and advocates for those with the least access to wider audiences. The study of public relations is not simply about press releases or “spin,” but instead about understanding how various communication channels and platforms are used to effectively communicate. Public Relations at Fairfield University is concerned with ethical argument and advocacy, clear writing, understanding interpersonal relationships, and thinking critically about how to shape stories aimed at specific stakeholders.

By completing a major in public relations students will be able to:
1. Apply the principles of primary and secondary research to public relations situations.
2. Apply basic public relations theories and principles to practice.
3. Create effective public relations plans across media platforms utilizing clear and effective writing.
4. Deliver clear and effective presentations.
5. Create ethically sound and socially responsible public relations plans.
6. Synthesize broader liberal arts knowledge in the service of public relations plans.
7. Identify optimal means of communication across various media platforms and channels, audience and situational contexts.
8. Critically evaluate the work of others for clarity, appropriate style, ethical soundness and sensitivity.

### Requirements

The major in Public Relations is a demanding 33-credit course major for undergraduate students that will engage students in the study of strategic communication and prepare students for a broad range of careers. The Public Relations major consists of eleven three-credit courses. All public relations majors complete a set of seven required courses known as public relations foundations. Public relations majors must also complete one writing course, one ethics course, and two electives. With the aid of the communication faculty, students have the ability to focus their studies in several areas of interest and to develop a personalized trajectory that best suits their theoretical and applied interests. Public Relations majors are strongly encouraged to complete minors related to their areas of interest, to continue their foreign language beyond the intermediate level, to study abroad, and to pursue internships that allow for applied learning of theoretical material.

Students are encouraged to meet with faculty advisors to design a comprehensive academic plan that takes advantage of the varied offerings in the Communication Department as well as from complimentary majors, minors and programs across the University to fulfill their public relations major.

1. See the list of electives (p. 96) in the Public Relations major. A writing course is highly recommended.

### Economics

The Arts and Sciences curriculum of the Department of Economics blends basic economic concepts and their applications with contemporary issues. Courses develop reasoning capacity and analytical ability in students. By focusing on areas of application, students use economic principles to stimulate their powers of interpretation, synthesis, and understanding. The department's individualized counseling encourages majors to tailor their study to career and personal enrichment goals. A major in economics provides an excellent background for employment in the business world while maintaining the objectives of a liberal education. The economics degree pairs nicely with a wide variety of double majors and minors, including finance, math, international studies, area studies, and other social sciences. In fact, many economic elective courses "double count" towards other major, minor, and core requirements. Economics majors regularly use a variety of up-to-date analytical tools, including Microsoft Excel and PowerPoint, and are introduced to Stata, a sophisticated statistical package. The economics major also prepares students for actuarial work and for advanced study in graduate or professional schools.

### Learning Outcomes for Economics Students

By the end of their degree programs, students who major in Economics should be able to use models, within an institutional framework, to understand and evaluate economic outcomes. These are the expected goals and student learning outcomes of the degree programs.

#### Goal I:

Describe concepts and apply them to real world issues.

**Outcomes:** Students will be able to:

- Use economic theory to explain historical and current economic events.
- Demonstrate how economic theory can be applied in different market and institutional settings to solve problems.

#### Goal II:

Use qualitative and/or quantitative models to interpret the impact of public policy choices.

**Outcomes:** Students will be able to:

- Identify how economic policies can be utilized to overcome market inadequacies.
- Evaluate the success or failure of policies designed to achieve intended economic outcomes.

---

### Notes:

- No course that counts toward the Public Relations major can be applied to "double count" for the University core.
- With the approval from the Department Chair, **double majors** can "double count" up to two courses from their second major as public relations electives. Some **second major and minor programs** may also choose to "double count" public relations courses to satisfy the second major or minor requirements. Students should consult those second major or minor chairs for approval.
- Internships (CO 0399) can be counted toward the major only once. Although two internships can be completed for academic credit (up to 6 credits), only 3 credits will count toward the Public Relations major.
- Independent studies do not count toward the Public Relations major.
- Special topics courses (CO 0329, CO 0339, and CO 0349) can each be taken twice for credit if the titles of the courses are different.
• Construct economic arguments using quantitative and non-quantitative forms of evidence.

Goal III:
Acquire quantitative skills to analyze data and use that data and analysis to support logical positions.

Outcomes: Students will be able to:
• Build data-gathering skills in order to analyze an economic argument that they find, or to design and present their own economic argument.
• Use Excel or other statistical software packages to analyze economic data.
• Formulate empirically testable hypotheses.

Goal IV:
Understand the trade-offs between efficiency and equity that are made as resources are allocated among economic actors.

Outcomes: Students will be able to
• Appraise various market models and resulting resource allocations.
• Use welfare measures to analyze economic tradeoffs.
• Identify the challenges of promoting and securing economic growth, and appraise the resulting impact on resource and income distribution.

Notes
The BA and BS degrees in the College of Arts and Sciences differ in the level of emphasis placed on quantitative analytical techniques. The BS degree has greater emphasis on Goal 3 above. The BA degree has greater emphasis on policy analysis, which is articulated in Goal 2.

The BS degree in the Dolan School of Business with a major in Economics has greater emphasis on Goals 1 and 3, which incorporate applications to real world settings and quantitative analysis.

Programs

College of Arts and Sciences
• Economics Major - Bachelor of Arts (p. 101)
• Economics Major - Bachelor of Science (p. 101)
• Economics Minor (p. 102)

Dolan School of Business
• Economics Major - Bachelor of Science (p. 267)

Courses

EC 0011 Introduction to Microeconomics 3 Credits
This course analyzes the behavior of individual consumers and producers as they deal with the economic problem of allocating scarce resources. The course examines how markets function to establish prices and quantities through supply and demand, how resource costs influence firm supply, and how variations in competition levels affect economic efficiency. Topics may include antitrust policy, the distribution of income, the role of government, and environmental problems. The course includes computer applications.

EC 0012 Introduction to Macroeconomics 3 Credits
This course develops models of the aggregate economy to determine the level of output, income, prices, and unemployment in an economy. In recognition of the growing importance of global economic activity, these models incorporate the international sector. The course examines and evaluates the role of public economic policy, including fiscal and monetary policy. Topics may include growth theory and price stability. The course includes computer applications.

EC 0112 Economic Aspects of Current Social Problems 3 Credits
Attributes: LCEL LACS Minor: Elective
This course uses a policy-oriented approach to study contemporary economic issues. Topics include government spending, the role of federal budgets in solving national problems, poverty, welfare, social security, population, the limits to growth controversy, pollution, energy, and regulation.

EC 0114 The Economics of Race, Class, and Gender in the American Workplace 3 Credits
Attributes: EDCG Educational Studies Cognate, EDDV Educational Studies Diversity, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
This course examines the impact of race, class, and gender differences on decisions made in households and in the workplace. It begins with an in-depth analysis of labor supply decisions and responsibilities of households, moving to an examination of labor demand decisions and wage-rate determination. The course reviews applications of theoretical predictions as they relate to important public policy issues such as child and elder care, social security, pay equity, the glass ceiling, affirmative action, sexual harassment, and poverty.

EC 0120 Environmental Economics 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science, LCEL LACS Minor: Elective, WDIV World Diversity
This course, which presents an overview of the theory and empirical practice of economic analysis as it applies to environmental issues, first establishes a relationship between the environment and economics. It then develops the concept of externalities (or market failures) and the importance of property rights before exploring the valuation of non-market goods. It examines the practice of benefit-cost analysis and offers economic solutions to market failures, while highlighting pollution control practices, especially those based on incentives. Throughout, the course examines current issues regarding environmental protection around the globe.

EC 0140 Health Economics 3 Credits
Attributes: HSSS Health Studies: Social Science
This course begins by applying microeconomic theory to the health sector of the U.S. economy. The U.S. experience will be generalized to global health issues and alternative health care systems. Topics include the demand for health care and health insurance, managed care and the role of government, physician compensation, and specialty choice, the role of nurses and other healthcare professionals, the hospital sector, and medical cost inflation.
EC 0150 Media Economics 3 Credits
This course analyzes the operation and consumption of the music, television, and entertainment industries within a microeconomic framework. Students will learn what forms of competition drive the production and distribution of media in the context of a changing technical environment. Theories of different media market settings will be illustrated and then concepts reinforced by real-world examples, including the changing operation of music production and distribution as the internet evolves, and the ways in which current media companies integrate seemingly different products. To explain these processes the topics of competition, pricing, industry structures, and regulatory environments will be explored.

EC 0152 Economics of Sport 3 Credits
This course develops and examines the tools and concepts of economic analysis as they apply to the sports industry. Topics in professional sports include free agency, salary cap, and new franchises. The course also explores economic issues and institutional structures of sports such as golf and tennis, and the broader industry including the National Collegiate Athletic Association, sports equipment, advertising, minor leagues, and the Olympics. Students gain an increased understanding of how economics affect them through this combination of sports and economics.

EC 0185 Regional Economic Development 3 Credits
This course includes two key components: a theoretical examination of the basic theories of regional economic development such as growth poles, spillovers, infrastructure requirements, and center-periphery analysis; and an application of these theories to a specific economic issue. Students participate in a comprehensive study of a significant economic issue facing a Connecticut community, in cooperation with a regional agency, resulting in detailed analysis of the issues and potential solutions. Fieldwork is required.

EC 0204 Intermediate Microeconomic Theory 3 Credits
Prerequisite: EC 0011.
This course builds upon and expands the theoretical models of EC 0011. The course introduces indifference curves to explain consumer behavior; short- and long-run production functions, showing their relationship to product costs; and the efficiency of various competitive market structures. Topics include marginal productivity theory of income distribution, monopoly, and general equilibrium theory.

EC 0204L Intermediate Microeconomic Theory Lab 1 Credit
Corequisite: EC 0204.
In this lab, students actively engage in the science of economics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer simulations. Note: This lab is required of all students pursuing the BS in economics; it is optional for students earning the BA.

EC 0205 Intermediate Macroeconomic Theory 3 Credits
Prerequisite: EC 0012.
This course, which includes computer applications, analyzes the determination of national income and output; fiscal and monetary tools; and growth, inflation, and stabilization policies.

EC 0205L Intermediate Macroeconomic Theory Lab 1 Credit
Corequisite: EC 0205.
In this lab, students actively engage in the science of economics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer simulations. Note: This lab is required of all students pursuing the BS in economics; it is optional for students earning the BA.

EC 0210 Money and Banking 3 Credits
Attributes: BUEL Business Elective
Prerequisite: EC 0012.
This course covers the commercial banking industry, the money market, Federal Reserve operations and policy making, and monetary theory.

EC 0224 Labor Economics and Labor Relations 3 Credits
Prerequisites: EC 0011, EC 0012.
Nearly 70 percent of income earned in the United States is a return to labor. This course applies the fundamentals of microeconomic and macroeconomic analysis to important decisions that people make in labor markets. From an employee’s perspective, questions include: Should I work in exchange for a wage? If so, how much? How will my work affect my lifestyle and family decisions? Should I go to school to improve my skills? From an employer’s perspective, questions include: Should I hire workers? If so, how many? How should I pick workers out of a pool of applicants? What techniques should I use to provide incentives for these workers? Many of the answers to these questions require complex analysis and an understanding of the impact of government policy on the workplace. The course explores a variety of public policy issues such as minimum wage programs, government welfare programs, workplace regulatory requirements, Title IX, immigration, and the union movement.

EC 0225 Environmental Economics 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science, P JUST Peace and Justice Studies
Prerequisites: EC 0011, EC 0120.
This in-depth examination of the economic tools used in environmental economics and policymaking builds on basic environmental economic concepts and provides the opportunity to put those concepts into practice. The course explores common externalities and market failures in the United States and analyzes governmental policies used to control them.

EC 0230 Comparative Economic Systems 3 Credits
Attributes: LCEL LACS Minor: Elective, WDIV World Diversity
Prerequisites: EC 0011 or EC 0012.
Is communism dead? Is capitalism the only real economic system left? This course explores the various economic systems that are used to distribute resources, i.e., to decide “who gets what” in a nation’s economy. The course considers the differences between alternative distribution mechanisms, what it means to transition from one system to another, and how these economic decisions are affected by political and national realities. Because there are so many international alternatives to be explored, each semester focuses on an economic region of the globe: Asia, Eastern Europe and Central Asia, Africa, or Latin America. This course, where appropriate, is available for credit in international studies or area studies programs.

EC 0231 International Trade 3 Credits
Prerequisite: EC 0011.
This course covers international trade theory, U.S. commercial policy (tariffs, quotas), common markets, trade with and among developing nations, balance of payments disequilibria, and multinational enterprises.

EC 0233 International Economic Policy and Finance 3 Credits
Prerequisite: EC 0012.
This course explores international financial relations. Topics include the international monetary system, exchange rate systems, balance of payments adjustment mechanisms, and changes in international finance relations. It treats theoretical concepts and considers governmental policy approaches to the various problems.
This course considers the nature and causes of problems facing low-income nations, with a focus on the impact that various economic policies have on promoting economic development.

**EC 0250 Industrial Organization and Competitive Strategy** 3 Credits
**Prerequisites:** EC 0011. Using microeconomic theory, this course examines the economic behavior of firms and industries, identifying factors affecting the competitive structure of markets and using these structural characteristics to evaluate the efficiency of resource use. Topics include mergers, measures of concentration, pricing, entry barriers, technological change, and product development.

**EC 0278L Economic Statistics Lab** 1 Credit
**Corequisite:** EC 0278. In this lab, students actively engage in the science of statistics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer applications appropriate to statistical analysis. Note: This lab is required of all students pursuing the BS in economics; it is not required for students earning the BA.

**EC 0290 Mathematical Economics** 3 Credits
**Prerequisites:** EC 0011, EC 0012, MA 0016. This course applies mathematical models and concepts to economic problems and issues. Mathematical techniques include calculus and matrix algebra. Economic applications include the areas of consumer theory, theory of the firm, industrial organization, and macroeconomic modeling.

**EC 0298 Independent Study** 1-3 Credits
For economic majors only, this course is open to seniors by invitation or mutual agreement with the instructor.

**EC 0299 Internship** 3 or 4 Credits
Students, placed in a professional environment by the department, use economic and analytical skills acquired from their courses in a non-academic job setting. Students submit a written assignment detailing their internship experience to a faculty sponsor by the end of the term. Enrollment by permission only.

**EC 0320 Financial Markets and Institutions** 3 Credits
**Prerequisite:** EC 0210. Topics include capital markets, financial intermediaries, equities, bonds, options, futures, security analysis, portfolio theory, and the efficient markets hypothesis. Students manage a hypothetical portfolio and use a computer model.

**EC 0380 Econometrics** 3 Credits
**Prerequisites:** EC 0011, EC 0012, MA 0016. This course introduces students to the process used to formulate theories of economic behavior in mathematical terms and to test these theories using statistical methods. The course discusses the technique and limitations of econometric analyses as well as methods available for overcoming data problems in measuring quantitative economic relationships.

**EC 0397 Microeconomics Seminar** 3 Credits
This seminar seeks to familiarize participants with recent developments in the discipline and sharpen research skills. Students complete a research project concerning a topic of their choice. The course includes computer applications. Enrollment by permission only.

**EC 0398 Macroeconomics Seminar** 3 Credits
This seminar seeks to familiarize participants with recent developments in the discipline and sharpen research skills. Students complete a research project concerning a topic of their choice. The course includes computer applications. Enrollment by permission only.

Investigative Learning Experience

Starting with the Class of 2021, students who complete either the BA or BS degrees in Economics will complete an Investigative Learning Experience as a graduation requirement. This written assignment will ask graduating students to reflect on their learning in the economics major, and to make connections across courses and other experiences, such as internships or study abroad. Students will write up these reflections as a paper and submit it to the department chairperson before graduation.

Economics Major (BS in CAS)

Requirements

With its emphasis on mathematical skills and statistical analysis, the Bachelor of Science in Economics prepares students for quantitative applications of economic theory as practiced in actuarial work, economic research, or graduate studies in economics. Students who complete this degree are urged to couple it with a minor in mathematics.

For a 33-credit Bachelor of Science degree in Economics, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EC 0011</td>
<td>Introduction to Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>EC 0012</td>
<td>Introduction to Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>EC 0204</td>
<td>Intermediate Microeconomic Theory</td>
<td>3</td>
</tr>
<tr>
<td>EC 0205</td>
<td>Intermediate Macroeconomic Theory</td>
<td>3</td>
</tr>
<tr>
<td>EC 0278</td>
<td>Economic Statistics</td>
<td>3</td>
</tr>
<tr>
<td>EC 0290</td>

<td>3</td>
</tr>
<tr>
<td>Select three elective courses in Economics</td>
<td></td>
<td>9</td>
</tr>
<tr>
<td>Total Credits</td>
<td>33</td>
<td></td>
</tr>
</tbody>
</table>

A grade of C or better is necessary in the required courses for the Bachelor of Science degree. No more than two 100-level courses may be counted toward the requirements of the major.

Economics majors are urged to take MA 0119 and MA 0120 (Applied Calculus I & II) or MA 0171 and MA 0172 (Calculus I & II) to fulfill their core mathematics requirement. Any questions about math requirements should be directed to the chair. Students in the BS track must earn a B- average in the Intermediate Theory sequence to proceed in the BS program.

Investigative Learning Experience

Starting with the Class of 2021, students who complete either the BA or BS degrees in Economics will complete an Investigative Learning Experience as a graduation requirement. This written assignment will ask graduating students to reflect on their learning in the economics major, and to make connections across courses and other experiences, such as internships or study abroad. Students will write up these reflections as a paper and submit it to the department chairperson before graduation.
Economics Minor

The economics minor complements a wide variety of majors. Students are able to apply the skills and theory learned in introductory courses to their primary areas of interest.

For a 15-credit minor in Economics, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EC 0011</td>
<td>Introduction to Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>EC 0012</td>
<td>Introduction to Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Select three elective courses in Economics</td>
<td>9</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>15</td>
</tr>
</tbody>
</table>

No more than one 100-level economics course may be counted toward the minor.

Education

The Educational Studies and Teacher Preparation Department, located in the Graduate School of Education and Allied Professions (GSEAP), in close collaboration with the College of Arts and Sciences, offers a minor in Educational Studies open to all interested undergraduates and a Five-Year Integrated Bachelor’s-Master’s Degree and Teacher Certification Program for students with approved majors in the College of Arts and Sciences. Candidates are advised by the faculty advisors in their majors and by faculty in the Department of Educational Studies and Teacher Preparation.

Undergraduates wanting to declare a minor in Educational Studies should meet with the Program Director as early in their studies as possible. Anyone interested in applying to the 5-Year Program must first declare the minor. Decisions for formal admission to the Five-Year Integrated Bachelor’s-Master’s Degree and Teacher Certification Program are made by March 15 and October 15 for Level I and Level II. Information sessions for the minor in Educational Studies and the Five-Year teacher education program are offered each semester, and the faculty of the Educational Studies and Teacher Preparation Department are available for individual advising by appointment throughout the year.

Teacher Education

Candidates interested in pursuing certification to teach Elementary Education (Grades 1-6) or Secondary Education (Grades 7-12) can do so through one of two 5-year Bachelor and Master of Arts Programs in Teacher Education. The Teacher Education Programs prepare scholar-practitioners who have the knowledge, skills, and dispositions to enact meaningful connections between theory and practice, promote a developmental model of human growth and learning, exercise ethical professional judgment and leadership, and advocate for quality education for all learners. As members of an inclusive community of learners, we (university faculty, experienced and aspiring classroom teachers, and community members and leaders) work together to create and sustain exemplary learning environments that empower 1-12 students to become engaged, productive citizens in their communities. Across all programs, our foci for inquiry and action include the socio-cultural and political contexts of education and schooling, the complexities of teaching and learning, teacher work and professional cultures, culturally relevant understandings of human growth and development, and socially responsible uses of technology in schooling and society.

Descriptions of all the required education undergraduate and graduate courses are found in the GSEAP catalog. Descriptions of undergraduate courses are found under appropriate departmental course listings.

Program Description

To be admitted to the Five-Year Integrated Bachelors-Master’s degree teacher education programs, students must first declare the minor in Educational Studies; successfully earn 45 credits; maintain a minimum GPA of 2.67 and 3.0 GPA in their certification major.

There are two phases of the admission process to the Five Year Program: Level I and Level II. Admission to Level I does not guarantee admission to Level II.

To be admitted to the undergraduate phase of the teacher education program (Level I), students must:

1. Declare a minor in Educational Studies.
2. Major in an approved discipline within the College of Arts and Sciences.
3. Successfully earn 45 credits.
4. Possess and maintain a minimum of 2.67 overall GPA.
5. Maintain a 3.0 GPA in their major
6. Complete Level I Application to the undergraduate phase of the Five-Year Program (available on GSEAP website or from the program director).
   a. Meet with the Director of the Five-Year Program and appropriate Educational Studies & Teacher Preparation Program faculty to discuss major and minor requirements.
   b. Submit an application as early as spring of sophomore year and no later than spring of junior year.
   c. Application components:
      i. Level I application
      ii. Essay
      iii. Official transcript
   d. Submit complete application to ESTP Graduate Assistant in CNS 116A by posted deadline.

Admission

To be admitted to the graduate phase of the Five-Year Program (Level II). Students must do the following by February 1 of their senior year:

1. Apply online via Fairfield University Graduate Admissions to the Five-Year Master’s Program, specifying which teacher education track they are pursuing.
2. Application components include:
   a. Application form and fee
   b. Admission interview with program faculty
   c. Proof of updated fingerprinting & background check
   d. Two letters of recommendation: one from faculty member in academic major and one from person in education-related field
   e. Resume
   f. Record of Immunizations
   g. Essay
   h. Official transcript (minimum cumulative GPA of 2.67 and 3.0 in major)
and be nominated by the chair of the Educational Studies and Teacher Preparation Department. To apply, obtain a nomination form from the Connecticut Office of Higher Education’s website (http://www.ctdhe.org).

**Courses**

**Education**

**ED 0200 Explorations in Education: Introduction to Teaching, Learning, and Schooling** 3 Credits

**Attributes:** UDIV U.S. Diversity

In this course, students/candidates discover how education is accomplished in schools through the social construction of teaching and learning. Through participant observation, service learning, reflections, assigned readings, class discussions and collaboration, candidates contribute positively to student learning in local schools and communities with diverse (socioeconomic, linguistic, race/ethnicity) populations, understand the complexities of schooling from multiple insider perspectives, and engage in the process of discerning whether to pursue a career in education. Successful completion of this course is one of the prerequisites for admission to the teacher education program. Approximately 25 hours of service in a local school is required.

**ED 0241 Educational Psychology** 3 Credits

This course considers a particular application of the more important psychological principles to educational theory and practice, embracing a systematic study of the educable being, habit formation, phases of learning, intellectual and emotional growth, and character formation. The course, which includes a 15-hour field experience in an approved, ethnically diverse public school setting, also examines individual differences, transfer of training, interest, attention, and motivation insofar as they influence the teaching process.
ED 0329 Philosophy of Education: An Introduction 3 Credits
This course applies the basic concepts of philosophy to education in general and to contemporary education theory in particular to acquaint educators with philosophical terminology, to improve the clarity of their thinking, and to encourage personal commitment to their own life philosophies. It also provides the opportunity to ask fundamental questions about the aims and purposes of education and schooling in a multicultural democratic society; the ethical dimensions of the teaching/learning relationship; the effects of poverty and injustice on the lives of young people, their families and communities; and the role of the imagination in transforming the world. A range of philosophical perspectives will be explored including Jesuit Education/Ignatian Pedagogy, Deweyan Progressive education, and Freirian Critical Pedagogy. This course includes an optional service learning experience in an approved, ethnically diverse school setting.

ED 0350 Special Learners in the Mainstream 3 Credits
This course familiarizes the mainstream professional with the special learning needs of children and youth with intellectual and developmental disabilities, learning disabilities, emotional disturbances, severe disabilities, multiple disabilities, and those who are gifted and talented. Topics include methods of identifying and working effectively with children and youth with special learning needs in the regular classroom; the roles and responsibilities of counselors, psychologists, educators, and ancillary personnel as members of a multidisciplinary team in planning educational services for exceptional learners; and laws that impact on assessment, placement, parent and student rights, and support services. This course may require a fieldwork component as part of the evaluation process. Note: This course is not for those pursuing an initial certificate or cross-endorsement in special education; it is for general educators and students in affiliated fields of study.

Educational Technology
MD 0300 Introduction to Educational Technology 3 Credits
This course covers the principles and applications of technology literacy in education. Topics include designing effective teaching strategies and environments conducive to learning; application of media and computer technologies in teaching; the use of the Web in teaching K-12; Microsoft Office applications; developing home pages; evaluating software; and examining new technologies for education. A field experience is included in this course.

Germain-Williams, Director of Teacher Education

Educational Studies Minor

The minor in educational studies provides an expanded opportunity for Fairfield University undergraduates to incorporate the study of education into their undergraduate living and learning experiences, whether as prospective teachers or as prospective citizens, or to enhance their preparation as policy makers, practicing professionals or scholars in other fields.

Eligibility for the minor requires completion of 30 credits. Some course work may require fingerprinting and a background check. Please check with course instructor or program director for more information.

1. Must differ from your diversity course choice.
2. Elementary education candidates are required to take one of the state-approved U.S. History courses.

Note: Biology majors and minors may use any 200- or 300-level biology lab course to satisfy the cognate course for the minor in educational studies.

Certain courses taken to fulfill the minor in educational studies may be used to fulfill requirements for the undergraduate core and US or World diversity requirements. Some may also be used to fulfill requirements for a major.

A passing grade of B or better in student teaching is required.

### English

“What do you read, my lord?”

“Words, words, words.”

As Hamlet’s reply to Polonius amply indicates, we live in a world of words - written, spoken, read, recited, analyzed, debated. In the English department, students learn to appreciate the inherent value of reading and writing, to value the beauty and power of language. At the same time, our students are trained to sharpen their skills for an ever-competitive job market by developing the ability to write clearly and persuasively, to think critically and creatively, and to engage in thoughtful analysis, skills that are essential to success in our contemporary, global marketplace.

While there are many ways to pursue English studies, we have some basic goals that apply to all of our many, varied programs. These goals include the ability to:

- Read, analyze and interpret texts, including imaginative literatures, in their relevant cultural, historical, and theoretical contexts.
- Compose texts for a range of audiences and purposes, using effective rhetorical approaches and appropriate media.
- Demonstrate information literacy, such as recognizing the need for sources and locating, evaluating, and using the needed information.
- Employ knowledge of disciplinary methods and standards common to English Studies.

#### Programs

- Digital Journalism Major (p. 123)
- Digital Journalism Minor (p. 124)
- English Major (p. 125)
  - Concentration in Creative Writing
  - Concentration in English Studies
  - Concentration in Journalism
  - Concentration in Literature
Courses

Introductory Core Courses
EN 0011 - EN 0012
Students gain experience with college reading and writing strategies, including the processes of invention, revision, editing, and publication. They practice inquiry, reflection, critical thinking, and argumentation through the reading and composing of increasingly complex texts across a range of academic and literary genres and audiences. Students gain experience with academic research projects and make connections to writing across the Core Curriculum. Core Writing students prepare rich, multi-artifact portfolios to record and demonstrate their development as readers, writers, and thinkers at the college level.

Literature Courses
EN 0100 - EN 0199
English courses at the 100-level are introductory courses appropriate for the University Core Curriculum requirement for non-majors and as the first literature course for majors. If students identify a 200-level or 300-level literature course that they wish to take instead of a 100-level course to fulfill the University Core Curriculum requirement, they can request permission from the instructor to take that course instead.

EN 0200 - EN 0299
Students must complete the EN 0011 - EN 0012 sequence and one 100-level literature course before enrolling in 200-level literature courses. Students may also receive permission of the instructor to take a 200-level literature course without first completing a 100-level course.

EN 0300 - EN 0399
Students must complete at least one 100-level or 200-level literature course before enrolling in 300-level literature seminars.

Writing Courses
EN 0012 or equivalent is a prerequisite for all ENW courses unless otherwise noted.

Course Descriptions

EN 0011 Texts and Contexts I: Writing as Craft and Inquiry 3 Credits
This course introduces students to the many kinds of reading and writing they will do across the curriculum and beyond. Students learn to draft, revise, and edit their own texts and respond effectively to the texts of their peers. The course offers practice with writing and reading assignments that call on different contexts (purposes, audiences, forms, or modes). Through the careful use of primary and secondary sources, students will foster their academic curiosities, practice reflection, and read deeply to join the conversation of ideas. Designated sections may satisfy the U.S. or world diversity requirement.

EN 0012 Texts and Contexts II: Writing About Literature 3 Credits
Prerequisite: EN 0011.
This course builds on the reading, writing, and critical inquiry work of EN 0011, focusing on the development of increasingly sophisticated reading, writing, researching and inquiry skills through the exploration of literary texts and their contexts. Students will practice close reading techniques, be introduced to key terms and concepts in literary study, and practice writing in a variety of academic and creative genres. The course is intended to foster greater appreciation for the power of literature and literary study as a foundation to all the liberal arts.

EN 0101 Introduction to Literary and Cultural Studies 3 Credits
Attributes: E_AF English Literature After 1800, WDIV World Diversity
Prerequisites: EN 0011, EN 0012.
This course allows students to develop ways of reading, analyzing, and interacting with texts in English from around the globe. You will focus on such questions as: How are literary texts produced? How do local, national, and global cultures and events affect the way authors fashion their texts? Do literary works produced in different cultures at the same time “speak to each other” across time and space? The course will be run as a combination of lecture and small group discussion and will make use of web-based background materials to provide context and depth to the readings.

EN 0102 Introduction to Contemporary World Literature 3 Credits
Attributes: E_AF English Literature After 1800, WDIV World Diversity
Prerequisites: EN 0011, EN 0012.
Students will review recent fiction from around the world, including Africa, Latin America, the Caribbean, New Zealand, and the Middle East. Students learn strategies for comparing stories and narrative styles from different cultures, subject positions, and sociopolitical frameworks. Students develop a stronger awareness of different types of subjectivity in a global context. The course is suitable for non-majors seeking to fulfill the world diversity and English core requirements, and for English majors who have not yet taken more than one course beyond EN 0011 and EN 0012.

EN 0103 Fairy Tales 3 Credits
Attributes: E_AF English Literature After 1800, FREN French Course Taught in English
Prerequisites: EN 0011, EN 0012.
A study of classic fairy tales in their oldest preserved versions by authors like Charles Perrault and the Brothers Grimm; in nineteenth- and twentieth-century literature influenced by the fairy tale tradition; in postmodern literary retellings; and in film and popular culture. The class leads to the production of a term paper involving research in primary sources and literary and folklore criticism.
EN 0105 African Diaspora: Literature and Culture 3 Credits
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, BSAH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, E_AF English Literature After 1800, LCEL LACS Minor: Elective, WDIV World Diversity
Prerequisites: EN 0011, EN 0012.
This course offers an interdisciplinary introduction to the African Diaspora, incorporating texts from Africa, the Caribbean, North America, and Europe. Beginning with colonization in Africa and representations of the Middle Passage, the course covers historical topics such as enslavement and the plantation system, abolition movements, migration within and out of the Caribbean, resistance movements, the Harlem Renaissance, and independence struggles. As we study the Atlantic world and globalization across several centuries, we will examine cultural syncretism, commodity culture rooted in the Triangle Trade, and creative endeavors in literature and the arts (painting and sculpture, film, music, dance, theatre).

EN 0106 Masterpieces of Greek Literature in English Translation 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
This course surveys major works of ancient Greek literature, emphasizing the content of this literature as a key to understanding classical Greek civilization and as meaningful in a contemporary context.

EN 0107 Masterpieces of Roman Literature in English Translation 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
This course surveys major works of ancient Roman literature of the republic and early empire, emphasizing the content of this literature as a key to understanding Roman civilization, and as meaningful in a contemporary context.

EN 0108 Myth in Classical Literature 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
This course introduces students to classical mythology through an examination of the diverse ways in which myth and legend are treated in the literatures of ancient Greece and Rome. Students read texts in English translation; knowledge of Greek or Latin is not required.

EN 0109 Greek Tragedy in English Translation 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
An intensive study in translation of the surviving works of Aeschylus, Sophocles and Euripides. Knowledge of Greek is not required.

EN 0110 Major Works of European Literature 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
This course surveys major works of world literature from ancient times to the present. Because the works are chosen from a broad span of cultures and periods, the course focuses on the function of literature: What kinds of stories do people tell about their societies? What are their major concerns, and how are these represented in fiction? How can we compare stories from one culture or period with those from another? The course discusses genre and style as well as content. Texts may include the Epic of Gilgamesh, as well as works by Boccaccio, Marguerite de Navarre, Madame de Lafayette, and Gabriel García Márquez.

EN 0111 International Short Fiction 3 Credits
Attributes: E_AF English Literature After 1800
Prerequisites: EN 0011, EN 0012.
This course examines works of short fiction from around the world written during the twentieth and twenty-first centuries. The degree to which - and the specific manners in which - these works contribute to a characteristically modern sense of human existence and the function of narrative art forms the basis for reading selections. Through textual analysis, students compare and contrast various versions of the modern experience as produced by authors such as Gogol, Melville, Mansfield, Joyce, Lawrence, Cather, Tolstoy, Chekhov, Kafka, Hemingway, Lessing, Borges, Barth, Böll, Mishima, Achebe, Erdrich, and Atwood.

EN 0114 Caribbean Literature: History, Culture, and Identity 3 Credits
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, BSFC Black Studies Focus Course, E_AF English Literature After 1800, LCEL LACS Minor: Elective, WDIV World Diversity
Prerequisites: EN 0011, EN 0012.
This course serves as an introduction to the field of Caribbean literatures in English and English translation, with a focus on the French-speaking Caribbean. We survey a wide range of theoretical and fictional texts (poetry, short stories, novels, theatre), and introduce students to the debate surrounding the formation of Antillean cultural identity/identities. This course examines "Caribbean literatures" with respect to their language of origin, colonization, slavery, racial experience, landscape, migration, and diaspora, specifically in Haiti, Martinique, Guadeloupe, Barbados, Trinidad, Cuba, and the Netherlands Antilles/Surinam.
EN 0115 Dante  
Attributes: CAOT Catholic Studies: Non-Religious Studies, E_BF English Literature Before 1800, ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
Prerequisites: EN 0011, EN 0012.  
This course examines the works of Dante Alighieri, including the Vita nova, in addition to the "Inferno," "Purgatorio," and "Paradiso" from the Divine Comedy. Students are introduced to the political, linguistic, theological, and poetic ideas that make Dante's works not only significant in the medieval context, but also continue to challenge and inform modern debates.

EN 0116 Rome in the Cultural Imagination  
Attributes: E_BF English Literature Before 1800, ISIF Italian Studies: Italy-Focused  
Prerequisites: EN 0011, EN 0012.  
The city of Rome has been a source of wonder and amazement throughout recorded history. This course examines the foundation myths of the Eternal City in contrast to the historical accounts, discusses early accounts of the life of the city, evaluates the reasons for its decline and fall, considers the riches of Renaissance and Baroque periods, analyzes poetry by the Roman people, and examines Rome's centrality for the world of art. This course, which is conducted in English, also focuses on the political importance of the city from its inception through the Risorgimento (Italian Unification), to Fascism and World War II, to present day.

EN 0117 Introduction to Francophone Sub-Saharan African Culture  
Attributes: E_AF English Literature After 1800, WDIV World Diversity  
Prerequisites: EN 0011, EN 0012.  
This course taught in English explores the issues that confront Sub-Saharan Africa in its transformation from tradition to colonization, and finally to independence through a large variety of literary texts (traditional oral literature and modern written literature), critical theory, films, music, and magazine and newspaper articles. Texts and films will be discussed from a multi-disciplinary perspective to illustrate their cultural, sociological, political, and religious import. Africa's geography and major historical markers will be woven into the readings and discussions.

EN 0118 Modern China through Fiction and Film  
Attributes: E_AF English Literature After 1800, WDIV World Diversity  
Prerequisites: EN 0011, EN 0012.  
A study of various cultural aspects of modern China in the 20th century through reading translated fiction as well as films. Students explore topics such as modernity, nationalism, individualism, gender, and cultural identity in the modern cultural-historical context. Also will be discussed are issues particular to fiction and film as representational modes: How do fiction and film narrate history and the complex Chinese experience? How have they both been shaped by and contributed to the socio-cultural transformations? And how do they represent the increasingly diversified cultural and social landscape of contemporary China?

EN 0119 The City and Modern China  
Attributes: E_AF English Literature After 1800, WDIV World Diversity  
Prerequisites: EN 0011, EN 0012.  
The course studies the literary and visual representations of the city in modern China through a sampling of stories, novels, photos, films, and critical essays. Students discuss how literature and visual art bear witness to the changing faces of the metropolis and urban life during the time of Chinese modernization and globalization and how the city expresses modern ethos, desires and paradoxes in literary works and films. All texts are in English. Films have subtitles.

EN 0120 American Women Playwrights  
Attributes: ASGW American Studies: Literature, ASGW American Studies: Gateway, ENAM American Literature, E_AF English Literature After 1800, UDIV U.S. Diversity  
Prerequisites: EN 0011, EN 0012.  
This course traces the evolution of plays by women from the Revolutionary War to plays reflecting the 21st-century concerns of African American, Asian, American, and Latina playwrights. Plays are discussed in light of the social, political, and economic climates that produced them. Special emphasis is given to questions of sex, gender, race, ethnicity, and class, as we explore how American women, despite considerable obstacles, have developed their own theatrical voices. Our study is further informed by the work of feminist performance theorists.

EN 0121 American Literature and the Environment  
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, ENAM American Literature, EVHU Environmental Studies: Humanities, EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, E_AF English Literature After 1800  
Prerequisites: EN 0011, EN 0012.  
This course aims to explore the ways in which ideas about the physical, "natural" environment have been shaped in American literature. The course will survey a variety of important texts in this tradition and introduce students to the scholarly perspective known as "Ecocriticism." Texts may include those by Austin, Cather, Leopold, Muir, Silko, Thoreau.

EN 0122 The Frontier in American Literature  
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, ENAM American Literature, E_AF English Literature After 1800  
Prerequisites: EN 0011, EN 0012.  
For the last five centuries, the frontier -- understood as the place where humanity comes into contact with its apparent absence in the shape of alien beings and landscapes -- has been the subject of some of the most lasting and powerful American stories. In this course, students concentrate on some of the major representations of the frontier produced between the 1820s and the present to learn how to recognize and talk about the position that the American western has occupied in our culture. Authors include Cooper, Twain, Cather, and McCarthy; filmmakers include Ford, Peckinpagh, and Eastwood.

EN 0123 Ethnic American Literature  
Attributes: ASGW American Studies: Literature, ASGW American Studies: Gateway, ENAM American Literature, E_AF English Literature After 1800, LCEL LACS Minor: Elective  
Prerequisites: EN 0011, EN 0012.  
This course focuses on stories from writers whose countries came in contact with American colonization. The course examines postcolonial themes in a historical context, and asks what it means to be a writer whose identity is formed by the diasporic flight of one's people. We begin with theorizing postcoloniality and move to a study of 20th century writing by Puerto Rican, Filipino, Vietnamese, and other ethnic American writers. Topics include the influences of English on vernacular literatures and the relationship of the postcolonial to contemporary politics and art.
EN 0124 American Literature: Myths and Legends 3 Credits
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, ENAM American Literature, E_AF English Literature After 1800
Prerequisites: EN 0011, EN 0012.
Our national literary tradition has been defined by the stories we tell about ourselves and our conversations about important social and political issues, including race, reform, democracy, suffrage, Native American removal, class, technology, and Manifest Destiny. This course explores how literature reflects, constructs, and questions the dominant image and understanding of the American identity from the Puritans through the nineteenth century. The course leads to developing a term paper drawing on research and using literary criticism. Writers include Bradstreet, Franklin, Wheatley, Irving, Douglass, Poe, Whitman, Dickinson, James, and Twain.

EN 0125 American Drama 3 Credits
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, ENAM American Literature, E_AF English Literature After 1800, UDIV U.S. Diversity
Prerequisites: EN 0011, EN 0012.
This course examines the development of American theatre from the 18th through the 21st centuries. It includes a study and analysis of the special problems affecting the development and changes in American society as seen through American playwrighting and theatre production. Students read over twenty plays that grapple with issues of race, ethnicity, gender, class, and what it means to be an American. The course includes theatre trips.

EN 0126 American Social Protest Literature 3 Credits
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, EDDV Educational Studies Diversity, E_AF English Literature After 1800
Prerequisites: EN 0011, EN 0012.
This course explores the long tradition of non-violent social protest in American literature. We examine how many writers have challenged their contemporaries to become aware of important issues - race, women's rights, Native American activism, the environment, war, and poverty. Students keep a journal in which they reflect on the literature and develop strategies for changing themselves and the world around them. A final project asks students to consider ways to raise awareness about a social issue at the University or in the larger community. Selected writers include Stowe, Davis, Thoreau, Crane, Douglass, Steinbeck, King, Wright, and Ginsberg.

EN 0127 Romantic Love in Greek and Roman Literature 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
The course of true love never did run smooth. From Homer's Penelope to Ovid's Remedies of Love we will examine the permutations of romantic desire and its frustrations in the literature of Greece and Rome. Readings also include selections from Sappho's poetry, Sophocles' Women of Trachis, Euripides' Phaedra and Medea, comedies by Menander and Terence, Catullus' poems to Lesbia, Vergil's tale of Dido and Aeneas, selections from the elegies of Tibullus, Sulpicia, Propertius and Ovid, and briefer excerpts from other authors. All readings are in English translation.

EN 0128 Cities in Literature 3 Credits
Attributes: E_AF English Literature After 1800
Prerequisites: EN 0011, EN 0012.
This course offers a comparative, cross-cultural approach to literature about the city, focusing primarily on fiction from the nineteenth century to the present. Beginning with a novel by Balzac, stories by Gogol and Dostoevsky, and poetry by Baudelaire and Whitman, we discuss topics including detective narratives, the figure of the flâneur, the country/city dichotomy, the crowd, the metropolis and mental life, and the rise of an urban middle class. In texts by authors such as James Joyce, Edith Wharton, Naguib Mahfouz, Monica Ali, Edward P. Jones, and Paulette Poujol-Oriol, issues surrounding gender, sexuality, race, ethnicity, and citizenship emerge as central topics.

EN 0129 American Short Story 3 Credits
Attributes: ASGW American Studies: Gateway, ENAM American Literature, E_AF English Literature After 1800
Prerequisites: EN 0011, EN 0012.
The American Short Story covers the rise of this genre form from the early Nineteenth Century beginning with Poe and continues through the realistic/naturalistic periods up through modernist and post-modernist movement through the present. Some of the authors studied include Poe, Hawthorne, Melville, Crane, Twain, Cather, McCullers, Welty, O'Connor, Hemingway, Faulkner, Roth, Updike, O'Brien, Lahiri.

EN 0130 Literature by Women: Vision and Revision 3 Credits
Attributes: ENAM American Literature, ENBR British Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisites: EN 0011, EN 0012.
This study of transatlantic, post-1800 literature by women will adopt Virginia Woolf's notion that "books continue each other." The course will be anchored in such "touchstone" texts as Jane Austen's Pride and Prejudice, Charlotte Brontë's Jane Eyre, and Edith Wharton's The House of Mirth. Each touchstone work will be grouped with a number of subsequent literary texts responding to and/or revising the earlier work. Readings will reach across centuries and continents. Topics include the social constructions of race, sexuality, gender, class, and beauty, intertextuality, influence, and canon formation.

EN 0131 Contemporary Women Writers of Color 3 Credits
Attributes: ASEN American Studies: Literature, ASGW American Studies: Gateway, BSAH Black Studies: Arts and Humanities, BSCC Black Studies Component Course, ENAM American Literature, E_AF English Literature After 1800, PJST Peace and Justice Studies, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisites: EN 0011, EN 0012.
This course focuses on works by Latinas, Native, Asian American, and African American women writers, as well as moving beyond the borders of the U.S. to include writers from the Americas, emphasizing the decades from the 1970s to the present. We consider the intersectionality of race, ethnicity, gender, sexuality, and socio-economic class, as these contribute to concepts of identity - for both the individual and the community. Authors may include Gloria Anzaldúa, Leslie Marmon Silko, Louise Erdrich, Lan Cao, Nora Okja Keller, Sky Lee, Ana Castillo, Carla Trujillo, Achy Obejas, Loida Maritza Pérez, Danzy Senna, Dorothy West, and Chitra Diakaruni.
EN 0132 20th Century Russian Fiction 3 Credits
Attributes: E_AF English Literature After 1800
Prerequisites: EN 0011, EN 0012.
In this comparative study, students read works by Russian and Soviet authors in tandem with texts by novelists from Eastern Europe, Asia, and the Americas. From the Silver Age, the course move to post-Revolutionary fiction and versions of dystopia, considers exile, dislocation, relocation, and dual identity, then examines the effects of the Stalin years, and concludes with contemporary fiction of the post-Soviet era. The course sets the literature with its historical, political, and cultural contexts, incorporating material from the arts, as well.

EN 0133 The African American Literary Tradition 3 Credits
Attributes: ASGW American Studies: Gateway, BSFC Black Studies Focus Course, ENAM American Literature, UDIV U.S. Diversity
Prerequisites: EN 0011, EN 0012.
This survey course examines the development of African American literature from the late eighteenth century to the present, with a focus on issues of literacy, authority, and identity. The course traces this tradition's history from Phillis Wheatley's role in defining American poetry and Olaudah Equiano's Interesting Narrative, to the narratives of enslavement by authors such as Harriet Jacobs and Frederick Douglass, to the New Negro Renaissance, the Civil Rights Movement, and contemporary African American fiction and poetry. Formerly EN 0253.

EN 0135 Graphic Novels as Thriller and Chillers 3 Credits
Attributes: ASEN American Studies: Literature, E_AF English Literature After 1800, UDIV U.S. Diversity
Prerequisites: EN 0011, EN 0012.
This course will introduce students to the idea of graphic novels as literature that deals with serious subjects — ranging from social, political, cultural, to race-based and sexually sensitive issues — in ways that are hyperbolically dramatic and/or humorous. It has a strong digital component and students will be asked to work with and use a range of multimodal tools such as blogs, Wiki, Twitter, Animoto, and visual story-telling. Students will be trained to grasp the fact the graphic novels often reflect historical events, prominent ideological and socio-cultural attitudes of the time, and span the spectrum from propelling propaganda to mounting a critique. The graphic novel, also called a comic, has always enjoyed a loyal fan base, mostly amongst the younger generations.

EN 0136 Book Histories and Futures: Literature in Times of Media Change 3 Credits
Attributes: E_AF English Literature After 1800
Prerequisites: EN 0011, EN 0012.
The book is a long-established symbol of knowledge and a vessel of literary culture, but the digital revolution has complicated its meaning. This course explores the book's current cultural status and its longer history, as both an object and expressive form. Students will chart the book's evolution through both historical and theoretical accounts, and literary works that embody and thematically explore these changes. Students will primarily use the techniques of traditional literary analysis, but will also incorporate methods from related disciplines such as visual and new-media studies, narratology, digital humanities, and book studies to address the course's formally diverse texts.

EN 0141 Imagining Shakespeare 3 Credits
Attributes: ENBR British Literature, E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
Shakespeare is considered the greatest writer in the English language. This course will investigate how his genius is expressed in comedy, history, tragedy, and romance. We will study how each kind of play influences the others in every part of Shakespeare's career. Plays include The Taming of the Shrew, Richard III, A Midsummer Night's Dream, Henry IV, Twelfth Night, Hamlet, Othello, King Lear, The Winter's Tale, and The Tempest. We will take a multimedia approach by analyzing performances as well as text. The history of Shakespeare's era and of his critics will be studied as well.

EN 0142 Myths and Legends of Ireland and Britain 3 Credits
Attributes: ENBR British Literature, E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
This course studies the literature of early medieval cultures of Ireland and Great Britain, with special attention to Celtic culture. The course is divided into four parts, focusing on the Irish Táin Bó Cúailnge, the Welsh Mabinogion, the Latin Christian legends of Celtic saints, and the Old English epic Beowulf. Critical issues for discussion include: paganism and Christianity; conceptions of law, kinship, and nationhood; warrior culture and the idea of the hero; the status of art and poetry; orality and literacy; the natural and the supernatural; the construction of gender.

EN 0143 The Greenworld: English Literature and the Environment 3 Credits
Attributes: ENBR British Literature, EVHU Environmental Studies: Humanities, EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
A survey of prose, poetry, and drama, the focus of this course is on the "Greenworld" in early modern English literature. The "Greenworld" encompasses all visions of the natural world - forests, gardens, oceans, caves, parks, animals, etc. - as represented in many different aesthetic forms. Students will be introduced to a number of environmental studies topics, including land dispossession, natural disasters, New World plantations, land stewardship, and animal rights, as these topics appear in literature. Course readings range broadly from Virgil, Montaigne, and Shakespeare to James Cameron's 'Avatar' and from the philosophical transactions of the Royal Society to transcriptions of witchcraft trials.

EN 0145 King Arthur 3 Credits
Attributes: E_BF English Literature Before 1800
Prerequisites: EN 0011, EN 0012.
A survey of the literature of the legend of Arthur, from ancient Celtic fragments and references to medieval chivalric romances, and on to modern reinterpretations in poems, novels, and film. Particular focus on the romances of Marie de France, Chrétien de Troyes, Sir Thomas Malory, and the anonymous author of Sir Gawain and the Green Knight. Attention to such themes as: the construction of nationality; the tension between the individual and culture; the stylized representation of gender and class; the interplay of reality and fantasy; theories of authorship and audience; connections to history-writing and to other literary genres.
EN 0161 Irish Literature  
Attributes: CAOT Catholic Studies: Non-Religious Studies, ENBR British Literature, E_AF English Literature After 1800  
Prerequisites: EN 0011, EN 0012.  
The course studies the deep connections between the literature and history of Ireland from 1800 to the present. Building on EN 0011 and EN 0012, it further develops the ability to read literature closely (to analyze and interpret the figurative language and stylistic features of fiction, drama, and poetry) and to write convincingly about the meanings and ideas that such close reading yields. It also adds to this skill by teaching students to recognize and articulate the inherent links between literature, history, and culture - links which are particularly evident in modern Irish writing, and which are revealed through close reading.  

EN 0162 Irish Women Writers  
Attributes: CAOT Catholic Studies: Non-Religious Studies, ENBR British Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
Prerequisites: EN 0011, EN 0012.  
A study of women writers both Anglo and Gaelic, from 19th-century fiction to contemporary poetry. The course focuses on the cross-cultural differences between these two groups, one privileged, the other marginalized, who perhaps share only a common language. Besides women's issues - education, emigration, marriage, motherhood, and equality - the themes include the Big House, colonization, the Literary Revival, folklore, the storyteller, and the roles of religion and politics in the society. Among the authors to be explored are Maria Edgeworth, Somerville and Ross, Elizabeth Bowen, Lady Gregory, Marina Carr, Peig Sayers, Edna O'Brien, Eilis Ni Dhuibhne, Eavan Boland, and Nula Ni Dhomhnaill.  

EN 0163 The Literature of Illness and Healing: Wounded Storytellers and Dedicated Healers  
Attributes: HSTE Health Studies: Traditions, Delivery, and Ethics, UDIV U.S. Diversity  
Prerequisites: EN 0011, EN 0012.  
What is it like to suffer a stroke, contend with cancer, deal with depression or live with a crippling disease? While biomedicine may clinically treat such conditions, it is to literature that we turn to gain a humanistic understanding of the emotional and spiritual impact of illness on wounded storytellers and on the dedicated doctors and nurses who care for them. Readings in various literary genres - memoir, essay, poetry, fiction, drama - and films with medical themes will also explore issues of diversity, noting how gender, race, ethnicity, religion and sexual orientation affect the illness experience.  

EN 0170 Writing the Self: Autobiography  
Attributes: ASGW American Studies: Gateway, ENAM American Literature, E_AF English Literature After 1800, UDIV U.S. Diversity  
Prerequisites: EN 0011, EN 0012.  
Autobiography holds a special place in its presentation of the writer's self, enlisting the reader's belief in the author's "confession" while crossing the line between fictional work and truth. This course examines autobiography and related genres, including memoir, diaries, and personal essays and considers their purpose: what do these authors reveal about themselves, and why? How much is convention, how much is truth? What impact do race, gender, class, nationhood, and ethnicity have on the construction of identity? Writers may include Franklin, Shepard, Douglass, Barnum, Johnson, Winnemucca, Zitkala-Sa, Malcolm X, Wright, Baldwin, Stein, Walker, and Cisneros.  

EN 0171 Literature and the Visual Arts  
Attributes: ENAM American Literature, ENBR British Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
Prerequisites: EN 0011, EN 0012.  
This interdisciplinary course will examine the dynamic relationship between literature and the visual arts. Special attention will be paid to literature written in English during the 19th and 20th centuries - a time when writers and cultural critics were increasingly interested in the visual arts in general (painting, sculpture, photography, film, etc.) and the impact of the new mass media in particular. These artists forged a unique and significant relationship between their bodies of work and the visual arts; several of the writers studied worked in the tradition known as "ekphrasis" (e.g., poems "speaking" to a work of art). Writers of focus might include Blake, Poe, the Brownings, the Rossettis, Siddall, Wilde, Wharton, and Larsen.  

EN 0172 Literacy and Language  
Attributes: EDCG Educational Studies Cognate, EDDV Educational Studies Diversity, E_AF English Literature After 1800, UDIV U.S. Diversity  
Prerequisites: EN 0011, EN 0012.  
This course examines the concept of literacy as it is represented in fiction and non-fiction texts. Reading widely -- in memoirs, essays, fiction, creative non-fiction, and drama -- we will consider individual experiences with literacy, language, and schooling, as well as the relationship between literacy and power. The course includes a service learning experience that connects issues from the course to the real context of a local elementary school.  

EN 0202 American Poetry  
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800  
Prerequisite: One 100-level English literature course.  
This course surveys a range of significant works of American poetry. It is an introduction to various movements (e.g., transcendentalism or modernism), various schools (e.g., New Formalism), and the turn to a multi-lingual and multi-vocal poetry found in the Harlem Renaissance and Spoken Word movements. The course pays particular attention to form, while grounding understanding of form within a socio-historical context. Readings may range from Walt Whitman, Emily Dickinson, William Carlos Williams, Elizabeth Bishop, Wallace Stevens, Gwendolyn Brooks, Robert Frost, Langston Hughes, Pedro Pietri, Joy Harjo, and others.  

EN 0203 English Epic  
Attributes: ENBR British Literature, E_AF English Literature Before 1800  
Prerequisite: One 100-level English literature course.  
Study of large-scale, verse narratives created or received as English national epics, or composed in the epic tradition. Texts will represent the major time periods of earlier English literary history: Beowulf from the Old English period; Sir Gawain and the Green Knight or Morte d'Arthur from the Middle English period; excerpts from Spenser's Faerie Queene from the Elizabethan period; Milton's Paradise Lost from the seventeenth century; Pope's Rape of the Lock from the eighteenth century. Critical attention will be paid throughout to changing and competing conceptions of England, nation, and epic.
EN 0204 Literary Fairy Tale Tradition 3 Credits
Attributes: E_AF English Literature After 1800
Prerequisite: One 100-level English literature course.
This course is a survey of the fairy tale as a literary genre which traces the development of the literary tradition from sixteenth-century Italy to the Brothers Grimm and nineteenth-centuries authors including Hans Christian Andersen and Oscar Wilde, and studies Charlotte Brontë’s Jane Eyre to note connections to the genre of the novel. Also follows the persistence of fairy tales in modern, post-modern, and contemporary fiction, and in popular film. Requirements include a research paper on a fairy tale or author of the student’s choosing. Not to be taken by students who have taken EN 0103.

EN 0207 Contemporary American Novel 3 Credits
Attributes: ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800
Prerequisite: One 100-level English literature course.
The Contemporary American Novel covers the past 30 years of this genre form. The course introduces the student to on-going developments in the realistic novel as well as post-modernist forms such as magical realism and metafiction, as well as the novel of social criticism. Some of the writers studied include Philip Roth, Marilynne Robinson, Elizabeth Strout, Ann Patchett, Cormac McCarthy, Toni Morrison, Edward P. Jones, Jeffrey Eugenides, Charles Frazier, Jonathan Lethem, Ha Jin.

EN 0211 Age of Chaucer 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, E_BF English Literature Before 1800
Prerequisite: One 100-level English literature course.
A survey of the literature of late-medieval England, focusing on its richest period, the second half of the fourteenth century - the age of Chaucer and his contemporaries. Students will gain access to the Middle English language, and study examples of the main genres of medieval literature, including religious and secular lyric, mystical writing, courtly romance, religious drama, chronicle, and comic narrative. Literature will be considered within its social and historical contexts, with special attention to representations of social order, and challenges to that order, notably the Great Rebellion of 1381.

EN 0213 Shakespeare I 3 Credits
Attributes: ENBR British Literature, E_BF English Literature Before 1800
Prerequisite: One 100-level English literature course.
In the first half of Shakespeare's career, comedy, tragedy, and history plays express both the spirit of the Elizabethan age and their own identities as different genres that reference each other. A Midsummer Night's Dream, Romeo and Juliet, Henry IV, and Much Ado About Nothing are among a selection of ten plays that explore dimensions of love, religion, and politics. We learn how critics have approached Shakespeare in many different ways, and how to evaluate and respond to critical opinion. Multimedia presentations show how performance and text combined enrich our understanding of this great writer.

EN 0214 Shakespeare II 3 Credits
Attributes: ENBR British Literature, E_BF English Literature Before 1800
Prerequisite: One 100-level English literature course.
The second half of Shakespeare’s career begins with bright Elizabethan comedies (As You Like It, Twelfth Night) and transitions to the darker Jacobean tragedies (Hamlet, Othello, King Lear). These troubling modern visions lead through problem plays to the anachronistic late tragedies and the romances (The Tempest), exploring issues of racism, colonialism, and social justice. We learn how critics have approached Shakespeare in many different ways, and how to evaluate and respond to critical opinion. Multimedia presentations show how performance and text combined enrich our understanding of this great writer.

EN 0215 Introduction to 18th Century British Literature 3 Credits
Attributes: ENBR British Literature, E_BF English Literature Before 1800
Prerequisite: One 100-level English literature course.
This selective survey of 18th-century English literature includes authors such as Pope, Swift, Gray, Jonson, Boswell, Goldsmith, Burns, and Montague.

EN 0216 Victorian Poetry and Poetics 3 Credits
Attributes: ENBR British Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
This course examines the poetry and theories of poetry posited by Victorian men and women who explored concepts of identity vis-à-vis Victorian notions of culture, religion, science, politics, and sexuality. Beginning with Arnold and ending with Wilde, the course covers both poetry and literary movements such as Pre-Raphaelitism, Decadence, aestheticism, and symbolism.

EN 0217 Romantics, Victorians, Moderns: British Literature 1800-1950 3 Credits
Attributes: ENBR British Literature, E_AF English Literature After 1800
Prerequisite: One 100-level English literature course.
A survey of three distinct but overlapping periods in British literary history - Romantic, Victorian, and Modern. As much a study of ideas as of literary works, the course examines the crucial ideological, philosophical, and cultural transformations that shape each of these important literary eras.

EN 0218 20th Century British Literature 3 Credits
Attributes: ENBR British Literature, E_AF English Literature After 1800
Prerequisite: One 100-level English literature course.
A survey of major developments in twentieth-century British, Irish, and Anglophone Post-colonial literature. 20th-Century England is shaped by rapid technological changes, the breakdown of Victorian mores and orthodox beliefs, the devastation of the Great War, the advent of psychoanalysis, and the height and decline of the British empire. Students learn to recognize and evaluate how these events relate to the new, experimental styles of Modern, Postmodern, and Postcolonial writing. Authors studied range from early figures such as Joseph Conrad, Virginia Woolf, W.B. Yeats, and James Joyce to contemporary stars such as Kazuo Ishiguro, J.M. Coetzee, and Zadie Smith.

EN 0231 Early American Literature 3 Credits
Attributes: ASEN American Studies: Literature, ENAM American Literature, E_BF English Literature Before 1800
Prerequisite: One 100-level English literature course.
A study of the origins of literature of the Americas with an emphasis on the Puritans and early Republic through 1830. We begin with the oral history of Native Americans and the literature of colonization and exploration. We also explore the rich tradition of spiritual autobiography, poetry, narrative history, and sermons among the Puritans. Turning to the eighteenth-century, we examine captivity narratives and democratic writing of the Revolutionary period, with an emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period.
EN 0233 American Literature: 20th Century to the Present 3 Credits
Attributes: ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800
Prerequisite: One 100-level English literature course.
A survey of 20th Century American Literature to the present within the socio-historical context of diverse and overlapping literary and cultural traditions of the United States, such as (though not limited to) Native American, African American, Anglo American, and Asian American. Writers might include Eliot, Hemingway, Faulkner, Yezierska, Hughes, Hurston, McNickel, Bellow, Okada, Kerouac, Rich, Plath, Welch, Gaines, Jen.

EN 0234 American Women Writers of the 19th Century 3 Credits
Attributes: ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
A study of American female writers who have made an impact on the world through their fiction, journalism, or poetry. The course is organized thematically around a set of topics related to nineteenth-century women's lives and selves: gender and domesticity, suffrage, slavery, labor, frontier life, sexuality, and social activism. African-American and Native-American women's writings and those of other ethnicities also form an integral part of the tradition. Writers may include Alcott, Beecher, Cary, Child, Chopin, Dickinson, Fern, Freeman, Gilman, Jacobs, Kirkland, Harper, Keckley, Jewett, Piatt, Ruiz de Burton, Sin Far, Spofford, Stowe, and Wharton.

EN 0235 Edith Wharton and Her Circle 3 Credits
Attributes: ASUP American Studies: Literature, ENAM American Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
A study of fiction by American realist Edith Wharton in the context of her peers, including writers she read and those she inspired. While Wharton serves as a focal point, the course also examines the works and ideas of such influential figures as Balzac, Flaubert, Maupassant, Chekhov, James, Crane, Dreiser, and Freeman, as well as adaptations of Whartonian themes by such novelists as Larsen, Bushnell, von Ziegesar and Tóbin. Topics include the social construction of "whiteness," the art of social climbing, turn-of-the-century gender crises involving masculinity and the New Woman, and the social and cultural transformations wrought by the modern city.

EN 0262 The Harlem Renaissance 3 Credits
Attributes: ASUP American Studies: Literature, ASUP American Studies Upper Level, BSAH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, E_AF English Literature After 1800, UDIV U.S. Diversity
Prerequisite: One 100-level English literature course.
This course examines African American literature and culture from Washington's Up From Slavery and Du Bois's The Souls of Black Folk, through the 1920s and the Great Depression, to the eve of U.S. participation in World War II. Grounded in U.S. history, the course explores fiction, poetry, and other forms of cultural production such as painting, sculpture, film, and music. It examines the aftermath of Reconstruction, the effects of the Great Migration, and the responses to Du Bois's call for a "Talented Tenth." The Harlem Renaissance provides the major focus, as do the debates about whether there was such a movement at all. The course looks towards the development of a contemporary Black tradition in literature and culture.

EN 0263 African American Women Writers 3 Credits
Attributes: ASUP American Studies: Literature, ASUP American Studies Upper Level, BSAH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, ENAM American Literature, E_AF English Literature After 1800, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
This course offers a survey of writing by African American women from the mid-nineteenth century to the present, focusing primarily on autobiography and fiction. Beginning with Jacobs's Incidents in the Life of a Slave Girl and examining late-nineteenth-century fiction by authors such as Harper, the course examines issues of redefining womanhood, participating in racial uplift, and coming to voice as both women and as writers. Moving through the twentieth century and into the twenty-first, the course may include writers such as Larsen, Fauset, Hurston, Petry, Morrison, Lorde, Naylor, Sapphir, Blackman, Youngblood, and Packer.

EN 0264 African American Fiction, 1940 to Present 3 Credits
Attributes: ASUP American Studies Upper Level, BSAH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, ENAM American Literature, E_AF English Literature After 1800, UDIV U.S. Diversity
Prerequisite: One 100-level English literature course.
A comparative study of novels by African American men and women, beginning with Richard Wright and Ann Petry in the 1940s, continuing through the 50s and 60s with writers such as Ralph Ellison, Gwendolyn Brooks, James Baldwin, and Alice Walker, and ending with major novelists from the 1970s, such as Charles Johnson, Toni Cade Bambara, Ernest Gaines, and Toni Morrison. The course focuses on topics such as family, religion, education, and urban experience, education, gender and sexuality, and shifting definitions of Blackness. Narrative techniques offer a main thread of discussion throughout the course.

EN 0274 Modernism in World Literature 3 Credits
Attributes: E_AF English Literature After 1800
Prerequisite: One 100-level English literature course.
A survey of the international literary movement known as "Modernism" (roughly 1890-1930, though earlier and later figures are often included). The radical aesthetics of literary Modernism respond to the rapid social and political transformations of the 20th century and to innovative styles in the visual arts, film, music, and architecture. They are also controversial: Are these new styles subversive or reactionary? The art of Europe's elite or the art of a global revolution? Students learn to debate these issues in an informed way, and produce core-integrative projects that explore the connections between modernist literature and other fields of study.

EN 0275 Modern Women Writers 3 Credits
Attributes: ENAM American Literature, ENBR British Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
This course examines the work of late nineteenth- and early twentieth-century American and British "sisters in error" (as described by poet Dilya Laing). We consider literature and its contexts - social, historical, political, ideological, artistic, and more. Among the concerns raised by these women are the following: the body, sexuality, marriage, motherhood, domesticity, vocation, the making of art and the artist, the homosocial, patriarchy, the struggle for individuality, relations between the sexes, tensions between True Woman and New Woman, and what it means to be "modern." The reading list embraces fiction, poetry, drama, and nonfiction prose. Writers of focus may include Bowen, Chopin, Dinesen, Eaton, Gilman, Glaspell, Hurston, Larsen, Mansfield, O'Connor, Parker, Porter, Spencer, West, Wharton, and Woolf.
EN 0281 Native American Literature 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800, UDIV U.S. Diversity
Prerequisite: One 100-level English literature course.
This course focuses on novels, short stories, and poems written by Native American writers during the 20th century. For purposes of background, the course also covers a number of significant works composed prior to this century. Students examine texts primarily for their literary value, but also consider the broad image of Native American culture that emerges from these works. The course also examines the philosophical, historical, and sociological dimensions of the material.

EN 0282 Latin@ Literature 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800, LCEL LACS Minor: Elective, UDIV U.S. Diversity
Prerequisite: One 100-level English literature course.
This is an introductory course on the literature produced by Latinos in the U.S. The course approaches the subject from an interdisciplinary lens, examining the literature from not only the tools available in literary studies but history and sociology, as well. The course will address historical, contemporary political and socioeconomic issues affecting Latinos (the most historically prevalent of which have been immigration status, language regulation, and racial/ethnic discrimination) and connect them to cultural production. We read such authors as Sandra Cisneros, Junot Díaz, Ed Vega Yunque, various Nuyorican and Chicano Poets, and others to better understand the literary and cultural products of the now largest minority group in the U.S. Course readings and discussions are in English. Spanglish is welcomed.

EN 0283 Asian Diasporas: Challenges to Citizenship 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800, HACA Humanitarian Action Minor Context Course, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
This course examines the explosion of Asian American fiction/cinema to study diasporic, migratory, refugee, socio-cultural and ethnic identities. Together with fiction and cinema, we will study historical and political documents that deal with the interpellation of citizenship challenges of Indian, Afghan, Pakistani, Chinese, Japanese, Bangladeshi, Vietnamese, Korean, Hawaiian-Pacific, and Sri Lankan subjects as seek to be integrated into the State and into US cultures. We study how Asian Americans authors assert their presence to claim American citizenship, while challenging racist, sexist, and xenophobic stereotypes of “aliens” as outsiders and foreigners.

EN 0284 Italian Renaissance 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, ENAM American Literature, E_AF English Literature After 1800, HACA Humanitarian Action Minor Context Course, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.

EN 0285 Renaissance Eros 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, ENBR British Literature, E_BF English Literature Before 1800
Prerequisite: One 100-level or 200-level English literature course.
This course introduces students to Middle English language and literature through a close study of the poetry of Geoffrey Chaucer, focusing on his Canterbury Tales. Students analyze the stylistic forms and representations of 14th-century society through tales, selected for their generic and stylistic variety, that include the tragic and the comic, the sacred and the profane.

EN 0286 Chaucer's Canterbury Tales 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, E_AF English Literature After 1800, HACA Humanitarian Action Minor Context Course, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.

Students analyze the stylistic forms and representations of 14th-century society through tales, selected for their generic and stylistic variety, that include the tragic and the comic, the sacred and the profane.

EN 0287 Gender and Sexuality in Film and Literature 3 Credits
Attributes: E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
This course examines the way gender and sexuality are represented in film and literature, beginning with an overview of lesbians and gays in film history with Vito Russo's The Celluloid Closet. The course then moves through popular films and novels from the 1960s to the present day, looking at the ways attitudes about gender are enmeshed with representations of homosexuality. Themes and topics include: What is the relationship between gender and sexuality? How are concepts of masculinity and femininity presented in novels and on screen? How have these representations changed as our culture's rules about gender and sexuality have become less rigid? The course aims to develop an analysis of current cultural assumptions about gender and sexuality, as they are revealed in film and literature.

EN 0288 Gender and Sexuality in Film and Literature 3 Credits
Attributes: E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: One 100-level English literature course.
This course examines the way gender and sexuality are represented in film and literature, beginning with an overview of lesbians and gays in film history with Vito Russo's The Celluloid Closet. The course aims to develop an analysis of current cultural assumptions about gender and sexuality, as they are revealed in film and literature.
EN 0316 Theoretical Readings of 19th Century Novels 3 Credits
Attributes: E_AF English Literature After 1800
Prerequisite: One 100-level or 200-level English literature course.
This course discusses and debates the meaning of "decadence" as an aesthetic and literary category. Beginning with the works of the pre-Raphaelites in mid-19th-century England, moving to Walter Pater and Oscar Wilde in the Victorian era, and then into Europe with Baudelaire, Flaubert, and Mann, the course focuses upon the role of pleasure in European cultures. Paintings by Moreau, Delacroix, and Ingres complement the understanding of the literary texts. The course treats metaphors of Salome as a femme-fatale and literary characters such as Huysmans' Des Esseintes or Wilde's Dorian Gray as models for behavior: figures in a typology of unorthodox self-fashioning. Theoretical frameworks posited by Adorno and Benjamin will be used to query the constrictions and deconstructions of the European self in that critical cusp between the centuries.

EN 0317 Advanced Studies in 20th Century British Literature 3 Credits
Attributes: ENBR British Literature, E_AF English Literature After 1800
Prerequisite: One 100-level or 200-level English literature course.
An intensive study of an important theme, topic, or debate that spans most or all of the 20th century in British literature. Possible topics include: the distinction between modernism and postmodernism; the significance and value of aesthetic innovation; interrogation of the British empire; imperial cultural traditions and their aftermath; defining and redefining "Britishness" from modernity through the contemporary global and transnational era; history, memory, and narrative; poetry, poetics, and social change.

EN 0319 James Joyce 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, ENBR British Literature, E_AF English Literature After 1800
Prerequisite: One 100-level or 200-level English literature course.
An intensive study of James Joyce's comic novel Ulysses, emphasizing thorough close reading of the text, understanding the work relative to Joyce's other fictional masterpieces, and extensive reading of related criticism and scholarship. Highly recommended: students should have read at least one complete work by James Joyce before taking the course.

EN 0321 Life and Print Culture in 18th Century London 3 Credits
Attributes: ENBR British Literature, E_BF English Literature Before 1800
Prerequisite: One 100-level or 200-level English literature course.
What was it like to live in eighteenth-century London? This course will explore daily life in London from the Great Fire to the French Revolution, using novels alongside other forms of popular literature -- pamphlets, ballads, broadsides, cookbooks, and newspapers -- to trace what ordinary people talked about and care about in their workaday world. Popular art such as Hogarth's engravings will show us what London and its people looked like. The course will investigate how to evaluate and discuss all forms of popular print culture within the larger context of literature.

EN 0332 American Romanticism 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies
Prerequisite: One 100-level or 200-level English literature course.
This course explores transcendentalism and romanticism during the flowering of intellectual and social life in America from 1830 to 1865. Studying the transatlantic origins of this movement in philosophy, religion, and literature, we examine how these writers responded to literary influences and crafted their unique style. The course also focuses on the relationship between literature and American culture, including a study of the visual arts and material culture. Authors include Emerson, Fuller, Thoreau, Alcott, Poe, Hawthorne, Melville, Douglass, Davis, Whitman, and Dickinson.

EN 0333 American Realism and Naturalism 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies
Prerequisite: One 100-level or 200-level English literature course.
This course examines significant developments in American Literature from 1865 through the turn into the twentieth century. The course will consider literature and its contexts - social, historical, political, ideological, artistic, and so on. Writers may include Chesnutt, Chopin, Crane, Davis, Dreiser, Du Bois, Eaton, Freeman, Gilman, Howells, James, Jewett, Norris, Twain, Washington, and Wharton.

EN 0334 American Modernism 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies
Prerequisite: One 100-level or 200-level English literature course.
This course explores the wide ranging cultural dynamics of American literary modernism (roughly 1920-1950) in the works of writers such as Hurston, Hemingway, Yezierska, Eliot, Hughes, Falkner, Matthews. Topics to discuss include, but are not limited to, time, space, gender, nationality, race, and ethnicity.

EN 0335 Contemporary American Literature and Culture 3 Credits
Attributes: ASEN American Studies: Literature, ASUP American Studies
Prerequisite: One 100-level or 200-level English literature course.
This course examines significant developments in American Literature and Culture from the period following World War II to the present. The course explores the turn to cultural studies in the field of literary studies that occurred during this period, allowing us to examine non-traditional literary texts such as music, film, graphic novels, and games. We ground our discussion heavily in literary theory.
EN 0336 Seminar on Toni Morrison  
**Attributes:** ASEN American Studies: Literature, BSFC Black Studies Focus Course, ENAM American Literature, E_AF English Literature After 1800, PJST Peace and Justice Studies, WDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
**Prerequisite:** One 100-level or 200-level English literature course.  
A comprehensive study of the works of Toni Morrison, the course situates her novels and nonfiction prose in their historical and cultural contexts. Attention to narrative techniques as well as to theoretical approaches from a range of disciplines offers students the opportunity to explore topics including gender and slavery, violence and trauma, identity construction, Black masculinity, commodity culture and racialized identity, law and civil rights, accommodation and resistance, family structures, community, geography and location/dislocation/relocation, ethics and relation, and Black female sexualities.

EN 0351 Literary Theory  
**Attributes:** E_AF English Literature After 1800  
**Prerequisite:** One 100-level or 200-level English literature course.  
The course examines the major theoretical approaches to the study of literature that developed in relation to important political and intellectual movements of the twentieth century. Despite highly significant differences, we presuppose that all literary theories pose similar questions: What is literature? Why does literature matter, and how do critics assign aesthetic value? This course studies the way various schools of theories have answered these questions. Included in our study are Formalism/New Criticism, Poststructuralism, Psychoanalytic criticism, Feminist theory, Gender and Queer Studies, Postcolonialism, and others. Course readings range broadly from Kant to Derrida, Freud to Spivak.

EN 0352 Cultural Studies Theory  
**Attributes:** E_AF English Literature After 1800, UDIV U.S. Diversity  
**Prerequisite:** One 100-level or 200-level English literature course.  
This interdisciplinary course examines the concept of culture as it is constructed, sustained, and contested within the United States and the United Kingdom. Readings focus on the history, theory, and practice of culture (high and mass) in the two countries. Class discussions focus on the interactive impact of our understanding of the term "culture" upon contemporary societies as it factors into nationhood, race, gender, class, sexuality, and media. As a way of understanding the various theories that undergird the experiential manifestations of culture, students will be exposed to print/visual texts and multimedia forms of expressions circulating in society.

EN 0353 Representations  
**Attributes:** E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
**Prerequisite:** One 100-level or 200-level English literature course.  
This course focuses on “ways of seeing” and the “gaze” that are constructed and maintained in contemporary culture within the concept of representation. The course balances on the margins of textual and visual materials (paintings and films); offers an interdisciplinary theoretical base; examines the presentation and representation of self, subject, and identity as narrative, biography, and autobiography; and questions notions of realism and politics of realism as manifested by deploying race, class, nationality, sexuality, and gender. By reading theoretical tracts on the ways of seeing and by using films and visual art to test these theoretical materials, students critique contemporary notions of seeing and being seen.

EN 0354 Theories of Globalization  
**Attributes:** E_AF English Literature After 1800, WDIV World Diversity  
**Prerequisite:** One 100-level or 200-level English literature course.  
This course teaches students how globalization is defined by major theorists and how to interpret the effects of its massive and random forces. Students grasp the differences between economic, political, and cultural explanations and the actual impact of globalization. The theories are tested against new literatures to see how novelists manipulate the forces of globalization - such as explaining the feminization of poverty, ethnic cleansing, human rights violations, access to natural resources like water and land, terrorisms and proliferation of nuclear arms, religious fundamentalisms - through their characters. One of the crucial and consistent foci of class discussions is exploration of ethical ways to deal with globalization, the potential for civic engagement, and the responsibility we all share in creating a global civil society.

EN 0352 All About Eve  
**Attributes:** CAOT Catholic Studies: Non-Religious Studies, ENBR British Literature, E_BF English Literature Before 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
**Prerequisite:** One 100-level or 200-level English literature course.  
This course surveys the literary and artistic representation of the legendary first woman of the Judeo-Christian tradition from Genesis to the present, with attention to both feminist and antifeminist traditions. The course centers on a reading of Milton’s Paradise Lost. Other authors include Christine de Pizan, Aemilia Lanyer, Mary Wollstonecraft, Mark Twain, and Ursula Le Guin. In a final research paper, students locate and interpret depictions of Eve in contemporary popular culture. Non-English sources are read in English translation.

EN 0372 Literature for Young Adults  
**Attributes:** EDCG Educational Studies Cognate, E_AF English Literature After 1800  
**Prerequisite:** One 100-level or 200-level English literature course.  
During the past two decades, adolescent literature has proliferated, grown more diverse, and improved in richness and quality. The course explores the major current authors, poets, and illustrators of works written for young adults. Topics include theories and purposes of reading literature in the classroom, criteria development for evaluating adolescent literature; reader response in the classroom; reading workshop; and adolescent literature integration across the curriculum.
EN 0374 The Woman Question: Early Feminism and 19th Century Transatlantic Literature 3 Credits  
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, ENAM American Literature, ENBR British Literature, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
Prerequisite: One 100-level or 200-level English literature course. This course will examine the issue properly known as the Woman Question through some of the major works of 19th-century literature. Because the philosophical and political debates concerning Woman’s role preoccupied not only 19th-century America but also Victorian Britain, we will consider American and British discussions as part of a transatlantic conversation. The course begins with early Victorian literature, moving across the Atlantic to the 1840s and 50s, when a group of "domestic feminists" became the most popular writers in the U.S. The course closes at the fin de siècle, when the conventions of sentimental fiction and "True Womanhood" were being superseded by realism and naturalism, and when an explicitly anti-domestic image of womanhood began to be formulated around the figure of the "New Woman." Authors may include Brontë, Fuller, Elizabeth Barrett Browning, Stowe, Fern, Jacobs, Christina Rossetti, Taylor, Mill, Patmore, Linton, Dickinson, Alcott, James, Ibsen, Harper, Gilman, Chopin, Freeman, and Wharton.

EN 0375 Caribbean Women Writers 3 Credits  
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, BSAH Black Studies: Arts and Humanities, BSCC Black Studies Component Course, EDDV Educational Studies Diversity, E_AF English Literature After 1800, LCEL LACS Minor: Elective, WDIV World Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
Prerequisite: One 100-level or 200-level English literature course. This course offers a Pan-Caribbean study of women's writing, primarily contemporary fiction. Setting the novels in a context that begins in the Middle Passage or comparable forced migration to the Americas, we examine the interconnections between those traumatic experiences and the relations established and demanded by imperialism. Topics for discussion include spaces and languages of resistance; genealogies, family trees, roots; memory and exile; political activism and its consequences; labor and socioeconomics; the role of education in colonialism and in immigrant life; and challenges to conventional categories of identity. Authors may include Marshall, Hopkinson, Kincaid, Condé, Danticat, Santiago, Santos-Fébres, Obejas, McWatt, Brand, Collins, Mootoo, Espinet, Lara, and John.

EN 0376 Global Women's Fiction 3 Credits  
Attributes: E_AF English Literature After 1800, WDIV World Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
Prerequisite: One 100-level or 200-level English literature course. This comparative study of fictional works by women begins with a discussion of issues raised in Virginia Woolf's A Room of One's Own, and focuses on writers from the early twentieth century to the present. Drawn from a wide range of world literatures and cultures, authors may include Aleramo, Djebar, al-Shaykh, Aidoo, Truong, Valenzuela, Menéndez, Roy, Dangarembga, Gordimer, Olsson, Rachlin, and Lispector. Topics include narrative techniques, women's relationship to the polis, women's participation in public culture and their artistic creativity, gender and sexuality, cross-class relations between women, and contemporary issues linked to globalization.

EN 0377 Urban Texts and Contexts: NYC 3 Credits  
Attributes: ASEN American Studies: Literature, ASUP American Studies Upper Level, E_AF English Literature After 1800, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
Prerequisite: One 100-level or 200-level English literature course. This course explores literary and visual evocations of the city from an interdisciplinary and theoretical perspective. In many ways, a city is as much a mental construct as a physical one, referred to as image, idea, myth, metaphor, vision, catalyst, and more. The course considers how such terms apply to representations of a metropolis, as well as how the city can be viewed as artifact or fiction. Drawing upon theories from geography, architecture, sociology, and urban studies, we examine the traditional dichotomy between city and country, the relationship between gender and sexuality and urban representation, and the ways that community is defined and envisioned in contemporary urban contexts.

EN 0390 Literature Capstone 3 Credits  
Prerequisites: EN 0351 or EN 0352; one 300-level literature course; junior or senior standing. The capstone seminar course provides Literature Concentration students with a cohort experience in which they integrate their literature coursework and produce a substantive research project. The capstone course functions as a seminar in which the students begin the semester with shared readings and discussion on a theme chosen by the instructor, including theory and research methodology. Students are encouraged to consider presenting their research in either traditional or digital format.

EN 0399 Independent Study 1-4 Credits  
See department chair for details.

ENW 0200 Creative Writing 3 Credits  
Prerequisite: EN 0012. This course fosters creativity and critical acumen through extensive exercises in the composition of poetry and fiction.

ENW 0202 Creative Writing: Poetry I 3 Credits  
Prerequisite: EN 0012. This workshop course concentrates on the analysis and criticism of student manuscripts, devoting a portion of the course to a discussion of major trends in contemporary poetry and significant movements of the past. The course considers traditional forms, such as the sonnet and villanelle, as well as modern experimental forms and free verse. Students learn how to prepare and submit manuscripts to publishers.

ENW 0204 Creative Writing: Drama 3 Credits  
Prerequisite: EN 0012. This course teaches the writing of one-act plays for the stage in a workshop format that involves envisioning, writing/drafting, and regular revision of seed-ideas and subjects. The process requires skillful, imaginative handling of the formative elements of drama, including plot, character, language or speech-action, envisaged staging, and form. It also involves timely submission of assignments and drafts of scenes and whole plays for periodic in-class readings and feedback. Students are expected to submit at specified times midterm and final drafts that demonstrate the technique or art of playwriting as well as conform to the general requirements of the course.

ENW 0205 Creative Writing: Fiction I 3 Credits  
Prerequisite: EN 0012. This course for the student who seeks an intensive workshop approach to fiction composition emphasizes the short story and focuses on the analysis of student manuscripts. It includes some discussion of the work of significant authors (past and present) as a way of sharpening student awareness of technique and the literary marketplace for fiction.
ENW 0206 Creative Writing: Nonfiction I 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: EN 0012.
This course offers students the opportunity to study and practice the art and craft of literary nonfiction. Students will study the work of accomplished writers in the field, both past and present, as a foundation for analyzing and critiquing each other’s manuscripts in workshop format. Forms studied and practiced will include the memoir, personal essay, and reflective essay.

ENW 0207 Themes in Creative Writing 3 Credits
Attributes: HSTE Health Studies: Traditions, Delivery, and Ethics
Prerequisite: ENW 0202 or ENW 0205 or ENW 0206.
This course provides an opportunity for students to study how a single theme is treated by a number of writers in the diverse genres of poetry, fiction, and nonfiction and to experiment with writing in all three genres as well. Topics will vary by year, but students will get the opportunity to write creatively and analytically on the theme in a course that combines techniques of literary study with those of creative writing.

ENW 0214 Professional Presentations: Writing and Delivery 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: EN 0012.
The ability to speak confidently and convincingly is an asset to everyone who wants to take an active role in his or her workplace and community. This interdisciplinary and writing-intensive course provides students with the necessary tools to produce audience-centered presentations and develop critical-thinking skills. It also introduces the techniques of argumentation and persuasion, and the use of technology in presentations.

ENW 0220 News Writing 3 Credits
Prerequisite: EN 0012 (concurrency allowed).
This introductory course emphasizes the techniques used by reporters to collect information and write stories for newspapers, magazines, the Internet, and broadcast outlets. Students learn to gather information, interview sources, write leads, structure a story, and work with editors. Students analyze how different news organizations package information, hear from guest speakers, and visit working journalists in the field. Students develop a higher level of media literacy and learn to deal with the news media in their careers.

ENW 0221 News Writing II: Digital Design 3 Credits
Prerequisite: ENW 0220.
The journalism world is in the middle of a transformation in the way stories are conceptualized, generated and communicated. Digital Journalism will help students discover how to take advantage of the multimedia possibilities in this new world of online story telling. This intermediate writing and multimedia course will allow students to build more complex and engaging story packages, taking advantages of new computer tools like the Adobe Creative Suite. It also will introduce students to the literature of publication design and help them develop an appreciation of the contributions that various world cultures have made to communication and design aesthetics.

ENW 0222 Journalism Editing and Design 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: ENW 0220.
Editing skills are in high demand in today’s journalism job market both for traditional and online sources of information. This intermediate level course emphasizes conciseness, precision, accuracy, style, and balance in writing and editing. The course includes researching and fact-checking, basic layout and design, headline and caption writing, and online editing.

ENW 0290 Writing and Responding 3 Credits
Prerequisite: EN 0012 (concurrency allowed).
This course introduces the field of contemporary composition theory. Composition theorists consider ways of responding to the words of other people in a manner that is thoughtful, careful, and provocative. At the same time, they learn that by responding to the work of others, they ultimately become better writers and better thinkers themselves. This course focuses specifically on the response types appropriate for one-to-one work with writers. Students also gain hands-on experience in the course by writing extensively, sharing writing with other class members, critiquing student texts, and engaging in trial tutoring sessions. This course is a prerequisite for anyone wishing to apply for a paid position as a peer tutor in the Fairfield University Writing Center.

ENW 0302 Creative Writing: Poetry II 3 Credits
Prerequisite: ENW 0202.
In a workshop setting, the class discusses six assignments, writing about a painting or writing in a structured form such as a sestina or sonnet. In addition to looking at models that illustrate individual assignments, the class reads collections by six poets and discusses a book on traditional forms.

ENW 0305 Creative Writing: Fiction II 3 Credits
Prerequisite: ENW 0205.
This advanced workshop further develops skills begun in ENW 0205 by looking closely at the craft of fiction. Students produce a substantial body of quality work such as several full-length short stories or substantial revisions, a novella, or several chapters of a novel. In addition to reading selections from published fiction writers, students read and comment extensively on their peers’ work.

ENW 0306 Creative Writing: Nonfiction II 3 Credits
Prerequisite: ENW 0206.
This advanced workshop builds upon students’ experience in creative nonfiction and allows students to practice the art of memoir in a workshop setting. Students will read in subgenres such as Adversity/Transformation, Family/Generational, Political/Social, and Spiritual Memoirs and comment extensively upon their peers’ work while reading exemplary work in the genre.

ENW 0307 Form and Theory of Creative Writing 3 Credits
Prerequisites: ENW 0202, ENW 0205, ENW 0206.
This course invites deeper study into the theoretical underpinnings of and diversity of formal choices available within a given genre in creative writing. Students will study theories of composition, the origins and utility of certain techniques specific to the genre, and will be asked to experiment with how these theories and practices inform their own experience of writing in the genre. Sustained attention to the functioning of language within the genre, and discussion of the process by which literary works within that genre gain their specific meanings.

ENW 0311 Teaching and Writing 3 Credits
Attributes: EDCG Educational Studies Cognate
Prerequisite: EN 0012.
This course is designed to enhance students’ skill as writers and their preparation as future teachers of writing in elementary and secondary schools. The course explores four significant questions: How do students learn to write? What experiences encourage good writing? How can your own experience as a writer inform your teaching? And, What do professional or state standards (such as the Common Core State Standards) require students to know about writing? Students have opportunities to write in a variety of genres and for a range of audiences. This course will help students develop the knowledge, skills, and competences to meet the NCTE/NCTA Standards for the Initial Preparation of Teachers of Secondary English Language Arts.
ENW 0317 Teaching and Learning Grammar 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: EN 0012.
This course is intended for students who may want to teach English Language Arts and who want to build (or build on) a strong foundation in both traditional and alternative models of English grammar and pedagogy. This course will help students develop the knowledge skills and competences to meet the NCTE/NCATE Standards for the Initial Preparation of Teachers of Secondary English Language Arts. A primary goal of the course is to help future teachers understand the study of grammar as much as more than learning a static list of "rules," but rather as a set of overlapping inquiries into the origins, nature, uses, and consequences of language.

ENW 0320 Writing the Feature Story 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: ENW 0220.
Students learn how to generate and develop feature story ideas, including human-interest stories, backgrounders, trend stories, personality profiles and other softer news approaches for use by newspapers, magazines, and web sites. The course stresses story-telling techniques and use of alternative leads. Interviewing, web research and rewriting techniques are stressed.

ENW 0321 Big Data Storytelling 3 Credits
Prerequisite: ENW 0220.
This intermediate course synthesizes cutting-edge big data technologies and traditional news writing and aims to produce compelling stories by mining the enormous public data provided by government and non-profit organizations. Other than overviewing the construct of big data, its origin, and social impact, the course offers hands-on training on using intuitive tools to produce engaging data-driven stories. Students will work through the entire production process: data access, retrieval, cleaning, analysis, and visualization. Principles of information visualization and interface design will be applied throughout the course, accompanied by in-depth discussions on legal and ethical challenges facing big data story telling.

ENW 0323 Photomjournalism 3 Credits
Attributes: ENDE Digital Journalism Elective, ENPC Digital Journalism Production Component
Prerequisite: ENW 0220.
Photography is derived from the Greek words for light and writing. Just as a journalist masters the art of words, a photographer masters the art of writing with light. A photographer tells a story with a single image, or multiple images, which impact the readers with a wide variety of human emotions. This course is about reporting with a camera, the visual aspect of journalism. Some technical aspects will be covered, but the majority will be hands-on assignments that are typical of newspapers, magazines, and web sites. There is substantial reading on photojournalism, plus a variety of writing assignments.

ENW 0329 Issues in News Writing 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: ENW 0220.
This intermediate course will focus on a different dimension of news writing each semester. Guest speakers will help students develop an ethical decision-making approach to journalism and deepen their understanding of the role of the press as a government watchdog. Students may take this course twice under different subtitles.

ENW 0330 Literary Journalism 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: EN 0012.
This course focuses on the use of story-telling techniques in writing creative nonfiction. Students learn how to make factual articles come alive by incorporating techniques such as narrative, dialogue, scene-setting, pacing, conflict and resolution. The course emphasizes interviewing and advanced research techniques used in writing these creative nonfiction articles for newspapers, magazines, books, and online sources. There will be substantial reading and analysis of classics in the literary journalism field.

ENW 0332 Business Writing 3 Credits
Attributes: BUEL Business Elective, ENDE Digital Journalism Elective
Prerequisite: EN 0012.
This course investigates the demands of business writing, including designing documents that visually display information and invite readers to read either quickly or thoroughly. The course stresses theoretical issues as well as practical skills. Students practice writing skills on a variety of projects including memos, proposals, reports, collaborative writing, and writing as part of the job-hunting process. Learning goals include understanding the purposes of writing in business and industry, writing with a clear sense of audience, becoming familiar with document design and electronic communication, ethical and cross-cultural issues, and reviewing scholarly writing and research in this academic field.

ENW 0335 Technical Writing 3 Credits
Attributes: ENDE Digital Journalism Elective, EVAP Environmental Studies: Applied Professional Skills
Prerequisite: EN 0012.
This course investigates the theory and practice of writing in technical fields, introducing students to types of oral, written, and hypertext communication that technical writers use in workplace settings. In-class writing activities, workshops, and lengthier projects familiarize students with the styles, organizations, and formats of various documents, and prepare students for the special demands of technical writing. The course also introduces students to research and scholarly writing in the academic field. This course is suitable for advanced undergraduate students preparing for writing-intensive careers or graduate school, as well as technical writing professionals and practitioners who wish to plan, research, and write more effectively. Available to MPA students with permission; additional coursework required.

ENW 0336 Issues in Professional Writing 3 Credits
Attributes: ENDE Digital Journalism Elective, ENPC Digital Journalism Production Component
Prerequisite: EN 0012.
This course investigates a variety of issues relevant to contemporary professional writing. In addition to surveying theoretical positions in the discipline, the course emphasizes preparing effective written products for academic and professional settings. In-class writing activities, workshops, and lengthier projects prepare students to think critically in this dynamic and ever-changing profession while familiarizing them with the writing styles, organizations, and formats of various documents. Topics include writing for public relations, multimedia writing, and technical and professional editing. This course is suitable for advanced undergraduate students preparing for writing-intensive careers or graduate school. Students may take this course twice under different subtitles.

ENW 0337 Issues in Online Writing 3 Credits
Attributes: ENDE Digital Journalism Elective, ENPC Digital Journalism Production Component
Prerequisite: EN 0012.
This course investigates a variety of issues relevant to contemporary online writing. In addition to surveying theoretical positions in the discipline, the course emphasizes preparing effective written products for academic and professional settings. In-class writing activities, workshops, and lengthier projects prepare students to think critically in this dynamic and ever-changing profession while familiarizing them with the writing styles, organizations, and formats of various documents. Topics include writing for public relations, multimedia writing, and technical and professional editing. This course is suitable for advanced undergraduate students preparing for writing-intensive careers or graduate school. Students may take this course twice under different subtitles.
ENW 0337 Multimedia Writing 3 Credits
Attributes: ENPC Digital Journalism Production Component
Prerequisite: EN 0012.

The purpose of this class is to encourage students to question how rhetoric functions in and through multimodal texts. Specifically, our goal throughout this course is to answer the question: what makes for an effective multimodal text? We will examine how meaning is construed through the use of images, sounds, arrangements, colors, shapes, sizes, movement, and fonts. We will analyze the ways rhetors construct multimodal texts, and we will also create our own multimodal texts. Together we will learn to use Photoshop, iMovie, Dreamweaver, CSS, and HTML in order to create rhetorically savvy multimodal texts.

ENW 0338 Persuasive Writing 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: EN 0012.

This course sharpens students’ skills in argument and encourages a clear, forceful prose style. Students practice writing skills in a variety of projects including resumes and cover letters, editorials, formal proposals, and public service announcements designed for video podcasts. Students will learn how to analyze an audience and use key features of persuasion such as concessions, disclaimers, rebuttals, and effective leads. The course examines the ethical responsibilities of a persuasive writer in business and civic life.

ENW 0339 Grant and Proposal Writing 3 Credits
Prerequisite: EN 0012.

This course prepares students to write effective proposals and reports. Students learn to define and write problem statements, objectives, plans of action, assessment documents, budget presentations, and project summaries. In addition, they sharpen their teamwork, editing, writing, audience awareness, and design skills as they engage in collaborative projects with non-profit organizations in the community. Relevant historical and ethical considerations are discussed. A service-learning component is included in this course. Available to MPA students with permission; additional coursework required.

ENW 0340 World of Publishing I 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: EN 0012.

This course introduces students to the field of publishing, particularly book and magazine publishing. It provides students with a solid foundation in the publishing field (e.g., selecting and editing manuscripts, book/magazine production, and marketing) and offers students practical hands-on experience similar to that of an internship position at a magazine or publishing house. In addition to attending lectures and participating in discussion, students work on the University’s national literary magazine, Dogwood.

ENW 0341 World of Publishing II 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: ENW 0340.

Students gain hands-on experience in the field of publishing, particularly book and magazine publishing, by working as associate editors in the preparation of the University’s national literary magazine, Dogwood, including work with digital publishing and design platforms.

ENW 0342 Sports Journalism 3 Credits
Attributes: ENDE Digital Journalism Elective

This course instructs students in the skills necessary to be a member of the evergrowing field of sports media, while simultaneously examining how early 1900s sports writing grabbed a foothold in the American public’s consciousness and eventually paved the path to today’s Golden Age of sports journalism. Students will learn to cover a wide variety of sports, and will report and write everything from game stories to opinion pieces to in-depth, multimedia feature stories focused on the sporting world.

ENW 0345 Internship 1-3 Credits
Attributes: ENCP Digital Journalism Capstone Course
Prerequisite: EN 0012.

The internship program allows students to gain on-site experience in the fields of journalism, publishing, and public relations through supervised work for local newspapers, magazines, publishers, and news agencies. These positions are available upon recommendation of the department intern supervisor, under whose guidance the students assume the jobs, which require 10 to 15 hours a week. Students may take one internship for credit toward the English major. Students may take a second internship for elective credit. The internship workshop is held in the evening, once a month. Enrollment by permission only.

ENW 0346 Internship 1-3 Credits
Attributes: ENCP Digital Journalism Capstone Course
Prerequisite: EN 0012.

The internship program allows students to gain on-site experience in the fields of journalism, publishing, and public relations through supervised work for local newspapers, magazines, publishers, and news agencies. These positions are available upon recommendation of the department intern supervisor, under whose guidance the students assume the jobs, which require 10 to 15 hours a week. Students may take one internship for credit toward the English major. Students may take a second internship for elective credit. The internship workshop is held in the evening, once a month. Enrollment by permission only.

ENW 0347 Independent Writing Project 3 Credits
Attributes: ENCP Digital Journalism Capstone Course
Prerequisite: EN 0012.

Students undertake individual tutorials in writing and can obtain credit for writing for The Mirror, The Sound, or for other projects of personal interest. Only one independent writing project can be counted toward fulfilling the five field electives required to complete an English major. The department will consider exceptions only if multiple Independent Writing Project courses cover different subject areas and approval in advance is obtained. Enrollment by permission only.

ENW 0348 Independent Writing Project 3 Credits
Prerequisite: EN 0012.

Students undertake individual tutorials in writing and can obtain credit for writing for The Mirror, The Sound, or for other projects of personal interest. Only one independent writing project can be counted toward fulfilling the five field electives required to complete an English major. The department will consider exceptions only if multiple Independent Writing Project courses cover different subject areas and approval in advance is obtained. Enrollment by permission only.

ENW 0350 Special Topics in Writing (Shell) 3 Credits
Prerequisite: EN 0012.

This course is an umbrella under which a variety of courses can be taken on an experimental or temporary basis, exploring different writing styles and approaches.
ENW 0397 Journalism Practicum 3 Credits
Attributes: ENCP Digital Journalism Capstone Course, ENDE Digital Journalism Elective
Prerequisites: ENW 0220; junior or senior standing; one semester on Mirror.
Students apply the material learned in class by working as a reporter, photographer or editor with the campus newspaper, The Mirror. The course is designed for Mirror editors or students with equivalent experience.

ENW 0398 Publishing Practicum 3 Credits
Attributes: ENDE Digital Journalism Elective
Prerequisite: ENW 0341; Junior or senior standing.
Students apply material learned in ENW 0340 as they serve in a senior editorial role as a Managing Editor in the preparation of the University's national literary magazine, Dogwood. Enrollment by permission only.

ENW 0399 Advanced Portfolio Workshop 3 Credits
Prerequisites: ENW 0302 or ENW 0305 or ENW 0306.
English 399 is a capstone course for Creative Writing concentrators who want to work on longer creative projects (novel, memoir, collection of short stories, essays, or poems; or some combination thereof). The course will be run as a workshop class, with students submitting creative work in one (or more) of the three genres, to be read and critiqued by the faculty member and students. Students can expect to submit a minimum of 50 pages of prose or 30 pages of poetry or some equivalent of the two. Students will also be required give a final public reading of their work during the semester.

Digital Journalism Major
The Bachelor of Arts degree in Digital Journalism in the English department is a rigorous, 12-course program designed to provide students with the knowledge, skills, and experience needed to understand and take part in today's quickly changing, digital journalism world. The major includes a large focus on ethics, consistent with Fairfield's mission, and a multidisciplinary approach that will draw on courses offered by other departments. It is inspired by the eloquensia perfecta approach to which the English Department aspires, consistent with Jesuit ideals.

The Digital Journalism major, alone or in combination with other majors and minors, will prepare students for professional careers in print and online journalism, broadcast journalism, technical writing, online writing, public relations, social media, marketing, law, and other fields. Students taking coursework in this major will build proficiency in media literacy and develop the ability to navigate the digital media spheres in their roles as civic leaders.
By completing a major in Digital Journalism, students will be able to:

• Demonstrate their ability to collect information and report on stories of public interest, using a conventional print format, social media tools like Twitter, and multimedia platform like WordPress.

• Demonstrate their ability to synthesize information from varied sources, including research, interviews, eyewitness accounts; analyze its veracity and usefulness; and build it into stories to help their audience understand an issue.

• Describe and debate the varied and sometimes conflicting roles of the press (to inform and amuse, educate and titillate, give readers what they want and what they need).

• Explain the privileges given to U.S. journalists through the First Amendment and the limitations – legal, ethical, and from professional standards – that guide and influence their work.

• Describe how the knowledge, attitudes, skills, and experience they develop in the program can be used in non-journalism settings such as law, public relations and marketing, and a variety of writing careers.

• Demonstrate their ability to write and communicate clearly across multiple platforms.

The major can be started in conjunction with taking EN 0012 during the first year, although most students will be sophomores when they start the Digital Journalism sequence. Students wanting an earlier start are encouraged to gain experience from various campus mass media outlets such as the Mirror, WVOF, or Stag TV.

**Requirements**

For a 36-credit major in Digital Journalism, students complete the following:

**Capstone Course**

Select one course from the following: 4
- ENW 0345/0346 Internship
- ENW 0347/0348 Independent Writing Project
- ENW 0397 Journalism Practicum

Total Credits 36

1 Literature courses should be chosen in consultation with your advisor, with an eye toward those more relevant to the broad field of journalism.

2 Students may substitute production courses with approval of the faculty advisor.

3 Other courses in Film, Television, and Media Arts; Communication; or Public Relations may also be used if approved by a faculty advisor.

4 Students may only use one internship and/or one Journalism Practicum course toward completion of the major or minor. Students may take a second internship and/or a second Journalism Practicum as a free elective toward graduation, but it does not count toward the major or minor.

**Digital Journalism Minor**

For a 15-credit minor in Digital Journalism, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

English Major

There are many different ways to pursue an English major, based on students’ interests and career goals.

1. All students must first complete the EN 0011 and EN 0012 core curriculum sequence. All of the major requirements are in addition to EN 0011 and EN 0012.

2. All English majors must complete the department core curriculum of five English literature classes. The five English literature courses can include the 100-level literature course required by the core curriculum.

3. All English majors must complete a concentration of five additional courses. Students select the concentration in consultation with their department academic advisor.

After completing EN 0011 and EN 0012, most majors begin the program by taking a 100-level literature class that also counts as their final English core course. With instructor permission, they may take a 200-level literature course instead of the 100-level.

Note: Students may use only one 100-level course to fulfill the requirements of the English major. They then take four additional literature courses at the 200 or 300 level. At least one course must be at the 300 level.

Of the five literature courses in the department core curriculum, at least two must be centered in the years before 1800 and at least one must be centered in the years after 1800. The historical period is listed in the catalog using the attributes E_BF (before 1800) and E_AF (after 1800).

Requirements

For a 30-credit major in English, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENW 0011</td>

</tr>
<tr>
<td>ENW 0016</td>
<td>Teacher Education (p. 127)</td>
<td></td>
</tr>
</tbody>
</table>

Concentrations

All English majors must select one of the Department’s six concentrations. The coursework is in addition to the university core and department core courses. The concentrations are:

- Literature (p. 125)
- Creative Writing (p. 126)
- English Studies (p. 126)
- Journalism (p. 126)
- Professional Writing (p. 127)
- Teacher Education (p. 127)

All concentrations include at least one ENW writing course (not including Internship or Independent Study) and a capstone experience. Students are allowed to complete more than one concentration; the second concentration will be listed as an academic minor on a student’s transcript for graduation.

Concentration in Literature

The Literature concentration is designed for students interested in a challenging and stimulating study of literature and culture. It offers a rich reading experience in important and influential works of literature as well as a study of theoretical and interdisciplinary approaches that move beyond national and canonical boundaries. Students learn to interpret texts within the sociohistorical contexts of their production and reception. They will therefore acquire knowledge in a number of theoretical frameworks (e.g., historical materialism, poststructuralism, feminist theory, postcolonial studies, queer studies, race and ethnic studies, and critical theory). Students completing the concentration are able to offer a historically grounded and rigorous critique of
global formations that structure literature, culture, and the self. The concentration prepares students for a variety of careers as well as for graduate or professional school.

**Specialized Courses**

Select one English Literature (EN) course at the 200 or 300 level

Select one English Writing (ENW) course

Select one English literature course cross-listed with an Interdisciplinary Program

**Capstone Experience**

EN 0390 | Literature Capstone                | 3       |

Total Credits 15

1 This includes the Program on the Environment, Peace and Justice Studies, Latin American and Caribbean Studies, Women, Gender, and Sexuality Studies, etc.

**Concentration in Creative Writing**

The Creative Writing concentration seeks to develop writers in various genres, including poetry, fiction, creative nonfiction and drama, as well as writers who wish to express themselves in more than one genre. The concentration is both rigorous and flexible to student needs, by offering a wide variety of classes in various genres and at various levels, and by allowing students to follow their own interests. In addition to preparing students to write creatively, the Concentration also prepares students to go into the field of publishing and editing by offering a sequence of publishing classes. In conjunction with publishing, students may elect to work on our national literary magazine, Dogwood.

</tbody>
</table>

**Intermediate Courses**

Select at least one course from the following:

| ENW 0302 | Creative Writing: Poetry II        | 3       |
| ENW 0305 | Creative Writing: Fiction II       |         |
| ENW 0306 | Creative Writing: Nonfiction II    |         |

**Specialized Courses**

Select at least one course from the following:

| ENW 0207 | Themes in Creative Writing         | 3       |
| ENW 0307 | Form and Theory of Creative Writing|         |
| ENW 0340 | World of Publishing I              |         |
| ENW 0350 | Special Topics in Writing (Shell)  |         |

**Capstone Experience**

Select at least one course from the following:

ENW 0390 | Literature Capstone                | 3       |

Total Credits 15

2 Students may substitute another ENW course with permission of the Coordinator of Creative Writing.

**Concentration in English Studies**

The concentration in English Studies provides students with special interests the opportunity to create a customized program of studies across literary genres, various writing concentrations and literacy studies in consultation with their adviser. Students might put together a coherent package of literature courses of their own choosing, mix and match writing courses in different concentrations, or combine relevant literature and writing course work. All department core requirements must still be met; at least one course must be in writing (other than Internship or Independent Study).

Concentration in Journalism

Note: Starting with the Class of 2019, students must pursue a Digital Journalism major if they are interested in the subject area. Students in the Class of 2018 or earlier may choose to pursue the new major or the five-course Journalism concentration.

The journalism concentration is designed for students interested in strengthening their news gathering, reporting, and writing skills. Many students in this concentration pursue careers as writers, editors, and reporters at web sites, newspapers, magazines, radio/television stations, web sites, and marketing and publishing companies. Students interested in careers in public relations and marketing especially find it useful.

<table>

</tbody>
</table>

**Specialized Courses**

Select at least one of the following:

| ENW 0222 | Journalism Editing and Design      | 3       |
| ENW 0320 | Writing the Feature Story          |         |
| ENW 0321 | Big Data Storytelling              |         |
| ENW 0323 | Photojournalism                     |         |
| ENW 0329 | Issues in News Writing             |         |
Concentration in Professional Writing

The professional writing concentration is designed for students who want to strengthen their writing and speaking skills as preparation for careers in business, the non-profit sector, legal studies, government, public relations, fundraising, politics, or education. Courses in this concentration focus on using writing and communication to make information accessible, usable, and relevant to a variety of audiences. Students develop advanced writing/composing skills using a wide variety of media, for a wide variety of disciplines and digital environments. Internships are available to students in the professional writing concentration, including placements in corporate communication, grant writing, advertising, marketing, technical writing, and the mass media.

Recommended Courses

Students are encouraged to select one or more of the following:

- A course on African American literature (e.g. EN 0105, EN 0262, EN 0263, EN 0264)
- A course on Latino/a literature (e.g. EN 0282)
- A course on world literature (e.g. EN 0102, EN 0111, EN 0113, EN 0114, EN 0274, EN 0375)
- EN 0172 Literacy and Language
- EN 0292 Contemporary Children's Literature
- ENW 0290 Writing and Responding

The EN courses listed above may also be used as English Core courses.

Capstone

Students who enroll in the five-year BA/MA program take their capstone course as student teaching at the end of the MA program. Students who do not enroll in the five-year program take at least one of the following: ENW 0345, ENW 0346, or EN 0399.

English Minor

For a 15-credit minor in English, students complete the following:

- Select five EN or ENW courses beyond EN 0012

Total Credits 15

Note: Students may choose to complete any concentration as a minor in English.

Environmental Studies

Understanding the natural environment, human impacts on environmental systems, and human perspectives on these relationships is more important than ever. The environmental studies program takes an interdisciplinary approach that combines cutting edge coursework in the natural sciences, policy, economics, and the humanities; adds an emphasis on critical thinking and problem solving skills; and provides plentiful opportunities for in-depth investigative research and applied experiential activities.

Students completing the major in Environmental Studies will be able to:

- Identify and describe fundamental physical, chemical and biological processes impacting environmental issues.
• Identify and describe fundamental concepts from the social sciences and humanities impacting environmental thought and policy.
• Analyze environmental issues using tools appropriate to the natural sciences, social sciences, and humanities.
• Communicate effectively about complex environmental issues for expert and general audiences.
• Critically evaluate the ramifications of human interaction with the environment from a scientific, social, and economic perspective.
• Formulate and revise solutions as part of an interdisciplinary team that may contain multiple stakeholders with divergent goals.
• Recognize and incorporate social and environmental justice as important components of sustainable solutions.

Students in the program will be offered a wide choice of courses and perspectives that will enable you to learn about both the problems and potential solutions. Internships and research projects are plentiful because of local and regional concerns about these issues. The program opens these opportunities to you and gives a special focus to your career or graduate study objectives.

Programs

• Environmental Studies Major (p. 128)
• Environmental Studies Minor (p. 129)

Courses

EV 0298 Internship 1-3 Credits
Attributes: EVCA Environmental Studies: Capstone, EVPE Environmental Studies Elective
Prerequisites: Completion of three environmental studies courses; program approval.
Environmental studies minors gain firsthand experience working off campus in fields related to environment science, policy, economics, education, and other issues. Typically, an internship requires 8 to 12 hours per week on site and a journal or summary report for credit. An on-site supervisor and an environmental studies professor evaluate student work. Students must have a GPA of 3.0 or higher.

EV 0299 Independent Study 1-3 Credits
Attributes: EVCA Environmental Studies: Capstone, EVPE Environmental Studies Elective
Prerequisites: junior or senior standing, three environmental studies program courses, and program approval.
A student may conduct a one-semester independent study on a defined research topic or field of study under the supervision of a professor in the Environmental Studies Program. Credit requires prior approval by the Professor which whom the student will work as well as the Director of the Environmental Studies Program. Students must have a GPA of 3.0 or higher.

EV 0301 Environment Workshop 3 Credits
Attributes: EVCA Environmental Studies: Capstone, EVPE Environmental Studies Elective
The Environment Workshop is a capstone course for students in the Environmental Studies Program but is also open to all juniors and seniors at the University. This course centers on a semester long, interdisciplinary project that examines a particular environment-related issue and proposes practical solutions.

EV 0303 Campus Sustainability 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science
Sustainability has become a nearly unassailable catchphrase for the 21st century. But what does it really mean? Not in a book but in practice? This course uses the Fairfield University campus and the expanding literature on best practices to explore key sustainability issues facing colleges, corporations, small towns, cities, and private citizens. The class will include off-campus site visits, guest speakers, and free ranging discussions of cutting edge readings. Students will also conduct semester-long individual or group interdisciplinary projects that analyze specific sustainability issues.

Environmental Studies Major

Requirements

The curriculum for majors is robust and interdisciplinary, requiring 13 courses. These include foundation courses in the natural sciences humanities and social sciences, a professional skill acquisition course, three electives, and a capstone.

To ensure additional disciplinary depth, all Environmental Studies majors will also fulfill the requirements for a major or minor in another department or interdisciplinary program. Students may double-count
courses toward a complementary second major or minor, as well as University core curriculum requirements.

Students who study abroad in an environmental program can work with the director or their advisor in the Program to match courses taken overseas with Environmental Studies requirements.

Health Studies

The minor in health studies will provide students with the opportunity to learn more about the complex issues related to the current and future environment of contemporary health care. This minor is appropriate for:

1. Any university student who seeks to learn more about health care and health care delivery as a current/future consumer.
2. Pre-health students who will become future health professionals and must have a broad and more integrative background for the increasingly interdisciplinary nature of the field.
3. Non-pre-health students who can become more educated about healthcare and, thus, become more competitive and better prepared to enter one of the countless professional fields that connect to the environment of contemporary health care.
4. Empowered health consumers and advocates for family and friends in future health care interactions.

This minor is not recommended for nursing students who already have a curriculum steeped in content on healthcare and healthcare delivery.

NS 0340 | Introduction to Global Public Health for Non-Nurses |
PH 0205 | Ancient Medicine and Philosophy |
SP 0231N | Career-Oriented Spanish for Nursing and Health Studies |

Total Credits 15

1 Select one course from each of the three elective lists. At least one elective must be an upper level course.

The elective courses in the health studies program are offered in collaboration with other departments, and count toward degree programs in other departments and programs. Descriptions of these courses are found in the course offerings for those departments.

Students may double-count courses with all core and major requirements.

History

The Department of History introduces students to the richness and complexity of the human experience. The discipline of history trains students to understand history as process: to research, analyze, synthesize, and critically evaluate evidence. To the historian, factual information is never an end in itself, but a means to understand how the conditions of our own day evolved out of the past. Those who major or minor in history receive a broad preparation for entrance into graduate school and the traditional professions of law, government, foreign service, journalism, business, and teaching. The department participates in interdisciplinary programs, including American studies, Asian studies, Black studies, Environmental studies, Judaic studies, Latin American and Caribbean studies, International studies, Russian and East European studies, Women, Gender and Sexuality studies, and University honors. Students who attain high standards of scholarship are sponsored for membership in the department’s Psi Theta Chapter of Phi Alpha Theta, the International Honor Society for History, and participate in the special programs under its auspices.

Core History Courses

All Fairfield University students take two history courses as part of their liberal arts core curriculum requirement. This requirement is fulfilled by one 100-level course, plus one 200- or 300-level course.

Programs

- History Major (p. 142)
- History Minor (p. 143)
### Courses

**HI 0100 Origins of the Modern World Since 1500**  
3 Credits  
The course, which examines the history of Europe and its relationship to the world from the end of the Middle Ages through the 19th century, emphasizes the cultural, social, economic, and political forces and structures that led to the development of commercial and industrial capitalism, and the effects of this development on Europe, the New World, Asia, and Africa. Topics include the Renaissance and Reformation; the Transatlantic Slave Trade; European expansion and colonialism; the development of strong nation states; the Enlightenment; the Industrial Revolution and conflicting ideological and political responses; changing social, family, and gender relationships; and the increasing interaction of Europeans and non-Europeans. Critical analysis of primary and secondary sources develops skills in historical methodology that are of great value in many other academic pursuits. Written assignments and class discussions enhance these skills. Formerly HI 0010.

**HI 0102 China, Japan, and Europe**  
3 Credits  
How can we provide a non-Eurocentric explanation of the rise of the modern world that has European and American features? We can do so by examining the encounters between the West and other parts of the world and by beginning and ending the story of the rise of the modern world not in Europe but elsewhere. This course surveys the history of Europe and the Atlantic world and their encounters with East Asia from the 1400s to the 1800s.

**HI 0103 Europe, Russia, and the World, 1300-1918**  
3 Credits  
This course examines the history of Europe and Russia and their relationship to the wider world from the end of the Middle Ages through World War I. Emphasis is placed upon cultural, social, economic, and political movements and the process of social and political change in Europe and Russia.

**HI 0104 War and Conflict in Western History, 1490-1989**  
3 Credits  
In this course we shall explore the political, social, religious, economic, and technological history of the western world by focusing on a single theme: war. By studying the conlicts that ravaged Europe and the world from ancient times to the later 20th century, we shall discover that war as an historical subject is much more than simply battles and tactics. What causes war? Religion? Politics? Economics? Social structures? The answer is “all of the above, intertwined.”

**HI 0105 Utopian Ideas and Practice Since 1500**  
3 Credits  
In order to understand past events, we must have a grasp on how their participants thought and what they imagined. This is a history of past futures: what people imagined would, could, or should happen. All utopian texts carry a critique of the societies that their authors inhabited.

**HI 0106 Imperialism and Colonialism in World History, 1500-Present**  
3 Credits  
This course is an introduction to the history of the modern world since 1500. Using a World History approach, we will explore the dramatic transformation of human societies over the past five centuries as a truly global process produced through the interactions of the West and “the rest.” The course focuses on the role of empires, imperialism, and colonialism in shaping world history.

**HI 0112 Germany Between Dictatorship and Democracy**  
3 Credits  
This course examines the turbulent history of modern Germany from the Second German Empire, or Kaisereich, to the present day Federal Republic. For much of this period, Germany played a pivotal, and indeed fateful, role in European and world affairs.

**HI 0146 Women’s History as U.S. History**  
3 Credits  
This course is an introduction to the discipline of history through a survey of American women’s experiences from the pre-colonial era to the 1960s. Weighing the impact of gender with race and class on everyday life, we explore the intersectional features of identity from multiple perspectives.

**HI 0201 History of Western Science**  
3 Credits  
Attributes: H_AF History After 1750, H_EU European History  
Prerequisite: HI 0010 or CL 0115 or CL 0116.  
This course is an introduction to the history of western science from antiquity to the present. Science informs our understanding of and interaction with every aspect of the world around us. In this course we will explore the historical paths that brought us to our contemporary understanding of the core sciences. We will examine scientists and their science within the broader historical contexts that shaped their lives and work. We will think critically about how scientific knowledge is created and the way society has used and abused scientific information.

**HI 0202 Health and Healing in America, 1650-1980: History of Western Medicine**  
3 Credits  
Attributes: HSTE Health Studies: Traditions, Delivery, and Ethics, H_AF History After 1750, H_US U.S. History  
Prerequisite: HI 0010 or CL 0115 or CL 0116.  
This course examines major themes and problems in the history of health and medicine in America. Students will explore the changing conceptions of health, illness, and disease from the colonial period through the 20th century in the U.S. Students will analyze the economic, political and cultural forces that helped shape the activities of patients and medical practitioners within an evolving medical marketplace. This course will introduce students to the perspectives of a wide range of sufferers and healers. Students will examine how medical theories, gender, race, class, and ethnicity have shaped the history of medicine in complex ways.

**HI 0203 European Society Middle Ages**  
3 Credits  
Attributes: CAOT Catholic Studies: Non-Religious Studies, H_BF History Before 1750, H_EU European History, ISIC Italian Studies: Italy Component  
Prerequisite: HI 0010 or CL 0115 or CL 0116.  
This course examines the social history of Europe from the barbarian migrations of the fifth century until the end of the Hundred Years War. From feudalism and the concept of courtly love, to the bitter power struggles of popes and monarchs, the course emphasizes emerging institutions, secular and religious, that came to define Western Europe in this and subsequent ages and to provide its most enduring rifts and hatreds. The course offers in-depth consideration of the role of women in medieval society, the persecution of Jews and other minorities, the Crusades, and the Black Death, with particular focus on their impact on the lives of average Europeans. Students read from primary and secondary sources.

**HI 0205 Anti-Semitism: Medieval to Modern**  
3 Credits  
Prerequisite: HI 0010 or CL 0115 or CL 0116.  
This course surveys the history of Jewish-Christian interaction in Europe from late antiquity until the Dreyfus Affair, with emphasis on the 10 centuries between the ninth and the 19th. Using primary and secondary sources, literature, and film, students explore the complex relationships between Jews and Christians in these years, including often overlapping instances of persecution, segregation, disputation, coexistence, assimilation, and cooperation. The major political events, social shifts, and intellectual trends that profoundly altered European society in this extended period provide the backdrop against which the changing lives of Jewish and Christian Europeans are studied.
This course examines the origins and legacy of the Nazi dictatorship during the years 1933-1945. We begin by analyzing the factors that facilitated the Nazis' rise to power including the long-term peculiarities of German history, the short-term crises of the years 1918-33, and the relationship between Hitler and the German people. Thereafter, the course examines the social, economic, political, and cultural life of the Third Reich during the years, 1933-39, before turning to Hitler's unleashing of World War II and the Holocaust in the years 1939-45. The course concludes by surveying the Nazi era's lingering legacy in postwar German and European memory.

This course surveys the major political, social, and cultural trends throughout the nation's unification in 1990.

This course surveys the turbulent history of modern Germany from the Middle Ages to the present day. Topics include the collapse of the Holy Roman Empire, the rise of the modern nation-state in the 19th century, the unification of Germany in 1871, and the establishment of the Weimar Republic and the Third Reich. The course concludes by surveying the Nazi era's lingering legacy in postwar Germany and European memory.

This course examines the history of Britain and of British overseas expansion between 1400 and 1800; the Tudor-Stuart conquest of Ireland; the establishment of the North American colonies and West Indian plantations; the growth of British power in India during the 18th century, the loss of the Thirteen Colonies, and the beginnings of British rule in Canada. Students study the causes and effects of imperial expansion from the standpoint of British political development, British society, English-speaking colonists, African slaves, and Native Americans.

This course examines the history of Britain and the British Empire from its great 19th-century expansion into Africa and Asia to its eventual crumbling under the impact of 20th-century independence movements and global war. Students compare the various independence movements, from the relatively peaceful transitions of Canada and Australia to the more violent ones by Ireland, South Africa, and India. The course finishes with an examination of the current racial and cultural conflicts that beset Britain's former colonies, with particular focus upon Ireland and South Africa.

This course introduces the civilizations of the ancient Nile Valley, Egypt, and Nubia. It includes the study of the development of ancient Egyptian civilization, the pharaohs, and the impact of foreign invasions and conquests on the country. The course also examines the role of religion in ancient Egyptian society and the development of literature, art, and architecture.

This course surveys the history of the Jewish people from the middle of the eighteenth century up to the present day. Following a brief survey of the ancient and medieval periods, we will examine the social, political, and cultural changes brought about by the dawning of the Jewish Enlightenment, the struggle for political emancipation, and the pursuit of religious reform in Western and Eastern Europe. We will then examine modern anti-Semitism, Zionism, the Holocaust, and the founding of the state of Israel. The course concludes by surveying the history of American Jewry.
HI 0221 Hellenistic World, 336-30 BCE 3 Credits
Attributes: H_BF History Before 1750, H_EU European History, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
The course examines the Mediterranean world and the ancient Near East from the late fourth to late first centuries BC. Focus is on: the career of Alexander the Great; the Greek kingdoms that emerge after the collapse of his empire; the interaction between local cultures and religions, e.g. Egypt, ancient Judaism, and Greek civilization; the social history of daily life in conquered lands under Greek rule; and the transformations in the Hellenistic world with the arrival of Roman rule.

HI 0222 The Roman Revolution 3 Credits
Attributes: H_BF History Before 1750, H_EU European History, ISIF Italian Studies: Italy-Focused
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This comprehensive study of the political, social, artistic, literary, and military transformation of Rome from the middle of the second century BCE through the reign of Augustus gives special attention to Rome's response to the cultural and governmental challenges imposed by its growing empire and how its responses forever changed the course of Western civilization.

HI 0223 The Roman World in Late Antiquity, 284-642 AD 3 Credits
Attributes: H_BF History Before 1750, H_EU European History, ISIC Italian Studies: Italy Component
Prerequisite: HI 0010 or CL 0115 or CL 0116.
The course examines the Mediterranean world from the third to seventh centuries AD. Focus is on: the collapse of the Roman Empire in western Europe; the dramatic upheavals caused by the arrival in the Roman Empire of the Visigoths, Vandals, and other barbarian tribes; the survival of the Byzantine East through the early Islamic conquests; the rise of Christianity from a persecuted religion to the official religion of the Roman Empire; and the accompanying cultural transformations, including the rise of monasticism and the importance of the holy man.

HI 0224 Byzantine World 3 Credits
Attributes: H_EU European History
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course is an introduction to political and social history of Byzantine Empire. It also highlights Byzantium’s role as a bridge between Greco-Roman antiquity and modern European civilization. Course lectures will cover Byzantium’s origins in the eastern half of the Roman Empire, Byzantium’s middle period as a major Mediterranean power, and its late period as an increasingly shrinking city-state. The course will also introduce students to some of the major Byzantine historians and to methods of analysis using these sources, and train students to form historical arguments based on these analyses.

HI 0230 Early Modern France 3 Credits
Attributes: FREN French Course Taught in English, H_BF History Before 1750, H_EU European History
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course covers the political, social, and cultural development of France from the 16th-century Wars of Religion to the ascension of Napoleon I in 1804, with an emphasis on the effects of revolutionary change on daily life (including the role of women, popular piety, the church and religious dissent, and labor relations), and on the impact of new political languages beyond the borders of France itself. Source readings, from the salon writings of the Bourbon court to the raucous songs of the streets of Paris, aid in considering if a French identity was formed during the period.

HI 0237 American Prophetic Tradition 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This Ignatian Residential College course explores the experiences of individuals and social movements throughout U.S. history, who from a variety of religious and philosophical traditions found meaning in their lives and made an impact on U.S. society. Individuals range from Mary Dyer and Roger Williams to Lucretia Mott, Walter Rauschenbusch, Dorothy Day, John Cardinal Murray, and Jonathan Kozol, from the abolitionists to the anti-war movement.

HI 0238 19th Century United States 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Students study the major transformations in U.S. economy, society, and politics from the Federalist era, through the Civil War to the beginning of the Progressive Era. The course analyzes forces of change in the United States - the struggle over slavery, as well as urbanization, industrialization, the maturation of corporate capitalism, and the growing importance of international affairs - and their effects on the way people lived, thought, and acted. The experiences of African-Americans, immigrants, and women receive special attention.

HI 0239 20th Century United States 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
The course surveys developments in American social, political, and economic life since 1900. Major themes include conflicts of industrial society, the growing government role in the economy, America's growing role in the world, and social movements of the 1930s and 1960s. Ethnic and cultural diversity within American society receive attention.
HI 0240 The Personal Is Political: Women's Activism in the 1960s 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Little fanfare and much derision accompanied the re-emergence of a women's movement in the mid-1960s. Within less than a decade, massive changes were underway. From the dismantling of gendered employment ads to the identification of domestic violence as a crime, few argued that Second Wave Feminism was meaningless. Students in this course discuss the depth and range of women's grass roots activism as well as the features of a social movement; they trace the development of consciousness, the growth of different ideologies, and the formation of agendas. The course also explores movement fault lines such as the fictive category of woman, racism, and “structurelessness,” in addition to the difficulties of sustaining coalition. From the Montgomery bus boycott in 1955 to the Houston Conference 22 years later, students encounter the women who illuminated the political nature of issues once relegated to the private arena. Course material includes extensive use of autobiography.

HI 0242 Immigration, Race, and Ethnicity in U.S. History 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This thematically arranged intensive reading, writing, and discussion seminar on the history of U.S. immigration in the 19th and 20th centuries situates the United States within the context of global migration patterns and economic development. Students investigate patterns of migration and community settlement, family strategies of survival and adaptation, and immigrant cultures. They analyze how successive groups of immigrants were received by U.S. society by examining the origins and effects of recurrent waves of racism, nativism, and ethnic and class antagonism that pervade American history.

HI 0243 American Constitutional and Legal History I: 1776-1900 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course covers the origins of the American constitutional tradition, the manifold heritage of the American Revolution, Jeffersonian republicanism and federal judicial power, nationalism and the centralization of the Marshall court, the reaction on the Taney court, slavery and sectionalism, the Civil War, Reconstruction, the Second American Constitution, and the Gilded Age turn in American law.

HI 0244 American Constitutional and Legal History II: 1900 to Present 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines the latter portion of the Fuller court, Imperialism and the Constitution, governmental efforts to restore economic competition, the police power, economic reform, progressivism, the tradition of national supremacy, new turns in civil liberties, the New Deal and the old Supreme Court, civil rights and the incorporation theory of the 14th amendment, and new roads back to legal conservatism.

HI 0245 Feminism in the United States 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Participants study feminism based on the premise that it is a multi-faceted struggle for women's autonomy and self-determination. The course focuses largely on the United States, birthplace of the first organized women's movement; however, it periodically expands its view beyond the United States for purposes of comparison. Students analyze the development of the feminist movement as well as feminist theory during the 19th and 20th centuries and explore the discourse on gender mediated by race and class, and its impact on women's lives. Using primary and secondary sources, students work toward a historical definition of feminism.

HI 0246 Women and Gender in U.S. History 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course surveys American women's history from the colonial era to the present, exploring the impact as well as the interdependence of gender, race, and class on experience. Although the term social history describes the course approach, it uses biography to illuminate key issues and enrich student perspectives. Through careful examination of primary and secondary sources, the course pursues two themes: the interplay of gender constructs through the myths and realities of women's lives, and the crucial role women played in transforming public and private space. The course views women as agents whose testimony and actions are vital to understanding our history.

HI 0247 Family and Sexuality in U.S. History 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines the growing scholarship in the fields of family history and sexual history in America. Students will explore the changing meanings of family, love, intimacy, emotions and sexuality from the colonial period through the 20th century in the U.S. Students will analyze the economic, political and cultural forces that helped shape sexual and family history. This course will introduce students to a wide range of American families and sexualities in history, examining how race, class, and ethnicity have made familial formation, sexual behavior and personal identity richly varied and complex.
HI 0250 America Enters the World: United States Foreign Relations, 1763-1900
Prerequisite: HI 0010 or CL 0115 or CL 0116. Students explore the foundation of U.S. foreign relations from independence in 1776 to the outbreak of World War I in 1914. This course looks closely at the interrelationship between ideals and reality as the new United States struggled to protect and confirm its independence, establish a constitutional basis for foreign policy, and expand its borders and influence across the North American continent and around the world. The course discusses such questions as manifest destiny, the Monroe Doctrine, the Mexican War, the displacement of Native Americans, southern expansionism and the Civil War, the Spanish American War, and the open door policy as the United States became a world power on the eve of World War I.

HI 0251 The American Century: The United States and the World Since 1900
Prerequisite: HI 0010 or CL 0115 or CL 0116. This course examines the development, crises, and turning points in U.S. relations with the world from Woodrow Wilson to the present, exploring issues such as U.S. reactions to the Russian Revolution, World War I, isolationism and the coming of World War II, the Grand Alliance, the origins and development of the Cold War, the nuclear arms race, the Vietnam War, the United States and Latin America, U.S./Soviet relations, the Middle East and Persian Gulf crises, and the post-Cold-War world.

HI 0252 Early America to 1800
Prerequisite: HI 0010 or CL 0115 or CL 0116. This study of the foundations of American civilization compares the colonial systems of Spain, France, and England. The course stresses the development of the British colonies in New England, the mid-Atlantic, and the South, with special emphasis on such topics as Puritanism, the Great Awakening, and the Enlightenment. The course continues through the American Revolution and the early United States to 1800. The role of outsiders – free and enslaved Africans, women and American Indians – is stressed.

HI 0256 Introduction to Public History
Attributes: H_AF History After 1750, H_US U.S. History
Prerequisite: HI 0010 or CL 0115 or CL 0116. This course presents the field of Public History, which is the application of academic historical knowledge for presentation to the general public in a manner that enhances the public's understanding of historical change. It gives students the skills to think about and write local history, by exploring the bases for historical analysis through evaluation of primary-source documents and familiarity with secondary historical interpretations. Through service-learning projects, students will serve community partners such as the Fairfield Museum and History Center, the Bridgeport Public Library Historical Collections, and the Barnum Museum, by contributing historical research, designing exhibitions, and preparing curriculum lesson plans.

HI 0257 Who Built America? Working People in America
Prerequisite: HI 0010 or CL 0115 or CL 0116. This course explores the history of working people's lives and social movements in the U.S. from the pre-industrial era, through the Industrial Revolution, to today's "post-industrial" society. This is not an Industrial Relations course. We look at three broad areas of historical change: 1) work itself, 2) the making and re-making of the American working class; and 3) the definitions of social justice that working people constructed for themselves and that informed their social movements. Our goal is to understand how and why the "Labor Question" was at the heart of American reform movements in the 19th and 20th centuries. Special attention will be given to the experiences of women, African Americans, and other racial and ethnic groups.

HI 0258 American History, 1619 to 1865
Prerequisite: HI 0010 or CL 0115 or CL 0116. This course examines the role that Africans played in the building of America after their forced migration to these shores. It emphasizes the rise of the plantation system, the cultural transformation of Africans into African-Americans, and the essential roles that slaves and slavery played in the emergence of the United States as an independent nation and its political and economic consolidation into a modern nation-state. Slaves and free blacks figure in this history, not just as tools and backdrop, but as social and political actors, rebels, and major builders of American civilization.

HI 0263 Inventing Themselves: African-American Women in U.S. History
Prerequisite: HI 0010 or CL 0115 or CL 0116. At the intersection of race, gender, and class, African-American women often challenged the codification of blackness and femaleness as well as a limited conception of class consciousness. From the diaspora to the present, they created forms of resistance, devised survival strategies, and transmitted cultural knowledge while defying racial/gender stereotypes. The multiple roles assumed by African-American women during their struggle from slaves to citizens in the United States represent a complex study of the relational nature of difference and identity. This course focuses on African-American women as subjects and agents of pivotal importance within the family, community, and labor force.
HI 0264 African-American History, 1865 to Present  3 Credits
Attributes: ASHI American Studies: History, ASUP American Studies
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines the role of African descent played as freed people and free people during Reconstruction, the Gilded Age, and the 20th century. It emphasizes the Southern origins of African America, the politics and economic activism of common people, and the recurring theme of struggle against racial injustice.

HI 0265 History of the Indian Subcontinent: Colonialism, Nationalism, and Democracy, c.1857-Today  3 Credits
Attributes: H_NW Non-Western History, PJST Peace and Justice Studies, UDIF World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Faced with unrivaled questions of diversity, poverty, and scale, South Asia has been a crucial laboratory in the making of political modernity. India, with a population numbering over a billion, is the world's largest democracy. Pakistan was the world's first Muslim "homeland" and "nation." Beginning with an examination of the colonial period, this course reconsiders partition, and then follows the postcolonial trajectories of India, Pakistan, and Bangladesh. We explore innovative and divergent imaginations of the future, and of democracy in particular. We encounter Hindu nationalists, communists, socialists, liberals, anarchists, Islamists, and Muslim nationalists, revolutionaries, and the inescapable Mahatma Gandhi.

HI 0270 History of Global Humanitarian Action  3 Credits
Attributes: H_AF History After 1750, H_EU European History, PJST Peace and Justice Studies, UDIF World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course, an intermediate (second core) history course, surveys the history of global humanitarian action in the face of famine, war, plague, natural disaster, refugees and other crises, since the middle of the nineteenth century. We will focus on intervention by European powers, the United States, the international community, and non-governmental actors. Special focus in case studies will be on 20th century war, famine, and genocide. Each student will research a case study with a focus on potential points of life-saving intervention.

HI 0271 Introduction to Russian History, Culture, and Civilization  3 Credits
Attributes: H_AF History After 1750, H_EU European History, UDIF World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This intermediate level history and culture course will introduce students to the multiple facets of Russian identity. Embracing the period from East Slavic settlements in the ninth century to contemporary Russia under Yeltsin, Putin and Medvedev, the course will survey major themes that contributed to the creation of the Russian archetype. The idiosyncrasies of Russia's geographic location, the enduring presence of Russian Orthodoxy, the complex relationship with the West, debates about "Russianness" among the Russian intelligentsia and the context of the Soviet Union and its disintegration, will be explored through literary texts, film, and significant works of art.

HI 0272 Russia, 700-1700: History and Myth  3 Credits
Attributes: H_BF History Before 1750, H_EU European History, UDIF World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course is a survey of the eastern forest-steppe frontier of Europe (the territory of what is now Russia, Ukraine, and Belorussia) from its first pagan rulers up to Russian Tsar Peter the Great, covering such themes as Russian Orthodoxy, the Mongol invasion, the growth of the Russian State and the founding of the Russian empire.

HI 0273 History and Culture of Central and Eastern Europe Since 1945  3 Credits
Attributes: H_AF History After 1750, H_EU European History
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This core history course explores the extraordinary story of accommodation, resistance, and oppression in Central and Eastern European societies during the second half of the 20th century and the crucial role that cultural and intellectual forces played from the period of fascist and wartime occupation, through the communist period to the overthrow of communism and the development of new societies in the period 1985 to the present. The course interweaves film from Poland, the Czech and Slovak Republics, and Hungary, historical texts and documents, and memoirs and writings of key dissident intellectuals, such as Vaclav Havel.

HI 0274 Historical Perspectives on Contemporary Global Crises  3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines, using topical, geographic, and critical approaches, the interaction of the United States and western Europe with the rest of the world in the 20th century, giving considerable attention to non-Western perspectives such as those of Asia, Africa, Latin America, the Arab world, Russia, and Eastern Europe. The course also includes an introduction to the history of U.S. foreign relations, international organizations, social change in the developing world, and world systems theory.

HI 0275 Russia's Road to Revolution  3 Credits
Attributes: H_AF History After 1750, H_EU European History, UDIF World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Topics in this course include the modernization of Russia since Peter the Great; the impact of Western culture in the 18th century; Catherine the Great as reformer; intellectual protest against autocracy and serfdom; revolutionary ferment: Slavophiles and Westerners; from populism to Marxism-Leninism; the revolution of 1905; the industrialization of Russia to 1914; and the revolutions of 1917.

HI 0276 St. Petersburg in Russian History  3 Credits
Attributes: H_AF History After 1750, H_EU European History
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This intermediate course offers an in-depth introduction to the extraordinary story of the city of St. Petersburg - Russia's "window on the west." St. Petersburg served as imperial Russia's capital from 1703 to 1918. After the consolidation of Soviet power, St. Petersburg (as Leningrad) continued to play a key role in 20th-century Russian social, political, and cultural history. The collapse of the Soviet Union in 1991 led to the rebirth of St. Petersburg as a cultural center. The course emphasizes historical sites and cultural accomplishments of St. Petersburg through the use of slides, video, and music.
HI 0278 A Cultural History of China's Relations with the United States
Attributes: H_AF History After 1750, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
International relations are often conceptualized as power rivalry, stressing conflicts and collaboration among nations in international politics and political economy. In this course the Chinese-American relations are viewed as a history of people and cultural exchange, not just a top-down history of diplomacy and politics. Using culture rather than politics or economics as a reference point, this course examines China-US relations since the 19th century to the present from the interaction of cultural exchanges between the Chinese and Americans. Topics include: Chinese Exclusion Act of 1882, Messengers of the 19th century from both, China and United States, The Internationalization of China and United States: Educators of the 1920s, the Journalists of the 1930s and 1940s, Literature Imagination in China and United Sates, and Popular Culture and Sino-American Relations. The format of the course includes lectures, group discussions, debates and audio-visual presentations.

HI 0279 China from the Classical Time to the 1800s
Attributes: H_BF History Before 1750, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
To many people China is one of the most mysterious and intriguing civilizations. Its fascinating concepts of philosophy, government, religion, art, and science that formed several thousand years ago continue to influence the modern world. This course examines the history, culture, self-image, worldview, and the ideas and institutions that shaped China and its people from the classical time to the 1800s. It is difficult to cover several thousand years of Chinese civilization in one semester. However, after this course, students should emerge with basic knowledge of Chinese culture and people. This course is an analytical survey of major topics and themes in Chinese history and culture. The format of the course includes lectures, group discussion, debate, and audio-visual presentation.

HI 0280 The West and the Middle East
Attributes: H_AF History After 1750, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines Western and Middle Eastern relations from the 18th century to the present, relating recurring upheavals of the Middle East, including conflicts between ethnic-religious groups and economic classes, to structural transformations that have developed across two centuries. Topics include Western colonization and conquest, Middle Eastern nationalism; the Arab-Israeli conflict; the economics and politics of oil; and the Islamic revival.

HI 0281 Portrait of the Arabs
Attributes: H_BF History Before 1750, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This interdisciplinary course provides a broad introduction to Arab culture and society in the past and present, using novels, poetry, films, and scholarly studies to investigate contemporary issues and their relationship to a complex historical legacy. Topics include the formation of Arab identity; the relationship of city and countryside; women and the family; literature; the arts and architecture; and nation building.

HI 0284 20th Century Russia
Attributes: H_AF History After 1750, H_EU European History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course covers such major themes as the impact of the 1905 and 1917 revolutions; Lenin, War Communism, and the new economic policy; Stalin, collectivization, and the Great Purges; the Russian war experience and the Cold War; Khrushchev, reform, and de-Stalinization; Brezhnev, stagnation, and detente; Gorbachev, glasnost, perestroika, and political and economic crisis; the Revolution of 1987 to 1991; and post-Soviet Russia.

HI 0285 Modern China: 1800 to Present
Attributes: H_AF History After 1750, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines the major developments in modern Chinese history from about 1800 to the present to show China's transformation from a semi-colonial country in the 19th century to a major player in world affairs today. Topics include the Opium Wars, the impact of imperialism on China and China's response to it, the revolutionary movements of the first two decades of the 1900s, the rise of nationalism and Chinese Communism, the anti-Japanese War, the history of the People's Republic of China, the current economic reform movement and social changes, and China's role in the new world order.

HI 0286 The Rise of Modern Japan: 1800 to Present
Attributes: H_AF History After 1750, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines the transformation of Japan from the late Tokugawa period in the 1800s to the emergence of Japan as a post-industrial society. It focuses on historical forces and events, and on the efforts of Japanese women and men that have shaped Japan's transition from a late developing industrial nation during the Meiji period (1868-1912) to a great economic power in the 20th century. The dramatic social, political, economic, and cultural changes of the 1980s and 1990s receive attention. Students compare Japan's path to modernization with that of the West.

HI 0288 Colonial Latin America, 1492-1900
Attributes: CAOT Catholic Studies: Non-Religious Studies, H_BF History Before 1750, H_NW Non-Western History, LCEL LACS Minor: Elective, PJST Peace and Justice Studies, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
The course examines Indian cultures, Portuguese and Spanish institutions, and values on the eve of the conquests, including the clash of cultures and interests, and three ensuing centuries of New World dialectics: conquistadores, viceroys, colonists, priests, friars, Indian caciques and peasants, black slaves, and free mulattoes mutually interacting and forming, by 1800, a new civilization composed of varying hybrid cultures from the Rio Grande to Tierra del Fuego. The course also considers the Iberian colonies on the eve of the 19th-century revolutions for independence.
HI 0289 Modern Latin America, 1800-Present  
Attributes: H_AF History After 1750, H_NW Non-Western History, LCEL 
LACS Minor: Elective, WDIV World Diversity  
Prerequisite: HI 0010 or CL 0115 or CL 0116.

This course introduces students to the concrete actors and events that have shaped politics, culture, and society in Latin America from the nineteenth century wars of independence to the present. Through scholarly readings, primary source documents, literature, music, and film, we will explore the imprint of Spanish and Portuguese colonial rule, the struggles to consolidate nation-states, the efforts to "modernize" in the late nineteenth century, and the extremes that Latin America experienced during the twentieth century. Among the varied topics to be explored in detail will be labor and slavery, citizenship, changing gender roles, urbanization, mass politics and social revolution, and transitions from dictatorship to democracy. The course will also include a consideration of Latin America's changing relationship with the outside world, and particularly with its powerful neighbor to the north.

HI 0297 Power, Politics, History: U.S.-Latin American Relations from the 1800s to the Present  
Attributes: H_AF History After 1750, H_NW Non-Western History, LCEL 
LACS Minor: Elective, LCSC LACS Minor: Spanish Culture and Literature, PJST Peace and Justice Studies, UDIV U.S. Diversity  
Prerequisite: HI 0010 or CL 0115 or CL 0116.

In this course, students examine the political, economic, social, and cultural repercussions of US-Latin American relations from the mid-19th century to the present. We will study cases of overt US political intervention and conflict, as well as less dramatic but ongoing forms of influence. While we will seek to understand what has led the United States to intervene so frequently in Latin America, our work will also pay close attention to the multiple ways that social actors throughout the Americas have constructed their national and cultural imaginaries across time, and in dialogue with one another.

HI 0298 Historical Geography  
Attributes: H_AF History After 1750, H_US U.S. History  
Prerequisite: HI 0010 or CL 0115 or CL 0116.

Historical geography applies the tools of geography to the phenomena and events of the past. Maps, statistics, and an understanding of how people interact with the physical world allow the historical geographer to achieve a new perspective on historic events. This class will be grounded primarily in the historical geography of North America, the Caribbean, and Mexico, and will also consider the general topics of history of place, change over time, the nature and uses of maps, and spatial analysis.

HI 0303 What If? Alternate History and the Historical Imagination  
Attributes: H_AF History After 1750, H_RE History: Research Paper  
Prerequisite: HI 0010 or CL 0115 or CL 0116.

What if the American Revolution had failed? What if the South had won the Civil War? What if Hitler had never been born? This seminar investigates why these and other counterfactual questions have increasingly been posed in works of Western popular culture in the last generation. In exploring the recent emergence of counterfactual history as a cultural phenomenon, we examine a wide range of speculative novels, films, television shows, comic books, plays, and historical essays in comparative analytical fashion. In the process, we attempt to arrive at general conclusions about how counterfactual narratives help us better understand the roles of causality and morality in history, as well as the broader workings of collective memory.

HI 0304 The Holocaust in History and Memory  
Attributes: GMEL German Major or Minor Course, GMEN German Course Taught in English, H_AF History After 1750, H_EU European History, H_RE History: Research Paper, JST Judaic Studies Minor, PJST Peace and Justice Studies  
Prerequisite: HI 0010 or CL 0115 or CL 0116.

The Holocaust demands, yet stubbornly resists, historical understanding. This course addresses the Nazis' genocidal assault upon European Jewry and others by examining a wide range of factors that contributed to it. The course explores the roots of modern German anti-Semitism, the origins of Nazism, the establishment of the Nazi dictatorship, the sharpening of anti-Jewish measures during the Third Reich, and the escalation of persecution following the outbreak of World War II that culminated in the so-called Final Solution. Students consider the legacy of the Holocaust after 1945 by examining the postwar struggle to preserve its lessons in memory, the difficulty in finding adequate cultural means of representing its extreme dimensions, and the challenge of understanding the lessons that the event left for the postwar world.

HI 0313 Godless: Atheism and Skeptical Thought in the West  
Attributes: H_BF History Before 1750, H_EU European History, H_RE History: Research Paper  
Prerequisite: HI 0010 or CL 0115 or CL 0116.

The history of atheism -- or whether atheism even has a history -- is difficult to establish. Scholars have used a narrow definition of the term atheism to suggest its origins in the 18th century, or a broad definition to trace its antecedents back to classical antiquity. This course considers atheism within the tradition of skepticism, and leaves open for classroom debate the question of whether the thinkers studied -- from Epicurus to Ingersoll, Diderot to Dawkins -- represent a coherent tradition or merely a collection of radical challenges, each tied to its own time and place.

HI 0315 Ireland Since the Famine  
Attributes: H_AF History After 1750, H_EU European History, H_RE History: Research Paper  
Prerequisite: HI 0010 or CL 0115 or CL 0116.

This course examines the changes in church, state, and society that took place in the British Isles from the reign of Henry VIII to the Glorious Revolution of 1688. These centuries saw the unification of England, Ireland, and Scotland under a single government, the development of that government from feudal kingship into Parliamentary-based bureaucracy, and the shattering of medieval Catholicism into a variety of different churches and doctrines. The course also examines the structure of Tudor-Stuart society and the cultural changes resulting from the Renaissance and the Scientific Revolution.
HI 0324 Ancient Greece, Rome, and Africa  
Prerequisite: HI 0010 or CL 0115 or CL 0116.
The course examines the interaction between Greco-Roman civilization and ancient African civilizations, in the period from the sixth century BC to the sixth century AD. Focus is on: initial contacts between mainland Greece and Pharaonic Egypt; the period of Greek rule in Egypt and subsequent Greek expansion in Sudan and the Red Sea; initial contacts between Republican Rome and North Africa, and subsequent Romanization in that region; the period of Roman imperial rule in Egypt and subsequent Roman expansion in Sudan and the Red Sea; and the Byzantine diplomatic interaction with and role in Christianization of Nubia and Axumite Ethiopia.

HI 0325 Athenian Democracy and Empire  
Attributes: H_BF History Before 1750, H_EU European History  
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This history seminar provides an in-depth exploration of classical Athens at the height of its power in the fifth century BC. Its focus is on close reading of the primary sources describing the rise and fall of Athens in this period. It places particular emphasis on the parallel rise of Athenian democracy at home and the Athenian empire overseas. It places secondary emphasis on the nature of Athenian intellectual discourse in this period. A final research project will engage modern scholarly debates on the nature of fifth-century Athens.

HI 0331 American Revolution and the New Nation  
Prerequisite: HI 0010 or CL 0115 or CL 0116.
An examination of the coming of the American Revolution and the transition from colonial to national status, this course discusses the military struggle itself and provides an assessment of the political, social, and economic effects of the Revolution. Topics include the Confederation period, the forming of the 1787 Constitution, and the Federalist era. Figures such as John Adams, Tom Paine, Jefferson, Hamilton, Madison, and Washington receive special attention.

HI 0335 Civil War and Reconstruction  
Attributes: ASUP American Studies Upper Level, H_AF History After 1750, H_RE History: Research Paper, H_US U.S. History  
Prerequisite: HI 0010 or CL 0115 or CL 0116.
The principal goal of this seminar will be to familiarize students with some of the most important aspects of the Civil War and Reconstruction period in the United States, including the close examination of some of the more important historiographical debates. Topics include: sectionalism, antebellum political parties, slavery, abolition, Civil War politics, Presidential and Congressional Reconstruction, and Redemption. Students will use primary and secondary resources to produce a significant research paper.

HI 0337 Race, Violence, and Punishment in the United States, 1865-1976  
Attributes: ASHI American Studies: History, ASUP American Studies Upper Level, BSFC Black Studies Focus Course, H_AF History After 1750, H_US U.S. History  
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Beginning with Black Reconstruction in the South and ending with the Supreme Court’s temporary ban on capital punishment in Furman v. Georgia (1972), this intensive reading, writing, and research seminar explores the history of lynching, capital punishment, and other forms of racial violence in the United States. Using primary sources, it charts the spread of extra-legal violence in the aftermath of the American Civil War to understand the social, economic, and political forces that fueled such violence. It explores the complex relationship between lynching and capital punishment through the eyes of contemporaries as well as through the research of scholars. Students will also engage in a semester-long project to research, record and document instances of lynching, extra-legal violence, and capital punishment as part of a final research paper.

HI 0346 Saints, Sinners, and Sisters: Women and Religion in American History  
Attributes: H_AF History After 1750, H_RE History: Research Paper, H_US U.S. History, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Why have women comprised the majority of American religious groups? What sorts of gender structures are central to religious groups in America? How have women’s relationships to religious institutions changed over time? This course spans from the colonial era to the twentieth century; this course will focus on key periods in the formation of American women’s relationship to religious ideas and institutions. Topics include: Native American women and colonialism; Puritan Women, Quakerism, Witchcraft Accusations, Evangelicalism American Catholic Life, Black Churches, Social Movements, Spiritualism, the Mormon Church, Jewish women in America, Fundamentalism, Muslim Women, Modern Witchcraft, Goddess Movements, and Buddhism.

HI 0349 The 1930s in America  
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This research seminar on the Great Depression and New Deal will use primary and secondary sources to focus on key events and different historical interpretations of the United States during this decade. The economic crisis defined the decade and propelled political, economic, social, and cultural changes. This era has immense relevance to today’s political debates — the federal government’s role in regulating the free market; the weakness of the labor movement; unemployment and the persistence of poverty; the increasing wealth gap; the increasing racial edge in these issues. All have their origins in the policies first forged during the New Deal.
HI 0356 History of the Cold War 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This intensive reading, writing, and discussion seminar focuses on the origins, deepening, and decline of the Cold War between the United States and the Soviet Union from 1917 to 1991, covering such issues as Lenin-Wilson ideological antagonism, the shift from Grand Alliance to Cold War, the arms race, the rise and fall of detente, and the collapse of the Cold War order in Europe and the Soviet Union from 1989 to 1991. The course attempts to approach the topic by understanding both sides of the conflict, studying decisions, policies, and actions in a bilateral fashion.

HI 0366 Gender, Culture, and Representation: Women in China and Japan, 1600 to Present 3 Credits
Attributes: H_AF History After 1750, H_NW Non-Western History, H_RE History: Research Paper, WDIV World Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Are Chinese and Japanese women mere victims of a patriarchal society? Do socialist revolution and industrial modernization liberate women? This seminar examines those questions by studying the historical changes and continuities in the experience of women in China and Japan from approximately the 17th century to the present. The construction and representation of gender relations in China and Japan represent complex processes with many changes. Using verbal and visual texts, this course considers women's lives and their struggles to represent themselves in both societies as well as the historiography on those subjects.

HI 0367 East Asia in 20th-Century American Wars 3 Credits
Attributes: ASHI American Studies: History, ASUP American Studies Upper Level, H_AF History After 1750, H_NW Non-Western History, H_RE History: Research Paper, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
During the 20th century the United States fought three wars in East Asia: the Pacific War, the Korean War, and the Vietnam War. How did the East Asians perceive and react to the wars? How did the wars affect people's lives and societies in East Asia? How did the wars affect postwar relations between the United States and East Asia? Did race, culture, and ethnicity play significant roles in these wars? This course examines those questions by studying East Asia in the three American wars as an oral and social history. The course focuses on the human dimensions of the wars as experienced by those East Asians who fought and lived through them.

HI 0368 Ideas in Action: Decolonization in World History 3 Credits
Attributes: H_NW Non-Western History
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This seminar explores the intellectual history of "decolonization," the multifaceted process marked by the collapse of longstanding European empires and the emergence of independent nation-states in Africa, Asia, and the Caribbean in the mid-twentieth century. The central assumption of intellectual history is that ideas are key drivers of historical change. Conventional intellectual history courses engage with a narrow canon of European thinkers. This course approaches key figures from the colonial and postcolonial world, such as Gandhi and Fanon, as important ideological innovators integral to world history. Our main concern will be the intellectual ferment inaugurated as colonized peoples sought first to make sense of colonialism and then debated the meaning of, and means of achieving, freedom and liberation.

HI 0371 Arab-Israeli Conflict 3 Credits
Attributes: H_AF History After 1750, H_NW Non-Western History, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
The course traces the Arab-Israeli conflict from the end of the 19th century until the present, emphasizing the political and socioeconomic transformation of Palestine as Zionists and Palestinian Arabs struggled for political sovereignty in the same land. Topics include Anti-Semitism and the Birth of Zionism; the British Mandate; the creation of Israel; the relationship between Israel and the Arab states; the Israeli occupation of the West Bank and Gaza; Palestinian resistance; Israel's war in Lebanon; diaspora politics; representations of the conflict in film and pop culture; and prospects for the future.

HI 0372 Terrorism in History 3 Credits
Attributes: H_AF History After 1750, H_EU European History, H_NW Non-Western History, PJST Peace and Justice Studies, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This course examines terrorism as it has been perpetrated by individuals, political-military groups, and states of varying political ideologies. Topics include political violence in antiquity and medieval times; the French Revolution; terrorism, anarchism, and Marxism; terrorism and national liberation; and terrorism and religion.

HI 0373 History of North Africa Since 1700 3 Credits
Attributes: H_AF History After 1750, H_RE History: Research Paper, WDIV World Diversity
Prerequisites: HI 0010 or CL 0115 or CL 0116; one 200-level history course or CL 0115 or CL 0116.
The region historically known as the Barbary Coast or North Africa today comprises five states: Mauritania /Western Sahara, Morocco, Algeria, Tunisia, and Libya. Bordered by the Mediterranean Sea on the north and the Sahara desert on the south, this region lay at the crossroads of European, African, and Middle Eastern civilizations. The course explores the countries' individual histories and inter-related regional topics such as piracy, Christian captivity narratives, the trans-Saharan slave trade, colonialism, national liberation and decolonization. Students investigate violence, power, identity, foreign domination, and the challenges these pose for the writing of history.

HI 0383 Food, Consumption, and Commodities in Latin America, 1500 to the Present: From Chocolate to Cocaine 3 Credits
Attributes: H_NW Non-Western History, LCEL LACS Minor: Elective, WDIV World Diversity
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This upper level research seminar examines food and commodities as a critical part of the social and cultural history of Latin America. Through historical texts, cookbooks, literature, film, and food tastings, we will explore the history of food production, commodification, and consumption in Latin America, while paying close attention to the ways that cuisine has shaped cultural identity, social difference, and nationalisms over time.
HI 0385 Comparative Russian Revolutions 3 Credits
Attributes: H_AF History After 1750, H_EU European History, H_RE History: Research Paper
Prerequisite: HI 0010 or CL 0115 or CL 0116.
An intensive reading, writing and discussion seminar studying in some depth the background, origins, development, and outcomes of two Russian revolutionary periods of the 20th century: the interrelated upheavals of 1905 to 1917, resulting in the overthrow of the tsarist regime and its replacement by the Bolsheviks; and the reform, collapse, and transformation of the Communist government of the Soviet Union from Mikhail Gorbachev to the present. In the process of two in-depth examinations, the course explores contrasts among the social, economic, political, and cultural forces at work in the two revolutionary periods.

HI 0391 The Meanings of History 3 Credits
Attributes: H_AF History After 1750, H_EU European History, H_NW Non-Western History, H_US U.S. History
Prerequisite: HI 0010 or CL 0115 or CL 0116.
This upper-division seminar for juniors and seniors analyzes the ideas of seminal Western and non-Western thinkers, historians and philosophers who have had a profound influence on historical understanding and the practice of historians. Topics include the following questions: What is history? To what extent has the understanding of history changed in various times, places, and cultures? Are "scientific" history and the discovery of objective truth possible? Do stable civilizational identities exist and what value do such concepts have for historical understanding? The course examines the contemporary political, social, and cultural relevance of these and comparable questions through intensive readings, discussions, and analytical papers.

HI 0395 Internship 3 Credits
Prerequisite: HI 0010 or CL 0115 or CL 0116; junior or senior standing.
Majors work a minimum of eight hours per week during the semester at the Fairfield Museum and History Center, the Bridgeport Public Library Historical Collections, or a similar institution. An intern's work at these sites may include researching and mounting an exhibit, cataloging manuscript and artifacts collections, or organizing and conducting historical walking tours. Training in required skills is provided at the site. Under the supervision of a history department faculty member, interns write a research paper based on the work of the internship. Enrollment only by permission of the department Internship Coordinator.

HI 0397 Special Topics (Shell) 3 Credits
Prerequisites: HI 0010 or CL 0115 or CL 0116; one 200-level history course or CL 0115 or CL 0116; junior or senior standing.
This course offers an in-depth investigation of a significant historical problem or topic, conducted in a seminar format. The professor teaching the course chooses the topic.

HI 0399 Independent Study 1-3 Credits
Attributes: H_RE History: Research Paper
Prerequisite: HI 0010 or CL 0115 or CL 0116.
Open to juniors and seniors only, this course provides an opportunity for advanced students to develop critical reading skills and writing ability in a tutorial arrangement with a chosen professor. Normally, the course results in a serious paper of publishable quality in student-centered journals (15 to 20 pages). Students arrange for independent study during registration period of the semester prior to the one in which they wish to take the course by applying to a professor under whose direction they wish to study. All independent study must have the concurrence of the department chairperson. Students may take only two independent studies.
Those who complete the program with an average of A in Honors courses receive the designation "University Honors Program Completed with Distinction."

### Educational Studies Minor

History majors and minors who elect a minor in Educational Studies and who have been admitted to the 5-year Integrated Bachelors-Masters Degree and Teacher Certification Program will fulfill the State of Connecticut content requirements for certification in Social Studies through their coursework for the History major or minor, plus 18 credits in other social sciences. Please consult with Dr. Cecelia Bucki in the Department of History and Dr. Ryan Colwell, Director of Education Minor and 5-Year Teacher Preparation Program, GSEAP. For additional information, see the catalog entry for the program in Education (p. 102).

### History Minor

For a 15-credit minor in history, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HI 0100</td>
<td>Origins of the Modern World Since 1500</td>
<td>3</td>
</tr>
</tbody>
</table>

Select a minimum of four upper-division courses, including:

- At least one upper-division course designated advanced (300-level)
- At least one upper-division course in European history, one in U.S. history, and one in non-Western history (Africa, Asia, Latin America, Middle East)

Total Credits 12

To ensure a well-planned and coordinated program, students are required to work closely with their history faculty advisor.

### Honors Program

The Honors Program at Fairfield University is an interdisciplinary course of study open to invited freshmen and sophomores from all of the University’s undergraduate schools. Since the program offers a curriculum of team-taught courses and small seminars, it is highly selective. Students who pursue Honors study at Fairfield are highly motivated, passionate about learning, and willing to engage their professors and fellow students in lively discussions about the great ideas that have shaped our culture and world cultures. Honors students at Fairfield also are invited to attend intellectual and cultural events outside the classroom such as Broadway plays, guided museum tours, operas, and faculty-led colloquia on a variety of topics.

The Honors curriculum challenges students to achieve the following educational goals:

1. Identify major intellectual questions about the past and present.
2. Write coherently about the history and methods of research into those questions.
3. Design a research project on a major question in their field of study.
4. Implement and report on the results of that research project.

Students who complete the Honors Program in good standing have their achievement noted on their final transcripts. Those who complete the program with an average grade of B+ in Honors courses receive the designation "University Honors Program Completed with Distinction." Those who complete the program with an average of A in Honors courses also receive the designation "University Honors Program Completed with High Distinction."

### New Curriculum

*This curriculum applies to students in the Class of 2022 and later.*

The Honors Program comprises 18 credits earned through six Honors courses completed in the first three years of the program. The program also requires a senior capstone project, usually undertaken as an independent study in the student’s major during their senior year.

Senior Honors Project

Total Credits 20

### Honors and the Core Curriculum

Students who complete the Honors Program are exempt from 21 credits in the core curriculum.

Students who enter the program as first year students are exempt from the three English core courses (9 credits). They also may exempt themselves from 4 courses chosen from the following 6 areas or disciplines, with no more than 1 exemption claimed in any area or discipline: Natural Science, History, Social/Behavioral Science, Philosophy, Religious Studies, and Visual and Performing Arts (4 courses, 12 credits). In choosing to fulfill their remaining core requirements in Applied Ethics, History, Philosophy, and Religious Studies, Honors students may enroll in 200-level courses without having taken the stipulated prerequisites.

Students who enter the program as sophomores and who have completed EN 0011 and EN 0012 are exempt from the third English core course (3 credits). They are also exempt from 1 course in each of the following 6 areas or disciplines: Natural Science, History, Social/Behavioral Science, Philosophy, Religious Studies, and Visual and
Performing Arts (6 courses, 18 credits). In choosing to fulfill their remaining core requirements in Applied Ethics, History, Philosophy, and Religious Studies, Honors students may enroll in 200-level courses without having taken the stipulated prerequisites.

**Senior Honors Project**

The senior honors project provides an opportunity for students to engage in mature research under the supervision of a faculty mentor. The senior honors project is not a course in its own right but an independent study of three credits, typically conducted in the student’s major field of study, which is recognized toward the completion of honors requirements. In the humanities, the project should be a paper of at least 25 to 50 pages in length. In studio art and creative writing, the project should take the form of a significant portfolio. In the natural sciences, mathematics, social sciences, nursing, and in the various areas of business, the finished project should conform to the discipline’s acceptable format and length for publication.

**Courses**

**HR 0100 Ideas That Shaped the West**
This team-taught lecture/seminar course examines selected ideas or themes from Western intellectual history, focusing on developments in philosophy, society, science, and the arts. The ideas selected vary from course section to course section.

**HR 0101 Minds and Bodies**
This team-taught lecture/seminar course examines constructions of the human person, and the social reflections of these constructions, in Western culture. The ideas selected vary from course section to course section.

**HR 0104 Enduring Questions**
This team-taught course explores major questions persistent throughout human history. It provides an interdisciplinary opportunity to ask about the nature of humanity and reality, the meaning and purpose of existence, and the relationship between the individual and the wider world.

**HR 0198 Special Topics**
This course offers an in-depth investigation of a significant topic or question, conducted in a seminar format. The professor(s) teaching the course choose(s) the topic. This course is generally limited to sophomores, with exceptions made as needed.

**HR 0200 Challenges to the Western Tradition**
Attributes: UDIV U.S. Diversity
This course examines alternatives to the configuration of knowledge, art, power, and justice in the classical, majority culture of the West by considering critical voices traditionally marginalized in that culture.

**HR 0201 Non-Western Culture**
Attributes: WDIV World Diversity
This course examines alternatives to the configuration of knowledge, art, power, and justice in the classical, majority culture of the West by investigating the history, worldview, and assumptions of a non-Western culture.

**HR 0202 Honors Seminar**
This seminar, offered in one of the traditional disciplines, seeks to cultivate the skills of critical thinking, cogent argumentation, and effective writing, all by attending to a particular subject matter. Honors students earn six credits in HR 0202 by completing one version of the seminar in their second year of honors coursework and another version of the seminar in their third year of honors coursework. A complete title, reflecting the seminar’s particular subject matter, appears on the student’s transcript. Students may not enroll in any section of HR 0202 offered in a discipline in which they major or minor.

**HR 0204 Emerging Questions**
This course explores new questions emerging in changing modern contexts. It invites students to consider how new paradigms change human relations, how new discoveries change our understanding of the world, and how these changes are shaping our future.

**HR 0298 Special Topics**
Prerequisite: HR 0100.
This course offers an in-depth investigation of a significant topic or question, conducted in a seminar format. The professor(s) teaching the course choose(s) the topic. This course is generally limited to sophomores, with exceptions made as needed.

**HR 0300 Interdisciplinary Inquiry**
This team-taught course stresses the value of interdisciplinary approaches to scholarly inquiry by investigating a wide-ranging theme from the perspective of at least two disciplines. Possible themes treated in a given year are progress and its critics, genius and creativity, and the city in the American imagination.

**HR 0304 Finding Answers**
This team-taught course offers a survey of theories of knowledge, research methodologies, data collection practices, and analytical methods from disciplines across all undergraduate fields. It aims to arm students with a wide array of techniques for engaging in their own original research.

**HR 0398 Special Topics**
Prerequisite: HR 0200 or HR 0201.
This course offers an in-depth investigation of a significant topic or question, conducted in a seminar format. The professor(s) teaching the course choose(s) the topic. This course is generally limited to juniors, with exceptions made as needed.

Humanitarian Action

In response to the increasing number, scope and intensity of humanitarian emergencies, the field of humanitarian action has grown dramatically over the last 25 years, along with diverse career opportunities. This minor complements students’ other fields of study in arts and sciences, business, engineering, and nursing with the concepts, theories and skills to discern individual and collective responsibilities to respond to humanitarian needs at home and around the world. This unique interdisciplinary minor prepares students to:

- Learn, reflect and respond to humanitarian needs.
- Advance moral commitments and ethically grounded action.
- Serve as men and women for others.
- Alleviate human suffering and protect human dignity.

The program includes faculty with expertise in an array of disciplines including ethics, engineering, health, history, economics, management, and international affairs.

Students minoring in humanitarian action have opportunities to prepare for humanitarian action through Fairfield’s chapter of the Jesuit Universities Humanitarian Action Network (JUHAN). The JUHAN club raises awareness on campus about humanitarian issues and builds strategies for responding to humanitarian crises. JUHAN also includes international skills-building conferences for undergraduate students of Jesuit universities, and organizes field and immersion experiences.

- Humanitarian Action Minor (p. 145)

Courses

HA 0298 Humanitarian Action Internship 3 Credits
Attributes: HASM Humanitarian Action Minor Skills/Method Course
Students gain first-hand experience through placement with a relevant international organization, non-profit, media and business, or government agency focused on humanitarian crises and disaster response. Typically, an internship requires 10 to 15 hours per week on site. Other requirements include an e-portfolio containing reflections about readings, meetings with internship coordinator and peers and a final reflection paper. An on-site supervisor and Humanitarian Action professor evaluate student work. Open to juniors and seniors only, by permission of the minor director. Requires an overall GPA of 3.0 or higher.

HA 0300 Humanitarian Action Capstone 3 Credits
Prerequisites: AE 0272 or HI 0270 or PO 0272; completion of three Humanitarian Action electives; junior or senior standing.
This capstone course is a culminating experience for students minoring in Humanitarian Action. It provides students with the opportunity to engage with enduring questions that they have encountered throughout their coursework. Through a process of reflection and discernment facilitated during each class meeting, students will identify a research topic for a major paper that integrates the student’s coursework, internship and/or extra-curricular experiences in the minor.

Capstone
- HA 0300  Humanitarian Action Capstone 3

Total Credits 18

Students have the option of choosing from one of three foundational courses in ethics, history and politics that introduce humanitarian action. Each course covers the core material through different disciplinary approaches.

In addition to one foundational course, students must complete four elective courses. These electives are divided equally among context and analysis and skills and methods. Context and analysis courses cover topics such as international organization, global public health, gender, war and peace, genocide, human rights, global security, historical perspectives on contemporary crises, border politics, migration, refugees and climate change.

To satisfy the two remaining electives in skills and methods, students may choose from a range of courses in such fields as anthropology, communication, management, law, information systems and grant writing. Elective offerings also include courses in international operations of non-profits, engineering, and field research courses in Latin American and Caribbean Studies. Students may also count the successful completion of a humanitarian action internship as one of the two skills and methods elective requirement.

Students may double-count one context and analysis elective and one skills and methods elective from another major/minor. With the director’s approval they may substitute an alternative course for the skills and methods requirement.

The culminating experience for the Humanitarian Action minor is the Capstone Seminar.

Consult with the director for additional information.

Individually Designed Major

Program Description
The Individually Designed Major (IDMJ) allows qualified students in the College of Arts and Sciences, under appropriate direction of at least two faculty advisors, to design and pursue an interdisciplinary major presently not available in the College.

The Individually Designed Major is, as its name implies, a major designed by the student. It must be a true major, with a progression of courses, including an appropriate number of advanced courses. It cannot be a simple collection of introductory courses in several disciplines. The major may be an extension of a presently existing interdisciplinary minor, or it may be a wholly new subject, e.g. “Social Justice in Latin American Culture” or “Arts Management.”

Courses already taken may be included in the major, but the IDMJ should be, as a whole, a planned endeavor, not simply the pulling together of courses already taken. For this reason application must be completed and approved by the IDMJ Committee no later than the end of the student’s second year.

Eligibility
To be eligible, the student must have an overall GPA of at least 3.0 at the time of application, and apply before the end of their second year at Fairfield University. Applications and information may be obtained from the office of the Dean of the College of Arts and Sciences. If you are interested in pursuing this major, please consult with two or more faculty who would serve as appropriate advisors, and also schedule an informational meeting with the IDMJ program director (Associate Dean of the College of Arts and Sciences) at your earliest convenience.

Course Requirements
1. The major requires a minimum of ten courses.
2. The major must be truly interdisciplinary. While there may be a primary department, at least four courses must be taken outside that department.
3. The major requires a suitable number of advanced courses.
4. The major also requires a senior project (seminar, capstone course, supervised lab, or whatever is appropriate for the relevant disciplines). The purpose of this project is to allow students to pull together the multiple threads of the interdisciplinary major.
5. Finally, the major requires that the student maintain a semester-by-semester portfolio for the purpose of a reflective review and self-assessment of the progress and changes in direction, if any, of the major. The student will use these materials as part of a progress review with advisors at least once a semester. The student will submit the portfolio in the final semester of their senior year, and
must also submit a final assessment of the major to the Individually Designed Major Committee as a requirement for graduation.

International Studies
The International Studies Program at Fairfield University draws from a group of interdisciplinary faculty, practitioners and students from many parts of the world with a commitment to thinking critically about global challenges, promoting social justice, and engaging in service. Students have opportunities to pursue a major or minor in International Studies in the College of Arts and Sciences or an innovative co-curricular program in International Business with a complementary major or minor in the Dolan School of Business. The Program seeks to heighten global awareness in the ways we situate ourselves geographically, and encounter conflict, gender, race, class, nationality, the environment, and development.

Programs
- International Studies Major (p. 148)
- International Studies Minor (p. 150)
- International Business Major (p. 272) (Dolan School of Business)

Courses

IL 0050 People, Places, and Global Issues 3 Credits Attributes: BUEL Business Elective, PJST Peace and Justice Studies, WDIV World Diversity
This course introduces students to some of the fundamental concepts of International Studies. Major world regions and selected countries within them are discussed with respect to the people, and their physical, demographic, cultural, political, and economic characteristics. Several concepts and global issues are explored, among which the physical environment, conflict, inequality, global interconnectedness, and the movement of goods and people across borders are central. This course will emphasize contemporary events, particularly as they relate to the fundamental themes covered.

IL 0051 Introduction to International Relations 3 Credits Attributes: HACA Humanitarian Action Minor Context Course, PJST Peace and Justice Studies, PMIR Politics Major: International Relations
This course introduces International Relations (IR) theories to students, providing concepts, frameworks and approaches that will help them make sense of global politics historically and today in a systematic and critical manner. The goal of the course is to familiarize students with these tools and to help them use them to understand and address challenges at a global scale, particularly different manifestations of violence, development and social injustice, including from war to economic, social, gendered, and political marginalization.

IL 0052 Culture and Political Economy 3 Credits
This course examines the ways in which global political economic dynamics impact local cultures. Students will begin with classic texts in social theory, examine how this theory informs contemporary debates, and look to small-scale societies in the Global South for an intimate, ethnographic perspective of our global era.

IL 0053 Introduction to Economics 3 Credits
This course introduces the fundamentals of economic analysis from individual consumer behavior to the choices firms make, as well as framing the aggregate economy and indicators that measure global economic activity. It will cover the basics of both micro and macro economic study. Supply and demand, market structures, international trade, fiscal, and monetary policy are introduced. Students may petition for this course to also count toward a major or minor in economics.

IL 0150 International Operations of Non-Profits 3 Credits Attributes: BUEL Business Elective, HASM Humanitarian Action Minor Skills/Method Course, WDIV World Diversity
This course introduces students to the environment of international not-for-profit organizations. The course examines the relationships between non-profits and the private and public sectors. Accountability is discussed in terms of short-term financial efficiencies and long-term program quality assessment. Course objectives include understanding internal and external environments in which non-profits operate; the relationship between non-profits with the public and private sectors; acquiring skills for accounting and financial information in the non-profit sector; understanding roles, performance and accountability issues of nongovernmental organizations in international development assistance; and developing case study analyses.

IL 0151 Gender, War, and Peace 3 Credits Attributes: PMIR Politics Major: International Relations, WDIV World Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
This course examines the complexities and gendered impact of war on children, family and other social actors, drawing on a wide range of theories, concepts and case studies on violence, conflict escalation and peacebuilding. Part I examines the multifaceted forces of globalization, structural violence and gender based violence (GBV) that set up the gendered dynamics of war. Part II draws from this framework to understand the fluid contexts of gender and violence in war, including sexual violence. It looks at how people try to remain safe from armed conflict and marauding bands of rebels or soldiers, and the difficulties of sorting victim from perpetrator. Part III examines theories of social justice in the aftermath of war, and policies that can lead to improved security, safety, health, rehabilitation and reconstruction. Course requirements include exams and a research paper on the theory and policy implications of gender in war and its aftermath.

IL 0152 International Human Rights 3 Credits Attributes: HACA Humanitarian Action Minor Context Course
This course is devoted to an examination of basic human rights philosophy, principles, instruments and institutions. It introduces students to the origins and development of international human rights; the need to apply and enforce legal obligations and establish accountability for human rights violators; and the procedures enforced by the international community for human rights violation. Students will engage in focused discussions and debates on contemporary issues of human rights, such as Environmental Rights, Women’s Rights, Rights Against Trafficking, and Economic Rights. The final part of the course includes a special focus on U.S Foreign Policies on Human Rights, concluding with Guantanamo. As part of the research requirements of the course, students will focus on human rights for which they want to be advocates and/or in which they want to be engaged.
IL 0154 Contemporary Issues Affecting the Global Business Environment 3 Credits

Attributes: INEL International Studies / International Business Elective
Prerequisites: EC 0011, EC 0012, or IL 0053.
This course introduces students to contemporary issues facing businesses that operate in the global market. Students will learn about the changing global business environment on a macro-level. The course focuses on the evolving rhetoric surrounding international trade and its impact on business activity, the now of investment to developing countries and emerging markets, and the status of global and regional integration and/or potential disintegration. Through the study of these current real-world topics in international business, students will learn about challenges and opportunities of doing business in an interconnected global environment while working with international organizations, local governments, and global competitors.

IL 0197 United Nations Security Council Crisis Simulation 3 Credits
Attributes: HACA Humanitarian Action Minor Context Course, WDIV World Diversity
This course gives students a hands-on learning experience in world diversity by simulating a United Nations Security Council crisis in international peace and security. The objective is to introduce students to the challenges of global governance in light of the different perspectives they encounter representing different constituencies of the UN Security Council who come from diverse cultural, historical, and geo-political regions of the world. A key goal of the course is to bring to light whether and how power disparities limit the global South's effective representation, and the stakes in reform of the Security Council. While the topic of the simulation will vary, the focus is on a crisis in a non-Western region of the world.

IL 0295 Seminar in International Studies 3 Credits
The course examines special topics in international studies. The specific topic for a given semester is announced at the time of registration. The course may be repeated with permission of the program director.

IL 0298 Internship 0-3 Credits
Prerequisite: Junior or senior standing.
Students accept placements with local organizations, government agencies, or non-profit organizations in positions with an international component. Interns learn to apply knowledge acquired in their course of study to real-world situations. Completion of the internship requires regular meetings with the supervising faculty member, submission of journal entries, and one paper. Note: Students complete the internship in addition to the basic requirements for the major or minor. Arrangements for summer and international internships are also available. Students must have a GPA of 2.8 or higher.

IL 0299 Independent Study 1-3 Credits
Students pursue an independent research project on international issues under the supervision of a faculty member. Open to juniors and seniors with the director's permission.

IL 0300 Senior Capstone Seminar 3 Credits
Prerequisites: EC 0011, EC 0012, IL 0050, IL 0051, IL 0052.
This course requires students to theorize and analyze emerging trends in the political, socio-cultural, economic, and business dimensions of global affairs, and develop the implications in a particular context or setting. Students undertake a major research project as a central activity in this course drawing on the expertise and research methodologies they have developed in International Studies. This course is taken during the senior year, after students have completed all core courses in international studies.

International Studies Major

Students majoring in International Studies begin with foundational coursework in international relations, economics, geography, and sociology/anthropology, and complete their degree requirements with a senior research project. To prepare for this, they develop their own specialization drawing on courses from three thematic areas: Global Development; Conflict, Diplomacy, and Peace Building; and Humanitarianism and Social Justice. The challenges and perils that face the global community are multifaceted and complex. Students acquire different sets of knowledge, tools, and perspectives to deal with the complexities that face local to global communities.

Complementary Studies and International Opportunities

Students complement their International Studies major with coursework in related departments like politics, economics, sociology, history or foreign languages, and in the Dolan School of Business. Many students also pursue related interdisciplinary programs, such as environmental studies, women's studies, peace and justice, and area studies with which International Studies works especially closely. They also study economics and business emphasizing multinational organizations and regional trade pacts, economic and political systems, socio-cultural structures, microfinance and diversities that have operational significance for community and economic development and international business.

The International Studies Program reinforces multidimensional learning with real-world experience through language studies, service learning, Model United Nations, the Undergraduate Journal of Global Citizenship, internships, and study abroad opportunities, and through work with our
faculty on research projects. Therefore students are expected to engage in one or more of these forms of experiential learning.

**Graduation with Honors in International Studies**

Fairfield University has a campus chapter of Sigma Iota Rho, the national honor society for international studies. Students must have attained a junior standing and completed at least twenty-one hours of course work toward the International Studies/Business major. Students with an overall GPA of 3.3 or greater and a GPA of 3.4 or higher in their International Studies or International Business major are nominated for membership.

Irish Studies

An opportunity to learn about the intriguing history, politics, literature, and art of Ireland is available to you through a minor in Irish Studies at Fairfield University. Courses focus on the troubled history of the nation, its colonial and postcolonial significance, its difficult politics of Northern Ireland, and the inspired art and literature that emerged from its turbulent past. The program organizes a number of courses previously available in various departments and enhances them with new features. Enthusiasm for this area of study has surged in the last three decades as the Irish people have sought to resolve long-standing political issues and taken an interesting role in the new global economy. Fairfield, with a significant Irish-American representation among its students and alumni, provides a welcoming environment for Irish Studies. The University hosts a number of lectures, concerts, plays, and readings that complement the academic program and has established a study abroad affiliate with the National University of Ireland, Galway.

Programs

- Irish Studies Minor (p. 151)

Courses

**IRI 0110 Introduction to the Irish Language I**  
This course, the first in a two-course sequence, offers students an introductory level study of the Irish Gaelic language. Irish is the oldest surviving Celtic language, dating to the Roman Empire, and it opens a window to the Gaelic Order prior to 1690, a span of over 15 centuries. This course sequence teaches students the basics of grammar, syntax, speaking and writing in Irish, as well as some of the historical and cultural contexts within which the Irish language developed and to which it is deeply tied. The class may be attended online-only as well. This course does not count for core credit in Modern and Classical Languages.

**IRI 0111 Introduction to the Irish Language II**  
Prerequisite: IRI 0110.  
This course, a continuation of IRI 0110, offers students an introductory level study of the Irish Gaelic language. Irish is the oldest surviving Celtic language, dating to the Roman Empire, and it opens a window to the Gaelic Order prior to 1690, a span of over 15 centuries. This course sequence teaches students the basics of grammar, syntax, speaking and writing in Irish, as well as some of the historical and cultural contexts within which the Irish language developed and to which it is deeply tied. The class may be attended online-only as well. This course does not count for core credit in Modern and Classical Languages.

Irish Studies Minor

**Requirements**

For a 15-credit minor in Irish Studies, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EN 0161</td>
<td>Irish Literature</td>
<td>1</td>
</tr>
<tr>
<td>HI 0215</td>
<td>Ireland: Middle Ages to the Present</td>
<td>2</td>
</tr>
<tr>
<td>HI 0315</td>
<td>Ireland Since the Famine</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Select four additional Irish Studies electives</td>
<td>12</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>15</td>
</tr>
</tbody>
</table>

1 Students who choose EN 0161 may take up to two additional English courses and must take the remaining two courses in different fields.
Students who choose HI 0215 or HI 0315 may take up to three additional courses in English, with the remaining course(s) in a field other than English or history.

Notes

• Subject to the Irish Studies Program Director’s approval, students may apply up to three courses (9 credits) taken at NUI Galway towards their minor in Irish Studies.
• While studying abroad is not required for completion of the Irish Studies minor, students are encouraged to do so.
• Irish Studies courses are offered in a variety of fields and disciplines. Please contact the program director for a course list and descriptions.

Student Learning Outcomes

Students minoring in Irish Studies should be able to:

• Express, orally and in writing, the significant connections between literature, history, politics, and art.
• Articulate the complexity of another culture (social, political, religious, economic) using the example of Ireland.
• Explain clearly and in depth the social, political, and religious problems that confronted and still do confront Irish people, including the role of literary and artistic production in the country’s troubled history.

Islamic World Studies

There are more than 1.6 billion Muslims worldwide and they are well represented on every inhabited continent. The Islamic World Studies minor at Fairfield University introduces students to this diverse population through a variety of disciplinary perspectives. The minor works toward Fairfield’s core objective to form global citizens with broad cultural competency.

Programs

• Islamic World Studies Minor (p. 152)
3. Students may petition for certain courses, like RS 0101 Exploring Religion, to count toward the minor if there is appropriate and sufficient related content. The Director of the Islamic World Studies Minor will evaluate each petition on a case-by-case basis.

**Italian Studies**

The Italian Studies Program focuses on a nation and people whose contribution to civilization has been significant. Virtually every area of the arts, humanities, social sciences, natural sciences, and mathematics partakes of that heritage, while Italy continues to influence cultural, political, scientific, and economic trends today.

Italian Studies at Fairfield offers students an opportunity to explore, analyze, and appreciate Italy from the perspectives of a variety of academic disciplines, including language, literature, film, art history, architecture, politics, history, philosophy, religion, science, and business. This interdisciplinary program includes courses offered in Connecticut and at Fairfield University’s program in Florence, Italy.

**Italian Studies Minor**

To complete a 15-credit minor in Italian Studies, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Choose five courses in Italian Studies</td>
<td>15</td>
</tr>
<tr>
<td>Total</td>
<td>Credits</td>
<td>15</td>
</tr>
</tbody>
</table>

At least four of the five required courses must be Italy-focused (dealing exclusively with Italy) or Italian language and literature courses numbered 211 or higher. The fifth course may be another Italy-focused course or it may be an Italy-component course in which at least half of the course material deals with Italy. No more than three of the five courses may be completed in a single discipline.

**Notes**

- The language of modern Italy is Italian. In as much as cultural mores and concepts are reflected and communicated in language, students must achieve minimal proficiency in the language to begin to access the richness and complexity of Italy. Hence, all students pursuing the minor must meet this language expectation by successfully completing IT 0211 Intermediate Italian II, or by passing a placement test administered by University faculty that verifies competency through the intermediate level. Note: Completion of this requirement is not considered a prerequisite for coursework in the minor. Instead, students are permitted to begin minor coursework during or prior to fulfilling the language requirement.

- While study abroad is not required for completion of the minor, participation in the University’s programs in Florence, Italy (fall, spring, or summer sessions) is strongly encouraged.

- Italian Studies courses are offered in a variety of fields and disciplines. A complete list of Italy-focused and Italy-component courses is available from the program director.

¹ This Italian course is taught in English.
Judaic Studies

Dating back nearly 4000 years, Judaism is the world's oldest monotheistic faith and the foundation of both Christianity and Islam. Studying Judaism is thus central for understanding the roots of Western Civilization. The Judaic Studies minor at Fairfield University is an interdisciplinary program, primarily based in the Departments of Religious Studies and History. In addition to its undergraduate courses, the Judaic Studies program also presents campus-wide lectures and other special events in cooperation with the University's Carl and Dorothy Bennett Center for Judaic Studies.

Programs

- Judaic Studies Minor (p. 154)

Faculty

Behre (History)

Eliasoph, P (Visual and Performing Arts)
Rosenfeld (History), Director
Umansky (Religious Studies)

Lecturers

Prosnit (Religious Studies)
Ostrow (English)
Shur (Modern Languages: Hebrew)

Judaic Studies Minor

Students may structure their own course of study in consultation with the program director, but they are expected to gain an understanding of basic Jewish religious beliefs and practices as well as those political, social, and cultural forces that have helped shape the historical experiences of the Jewish people.

For a 15-credit minor in Judaic studies, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select five courses in Judaic Studies, including:</td>
<td>15</td>
<td></td>
</tr>
<tr>
<td>At least two courses in Religious Studies</td>
<td></td>
<td></td>
</tr>
<tr>
<td>At least one course outside the Department of Religious Studies</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 15

Independent study and internships are encouraged and can be substituted for any course (other than the two required Religious Studies courses) with the approval of the program director. Students are also encouraged to apply for spring, summer, fall, or year-long programs in the United States or Israel, especially those offering Hebrew language study. Students receiving credit for such programs and/or Judaic studies courses taken at another university may count up to six Hebrew language credits and three additional credits toward the Judaic Studies minor.

Latin American and Caribbean Studies

Fairfield University's commitment to a humanistic perspective and to the concept of social justice requires that students be introduced to the "other" Americans who inhabit this hemisphere. The vibrant cultures of the Caribbean and Central and South American nations, blending indigenous, European and African influences, provide a rich field of study that can be approached from many points of view.

The Program in Latin American and Caribbean Studies (LACS) offers students an interdisciplinary approach to the study of the multifaceted aspects of the Latin American and Caribbean countries, including the political and economic involvement of the United States. The pre-Columbian indigenous cultures, the systems of African slavery, economic dependency, 20th-century revolutions in politics, poetry, painting, literature, the churches, and the reassertion of negritude and Indian rights are some of the themes considered in the courses offered in the program.
Programs

- Latin American and Caribbean Studies Minor (p. 155)

Courses

LAC 0300 Justice and the Developing World 4 Credits
Attributes: EDCG Educational Studies Cognate, HASM Humanitarian Action Minor Skills/Method Course, LCEL LACS Minor: Elective, PJST Peace and Justice Studies, WDIV World Diversity
This interdisciplinary course combines the insights of history, politics, philosophy, anthropology, sociology, business, and economics to examine problems of poverty and justice in the developing world - including health, education, and environmental sustainability - with particular focus either on Central or South America, or the Caribbean. Significant to the course is a one-week immersion in one country, which is not required but strongly encouraged. Students plan and carry out a research project asking the critical questions and using the research methodologies of their academic major or minor. The immersion trip provides students with an intensive field research opportunity, the findings from which they incorporate into their papers.

LAC 0301 Latin America and the United States 3 Credits
Attributes: H_NW Non-Western History, H_RE History, Research Paper, LCEL LACS Minor: Elective, WDIV World Diversity
This interdisciplinary course is not a course in diplomatic relations. Rather it considers the ways in which Latin Americans have perceived, analyzed, depicted, reacted to, and dealt with the United States. The course considers essayists, poets, filmmakers, social scientists, statesmen, journalists, revolutionaries, artists, "vendepatrias", and diplomats. This course, which fulfills the requirement for the capstone seminar in Latin American and Caribbean studies and counts as a history course, includes research papers and oral presentations.

LAC 0373 Internship 3 Credits
Attributes: LCEL LACS Minor: Elective, WDIV World Diversity
Short-term internships in the field of Latin American and Caribbean Studies combine academic work with service that answers a community-identified need, and critical reflection. Such internships are offered in Latin American or Caribbean country generally during the summer for a four to six-week period. Prior approval from the director(s) of the LACS program is required.

LAC 0399 Independent Study 1-4 Credits
Attributes: LCEL LACS Minor: Elective
Prerequisites: At least one course in LACS; Junior or senior standing.
A student may conduct a one-semester independent study on a defined research topic or field of study under the supervision of a Professor in the LACS Program. Requires prior approvals by the Professor with whom the student will work as well as the Director of the LACS program.

Latin American and Caribbean Studies Minor

The Latin American and Caribbean Studies minor, an interdisciplinary program, offers students an opportunity to develop a focus on this multifaceted area of the world.

To earn a 15-credit Latin American and Caribbean Studies minor, students complete the following:

- Select four elective courses in Latin American and Caribbean Studies 1

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAC 0300</td>
<td>Justice and the Developing World</td>
<td>3</td>
</tr>
<tr>
<td>LAC 0301</td>
<td>Latin America and the United States</td>
<td>3</td>
</tr>
<tr>
<td>LAC 0373</td>
<td>Internship</td>
<td>3</td>
</tr>
<tr>
<td>LAC 0399</td>
<td>Independent Study</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 15

1 These four courses, from a range of fifteen disciplines (no more than three from any one discipline), must be exclusively or substantially concerned with Latin American and/or the Caribbean.
2 The capstone seminar is required of all minors in their junior or senior year.

Language Proficiency

Students must demonstrate proficiency in French, Portuguese, or Spanish. Students may demonstrate language proficiency when they pass FR 0211, PG 0211, or SP 0211.

Language Electives

Students may count three courses of Spanish or French culture and literature to count among their four elective courses. Students may count one Portuguese course with the approval of their advisor.

Study Abroad

Students are strongly advised to apply for a junior semester or year abroad in a country of Latin America or the Caribbean from a wide range of programs. Summer programs are also available. Students are particularly encouraged to study in Nicaragua through our partner, Universidad Centroamericana-Managua. Other approved country programs include Argentina, Brazil, Chile, Costa Rica, Dominican Republic, Ecuador, Mexico, Panama, and Peru. Summer programs and short-term immersions are available too. Short-term courses led by Fairfield University faculty members include courses in Brazil, Cuba, Guatemala, and Nicaragua.
Students are also encouraged to pursue an internship in a Latin American or Caribbean country (see LAC 0373). Funding assistance for internships and research abroad is available through inquiry with the LACS Program Directors.

Note: While the majority of courses taken abroad should count towards a LACS minor, in some cases, based on content, a study abroad course may not be awarded credit towards the LACS minor.

Students may count courses taken for the Latin American and Caribbean studies minor toward their core curriculum or major program requirements.

### Liberal Studies

The Liberal Studies program offers both traditional and online courses for part time and full time students looking for flexibility and convenience from a comprehensive university. Advisor-guided emphasis on courses in particular fields allows students to design their programs to meet professional or personal goals for the degree. A student may earn a Bachelor of Arts by emphasizing courses from the humanities and/or social and behavioral sciences, or a Bachelor of Science by emphasizing courses from mathematics and science and/or professional programs.

This degree is designed for:

- Adults who are returning to college to complete their bachelor's degree.
- Community college students seeking to earn their bachelor's degree.
- Working professionals seeking a career change or advancement.

The program facilitates individualized educational plans to help students achieve their goals. Advisors work with students to help them map out a baccalaureate curriculum. Previous experience is evaluated: up to 75 credits may be transferred in from a combination of accredited colleges and universities coursework as well as CLEP exams and/or portfolio.
credits for life/work experience. Liberal Studies offers classes in online formats as well as accelerated and traditional programs.

**College Equivalency Exams**
Credit may be granted for specific college-level learning gained through self-education or non-collegiate-sponsored instruction. Fairfield University is a participating institution in accepting approved CLEP (College Level Examination Program) examinations for credit. This standardized examination program is designed to let students demonstrate proficiency in various college-level subjects. An advisor should be consulted about applicable examinations prior to taking any CLEP exams. A maximum of 15 credits can be earned through CLEP exams.

**Portfolio Credit for Life Experience Learning**
Matriculated students may choose the portfolio assessment process as a means of receiving credit for non-collegiate sponsored learning or life experience for which there is no CLEP examination. An evaluation process of the documented learning is necessary. Portfolios must be submitted one semester prior to the anticipated graduation date. Contact the Liberal Studies director for complete information.

**Program**

**Degree Requirements**
Complete a minimum total of 120 credits with a GPA of 2.0 or better. At least 45 of those credits must be taken at Fairfield University, including:

- Meeting the Liberal Studies requirements of the University Core Curriculum (see below)
- Completing GS 0399 General Studies Senior Project
- Completing nine upper-level courses. Students will work with a faculty advisor to customize their curriculum to best serve their academic interests. No more than four courses can be taken in any one subject.

**Diversity Requirement**
All students must complete one U.S. Diversity course and one World Diversity course.

**Courses**

**GS 0399 General Studies Senior Project** 3 or 4 Credits
This course, required for all students earning a BA or BS degree in Liberal Studies, is typically taken during the final semester. The course synthesizes and integrates students’ multidisciplinary studies. Students complete a project or thesis under the direction of a faculty member after first discussing the proposed project with an academic advisor and the faculty member. The course requires a written paper reflecting the various disciplines studied.

**Mathematics**

The mission of the Mathematics Program at Fairfield University is two-fold:

We strive, as mentors and teachers, to graduate majors with broad knowledge of the principal content of Mathematics and its applications, who are aware of the historical and, when appropriate, cross-cultural development of Mathematics and the manifold connections among its subject areas, who have seen some of the connections of Mathematics to other disciplines, and who can think quantitatively and analytically. We want our majors to possess technical problem-solving skills, to have a deep appreciation for mathematical beauty and the power of abstraction, and to be able to understand and build complex logical arguments and communicate these arguments through written, visual, and oral means.
We strive to serve the mission of the Fairfield University Core Curriculum by ensuring that the student body possesses the ability to reason quantitatively and analytically, and understands not only the power of Mathematics (and especially the calculus) as the language of the sciences, but also the pervasive role of Mathematics in the arts, sciences, and other disciplines.

Student Learning Goals and Objectives
We would like our students to come away with the following:

1. Knowledge of:
   a. The fundamental concepts underlying the major areas of undergraduate Mathematics, including calculus, discrete mathematics, real analysis, linear algebra, and abstract algebra.
   b. Applications of Mathematics to other disciplines.
   c. Mathematical content and skills needed to support graduate study and/or professions that require mathematical proficiency.

2. Awareness of:
   a. The beauty and power of Mathematics.
   b. Connections between different fields of Mathematics.
   c. The historical development of Mathematics across cultures.

3. Ability to:
   a. Think quantitatively, analytically, and abstractly.
   b. Understand and create logical arguments and proofs.
   c. Read mathematics with comprehension.
   d. Write and communicate mathematics clearly and effectively.
   e. Demonstrate proficiency in symbolic representation and manipulation.
   f. Use technology as a tool to solve problems.

For the student of the humanities, the social sciences, or business, mathematics at Fairfield University offers training in basic mathematical skills and their application to real world problems. However, more importantly, it attempts to make the student aware of the relationships between mathematics and other branches of knowledge, while imparting a sense of its historical and cultural value.

The mathematics major offers students a strong and broad background in undergraduate mathematics, providing the foundation for further graduate studies in theoretical or applied fields of mathematics, for advanced study in fields where strong quantitative skills are needed, or for employment in mathematics-related fields in industry or in teaching. The mathematics minor offers students an opportunity to strengthen their mathematical backgrounds.

Courses

MA 0010 Mathematics for Liberal Arts 3 Credits
This course presents major mathematical concepts in an historical and cultural setting. Topics include geometry, set theory and logic, along with others that are the choice of the instructor. Students explore the interplay between mathematics, philosophy, and the arts in addition to the more traditional relationship between mathematics and the physical sciences. The course treats mathematics as an art for its aesthetic beauty and as a science, providing a mathematician’s view of the subject rather than preparing students for a specific application of mathematics.

MA 0015 Mathematics: An Exploration 3 Credits
This course introduces various ideas in mathematics at an elementary level. It is meant for the student who would like to fulfill a core mathematics requirement, but who does not need to take mathematics for her or his major. Topics will vary, depending upon the instructor, but in general will include topics of both historical and current interest.

MA 0016 Concepts of Calculus 3 Credits
This course introduces differentiation and integration, and shows how these ideas are related. The course illustrates how important and interesting applied questions, when expressed in the language of mathematical functions, turn out to be questions about derivatives and integrals and, thus, can be solved using calculus. The basic concepts of calculus are numerically, algebraically, and geometrically investigated, using graphing technology to illustrate many of the underlying geometrical ideas. This is a terminal core course and is not a prerequisite for any other course. Please note that MA 0011 is not an appropriate course to take before taking MA 0016.

MA 0017 Introduction to Probability and Statistics 3 Credits
This introduction to the theory of statistics includes measures of central tendency, variance, Chebyshev’s theorem, probability theory, binomial distribution, normal distribution, the central limit theorem, and estimating population means for large samples. Students who have received credit for any mathematics course at the 100-level or higher may not take this course for credit without the permission of the department chair.

MA 0019 Applied Calculus I 3 Credits
Prerequisite: Precalculus.
Topics in this course include: foundations of the calculus; differentiation of algebraic, exponential and logarithmic functions; extrema and curve sketching; applications of derivatives; antiderivatives; the Fundamental Theorem of Calculus; and integration of algebraic functions. A graphing calculator and Wolfram Alpha are among the technologies that may be used. Students who received credit for MA 0145 or MA 0171 may not take MA 0019 for credit.
MA 0120 Applied Calculus II  
Prerequisite: MA 0119.  
Topics in this course include: applications of the derivative, including implicit differentiation, related rates and linear approximation; integration of algebraic, transcendental and trigonometric functions; differentiation of trigonometric functions; techniques of integration; applications of the definite integral; infinite series. A graphing calculator and Wolfram Alpha are among the technologies that may be used. Students who receive credit for MA 0146 or MA 0172 may not receive credit for MA 0120.

MA 0145 Calculus I for Chemistry, Engineering, and Physics  
Majors  
Prerequisite: Precalculus.  
This course covers analytic geometry; continuous functions; derivatives of algebraic and trigonometric functions, product and chain rules; implicit functions; extrema and curve sketching; indefinite and definite integrals; applications of derivatives and integrals; exponential, logarithmic and inverse trig functions, hyperbolic trig functions, and their derivatives and integrals. It is recommended that students not enroll in MA 0145 unless they have a solid background in high school algebra and precalculus.

MA 0146 Calculus II for Chemistry, Engineering, and Physics  
Majors  
Prerequisite: MA 0145 or MA 0171.  
This course covers applications of the integral to area, arc length, and volumes of revolution; integration by substitution and by parts; indeterminate forms and improper integrals: Infinite sequences and infinite series, tests for convergence, power series, and Taylor series; geometry in three-space.

MA 0151 Functional Programming  
Prerequisite: Precalculus.  
This course provides an introduction to the theory and practice of programming in the functional paradigm. Functional programming is based on a view of programs as data and computing as calculation. This approach facilitates the development of programs that are concise, elegant, and free of broad classes of errors. Topics covered will include a broad introduction to computing, symbolic representation of data, recursion, algebraic data types, the lambda calculus as a model of computing, higher-order functions and type systems. Students will complete the course with both the ability to program and a useful foundation for further study of topics in discrete math, logic, proof, and computer science theory. No prior programming experience is required. May be taken as one course in the core requirement in mathematics.

MA 0171 Calculus I  
Prerequisite: Precalculus.  
This is our most rigorous first-year calculus sequence. However, students are not expected to have had calculus before taking this course. Topics include functions; limits (including the epsilon-delta definition), continuity, and derivatives; trigonometric functions and their derivatives; applications; relative and absolute extrema, and curve sketching; related rates; Rolle's Theorem and the mean value theorem; antiderivatives, definite integrals and area, and the fundamental theorem of calculus. It is recommended that students not enroll in MA 0171 unless they have a solid background in high school algebra and precalculus. Students who have received credit for MA 0119 or MA 0145 may not take MA 0171 for credit.

MA 0172 Calculus II  
Prerequisite: MA 0145 or MA 0171.  
This course is the continuation of MA 0171. Topics include integration by substitution and by parts; areas between curves; volumes of revolution; inverse functions; logarithms and exponential functions; inverse trigonometric functions; indeterminate forms and l'Hospital's rule; improper integrals; and infinite sequences and series, including convergence tests, absolute and conditional convergence, power series and Taylor series. Students who have received credit for MA 0120 or MA 0146 may not take MA 0172 for credit.

MA 0211 Applied Matrix Theory  
Majors  
Prerequisite: MA 0119 or MA 0145 or MA 0171.  
This introductory, calculus-based statistics course focuses on applications in business, statistics, and everyday events. Topics include descriptive statistics including mean, median, mode, standard deviation, histograms, distributions, box plots, and scatter plots; probability theory including counting rules, random variables, probability distributions, expected values, binomial and normal distributions, and the central limit theorem; inferential statistics including point estimates, confidence intervals, and hypothesis testing; and regression theory. Students learn to analyze data with the aid of common software packages. Mathematics majors may not take this course as a mathematics requirement or elective.

MA 0217 Accelerated Statistics  
Attributes: EVAP Environmental Studies: Applied Professional Skills  
Prerequisite: MA 0119 or MA 0145 or MA 0171.  
This introductory, calculus-based statistics course focuses on applications in business, statistics, and everyday events. Topics include descriptive statistics including mean, median, mode, standard deviation, histograms, distributions, box plots, and scatter plots; probability theory including counting rules, random variables, probability distributions, expected values, binomial and normal distributions, and the central limit theorem; inferential statistics including point estimates, confidence intervals, and hypothesis testing; and regression theory. Students learn to analyze data with the aid of common software packages. Mathematics majors may not take this course as a mathematics elective. Students who have received credit for MA 0352 may not take MA 0217 for credit.

MA 0221 Applied Calculus III  
Prerequisite: MA 0120 or MA 0146 or MA 0172.  
This course covers first order differential equations, vectors in 2-D and 3-D, partial differentiation and multiple integrals. This is the third course in the three-course sequence MA 0119, MA 0120, MA 0221.

MA 0231 Discrete Mathematics  
Prerequisite: MA 0231.  
Topics in this course include logic; sets; functions; equivalence relations and partitions; mathematical induction; and countability.

MA 0235 Linear Algebra  
Prerequisite: MA 0231.  
Students examine linear spaces and subspaces; linear independence and dependence; bases and dimension; linear operators; matrix theory; determinants and systems of linear equations; eigenvalues and eigenvectors. Students may not receive credit for both MA 0211 and MA 0235.

MA 0245 Calculus III for Chemistry, Engineering, and Physics  
Majors  
Prerequisite: MA 0146 or MA 0172.  
Topics include partial differentiation; chain rule, exact differentials, maxima and minima; multiple integration; application to volumes, center of gravity; and polar, cylindrical, and spherical coordinates; vector arithmetic and algebra, dot and cross products, parametric equations, lines and planes; gradient, directional derivative, curl, divergence; line integrals, work, Green's theorem, surface integrals, Stokes's and divergence theorems.

</tbody>
</table>
MA 0385 Point Set Topology  3 Credits
Prerequisite: MA 0371.
This course considers topological spaces, continuous functions; product, metric, and quotient spaces; countability and separation axioms; existence and extension of continuous functions; compactification; metrization theorems and complete metric spaces.

MA 0390 Honors Seminar I  3 Credits
This course is open to senior mathematics majors with a mathematics GPA of 3.5 or higher and invited junior and senior mathematics majors with demonstrated ability who have been recommended by the mathematics faculty. This seminar provides talented students with an opportunity to undertake individualized study under faculty direction. Participants present several lectures before a group of peers. The seminar's subject matter varies each semester.

MA 0391 Honors Seminar II  3 Credits
This course is open to senior mathematics majors with a mathematics GPA of 3.5 or higher and invited junior and senior mathematics majors with demonstrated ability who have been recommended by the mathematics faculty. This seminar provides talented students with an opportunity to undertake individualized study under faculty direction. Participants present several lectures before a group of peers. The seminar's subject matter varies each semester.

MA 0395 Special Topics in Mathematics  3 Credits
Prerequisites: MA 0231; additional mathematics courses depending on the topic.
Mathematical topics not currently among the department's offerings can be offered one-time or to allow a professor the opportunity to "test drive" a course for the first time.

MA 0397 Internship  1-3 Credits
Prerequisite: Senior standing.
The internship program provides senior mathematics majors with opportunities to gain practical, career-related experience in a variety of supervised field settings. Student interns select from a variety of placements, especially those requiring applications of mathematics, numerical methods, and statistics. Interns spend a minimum of 10 hours per week working at the placement site and complete the required academic component specified by their faculty advisor. Internship credits vary; interns may register for a summer session and/or one or two semesters for an overall maximum of six credits. In addition, an internship must satisfy the requirements outlined in the University Internship Policy, which is available from the Career Planning Center. An internship may not take the place of a mathematics elective. Enrollment by permission only.

MA 0398 Internship  1-3 Credits
Prerequisite: Senior standing.
The internship program provides senior mathematics majors with opportunities to gain practical, career-related experience in a variety of supervised field settings. Student interns select from a variety of placements, especially those requiring applications of mathematics, numerical methods, and statistics. Interns spend a minimum of 10 hours per week working at the placement site and complete the required academic component specified by their faculty advisor. Internship credits vary; interns may register for a summer session and/or one or two semesters for an overall maximum of six credits. In addition, an internship must satisfy the requirements outlined in the University Internship Policy, which is available from the Career Planning Center. An internship may not take the place of a mathematics elective. Enrollment by permission only.

MA 0399 Independent Study  1-3 Credits
Independent study provides students with the opportunity to examine areas not covered in the undergraduate curriculum. Under the guidance of a faculty member, advanced students learn about an area in mathematics through reading and research. Independent study includes written work in the form of exercises or papers. Students apply to a professor under whose direction they wish to study and obtain the approval of the department chair. This course may not replace a mathematics elective to fulfill the requirements for the major, unless special permission is given by the department chair.

1. An equivalent course may be substituted. Students who can demonstrate proficiency in a computer programming language can have this requirement waived by the department chair.

2. This also fulfills the natural science core requirement. Although physics is the usual science taken by majors in mathematics, another laboratory science may be substituted with permission of the chair.

3. All mathematics majors must complete a two-part Capstone Experience consisting of completion of the Senior Comprehensive Exam in Mathematics in the spring of their senior year and attendance at five or more Mathematics Department Colloquia (or equivalent) in their junior and senior years. Results are noted on the transcript as follows: Senior Comprehensive Exam in Mathematics “Passed with Distinction” or “Passed” or “Failed”; Capstone Experience in Mathematics: “Completed” or “Not Completed.”

Students who wish to double major in mathematics and another area are encouraged to meet with the chairs of the respective departments so that appropriate modifications to the requirements can be made to allow these students to graduate in four years. Popular double majors with mathematics include computer science, economics, and physics.

Mathematics majors are required to have a graphing calculator at least as powerful as a TI-84.

Honors Seminar

Students who take the MA 0390 or MA 0391 Honors Seminar receive three credits for one of their mathematics electives upon completion of one semester of MA 0390 or MA 0391. Students who complete both MA 0390 and MA 0391 earn six credits: the first semester counts as a 3-credit mathematics elective, while the second counts as a 3-credit free elective.

Students Interested in Teaching Mathematics in High School or Middle School

Students planning a career in secondary education should consult with the department chair, and with the Graduate School of Education and Allied Professions, as early as possible. Consult the catalog section for the Program in Education (p. 102) for information concerning requirements for the Five-Year Integrated Bachelor’s and Master’s Degree program in Secondary Education with Initial 7-12 Certification.

Plan of Study

The curriculum given below represents a typical option for completing the major in mathematics.

¹ No more than one of the following may be accepted as one of the three upper-level mathematics courses: EC 0290, EC 0380, or ME 0325.

The specific selection of courses must have the approval of the chair of the Department of Mathematics. A student may place out of one or both calculus courses, depending on his or her high school calculus background. While the student does not earn credit for these courses, they will still count toward the minor.

Modern Languages and Literatures
The study of modern foreign languages, as well as cultures and literatures in their original languages, is an intellectual experience that offers students another point of view on life. Knowledge of a language other than English frees students from the restraints of seeing but one reality, and the new perspectives gained from understanding the expression of another people are the essence of a liberal education.

The Department of Modern Languages and Literatures stresses proficiency in all language skills to prepare students for careers in business, communication, education, government, health sciences, social work, and related professions.

The department offers instruction in the following languages: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Portuguese, Russian, and Spanish. Currently, majors and minors are available in French, German, Italian, and Spanish.

In addition to its own programs, the Department of Modern Languages and Literatures participates in the International Studies program and the minor programs in Asian Studies, Italian Studies, Judaic Studies, Latin American and Caribbean Studies, Russian, East European, and Central Asian Studies, and Women, Gender, and Sexuality Studies.

Select language courses may count toward those programs. A limited number of courses taught in English may count towards majors and minors. Courses offered by other departments may count as well. Please consult individual directors of the French, German, Italian and Spanish sections for a list of relevant courses from outside the department.

Modern Languages and Literatures courses requiring a prerequisite may allow students with suitable life or academic experience from other institutions to be admitted by permission of the instructor. Students who believe they have appropriate background experience may petition the professor for admission to desired courses.

Note: Education minors need a minimum of 30 credits in the language area, of which at least three credits must be in literature and three in culture/civilization.

Language Core Requirements
Core requirements may be fulfilled by successfully completing two semesters at the intermediate level of any language listed among the offerings of the Department of Modern Languages and Literatures.

Core Mission Statement
The study of languages is a key element in working and learning across cultures and geographical boundaries. Language in the Core Curriculum focuses on the acquisition of the skills of reading, listening, speaking, and writing, though the emphasis varies according to the chosen language. Students in core language study acquire knowledge about other cultures, literatures, and historical periods. It is expected that students will use the skills and knowledge acquired in language courses in practical and intellectual pursuits.

Through their study of foreign languages, students will:

- be able to read a passage of moderate difficulty in their chosen language and be able to communicate with a native speaker
- learn grammatical and syntactical rules which will facilitate oral and written expression in the language
- become acquainted with the life, customs, and cultural traditions where the language is spoken

Programs
- French Major (p. 175)
- French Minor (p. 175)
- German Major (p. 175)
- German Minor (p. 176)
- Italian Major (p. 176)
- Italian Minor (p. 176)
- Spanish Major (p. 177)
- Spanish Minor (p. 177)
Courses

Arabic

AR 0110 Elementary Modern Standard Arabic I  
3 Credits
The first course, the first of a two-semester sequence, teaches the essentials of phonology, script, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing in the standard means of communicating in the Arab world. Teaching is proficiency-based, implying that all activities within the courses are aimed at placing student learners in the context of the native-speaking environment.

AR 0111 Elementary Modern Standard Arabic II  
3 Credits
Prerequisite: AR 0110.
A continuation of AR 0110, this course teaches the essentials of phonology, script, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing in the standard means of communicating in the Arab world. Teaching is proficiency-based, implying that all activities within the courses are aimed at placing student learners in the context of the native-speaking environment.

AR 0210 Intermediate Modern Standard Arabic I  
3 Credits
Prerequisite: AR 0111.
This course, the first in a two-semester sequence, continues to build upon the skills acquired in the first-year course. Emphasis will be placed upon improving grammar, listening comprehension, and speaking and reading skills. Students will gain confidence in conversing with native speakers on a variety of topics, will be able to write more complex texts on everyday themes, and will acquire the skills to read uncomplicated authentic texts, such as newspaper articles on familiar topics.

AR 0211 Intermediate Modern Standard Arabic II  
3 Credits
Prerequisite: AR 0210.
A continuation of AR 0210, this course continues to build upon the skills acquired in the first-year course. Emphasis will be placed upon improving grammar, listening comprehension, and speaking and reading skills. Students will gain confidence in conversing with native speakers on a variety of topics, will be able to write more complex texts on everyday themes, and will acquire the skills to read uncomplicated authentic texts, such as newspaper articles on familiar topics.

AR 0381 Coordinating Seminar  
3 Credits
Students undertake readings and studies in a specialized area of Arabic language and culture, under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair.

AR 0382 Coordinating Seminar  
3 Credits
Students undertake readings and studies in a specialized area of Arabic language and culture, under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair.

Chinese

CI 0110 Elementary Chinese I  
3 Credits
Prerequisite: CI 0110.
This course, a continuation of CI 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

CI 0111 Elementary Chinese II  
3 Credits
Prerequisite: CI 0110.
This course, a continuation of CI 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

CI 0210 Intermediate Chinese I  
3 Credits
Prerequisite: CI 0111.
This course, the first of a two-semester sequence, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

CI 0211 Intermediate Chinese II  
3 Credits
Prerequisite: CI 0210.
This course, a continuation of CI 0210, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

CI 0220 Advanced Chinese  
3 Credits
Prerequisite: CI 0211.
This course will continue to build on work completed through the intermediate level Chinese. All four skills: reading, listening, reading, and writing, will be further strengthened, but with emphasis on consolidating conversational skills and improving reading confidence. Upon completion of the course, students should be able to use integrated skills and cultural strategies to speak with some fluency on everyday conversational topics, read lengthier and more complex materials, write short but accurate compositions on computers using Chinese software, and develop a more sophisticated sense about the language and the culture.

CI 0221 Reading China  
3 Credits
Attributes: WDIV World Diversity
Prerequisite: CI 0211.
This course has the twin goals of increasing reading proficiency in Chinese language and exploring Chinese culture. Topics are selected from four main areas: Chinese Geography (e.g. city, countryside, landscape), Chinese Life (e.g. festivals, popular culture, everyday living), Chinese Society (e.g. family, social problems, internet use), and Chinese History and Thought (e.g. history, literature, myth, and philosophy). Students also learn how to use different resources and online tools to read and research China-related subjects on their own. Required readings and assignments are in Chinese.

CI 0250 Modern Chinese Through Fiction and Film  
3 Credits
Attributes: WDIV World Diversity
A study of various cultural aspects of modern China in the 20th century through reading translated fiction as well as films. Students explore topics such as modernity, nationalism, individualism, gender, and cultural identity in the modern cultural-historical context. Also will be discussed are issues particular to fiction and film as representational modes: How do fiction and film narrate history and the complex Chinese experience? How have they both been shaped by and contributed to the socio-cultural transformations? And how do they represent the increasingly diversified cultural and social landscape of contemporary China?
CI 0251 New Chinese Cinema  
Attributes: WDIV World Diversity  
The course examines the films of major directors contributing to the rise of "New Chinese Cinema" in mainland China, Taiwan and Hong Kong since the mid-1980s. Emphasis is on individual directors' distinctive aesthetics and philosophy in the specific cultural-historical context of film production and reception. Students will study how these films represent history and memory, the relationship between individual and society, woman and gender, and how such films participate in the cultural imagination of China and Chineseness in the global context. The goal will be development of a basic film-critical vocabulary. All films have subtitles, and readings are in English.

CI 0252 The City and Modern China  
Attributes: E_AF English Literature After 1800, WDIV World Diversity  
The course studies the literary and visual representations of the city in modern China through a sampling of stories, novels, photos, films, and critical essays. Students discuss how literature and visual art bear witnesses to the changing faces of the metropolis and urban life during the time of Chinese modernization and globalization and how the city expresses modern ethos, desires and paradoxes in literary works and films. All texts are in English. Films have subtitles.

CI 0253 China and the West: Stories of Encounter  
Attributes: WDIV World Diversity  
The course examines the relationship between China and the West with an emphasis on the intellectual and artistic aspects of the encounter in modern times. We discuss both the West's experience and views of China and China's response to the West and their modern global experience. The course materials, which include fiction, films, non-fictional essays and theoretical articles, are arranged based on key historical figures, events, and issues. Students develop a foundational knowledge about China-and-the-West intercultural experience and representations and learn to think and analyze critically the relationships between fiction and history, art and life, and self and society. All texts are in English.

CI 0381 Coordinating Seminar  
3 Credits

Students undertake readings and studies in a specialized area of Chinese under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.

CI 0382 Independent Study  
1-3 Credits

Students undertake readings and studies in a specialized area of Chinese under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.

French

FR 0110 Elementary French I  
3 Credits

Designed for students with no prior experience with French or whose placement scores are in the range for this course level. This course, the first of a two-semester sequence, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

FR 0111 Elementary French II  
3 Credits

Prerequisite: FR 0110.
This course, a continuation of FR 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

FR 0210 Intermediate French I  
3 Credits

Prerequisite: FR 0111.
This course, the first of a two-semester sequence, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor.

FR 0211 Intermediate French II  
3 Credits

Attributes: LCEL LACS Minor: Elective  
Prerequisite: FR 0210.
This course, a continuation of FR 0210, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor.

FR 0219 French Syntax and Expression  
3 Credits

Attributes: FREL French Major or Minor Course  
Prerequisite: FR 0211.
This course provides a rigorous review of French grammar and syntax and examines the critical differences between English and French. The goals of this course are to prepare students for further advanced courses, and to use French more accurately by practicing the specifics of grammar and syntax. Furthermore, the students will examine and use the French language in varying levels of discourse and registers, ranging from everyday speech to short narratives. To achieve these goals, we will examine contemporary, historical and literary readings, which contain the grammar and syntax under study and insure that they are studied in context.

FR 0220 Topics in Language and Culture  
3 Credits

Prerequisite: FR 0211.
This course improves proficiency in written and oral expression by focusing on topics in French language and culture. Students develop advanced writing and speaking skills while concentrating on grammar, style, and appropriateness. Weekly compositions, based primarily on the genre or topics studied allow students to identify and correct grammatical mistakes. Students present research in class in French. Films and various cultural artifacts (proverbs, songs, historical materials) familiarize students with idiomatic French.

FR 0251 Culture and Civilization of France and the Francophone World I  
3 Credits

Prerequisite: FR 0211.
This course explores France and French-speaking people in a cultural, social, and historical context. Students use multimedia, Internet, and audio-visual resources extensively and submit frequent oral and written reports.
FR 0252 Culture and Civilization of France and the Francophone World II 3 Credits
Attributes: WDIV World Diversity
Prerequisite: FR 0211.
This course explores the regions and people that comprise the francophone world in a cultural, social, and historical context. Students use multimedia, Internet, and audio-visual resources extensively and submit frequent oral and written reports.

FR 0260 Introduction to Sub-Saharan African Culture 3 Credits
Attributes: BSAH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, E_AF English Literature After 1800, FREN French Course Taught in English, WDIV World Diversity
Prerequisite: FR 0219 or FR 0220.
This course taught in English explores the issues that confront Sub-Saharan Africa in its transformation from tradition to colonization, and finally to independence through a large variety of literary texts (traditional oral literature and modern written literature), critical theory, films, music, and magazine and newspaper articles. Texts and films will be discussed from a multi-disciplinary perspective to illustrate their cultural, sociological, political, and religious import. Africa's geography and major historical markers will be woven into the readings and discussions. Students taking this course for French credits will do a significant part of the readings and assigned writing in French.

FR 0265 French Translation Workshop 3 Credits
Prerequisite: FR 0219 or FR 0220.
In this course, students develop expertise in the art and craft of translation. The course presents terminology, advanced grammar analysis, and procedures that assist the translator in describing and solving translation problems. It uses real and simulated case studies in a variety of fields including commercial correspondence, tourism, food, transportation, telecommunications, social science, and literature. Students practice with native script, giving attention to individual interests and majors, using French-to-English and English-to-French translations. The class, which is conducted in both languages, uses human, computer-based, and print resources.

FR 0266 Film and Literature in French 3 Credits
Prerequisite: FR 0219 or FR 0220.
This course examines the relationship between film and literature. Students view the film version of each work, which serves as a basis for class discussion. The course requires frequent oral and written reports.

FR 0267 French Commercial Culture 3 Credits
Prerequisite: FR 0219 or FR 0220.
This introduction to the business practices and economic situation of France in the context of the European Union emphasizes commercial vocabulary and business situations presented through extensive use of authentic material and documents. This course, which is of particular interest to students seeking a career in international business or international affairs, uses multimedia, Internet, and audio-visual resources extensively, and includes regular practice in speaking and writing.

FR 0271 Contemporary French Press and Media 3 Credits
Prerequisite: FR 0219 or FR 0220.
Students read and discuss articles from representative magazines and newspapers in French, as well as reports from television news broadcasts and the Internet. The course considers how the media and technology are shaping French society in the 21st century and discusses a wide range of topics such as politics, education, religion, the arts, science, privacy, and censorship. Students complete frequent oral and written reports.

FR 0301 Survey of Literature in French I 3 Credits
Prerequisite: FR 0219 or FR 0220.
This course presents a chronological view of French literature, emphasizing the most important writers and major literary movements and themes. Students will consider varied genres from the Middle Ages through the 17th century.

FR 0302 Survey of Literature in French II 3 Credits
Prerequisite: FR 0219 or FR 0220.
This course presents a chronological view of French literature, emphasizing the most important writers and major literary movements and themes. Students will study the forces unleashed by the Revolution and considers the development of modern French literature.

FR 0305 French and Francophone Women Writers 3 Credits
Attributes: WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: FR 0219 or FR 0220.
The course explores a wide range of literary genres produced by women writers from France and the francophone world, investigating women's issues such as race, gender, class, status, and power within the historical, political, and cultural contexts of their regions of origin. The course introduces French feminist theories. Students read and conduct discussions in French and complete frequent oral and written assignments.

FR 0337 Literature of the 19th Century: Romanticism to Naturalism 3 Credits
Prerequisite: FR 0219 or FR 0220.
From Romanticism to Naturalism, this course selects from a variety of genres - fantastic and exotic tales, science fiction, short stories, poetry and novels - to provide an overview of the rich literature of nineteenth-century France. Love, war, and the imagination contend for attention while the country emerges from political and social revolution, headed toward democracy and the Industrial Revolution. This course requires frequent oral reports and critical papers.

FR 0366 Film and Literature in French 3 Credits
Prerequisite: FR 0219 or FR 0220.
This course examines the relationship between film and literature. Students view the film version of each work, which serves as a basis for class discussion. The course requires frequent oral and written works.

FR 0377 Internship I 3 Credits
Prerequisite: FR 0219 or FR 0220.
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising, teaching, etc., in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, an evaluation of student interns may be required from the institution where students work. The student's work should demand no less than one full day per week, or its equivalent.

FR 0378 Internship II 3 Credits
Prerequisite: FR 0219 or FR 0220.
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising, teaching, etc., in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, an evaluation of student interns may be required from the institution where students work. The student's work should demand no less than one full day per week, or its equivalent.

FR 0381 Coordinating Seminar I 3 Credits
Prerequisite: FR 0219 or FR 0220.
Students undertake readings and studies in a specialized area of French, under the direction of a member of faculty. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.
FR 0382 Coordinating Seminar II 3 Credits  
Prerequisite: FR 0219 or FR 0220.  
Students undertake readings and studies in a specialized area of French, under the direction of a member of faculty. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.

FR 0399 Capstone Seminar 3 Credits  
Prerequisite: Senior standing.  
Majors in French participate in an interdisciplinary seminar in the spring of their senior year. The focus of this seminar varies according to the professor, but possible topics include European Film, The Grand Tour, Immigration in Europe, Capital Cities, Language Teaching and Technology, Europe and America. Students research their capstone papers in the target language and present the final work in English and French. The instructor may, in some cases, evaluate work in the target language in consultation with colleagues in that area of expertise in the department. Seminar is conducted in English.

German  
GM 0110 Elementary German I 3 Credits  
Designed for students with no prior experience with German or whose placement scores are in the range for this course level. This course, the first of a two-semester sequence, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

GM 0111 Elementary German II 3 Credits  
Prerequisite: GM 0110.  
This course, a continuation of GM 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

GM 0210 Intermediate German I 3 Credits  
Prerequisite: GM 0111.  
This course, the first of a two-semester sequence, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

GM 0211 Intermediate German II 3 Credits  
Prerequisite: GM 0210.  
This course, a continuation of GM 0210, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

GM 0220 Topics in Language and Culture 3 Credits  
Prerequisite: GM 0211.  
This course improves proficiency in written and oral expression by focusing on particular topics in German language and culture. Students develop advanced writing and speaking skills while concentrating on grammar, style, and appropriateness. Weekly compositions, based primarily on the genres studies (short story, theater, memoir, essay) allow students to identify and correct grammatical mistakes. Students present speeches in class and conduct situational dramas such as job interviews, television reporting, courtroom trials, debates in German. Films and various cultural artifacts (comic strips, proverbs, songs) familiarize students with idiomatic German.

GM 0241 German Cinema 3 Credits  
Prerequisite: GM 0211.  
German filmmakers are known for their artistic expression and reaction to social and political trends that concern the country and its citizens. This course deals with major developments of German cinema throughout the twentieth century and will give students an overview of major movements, important directors, genres, and actors in the history of German film, as well as socio-political matters facing Weimar and Nazi Germany, post-war West and East German states, and unified Germany. Students will be introduced to the tools of film analysis, cinematic codes, and techniques such as narration, mise-en-scène, cinematography, sound, editing, and how these affect the viewer.

GM 0251 German Civilization and Culture I 3 Credits  
Prerequisite: GM 0211.  
This course examines the main currents of German culture and civilization through lectures, films, the Internet, and literary and cultural readings. Students complete frequent oral and written reports. Conducted in German, this course requires frequent oral and written reports.

GM 0252 German Civilization and Culture II 3 Credits  
Prerequisite: GM 0251.  
This course examines German immigration, especially to the United States, considering in-depth the German-American experience through lectures, films, the Internet, and literary and cultural readings. Conducted in English, this course requires frequent oral and written reports.

GM 0262 Survey of German Literature 3 Credits  
This course offers an overview of German works and literary movements from the Middle Ages to 1945, providing students with the fundamentals of literary analysis in the genres of poetry, drama, novels, novellas, short stories, and film. The course requires frequent oral and written reports.

GM 0291 Modern German Literature 3 Credits  
This course introduces students to a variety of German literature and genres written in the 20th century. All works are heavily influenced by the two world wars. The literary canon includes a text by Kafka, portraying hope and despair; and Anna Seghers’ poems and short stories written in exile portraying the various social and political changes in West Germany, and the essays by the East German writer Christa Wolf that deals with loyalty and dissidence. The course also addresses narrative strategies and the challenges faced by the translator. Furthermore, we talk about the different roles literature can play, including the influence and value in furthering the understanding of material to contextualize the readings. Of particular interest is the portrayal of social and political issues.
GM 0377 Internship 3 Credits
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising, teaching, etc., in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, an evaluation of student interns may be required from the institution where students work. The student’s work should demand no less than one full day per week, or its equivalent.

GM 0381 Coordinating Seminar 3 Credits
Students undertake readings and studies in a specialized area of German under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.

GM 0382 Coordinating Seminar 3 Credits
Students undertake readings and studies in a specialized area of German under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.

GM 0399 Capstone Seminar 3 Credits
Prerequisite: Senior standing.
Majors in German participate in an interdisciplinary seminar in the spring of their senior year. The focus of this seminar varies according to the professor, but possible topics include European Film, The Grand Tour, Immigration in Europe, Capital Cities, Language Teaching and Technology, Europe and America. Students research their capstone papers in the target language and present the final work in English and German. The instructor may, in some cases, evaluate work in the target language in consultation with colleagues in the area of expertise in the department. Seminar is conducted in English.

Hebrew

HE 0110 Elementary Hebrew I 3 Credits
Attributes: JST Judaic Studies Minor
Designed for students with no prior experience with Hebrew or whose placement scores are in the range for this course level. This course, the first in a two-semester sequence, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

HE 0111 Elementary Hebrew II 3 Credits
Attributes: JST Judaic Studies Minor
Prerequisite: HE 0110.
This course, a continuation of HE 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

HE 0210 Intermediate Hebrew I 3 Credits
Attributes: JST Judaic Studies Minor
Prerequisite: HE 0111.
This course, the first in a two-semester sequence, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

HE 0211 Intermediate Hebrew II 3 Credits
Attributes: JST Judaic Studies Minor
Prerequisite: HE 0210.
This course, a continuation of HE 0210, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

Italian

IT 0110 Elementary Italian I 3 Credits
Attributes: ISIT Italian Studies: Italian
Prerequisite: IT 0110.
Designed for students with no prior experience with Italian or whose placement scores are in the range for this course level. This course, the first in a two-semester sequence, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. The culture of Italy is explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

IT 0111 Elementary Italian II 3 Credits
Prerequisite: IT 0110.
This course, a continuation of IT 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. The culture of Italy is explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

IT 0210 Intermediate Italian I 3 Credits
Prerequisite: IT 0111.
This course, the first in a two-semester sequence, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. Italian culture is explored through a wide variety of materials including literary texts, press articles, and films. Students attend three classes per week and do mandatory online work determined by the instructor.

IT 0211 Intermediate Italian II 3 Credits
Attributes: ISIT Italian Studies: Italian
Prerequisite: IT 0210.
This course, a continuation of IT 0210, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. Italian culture is explored through a wide variety of materials including literary texts, press articles, and films. Students attend three classes per week and do mandatory online work determined by the instructor.

IT 0220 Topics in Language and Culture 3 Credits
Attributes: ISIF Italian Studies: Italy-Focused
Prerequisite: IT 0211.
This course improves proficiency in written and oral expression by focusing on particular topics in Italian language and culture. Students develop advanced writing and speaking skills while concentrating on grammar, style, and appropriateness. Weekly compositions, based primarily on genres studied (short story, theater, memoir, essay) allow students to identify and correct grammatical mistakes. Students present speeches in class and conduct situational dramas such as job interviews, television reporting, courtroom trials, and debates in Italian. Films and various cultural artifacts (comic strips, proverbs, songs) familiarize students with idiomatic Italian.
IT 0222 Made in Italy 3 Credits  
Attributes: ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
Prerequisite: IT 0211.
Made in Italy, a term that indicates the uniqueness of Italy in abbigliamento (clothing), agroalimentare (food), arredamento (furniture) and automobili (automobiles), dates to the 1980s. This course seeks to further our understanding of Italian culture by investigating the reasons for the popularity and preeminence of products made in Italy. Designers have ensured Italy’s prominence in the world of fashion. Pasta, prosciutto, and olive oil are synonymous with Italy, the birthplace of the Slow Food movement. Innovative design, both interior and exterior, is another hallmark of Italian excellence. Italy has produced both high performing, luxury cars and more economical modes of transportation. Conducted in Italian.

IT 0233 Creative Writing 3 Credits  
Attributes: ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
Prerequisite: IT 0211.
This course will explore the craft of fiction, touching on both its theory and practice. Students will begin by examining some masters of prose in order to discuss key elements of fiction writing (plot, character, point of view, and style). They will consider the panorama of modern and contemporary Italian fiction, from the novella to the historical novel, coming-of-age fiction to the postmodern immigrant narrative. Students will develop individual creative projects, which will be shared with their workshop classmates and revised in cooperation with the instructor.

IT 0240 Language of Food in Italian Culture 3 Credits  
Attributes: ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
Prerequisite: IT 0211.
"Dimmi ciò che mangi e ti dirò chi sei… Tell me what you eat, and I will tell you what you are." Perhaps more than any other modern nation, Italy is defined by and celebrated for its food. Exports such as vino, pizza, and gelato, so quintessentially Italian, are now readily available across the globe. But what does food mean to Italians, and how does it reflect, magnify, and shape their collective identity? In this course, students will explore references to food and gastronomy in Italian literature, television, cinema, and art. We will investigate how Italians past and present have used food to talk about mechanisms of social belonging, disparity, and alienation. Beginning with today’s celebrity chefs and moving back to Dante and the origins of Italian literature, we will learn about the historical forces that influenced Italy’s evolving culinary traditions while honing our Italian language skills.

IT 0253 Contemporary Italian Culture 3 Credits  
Attributes: ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
Prerequisite: IT 0211.
This course examines aspects of contemporary Italian culture in the arts, film, music, media, and literature. Students analyze the debates that inform the political, social, and cultural dimensions of Italian society today. Readings include magazine and newspaper articles, print advertisements, novels, short stories, and comic books. Students view television news reports, soap operas, commercials, and movies, and listen to various types of contemporary Italian music. The course is conducted in Italian.

IT 0255 The Novella 3 Credits  
Attributes: ISIF Italian Studies: Italy-Focused  
Prerequisite: IT 0211.
This course analyzes the most successful genre in Italian literature, the novella (short story), as it evolved from the medieval era through the Renaissance to present day. Students read selections from Boccaccio, Basile, Bandello, Verga, Pirandello, Deledda, Morante, Moravia, Calvino, and others. The course is conducted in Italian.

IT 0257 Theatre in Italy: Comedy from Machiavelli to Fo 3 Credits  
Attributes: ISIF Italian Studies: Italy-Focused  
Prerequisite: IT 0211.
From the erudite satires of the humanists to the political farces of contemporary playwrights, Italian comedy has always done more than just entertain. In this course we will study dramatic works by some of Italy’s most prominent authors (Machiavelli, Aretino, Goldoni, Pirandello, et al.) and explore the development of comic theater in Italy from the Renaissance to the present. We will weigh the social function of humor in Italian theater, along with issues relating to gender, power, and performance. We will focus on the literary and historical dimensions of these texts, but also use these lively comedies to hone our reading, writing, and oral skills in Italian. To that end, we will watch clips of the plays, regularly perform scenes together in class, and even experiment with improvised “commedia dell’arte” scenarios.

IT 0259 Made in Italy 3 Credits  
Prerequisite: IT 0211.
This course examines aspects of contemporary Italian culture in the arts, film, music, media, and literature. Students analyze the debates that inform the political, social, and cultural dimensions of Italian society today. Readings include magazine and newspaper articles, print advertisements, novels, short stories, and comic books. Students view television news reports, soap operas, commercials, and movies, and listen to various types of contemporary Italian music. The course is conducted in Italian.

IT 0271 Italian Cinema 3 Credits  
Attributes: CAOT Catholic Studies: Non-Religious Studies, E_BF English Literature Before 1800, ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
The city of Rome has been a source of wonder and amazement throughout recorded history. This course examines the foundation myths of the Eternal City in contrast to the historical accounts, discusses early accounts of the life of the city, evaluates the reasons for its decline and fall, considers the riches of Renaissance and Baroque periods, analyzes poetry by the Roman people, and examines Rome’s centrality for the world of art. This course, which is conducted in English, also focuses on the political importance of the city from its inception through the Risorgimento (Italian Unification), to Fascism and World War II, to present day.

IT 0271 Italian Cinema 3 Credits  
Attributes: CAOT Catholic Studies: Non-Religious Studies, E_BF English Literature Before 1800, ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
This survey of Italian films as textual, cultural, and historical artifacts analyzes movements such as neorealism, commedia all’italiana, the spaghetti western, and new Italian cinema through the works of selected directors. The course follows a chronology from the silent period to present day, with special emphasis on the "golden ages" of Italian cinema, neo-realism of the postwar period, the 1960s’ comedy of manners, and the new Italian cinema of the ’80s and ’90s. Students analyze the works of Rossellini, De Sica, Fellini, Visconti, Germi, Antonioni, Wertmüller, Leone, Pasolini, Moretti, Benigni, and others.

IT 0289 Dante 3 Credits  
Attributes: CAOT Catholic Studies: Non-Religious Studies, E_AF English Literature After 1800, ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian  
This course examines the works of Dante Alighieri, including the Vita nuova, in addition to the "Inferno," "Purgatorio," and "Paradiso" from the Divine Comedy. Students are introduced to the political, linguistic, theological, and poetic ideas that make Dante’s works not only significant in the medieval context, but also continue to challenge and inform modern debates. This course, which is conducted in English, counts towards the core requirement in literature.
IT 0290 Italian American Cinema
Attributes: ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian, ITEN Italian Course Taught in English
This course investigates salient aspects of Italian American cinema, including the representation of Italian Americans, works directed by Italian American directors, and roles played by Italian American actors. It also examines the difference in roles and representation for men and women in this subgroup of American society, with particular consideration given to the ethnic roots of these differences. Throughout the semester we will examine the ways in which film displays Italian ethnicity in the United States. The course also analyzes the profound influence of Italian cinema on the filmmaking of Italian American screenwriters and directors. This class is taught in English.

IT 0330 Redefining the Cosmos: Voyages to the New World in the Italian Renaissance
Attributes: ISIF Italian Studies: Italy-Focused
Prerequisite: IT 0211.
The Italian Renaissance has traditionally been understood as the very laboratory of Modernity. In a time where new and revolutionary ideas about art, politics and science took shape, Europe faced an extraordinary challenge: how to integrate into "the Renaissance experiment" the new natural and human experience that opened up with the discovery of the New World. Italy produced an extraordinarily heterogeneous body of work that stemmed from these voyages: that is, a "literature of discovery." This course will explore this literature, which includes epic poems, popular cantari, travelogues, historical and geographical treatises, as well as epistolary collections.

IT 0377 Internship
Attributes: ISIF Italian Studies: Italy-Focused
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising and teaching in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, an evaluation of student interns may be required from the institution where students work. The student's work should demand no less than one full day per week, or its equivalent.

IT 0378 Internship
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising and teaching in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, an evaluation of student interns may be required from the institution where students work. The student's work should demand no less than one full day per week, or its equivalent.

IT 0381 Coordinating Seminar
Attributes: ASML American Studies: Language, ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian
Students undertake readings and studies in a specialized area of Italian, under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.

IT 0382 Coordinating Seminar
Attributes: ISIF Italian Studies: Italy-Focused, ISIT Italian Studies: Italian
Students undertake readings and studies in a specialized area of Italian, under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement.

IT 0393 Italian-American Experience
Attributes: ASML American Studies: Language, ISIF Italian Studies: Italy-Focused, UDIV U.S. Diversity
This course analyzes the concept of nationality and national identity in literature, film, and critical essays by and about Italian-Americans. The course also discusses the concept of ethnicity together with the phenomenon of emigration and the difference in roles for men and women in this subgroup of American society. The success of Italian-Americans in various sectors of society reveals the vitality and determination of this particular ethnic group in the face of prejudice and economic hardship. Students examine the contributions of Italians who left their native land for a new beginning and discuss the perception and reality of America as the "promised land" in the Italian-American community. The course is conducted in English.

IT 0399 Capstone Seminar
Attributes: ISIF Italian Studies: Italy-Focused
Prerequisite: Senior standing.
Majors in Italian participate in an interdisciplinary seminar in the spring of their senior year. The focus of this seminar varies according to the professor, but possible topics include European Film, The Grand Tour, Immigration in Europe, Capital Cities, Language Teaching and Technology, Europe and America. Students research their capstone papers in the target language and present the final work in English and Italian. The instructor may, in some cases, evaluate work in the target language in consultation with colleagues in the area of expertise in the department. Seminar is conducted in English.

Japanese

JA 0110 Elementary Japanese I
Attributes: ISIF Italian Studies: Italy-Focused
Prerequisite: JA 0110.
This course, the first in a two-semester sequence, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

JA 0111 Elementary Japanese II
Prerequisite: JA 0110.
This course, a continuation of JA 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

JA 0210 Intermediate Japanese I
Prerequisite: JA 0111.
This course, the first in a two-semester sequence, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.
**Portuguese**

**PG 0110 Elementary Brazilian Portuguese I**  
3 Credits  
**Prerequisite:** PG 0110. 
This course, the first in a two-semester sequence, is designed to present the student with the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Cultures are explored through a variety of media. The course will broaden the students’ understanding of the cultures of the different countries where Portuguese is spoken, especially Brazil.

**PG 0111 Elementary Brazilian Portuguese II**  
3 Credits  
**Prerequisite:** PG 0110. 
This course, a continuation of PG 0110, is designed to present the student with the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Cultures are explored through a variety of media. The course will broaden the students’ understanding of the cultures of the different countries where Portuguese is spoken, especially Brazil.

**PG 0210 Intermediate Brazilian Portuguese I**  
3 Credits  
**Prerequisite:** PG 0111. 
This course, the first in a two-semester sequence, continues to build upon the skills acquired in the first-year sequence. The course focuses on increasing the development of communication and comprehension skills while exploring in more depth the complexity of the Brazilian Portuguese language. Emphasis is placed on the development of listening, speaking, reading, and writing skills, as well as the development of cultural literacy. Cultural emphasis is placed on both Brazil and the Lusophone world.

**PG 0211 Intermediate Brazilian Portuguese II**  
3 Credits  
**Prerequisite:** PG 0210. 
This course, a continuation of PG 0210, continues to build upon the skills acquired in the first-year sequence. The course focuses on increasing the development of communication and comprehension skills while exploring in more depth the complexity of the Brazilian Portuguese language. Emphasis is placed on the development of listening, speaking, reading, and writing skills, as well as the development of cultural literacy. Cultural emphasis is placed on both Brazil and the Lusophone world.

**Spanish**

**SP 0110 Elementary Spanish I**  
3 Credits  
**Prerequisite:** SP 0110. 
This course, the first in a two-semester sequence, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

**SP 0111 Elementary Spanish II**  
3 Credits  
**Prerequisite:** SP 0110. 
This course, a continuation of SP 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

**Russian**

**RU 0110 Elementary Russian I**  
3 Credits  
**Prerequisite:** RU 0110. 
This course, a continuation of RU 0110, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

**RU 0111 Elementary Russian II**  
3 Credits  
**Prerequisite:** RU 0110. 
This course, a continuation of RU 0110, teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor.

**RU 0210 Intermediate Russian I**  
3 Credits  
**Prerequisite:** RU 0111. 
This course, the first in a two-semester sequence, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

**RU 0211 Intermediate Russian II**  
3 Credits  
**Prerequisite:** RU 0210. 
This course, a continuation of RU 0210, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.
This course, a continuation of SP 0210, prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor.

This course improves proficiency in written and oral expression by focusing on particular topics in Spanish language and culture. Students develop advanced writing and speaking skills while concentrating on grammar, style, and appropriateness. Weekly compositions, based primarily on the genres studied (short story, theater, memoirs, essay) allow students to identify and correct grammatical mistakes. Students present speeches in class and conduct situational dramas such as job interviews, television reporting, courtroom trials, debates in Spanish. Films and various cultural artifacts (comic strips, proverbs, songs) familiarize students with idiomatic Spanish.

This course aims to give post-intermediate students of Spanish a solid foundation of business vocabulary, basic business and cultural concepts, and situational practice that will prepare them to succeed in today's growing Spanish-speaking business world. It will incorporate a wide array of real-life situations and problems that will integrate all four language skills: speaking, reading, writing and listening. One of the main objectives of this course is to turn students into potential professionals by improving their critical thinking and problem-solving skills necessary in today's globalized business world.

This course provides students with the fundamentals of literary analysis in the genres of poetry, narrative, theater, and film. It uses materials from around the Hispanic world to present a broad historical-cultural context for further reading and to sharpen the skills of analysis, argumentation, speaking, and writing. Focused on a literary study whose critical terms derive from the structure of literature itself (plot, scene, shot, verse, etc.), the course includes a survey of the periods of literary history. Students complete essential grammar, style, and appropriateness. Weekly compositions, based primarily on the genres studied (short story, theater, memoirs, essay) allow students to identify and correct grammatical mistakes. Students present speeches in class and conduct situational dramas such as job interviews, television reporting, courtroom trials, debates in Spanish. Films and various cultural artifacts (comic strips, proverbs, songs) familiarize students with idiomatic Spanish.

This course examines and analyzes film by Spanish and Latin-American directors (Buñuel, Saura, Littin, Sanjines, etc.). Students initially study means of analysis (close-up, soundtrack, frame, etc.). Students then begin to formulate interpretations that move between the formal, technical composition of films and the concrete socio-historic and cultural reality to which each film refers. Course activities include screening of films, discussion of articles that deal with literary theory and cultural reality to which each film refers. Course activities include screening of films, discussion of articles that deal with literary theory and analysis of film, and writing short papers.

This course examines and analyzes film by Spanish and Latin-American directors (Buñuel, Saura, Littin, Sanjines, etc.). Students initially study means of analysis (close-up, soundtrack, frame, etc.). Students then begin to formulate interpretations that move between the formal, technical composition of films and the concrete socio-historic and cultural reality to which each film refers. Course activities include screening of films, discussion of articles that deal with literary theory and analysis of film, and writing short papers.

This course is an introduction to the scientific study of language, with a focus on Spanish. It particularly aims at both the descriptive and applied levels. At the descriptive level, it will focus on the understanding of the mechanisms of the language in various areas: how sounds are articulated and work within a system (phonetics and phonology); how small units with meaning are combined to form words (morphology); how words are combined to form sentences (syntax); how meaning is attached to the different units, and how meaning operates at different levels (semantics). At the applied level, it will also explore topics such as linguistic variation, second language acquisition, bilingualism, and the situation of Spanish in the US. Taught in Spanish.
SP 0305 Popular Culture in Latin America 3 Credits
Attributes: LCEL LACS Minor: Elective, LCSC LACS Minor: Spanish Culture and Literature
Prerequisites: SP 0220 and one additional 200-level Spanish course.
This course examines the interaction among mass, elite, traditional, and indigenous art forms, their relationship with the dynamics of national/cultural identity in Latin America in the 19th and 20th centuries, and globalization. Forms of expression include oral poetry and narrative; the folletín (19th-century melodramas by installment) to 20th-century "fotonovelas," "radionovelas," and "telenovelas"; broadsides; comics; musical and political movements such as neo-folklore, new song, Nueva Troba, and Rock Latino; artistic movements such as Mexican muralist; traditional and popular crafts; cooking; popular dance; and film. Open to juniors and seniors only.

SP 0306 Cuban Film: A Close Look at the Revolution 3 Credits
Attributes: LCEL LACS Minor: Elective, SPME Spanish Major or Minor Elective, WDIV World Diversity
Prerequisite: SP 0220 and one additional 200-level Spanish course.
This class investigates topics in Cuban history, culture, and politics, by focusing on the impact of the Cuban Revolution on society as presented through one of the strongest contemporary Cuban cultural artifacts: Cuban film and film about Cuba. Since 1959 film has played a crucial role in officially narrating, shaping, critiquing and questioning the Revolution. We will analyze how film continues to serve as a space to reflect on the complexities of Cuban society, and how social media and technology is now challenging the limits of Cuban film, and possibly of the Revolution itself.

SP 0309 Bilingualism in the Spanish-Speaking World 3 Credits
Attributes: SPME Spanish Major or Minor Elective
Prerequisites: SP 0220 and one additional 200-level Spanish course.
The theme of this course is the issue of bilingualism, analyzed from three different angles: sociolinguistic, psycholinguistic, and educational. Bilingualism is a natural and widespread phenomenon, and research on this area has been growing over the last years in various fields, such as Applied Linguistics, Psychology, Sociology, or Education. Approximately half of the world population speaks two or more languages, and current research also shows cognitive advantages for those who speak more than one language. This course will offer students a critical overview of this phenomenon from the three perspectives mentioned above. It will be conducted in Spanish.

SP 0311 Glory, Splendor, and Decay: Spanish Golden Age Literature 3 Credits
Prerequisites: SP 0220, SP 0245.
This course studies the most important literary manifestations of the 16th- and 17th-centuries’ Golden Age Spanish culture, with emphasis on Cervantes, Tirso de Molina, Lope de Vega, Quevedo, Góngora, and Calderón de la Barca.

SP 0331 Love and Deception in 19th-Century Spanish Literature 3 Credits
Prerequisites: SP 0220, SP 0245.
Students study and analyze representative works of the romantic and realist movements. The course emphasizes theatre and poetry, or the novel, depending on students’ needs.

SP 0341 20th Century Spanish Literature 3 Credits
Prerequisites: SP 0220, SP 0245.
This course examines works and literary movements from the early part of the 20th century (Generation of ‘98) to present times. Representative authors include Unamuno, Baroja, Valle-Inclán, García Lorca, J.R. Jiménez, Cela, Laforet, Delibes, and Matute.

SP 0346 Contemporary Spanish Theatre 3 Credits
Prerequisites: SP 0220, SP 0245.
This course examines several current themes in contemporary Spanish theatre. One topic is how Spanish theatre has engaged with the memory of historical moments such as the Spanish Civil War (1936-39), the ensuing Franco dictatorship (1939-75), and terrorism under democratic rule, particularly the post-9/11 terrorist bombings in Madrid. While reading a selection of contemporary Spanish plays, we will study the strategies used by playwrights to evoke or avoid the historical memory of these events.

SP 0353 Spanish-American Narrative 3 Credits
Prerequisites: SP 0220 and one additional 200-level Spanish course.
This critical analysis and discussion of key words of the narrative genre emphasizes the 20th-century development of the novel and short story. Authors include Azuela, Quiroga, Borges, Bombal, Somers, Cortázar, García Márquez, Fuentes, Ferré, and Allende. The course also considers experimental writing, the short story of fantasy, testimonio, and others, and requires critical papers and oral reports. Open to juniors and seniors only.

SP 0357 The Spanish Novel 3 Credits
Prerequisites: SP 0220, SP 0245.
This course studies the novel of Spain from its first tentative manifestation with the picaresque through its major development with Cervantes and into the 20th century, emphasizing the works of more important writers. Open to juniors and seniors only.

SP 0359 Culture, Civilization, and Literature in the Spanish-American Caribbean Region 3 Credits
Attributes: EDCG Educational Studies Cognate, EDDV Educational Studies Diversity, LCEL LACS Minor: Elective, LCSC LACS Minor: Spanish Culture and Literature, WDIV World Diversity
Prerequisites: SP 0220 and one additional 200-level Spanish course.
This study and explanation of distinctive elements of Puerto Rico, Cuba, Dominican Republic, and Central American countries focuses on the fusion of indigenous, Black, and Hispanic as manifestation in the Spanish-American Caribbean Region. Students will read, study, and critically analyze relevant documents, and cultural materials from pre-Columbian populations until the contemporary period. Juniors and seniors only.

SP 0360 Dictatorships and Revolutionary Movements in Contemporary Latin America 3 Credits
Attributes: LCEL LACS Minor: Elective, LCSC LACS Minor: Spanish Culture and Literature, WDIV World Diversity
Prerequisites: SP 0220 and one additional 200-level Spanish course.
This course will analyze various revolutionary movements in Latin America as well as the dictatorships that emerged in early 20th Century and ended almost at the turn of the century. We will discuss the new “neo-socialist” governments that have emerged in 21st Century Latin America since the end of the Socialist Block (1990s), under the dominant global economy. In this class we will read, analyze, and discuss critical essays and literature (narrative, poetry, and testimonies), and other cultural forms (such as fiction and documentary films, art, music, etc.).
SP 0363 Literature and Culture of the Hispanic Caribbean Migration and Diaspora 3 Credits
Attributes: LCEL LACS Minor: Elective, LCSC LACS Minor: Spanish Culture and Literature
Prerequisites: SP 0220 and one additional 200-level Spanish course.
This course explores the overlapping experiences of migrations and diaspora in the Hispanic Caribbean. The course reviews the history of Caribbean migrations and the experiences of Caribbean migrants in the United States through major literary works of Puerto Rico, Dominican Republic and Cuba. With its complex racial, cultural and linguistics mixture, the Caribbean is where today's globalization began, over 500 years ago. Students will draw on an interdisciplinary approach: historical, sociopolitical, ethnic, multi-linguistic and global contexts. Films and oral presentations are part of the course. This course is taught in Spanish.

SP 0371 Images of Latin American Indians 3 Credits
Attributes: LCEL LACS Minor: Elective, LCSC LACS Minor: Spanish Culture and Literature, WDIV World Diversity
Prerequisites: SP 0220 and one additional 200-level Spanish course.
This course examines the vision of Latin American Indians from the first letters of the "discoverers" and conquistadores (Colón, Cortés, Bernal Díaz del Castilho), and missionaries (Bartolomé de las Casas) through relevant novels, short stories, and films of the 19th and 20th centuries. To understand the post-discovery vision of the Indians, this course also studies the major pre-Columbian civilization of Mesoamerica and the Andean region. Authors include: Matto de Turner, Icaza, Arguedas, Castellanos, and others. Open to juniors and seniors only.
French Major

Requirements

For a 30-credit major in French, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select at least 7 courses taught in French</td>
<td>21</td>
</tr>
<tr>
<td></td>
<td>Select 2 additional courses from the department’s French offerings or from the list of approved courses in other departments</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>Select one capstone seminar taught in English</td>
<td>3</td>
</tr>

<td></td>
<td>Total Credits</td>
<td>30</td>
</tr>
</tbody>
</table>

1. This may include FR 0211 with a grade of B or better, and/or approved courses from study abroad partner institutions (list available upon request).

Students select their course of study from a variety of offerings including courses on composition and conversation, creative writing, France’s culture, francophone cultures, literature, and film. French majors also have the opportunity to apply for internships that count towards the major. Students are encouraged to study abroad in France or in a francophone country either during the junior year or in the summer. The final course for the French major must be taken at Fairfield University.

All majors are urged to work closely with an advisor of their choice, as soon as possible, to plan a program of study.

The following list of courses taught in English have been approved to count toward the French major and minor:

<table>
<thead>
<tr>

Select 4 additional 200- or 300-level Spanish courses 12

Total Credits 30

1 Students must take this course during their senior year.

Notes:

- SP 0220 is a prerequisite for all subsequent Spanish classes. After taking SP 0220, students may take all remaining courses (required and elective) at any time and in any order, provided individual course prerequisites are met.
- If students have received their High School education in a Spanish-speaking country, and if those classes were given in Spanish, then the student needs to meet with a Spanish Professor to have his or her level determined. If it is determined that the student should not take SP 0220, he or she would still need to complete the required 30 credits for the major.
- Any questions regarding the major should be directed to the director of the Spanish section.

Study Abroad

Major requirements may include approved courses from study abroad partners. Students are encouraged to study abroad in a Spanish speaking country. In order to have courses taken abroad count toward the Spanish major or minor, two conditions must be met:

1. The courses are taught entirely in Spanish.
2. The content is related to some aspect of Latin American or Spanish culture, history, linguistics, politics, or literature.

Spanish Minor

For a 15-credit minor in Spanish, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SP 0220</td>
<td>Topics in Language and Culture</td>
<td>3</td>
</tr>
</tbody>
</table>

Select 4 upper-division Spanish electives 1 12

Total Credits 15

1 These electives may include any 200- or 300-level Spanish course beyond SP 0211 taught at Fairfield University, courses taken abroad, or the coordinated seminar with instructor approval.

Notes:

- It is strongly recommend that all minors also take SP 0245 Analysis and Interpretation of Hispanic Literature and SP 0285 Introduction to Spanish Linguistics.
- SP 0220 is a prerequisite for all subsequent Spanish classes. After taking SP 0220, students may take all remaining courses (required and elective) at any time and in any order, provided individual course prerequisites are met.
- If students have received their High School education in a Spanish-speaking country, and if those classes were given in Spanish, then the student needs to meet with a Spanish Professor to have his or her level determined. If it is determined that the student should not take SP 0220, he or she would still need to complete the required 15 credits for the minor.
- Any questions regarding the minor should be directed to the director of the Spanish section.
Peace and Justice Studies

The Peace and Justice Studies program is an expression of the Jesuit educational commitment, which is fundamentally identified with the promotion of the values of peace and justice. The program is based on the principle that true peace is not only the absence of hostilities, but also requires the establishment of a just social order providing a decent and dignified life for all. The program gives focus and substance to concerns about troubling social and political issues while providing the academic and real-world skills to address them.

Accordingly, the minor provides students with an opportunity to study systematically a variety of issues in world peace and social justice, including how religions and philosophical traditions approach these values, and the ways in which people from across the globe engage to create positive change for the future.

Programs

- Peace and Justice Studies Minor (p. 178)

Courses

PJ 0298 Internship in Advocacy and Community Organizing  3 Credits
This internship provides students in the minor with the opportunity to understand, through direct participation, how citizens organize to empower their communities and promote policies that will benefit them. Interns are placed with community organizations in the greater Bridgeport area and some placements include advocacy work in the state legislature in Hartford. The internship requires a journal and final reflection paper based on analysis of the site experience and its relationship to peace and justice. Enrollment by permission only.

PJ 0398 Capstone Research Seminar  3 Credits
This course creates a context for integrating and reflecting on experiences and knowledge acquired in the program by providing the students the opportunity to examine how their major connects to the values and practices of peace and justice. Students undertake a major research project focused on applying their practical engagement with peace and justice issues to broader theoretical frameworks with attention to contemplating a vision for change in the future. The course is built around student-led discussion and an in-depth research project that analyzes an issue from the student’s major area of study through the lens of peace and justice.

Faculty

Co-Directors
Labinski (Philosophy)
The Department of Philosophy has also adopted the following Student Learning Goals:

1. The ability to identify arguments and provide counter-arguments
2. The critical engagement with and the questioning of one's assumptions
3. The thoughtful integration of action with values
4. The existential risk of crisis and transformation through self-reflection
5. The acceptance of the invitation of philosophy to wonder at the big questions

The Department of Philosophy has also adopted the following Student Learning Objectives:

1. Thinking Skills: Students should be able to construct (or re-construct) a philosophical argument, both verbally and in writing. They should be able to anticipate and clearly articulate counter-arguments. Students should be able to recognize and question their own assumptions/prejudices. Students should be able to frame questions aware that what is asked often determines the response.
2. Reading Skills: Students should be able to interpret texts and to recognize and reflect on textual ambiguities. Students should be able to discern the steps of a philosophical argument, as well as
3. Writing Skills: Students should be able to write logically compelling arguments in a clear, concise, and well-ordered manner.
4. Familiarity with some of the central philosophical questions in the history of philosophy (broadly construed): Students should have a rudimentary knowledge of the history of philosophical questions and their attendant concepts and arguments, and be able to recognize versions of these questions in contemporary philosophical discussions. Students should be able to recognize and articulate alternative perspectives to the problems and claims with which they are confronted in contemporary life.
5. Students should be able to reflect critically on philosophical questions in the context of their own lives.

In addition to offering courses in Area III of the Core Curriculum, the department offers both a major and minor in philosophy.

**Courses**

**PH 0101 Introduction to Philosophy** 3 Credits
This course is a topical introduction to philosophy. The aim of the course is to introduce students to the vocation of wonder and questioning by engaging students in discussions about some of the basic questions of philosophy. Students will read texts from historical and contemporary writers, and will be asked to develop their own skills of thinking, reading, and writing critically.

**Prerequisite:** PH 0101.

**PH 0200 Ancient Philosophy** 3 Credits
In this course we will investigate how the earliest practitioners of Western philosophy conceived of their own activity. The word 'philosophy' stems from two ancient Greek words and means, literally, 'love of wisdom.' A lover of wisdom is one who pursues wisdom rather than possesses it; consequently, we can think of ancient philosophers as founding a history of inquiry into questions whose relevance for human beings ensures their persistence, questions like: What is the nature of the universe? What can be known? And what in any given situation is the right thing to do?

**Prerequisite:** PH 0101.

**PH 0201 Medieval and Renaissance Philosophy** 3 Credits
This course will examine texts from representative thinkers from Augustine of Hippo in the period of the post-Constantinian Empire to Thomas More in the Renaissance, all sharing the new conception of philosophy. For Christians, as well as for Muslims and Jews, the enterprise of philosophy took on new motivation – the understanding of one's faith – and addressed new problems, not considered by the ancient Greeks and Romans.
### PH 0202 Modern Philosophy
**Prerequisite:** PH 0101.

In light of the development and success of the new mechanistic science in the 17th and 18th centuries philosophers began to reexamine such fundamental philosophical topics as the nature of the human mind, the relationship between the mind and body, the source and scope of human knowledge, the existence of a divine being, and the source and nature of morality. In this course we will trace the development of philosophical thought in the writings of modern philosophers such as Bacon, Descartes, Spinoza, Leibniz, Locke, Berkeley Hume, Reid, and Kant.

### PH 0203 19th Century Philosophy
**Prerequisite:** PH 0101.

This course examines the representative philosophers of the 19th century, notably Kant, Fichte, Schelling, Hegel, Schleiermacher, Schopenhauer, Nietzsche, Kierkegaard, and Marx.

### PH 0204 20th Century Philosophy
**Prerequisite:** PH 0101.

This course presents a coherent picture of the main currents of contemporary philosophy in the Western and the non-Western tradition: phenomenology and existentialism, pragmatism and analytic philosophy, Marxism and dialectical materialism, and philosophy of history and culture.

### PH 0205 Ancient Medicine and Philosophy
**Attributes:** HSTE Health Studies: Traditions, Delivery, and Ethics

**Prerequisite:** PH 0101.

The various methods for investigating the human body have been subject to foundational questions of scientific investigation, religious sanction, social condemnation and philosophical impasse. In this class, we will look at the way in which Ancient Greek medical practitioners and philosophers took up these investigations, negotiated problems of method, and profoundly influenced the ways we talk about, think about and treat the body today.

### PH 0206 Philosophical Perspectives on Women in Classical Literature
**Attributes:** WSGF Women, Gender, and Sexuality Studies: Gender Focused

**Prerequisite:** PH 0101.

Ancient Greek and Latin literature presented its audience with a cast of characters who continue to enjoy social, political and cultural currency. Antigone and Oedipus, Helen and Paris, Cassandra and Prometheus have all had a hand in shaping western thought about the natures of beauty and freedom, the limits of human knowledge, and the role of law. In this course we will focus specifically upon the literary characterizations of women found throughout the ancient Greek and Latin worlds.

### PH 0209 Existentialism
**Attributes:** FREN French Course Taught in English

**Prerequisite:** PH 0101.

The word existentialism describes a particular attitude toward the creation of meaning out of an inherently meaningless existence. Despite the diversity within the tradition, the existentialists of the 19th and 20th century often address questions pertaining to human freedom and responsibility, values and nihilism, anguish and affirmation, authenticity, and the absurd. This course traces how existentialism has answered these questions. In so doing, students are encouraged to rethink the foundation of their own existence and personal values, while understanding the implications of Dostoyevsky’s "If God is dead, then everything is permitted" and Sartre’s "Man is condemned to be free."
Western traditions may also be included. Buddhism, Confucianism, and Daoism. Emphasis is given to greater Asia. These traditions include, but are not limited to, Hinduism, philosophical responses and contributions to them from throughout traditions that originate in Indian and China, including significant

This course provides a philosophical overview of the major philosophical

Prerequisite: PH 0101.

PH 021 The Question of Religion
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: PH 0101.

Nineteenth- and 20th-century continental philosophy calls into question the traditional understanding of religion, God, transcendence, incarnation, sacrifice, responsibility, evil, and ritual. This course explores the transformation of the traditional understanding of these ideas in the wake of thinkers such as Hegel, Kierkegaard, Nietzsche, Heidegger, Bataille, Lacan, Levinas, Girard, Nancy, Derrida, and Marion.

PH 022 Evil
Prerequisite: PH 0101.

This course explores the problem of evil from the perspectives of theology and philosophy. The course considers God and evil, classical theodicies (reasonable justifications of God before the prevalence of evil), modern philosophical accounts of evil, social evil, and the possibility of belief in the face of evil. Within the context of these subjects, the course addresses the following questions: What is evil? What are the roots of evil? What effect does an individual's understanding of evil have on his or her understanding of the human being, of God, and of religion? What is our responsibility in the face of evil?

PH 023 The Problem of God
Attributes: CAOT Catholic Studies: Non-Religious Studies
Prerequisite: PH 0101.

This course studies the problem of the existence of God, including the metaphysical and epistemological issues entailed therein, as developed by such thinkers as Augustine, Anselm, Aquinas, Descartes, Hume, Spinoza, Kant, and Hartshorne.

PH 024 Philosophy of Self and Subjectivity
Prerequisite: PH 0101.

In 446 BCE the Greek poet Pindar, crafted this line: "What is someone? What is someone not? A person is the dream of a shadow," What does it mean to be a self or a subject? While most people would claim to know themselves, it is not always entirely clear what a 'self' is. This course examines the development and parameters of the self and subjectivity through the lens of major philosophical figures. First using a historical approach, then applying methods from contemporary schools of thought, the course investigates the self as both an anchor of security and source of complexity.

PH 025 Introduction to Asian Philosophies
Attributes: WDIV World Diversity
Prerequisite: PH 0101.

This course provides a philosophical overview of the major philosophical traditions that originate in Indian and China, including significant philosophical responses and contributions to them from throughout greater Asia. These traditions include, but are not limited to, Hinduism, Buddhism, Confucianism, and Daoism. Emphasis is given to philosophical exegesis of texts and practices; some comparison with Western traditions may also be included.

PH 026 Social and Political Philosophy
Attributes: BSASH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, PJST Peace and Justice Studies
Prerequisite: PH 0101.

This course analyzes the writings of leading social and political thinkers, with special consideration of the movements of protest and dissent.
PH 0263 The Concept of Human Rights 3 Credits
Prerequisite: PH 0101.
Bosnia, Somalia, Guatemala, the Holocaust: The notion of human rights and accusations of human rights violations are a constant presence in our political environment and in the formulation of U.S. foreign policy. This course follows the emergence of this concept from the political and ethical thought of the Greeks, to the Enlightenment, to the explicit formulation of "human rights" in the 20th century as a guiding principle of international relations.

PH 0264 Philosophy of Law 3 Credits
Prerequisite: PH 0101.
This course examines the major questions of legal philosophy, the nature of legal rights and legal duties, the definition of law, and the grounds of legal authority.

PH 0265 Philosophy and Economic Anthropology 3 Credits
Attributes: PMMP Philosophy Major: Major Philosopher
Prerequisite: PH 0101.
This course examines the economy from philosophical and anthropological perspectives. We will investigate why people produce and exchange things, why they seek to amass things in some circumstances and give them away in others, and how our modern understandings of value, debt, and rationality emerged.

PH 0270 Aesthetics 3 Credits
Prerequisite: PH 0101.
The course examines aesthetic experience and concepts like imitation, expression, and psychic distance; considers the relationships among the various arts; and explores the role of art in life.

PH 0271 Philosophy of Tragedy 3 Credits
Prerequisite: PH 0101.
This course explores various works on tragedy by, for example, Plato, Aristotle, Hegel, Kierkegaard, Nietzsche, Freud, Heidegger, Lacan, Derrida, and Irigaray, which are read alongside various tragedies such as Sophocles' Oedipus the King and Antigone, and Shakespeare's Hamlet.

PH 0272 Philosophy of Film 3 Credits
Prerequisite: PH 0101.
Philosophy of film is one of the leading branches of philosophical aesthetics. While informed by and partly related to disciplines such as film studies, film theory, and film criticism, philosophy of film privileges a cognitive approach to the interpretation and study of film, an approach according to which film might be seen as doing philosophy per se, thus providing an original contribution to the overall philosophical panorama. The course begins with a critical overview of the most significant ontologies of film. Such a discussion is then followed, in the second and third units, by the exploration of issues pertaining to both the tradition of film studies and to the aforementioned cognitivist tradition. Among the issues considered, specific attention is given to the question of narrative, to emotions and film, and to the relation between fiction and nonfiction. A last unit will instead open the discussion to the relation between film and television and, more speculatively, to the future of film in the age of digital technologies.

PH 0281 Philosophies of Love and Sex 3 Credits
Attributes: WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: PH 0101.
This course examines some of the major trends within traditional and feminist philosophies of love and sex. Possible topics include the nature of erotic love, the construction of sexual activity, and the social/political reality of pornography and prostitution.

PH 0282 Violence and the Sacred 3 Credits
Attributes: PJST Peace and Justice Studies, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: PH 0101.
Is religion essentially violent? How have religious principles been used to justify abuse? Who suffers the physical and spiritual effects of this hostility? What actions might we take in response to such suffering? This course examines the intersection of violence and the sacred, especially as it has emerged and been confronted within the Catholic/Christian tradition. Attention is paid to the works of both traditional and feminist philosophers. Possible topics include: child abuse, domestic violence, and racial violence.

PH 0283 Philosophy and Pornography 3 Credits
Prerequisite: PH 0101.
This course examines some of the major trends within traditional and feminist philosophies of pornography. Possible topics include the nature of pornography, the relationship between pornography and the construction of sexual desire, and the social/political consequences of pornography in our communities. Students must be at least 18 years of age.

PH 0299 Special Topics (Shell) 3 Credits
Prerequisite: PH 0101.
This course explores a specific topic in the discipline of philosophy, in an effort to deepen students’ vocations of incessant questioning not only by exploring a specific thinker, question, or historical period, but also by further developing their own thinking, reading, and critical writing skills.

PH 0300 Plato 3 Credits
Prerequisites: Two courses in Philosophy.
This course covers central ontological and epistemological themes in selected early, middle, and late Platonic dialogues, paying particular attention to Plato’s inclination to identify virtue with knowledge.

PH 0301 Aristotle 3 Credits
Prerequisites: Two courses in Philosophy.
This course introduces Aristotle through a selection of his works, exploring their relation to other works, their place in the scheme of the sciences, and thoroughly investigating their subject matter.

PH 0304 Aquinas 3 Credits
Attributes: ISIF Italian Studies: Italy-Focused
Prerequisites: Two courses in Philosophy.
This course focuses on Aquinas’s most mature work, Summa Theologiae. This work exemplifies the Christian intellectual reaction to Islamic Aristotelianism, while at the same time bearing witness to Thomas’s belief in the unity of truth. The course examines and analyzes such questions as the existence and intelligibility of God, the nature and powers of the human composite, human destiny, the human act, good and evil, providence and freedom, natural law, and the virtues.

PH 0307 Descartes 3 Credits
Attributes: FREN French Course Taught in English
Prerequisites: Two courses in Philosophy.
Three years after he finished college, Descartes got stuck in a snowstorm on his way to fight in a war. Alone in his room, he reflected on his education, coming to believe that many of the things he had been taught in college were pretty dubious. He also realized that he had believed many things all his life without giving thought to his reasons for believing them. He decided the best thing he could do was rid himself of all his old beliefs and then, relying only on his own mind, replace them with only those beliefs for which he could find good reasons. This course discusses the development and results of Descartes’ search for truth.
PH 0309 Leibniz 3 Credits
Prerequisites: Two courses in Philosophy.
Can everything in the world be rationally explained? Even the existence of the world itself? G.W. Leibniz (1646-1716) thought so. Together with his understanding of the nature of truth, this led him to some startling conclusions, such as nothing causally interacts with anything else, everything internally reflects everything else, and even though evil exists this is the best of all possible worlds. In this course we examine these conclusions as well as Leibniz’s theories about such puzzling topics as the nature of the mind, body, God, freedom, and space.

PH 0310 Hume 3 Credits
Prerequisites: Two courses in Philosophy.
This course offers an in-depth understanding of the philosophy of David Hume. Hume, one of the most interesting (and influential) of the 18th-century philosophers, made major contributions to our understanding of causation, morality, and the mind, to name just a few. Hume began with principles that seemed quite plausible but, taking these ideas to their logical conclusions, arrived at a philosophy that is, to say the least, surprising.

PH 0311 Kant 3 Credits
Prerequisites: Two courses in Philosophy.
Almost everyone recognizes that through experience the human mind is shaped by the world. Immanuel Kant, however, argued for the revolutionary claim that the world is shaped by the human mind. In developing this position Kant was led to formulate a radical view concerning the nature of space and time. It also led him to draw striking conclusions about our knowledge of ourselves, objects, causation, God, freedom, and immortality—conclusions that changed philosophy forever. In this class we will study Kant’s revolution in philosophy.

PH 0312 Hegel 3 Credits
Prerequisites: Two courses in Philosophy.
The philosophy of G.W.F. Hegel, the most famous of the German idealists, directly spawned the philosophy of Karl Marx. Hegel is considered the father of existentialism and influenced contemporary schools of critical theory, continental philosophy, and post-structuralism. This course focuses on Hegel’s most famous work, Phenomenology of Spirit. Students learn the mechanics of dialectical reasoning by examining Hegel’s reflections upon time and space, perception, scientific reasoning, the concepts of life and death, the master-slave dialectic, and self-consciousness. The course works through this text in detail, and pays particularly close attention to how Hegel interprets the philosophy of Immanuel Kant.

PH 0314 Nietzsche 3 Credits
Prerequisites: Two courses in Philosophy.
This course deals with the thought of one of the leading philosophical figures of the 19th century, Friedrich Nietzsche. In terms of both style and content, Nietzsche was an innovator who called into question the traditional notions of science, systematic knowledge, ethics, and culture as such. The task of the course is to examine several themes central to Nietzsche’s work, among them the will to power, the perspectival approach to truth, the concept of genealogy, the revaluation of values, eternal recurrence, and the death of God.

PH 0316 Bergson 3 Credits
Attributes: FREN French Course Taught in English
Prerequisites: Two courses in Philosophy.
This course explores the work of Henri Bergson (1859-1941). The course primarily takes the form of a close reading of Time and Free Will (1889), Matter and Memory (1911), and The Two Sources of Morality and Religion (1932). The course will also explore the influence of Bergson’s work on contemporary philosophy, psychology, science, and religion.

PH 0317 Heidegger 3 Credits
Prerequisites: Two courses in Philosophy.
This course explores the work of Martin Heidegger (1889-1976), one of the most influential philosophers of the 20th century. It primarily takes the form of a close reading of Being and Time (1927) and The Origin of the Work of Art (1936). The course hinges on Derrida’s reading of Heidegger’s existential analysis of death.

PH 0320 Metaphysics 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies
Prerequisites: Two previous courses in Philosophy.
This course concerns itself with being and our knowledge of being, developing in student minds an operative habit of viewing reality in its ultimate context.

PH 0321 Knowledge 3 Credits
Prerequisites: Two courses in Philosophy.
The focus of this course is to examine the fundamental questions concerning human knowledge. For example: What is knowledge? Can I know anything? Do I know something because I can trace it back to some indubitable foundation or because it fits together with everything else like a piece of a jigsaw puzzle? Can I have knowledge without being able to say how I know it? Do men and women know things in different ways? Is knowledge something I can gain on my own or is knowledge essentially a social activity?

PH 0323 Philosophy of Mind 3 Credits
Prerequisites: Two courses in Philosophy.
This course acquaints students with the most recent philosophical theories on the workings of the mind. Although it emphasizes philosophical theories of the mind, it also pays close attention to the philosophical implications of recent research in sciences such as psychology and neuroscience. This is an exciting topic; join us on this quest to address the Delphic dictum: Know Thyself!

PH 0331 Philosophy of Language 3 Credits
Prerequisites: Two courses in Philosophy.
This course introduces the student to the philosophy of language: its themes, complexities and problems. Employing a historical approach, the course surveys key philosophers who investigate the meaning, source and structure of language. Typically their primary question investigates various ways that the human person, while immersed within a context, understands language. After a brief investigation of ancient and medieval thinkers, the course focuses on a number of modern and contemporary figures who represent the mainstream discussion of the philosophy of language, including representatives of both analytic and continental traditions.

PH 0340 Critical Theory 3 Credits
Prerequisite: PH 0101.
This course examines the 20th century philosophical movement of cultural critique arising out of the association of German Jewish scholars known as the Frankfurt School. Central problems within this movement include the persistence of violence within human reason, the various forms and forces of ideology, the relation of political activity to artistic activity, the proper undertaking of immanent social critique, and the possibility of freedom in societies that are increasingly authoritarian. Representative thinkers within this field include Theodor Adorno, Max Horkheimer, Herbert Marcuse, Erich Fromm, and Walter Benjamin. Previously PH 0212.
PH 0350 Advanced Topics in Ethics 3 Credits
Prerequisites: Two courses in Philosophy.
This course examines questions pertaining to the status and content of morality, such as the following. Are there universal moral truths, and what makes them true? Is morality objective, or is it constructed by communities or individuals? What makes an action right or wrong? What reasons do we have to be moral? This course examines competing answers to such questions and considers philosophical defenses of them.

PH 0360 Critical Race Theory 3 Credits
Attributes: BSAH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, PJST Peace and Justice Studies, UDIV U.S. Diversity
Prerequisites: Two courses in Philosophy.
Although race can be considered as one of several physical features of an individual, this course will investigate the recent research and literature in the field of Critical Race Theory that critiques this purely biological conception. For the purpose of understanding how race functions in our socio-political world, this body of work treats the concept as a social construction, drawing heavily on the phenomenological and existential traditions. Pertinent themes like lived experience, authenticity, and racial privilege will be explored using key texts (by Jean-Paul Sartre, Franz Fanon, Lewis Gordon, and Robert Bernasconi, to name a few).

PH 0370 Philosophy of Literature 3 Credits
Prerequisites: Two courses in Philosophy.
This course examines the philosophy "of" literature (the general nature of poetry and prose) and philosophy "in" literature (specific works that harbor philosophical ideas).

PH 0398 Independent Study 1-3 Credits
Upon request and by agreement with an individual professor in the department, a student may conduct a one-semester independent study on a specific philosophical topic. Prerequisite: two previous courses in Philosophy.

PH 0399 Capstone Experience 3 Credits
Prerequisites: Two courses in Philosophy.
This course is the culminating experience in a student's study of philosophy at Fairfield University. Students will be asked to reflect on their philosophical writings and activities over the course of their study, to synthesize and expand a selection of these, to critically and collegially engage with other students for the mutual improvement of their philosophical projects, and to prepare for a philosophical life after graduation regardless of their career choices. Enrollment by permission only.

<td>Capstone Experience 2</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 30

At least three of these courses must be 300-level Philosophy courses. Two of these courses may be 200- or 300-level Applied Ethics courses.

The capstone is required for students in the Class of 2021 and later. For students in the Class of 2020 and earlier, a sixth elective course in philosophy is required.
Philosophy Minor

For a 15-credit minor in philosophy, students complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PH 0101</td>
<td>Introduction to Philosophy</td>
<td>3</td>
</tr>
<tr>
<td>Select one 200-level Philosophy course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Select three additional Philosophy courses with departmental guidance</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 15

1 At least one of these three courses must be a 300-level Philosophy course. One of these three courses may be a 200- or 300-level Applied Ethics course.

Physics

Physics is the study of how the world works: from fiber optic communications to the CCD chips in your phone; from bridges to radio antennas; from subatomic particles to stars and galaxies; physicists study it all.

The educational objectives of the Department of Physics are:

1. To train students to become critically thinking problem solvers.
2. To prepare students for entrance into and successful completion of a graduate education in physics or related fields.
3. To prepare students for entrance into the technological and non-technical work forces.

To accomplish these objectives, physics students are guided to an understanding of physical laws and their applications; students are trained to think logically and develop their problem-solving abilities; students develop experimental skills and become knowledgeable in the use of instrumentation; and students receive instruction in advanced mathematical and analytical techniques and in the use of computers and microprocessors. The applied component of the physics curriculum focuses on laser technology, applications in biology and medicine, and nanotechnology and materials science. Students learn the fundamental physical processes that constitute the basis of modern technology and engineering. Student research is highly encouraged. Students have opportunities to work with our faculty members on research ranging from biophotonics, astronomy, to high energy physics. Students are required to complete Senior Capstone Project which is an integrative project, chosen by our students and executed with the help of a faculty mentor. Here, students will apply their classroom knowledge to concrete challenges at the forefront of physics. Past capstones, for example, have ranged from quantum computing, to detecting early-stage cancer, to monitoring the earth's ionosphere using low-frequency radio receivers. Physics majors automatically earn a minor in mathematics.

Whether your interest is teaching high school, working in a high-tech company, or continuing on to graduate school and a research career, our combination of a solid classroom foundation and student research will give you an outstanding starting point for your future career. Physics graduates can pursue graduate studies in any sub-field of physics and related fields such as engineering, follow industrial careers in research and development in corporate or industrial environments, or pursue professional careers in such fields as physics, engineering, computer science, finance, medicine, biology, architecture, patent/high-tech law, and science teaching, just to name a few.

Programs

- Physics Major (p. 188)
- Physics Minor (p. 189)

Courses

PS 0071 Physics of Light and Color 3 Credits
Attributes: EDCG Educational Studies Cognate
This course, intended for students who are not majoring in the physical sciences, covers the particle-wave duality of light and the relationship of light to other electromagnetic waves. Additional topics include polarization, vision, color and the perception of color, optical phenomena in nature and in biological systems, color and light in art, simple optical instruments, sources of light and their spectra, lasers, and holography.

PS 0076 Physics of Sound and Music 3 Credits
Attributes: EDCG Educational Studies Cognate
Designed for the non-science major, this course examines the physical principles in the production of sound, with an emphasis on sound produced by musical instruments. Topics include the nature of wave motion as produced by vibrating strings and organ pipes, harmonic content, musical scales and intervals, and the mechanism of the hearing process. The course applies concepts to the construction and characteristics of musical instruments and to the design of auditoriums and concert halls.

PS 0077 Science and Technology of War and Peace: The Way Things Work 3 Credits
Attributes: EDCG Educational Studies Cognate
Designed for the non-science major, this course includes critical discussion and descriptive exposition of the swords and plowshares dilemma, of the concept that science and technology have been used to build up - and tear down - civilization, and of the forces of civilization driving and being driven by the dual nature of our technological heritage. The course begins with the first lever and club and ends with laser surgery and Star-Wars lasers, taking a historical and a thematic approach where appropriate. The course describes, in the simplest terms, the way important real devices (television, telephones, lasers, gas turbines, thermonuclear weapons, etc.) work, examining their illustration of and limitations by scientific principles at a qualitative level. The course also considers the technical future from a past, present, and future perspective, asking: What can, could, didn’t, might, and can we not do? The course illustrates the moral and ethical implications of science where appropriate. Knowledge of no more than high school algebra is required.

PS 0078 The Nature of the Universe 3 Credits
This course, intended for non-science majors, reviews the scientific field of cosmology, or the nature of the physical universe, from a historical perspective. Beginning with the ancients, the course traces the development of cosmological principles through the Greek and Egyptian era of Aristotle, C. Ptolemy, and others; the 16th and 17th centuries of Copernicus, Galileo, and Newton; and the cosmology of the 20th century based upon Einstein’s theories of relativity coupled with several fundamental observations. This leads to an examination of the current model of the universe, which is based upon the Big Bang theory.
PS 0087 Fundamentals of Astronomy 3 Credits
This course introduces students who are not majoring in science to the principal areas, traditional and contemporary, of astronomy. Traditional topics include a historical background to astronomy, telescopes, the sun, the moon, the major and minor planets, comets, and meteors. After discussing these subjects in detail, the course covers areas appropriate to modern astronomy such as the composition and evolution of stars, star clusters, quasars, pulsars, black holes, and cosmological models.

PS 0089 Physics of Sport 3 Credits
Attributes: EDCG Educational Studies Cognate
This course introduces concepts from science, particularly physics, by using illustrations from a wide variety of sports. For example, it explains why a baseball curves, why gears work on a bike, the speeds obtainable by a windsurfer or skier or tennis ball or arrow, how scuba divers survive, and a wide variety of other sports phenomena from football, golf, skiing, climbing, sailing, skating, baseball, scuba, fishing, sky-diving and so forth. The association of sports with motion, forces, and energy is explained by scientific reasoning and analysis. The course includes a small laboratory/experiential component that illustrates the scientific method, where various examples of sports are made quantitative, using readily available equipment.

PS 0093 Energy and Environment 3 Credits
Attributes: EDCG Educational Studies Cognate, EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
This course introduces students not majoring in the natural sciences to topics relating to work, energy, and power, and explores many of the environmental consequences resulting from our use of energy. The course examines the finite nature of fossil fuels as well as many alternative energy sources including solar energy; wind, tidal, and geothermal energy; nuclear fission; and nuclear fusion. Students use arithmetic and simple algebra.

PS 0115 General Physics I 3 Credits
Prerequisite: MA 0145 or higher (concurrency allowed).
This introductory course - for students concentrating in physics, mathematics, chemistry, or engineering - covers mechanics, heat, and fluid dynamics. It also includes rigorous mathematical derivations using integral and differential calculus. Topics include velocity and acceleration, Newton's laws of motion, work, energy, power momentum, torque, vibratory motion, elastic properties of solids, fluids at rest and in motion, properties of gases, measurement and transfer of heat, and elementary thermodynamics.

PS 0115L General Physics I Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: PS 0115.
This lab course engages students in experimental measurements spanning the areas of mechanics and thermal stresses on matter, with the objective of training students in experimental measurements, data manipulation and analysis, error analysis, deductive thinking, and instrumentation, providing depth to students' understanding of the phenomena taught in PS 115. Specific experimental measurements include accelerated motion, periodic motion, gravitational force, ballistics, conservation of energy and momentum, rotational dynamics, and measurements of the coefficient of linear expansion and the heat of fusion. Students complete a weekly lab report.

PS 0116 General Physics II 3 Credits
Prerequisites: MA 0146 or higher (concurrency allowed); PS 0115.
This continuation of PS 0115 covers electricity and magnetism, light and optics, and sound. Topics include magnetism and electricity; simple electric circuits; electrical instruments; generators and motors; characteristics of wave motion; light and illumination; reflection; refraction, interference; polarization of light, color, and the spectrum; and production and detection of sound waves.

PS 0116L General Physics II Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: PS 0116.
This laboratory provides students with a greater understanding of electromagnetic phenomena, wave phenomena, and optics, and supports PS 116. Measurements of microscopic quantities, like the charge and mass of the electron, give students an opportunity to explore the structure of matter. Other experiments involve the physics of electrical currents, electric properties of bulk matter, magnetic fields and their effect on beams, wave phenomena, and the nature of light and its interaction with optical materials. This course trains students in experimental measurements, data manipulation and analysis, error analysis, deductive thinking, and instrumentation. Students complete a weekly lab report.

PS 0204L Modern Experimental Methods Lab 2 Credits
Fee: $60 Science Lab Fee
Prerequisite: PS 0285.
This course offers lab experience in modern experimental methods and techniques. It involves lab investigation of fundamental concepts in modern physics including atomic, nuclear, solid-state, X-ray, acoustic, superconductivity, and quantum physics. Lab procedures emphasize hands-on work with basic experimental equipment such as vacuum systems, power supplies, electronics and instrumentation, detectors, diagnostic techniques, computer interfaces, data acquisition and control, hardware and software, etc. This lab course gives students maximum opportunity to work on their own with minimum supervision.

PS 0206L Modern Optics Lab 1 Credit
Fee: $60 Science Lab Fee
Prerequisite: PS 0222 (concurrency allowed).
In this lab course, student experiments include measurement of the photoelectric effect, electro-optic phenomena, diffraction phenomena, spectroscopy, interferometry, interference effects, and optical heterodyning. Students may - and are encouraged to - develop relevant experiments. The course requires comprehensive lab reports.

PS 0212 Circuit Analysis and Analog Systems 3 Credits
Corequisite: PS 0212L.
Prerequisites: PS 0115, PS 0116.
This course introduces students to the theory and practice of basic electronics and linear/analog circuitry. Topics include Kirchhoff's laws and applications; resistor circuits; concepts of capacitive and inductive reactance; impedance calculation using vector and complex notation; DC, AC, and transient circuit behavior; operation of basic solid state devices (diodes, junction transistors, FETs, SCRs); operational amplifiers; active and passive filters; feedback techniques; and frequency dependent effects. The basic laws and theorems of circuit analysis are introduced.

PS 0212L Circuit Analysis and Analog Systems Lab 1 Credit
Fee: $60 Science Lab Fee
Corequisite: PS 0212.
Students learn the use of basic laboratory test equipment such as the digital volt-ohm-amp meter, function generator, oscilloscope, and frequency counter. Bread boarding techniques are utilized to assemble and test various linear/analog circuits. Simulation software is introduced.
PS 0215 Computational Physics 3 Credits
Prerequisites: PS 0115, PS 0116.
In this course students will learn numerical methods to solve scientific problems and to integrate the use of the computer into their research. The course will cover numerical methods to solve integrals, differential equations, partial differential equations, systems of linear equations, and to model random processes. Problems that will be solved in this class include: Laplace equation, chaotic pendulum, Schrodinger's equation, and magnetic and electric field calculations. The programming languages that will be used in this course are high level languages, such as C and C++, whose basic syntax will be taught in class.

PS 0222 Modern Optics 3 Credits
Corequisite: PS 0206L.
Prerequisite: PS 0285.
Starting with a review of electromagnetic wave theory and the differential wave equation, this course covers the propagation of light from a scattering and an electromagnetic wave phenomena point of view. The course investigates superposition, polarization, interference, and diffraction in detail and discusses the photon theory of light along with the photoelectric effect. The course covers the basic theory of coherence with its contemporary application to lasers and additional selected topics in applied optical devices, stressing the application of theory to devices and observations.

PS 0226 Classical Mechanics 3 Credits
Prerequisites: PS 0115, PS 0116.
The formulation of classical mechanics represents a major milestone in our intellectual and technological history as the first mathematical abstraction of physical theory from empirical observations. This achievement is rightly accorded to Isaac Newton, who first translated the interpretation of various physical observations into a compact mathematical theory. More than three centuries of experience indicate that mechanical behavior in the everyday domain can be understood from Newton's theories. Topics in this course include elementary dynamics in one and two dimensions, gravitational forces and potentials, free and forced harmonic oscillations, central fields and the motions of planets and satellites, Lagrange's and Hamilton's equations, small oscillations, and normal mode analysis.

PS 0241 Thermal and Statistical Physics 3 Credits
Prerequisite: PS 0285.
Thermodynamics, viewed primarily as the science that deals with energy transformations and the relationships between properties of systems, is a fairly modern science. As its name implies, thermodynamics deals with heat and power; originally, this now broad subject dealt almost exclusively with heat engines. This course begins with a review of the three fundamental laws of thermodynamics. Additional topics include the kinetic theory of gasses and modern statistical mechanics.

PS 0255 Introduction to Astrophysics 3 Credits
Prerequisite: PS 0285.
This course is an introduction to modern astronomy and astrophysics. Starting from basic physical principles, we will begin with a number of practical problems in observational astronomy: the location of stars in the sky, optical telescopes and detectors, and measuring the brightness of stars and galaxies. From here, we will go on to discuss the formation, evolution, and death of stars and how these astronomical processes have influenced the world around us. Finally, we will end with a discussion of cosmological evolution from the big bang onward.

PS 0260 Introduction to Biomedical Optics 3 Credits
Corequisite: MA 0251.
Prerequisite: PS 0116.
This Introduction to Biomedical Optics course provides an opportunity for students to be introduced to an exciting area in biophotonics. It would introduce students to some of the optical methods in non-invasive medical diagnostics and imaging. Students would learn about basics of tissue optics, elastic scattering, absorption, fluorescence and Raman spectroscopies, and photon transport in random media, Monte Carlo simulations, microscopy, ultrafast lasers and detection systems. Applications would include non-invasive detection of cancer, atherosclerosis, and optical tomography.

PS 0271 Electricity and Magnetism I 3 Credits
Prerequisites: PS 0115, PS 0116, MA 0251.
This lecture course covers the foundations of electric and magnetic phenomena. Topics include electrostatics and the concepts of the electric field, flux, and potential; Coulomb's law and Gauss's law and their applications; vector and scalar fields and vector operators; electric energy of systems of charges; dipole fields and Laplace's equation; moving charges and currents; Ampere's law; and magnetic fields and forces.

PS 0285 Modern Physics 3 Credits
Corequisite: MA 0245.
Prerequisites: PS 0115, PS 0116.
This course introduces modern physics, i.e., the physics of the 20th century. The basic ideas that led to the formulation of quantum mechanics together with Einstein's theories of relativity provided a means to explore many new aspects of the physical world. This course examines the discovery of quanta of energy; Einstein's Special Theory of Relativity; the Bohr model of the atom; wave mechanics, angular momentum, and spin; various aspects of quantum mechanics that explain much of the subatomic world; and aspects of atomic and nuclear physics including solid-state physics and superconductivity. The course also examines several of the major experimental observations that support and confirm these new theories.

PS 0371 Electricity and Magnetism II 3 Credits
Prerequisite: PS 0271.
This lecture course is a continuation of PS 0271, covering additional topics in electric and magnetic phenomena. Topics include Faraday's laws and induced electromotive force; electric and magnetic fields in matter; methods of solving boundary value problems; Maxwell's equations in integral and differential form; electromagnetic radiation and wave propagation; and Einstein's Special Theory of Relativity for electrodynamics.

PS 0386 Quantum Physics 3 Credits
Prerequisites: MA 0331, PS 0226, PS 0285.
This course introduces students to the physical concepts and mathematical formulations of nonrelativistic quantum mechanics. Topics include the Schrodinger wave equation, Fourier techniques and expectation values, operator formalism, angular momentum, central forces, matrix representations, and approximation methods.
**PS 0387 Introduction to Condensed Matter**  
3 Credits  
**Prerequisite:** PS 0386.  
Condensed matter physics is the study of the condensed phases of matter where atoms and molecules interact strongly and bind together to form solids and fluids governed by the laws of electromagnetism, quantum mechanics, and statistical physics. Condensed matter research forms the largest area of research in physics with applications in chemistry, photonics, semiconductor and material science, and nanotechnology. Students will be introduced to several topics including crystal structure, crystal binding, thermal properties based on quantized vibrations (phonons), free-electron Fermi-gas, origin of the energy bands, semi-conductor crystals and superconductivity.

**PS 0388 Elementary Particles and Nuclear Physics**  
3 Credits  
**Prerequisite:** PS 0386.  
This course begins with a review of elementary particles, their properties and classification, and their nuclear and electromagnetic interactions. It proceeds with the study of bound nuclear systems, conditions for nuclear stability, and radioactive decay modes. The course concludes with an examination of particle accelerators and other nuclear experimental facilities.

**PS 0390 Special Topics (Shell)**  
3 Credits  
**Prerequisites:** PS 0115, PS 0116, PS 0285.  
This course covers the following content: condensed matter physics, numerical analysis and computational physics, and wave phenomena and quantum phenomena. Condensed matter topics include mechanical, thermal, and electric properties of matter; magnetism; superconductivity; and magnetic resonance. Topics in numerical analysis and computational physics include solutions of differential equations, boundary value and eigenvalue problems, special functions and Gaussian quadrature, and matrix operations. Topics in wave phenomena include electric and mechanical oscillators, coupled oscillators, transverse and longitudinal waves, waves on transmission lines, and electromagnetic waves. Quantum phenomena include advanced topics in quantum mechanics with applications in the structure of nuclei, atoms, molecules, metals, crystal lattices, semiconductors, and superconductors.

**PS 0391 Theoretical/Experimental Capstone**  
1-4 Credits  
This course provides opportunities for intensive investigation, experimental or theoretical, of selected topics at an advanced level under the guidance of a faculty member. Participation in this course is required of all seniors. Credit by arrangement.

**PS 0392 Theoretical/Experimental Capstone**  
1-4 Credits  
This course provides opportunities for intensive investigation, experimental or theoretical, of selected topics at an advanced level under the guidance of a faculty member. Participation in this course is required of all seniors. Credit by arrangement.

**PS 0399 Independent Study**  
1 or 2 Credits  
This course provides opportunities to physics majors in their junior year, and to sophomores by permission of the department Chair, to pursue independent studies in selected areas of physics, under the mentorship of a faculty member. The course aims to guide students in using the methods of scientific inquiry to explore subjects in an area of mutual interest to the student and teacher. In the process, students will get personal attention and hands-on experience, and will develop further their analytical and experimental skills.

**Physics Electives**  
9 Credits
Provision for Physics Advanced Placement Exam C

Entering students who have passed both AP Physics C exams with scores of 4 or 5 may advance directly to the sophomore physics course PS 0285 Modern Physics, without taking the PS 0115 and PS 0116 prerequisites. Note: For having passed the AP exams, only 4 credits are awarded toward graduation, according to the general Advanced Placement policy of the University. Students who do not take PS 0115 and PS 0116 under this provision therefore will need to take an additional elective in physics or another discipline with the chair’s permission, in order to complete the required number of credits for the major in physics.

Physics Major with a Minor in Educational Studies and the 5-Year Teacher Education Program

Physics majors who elect a minor in Educational Studies and who have been admitted to the Five-Year Integrated Bachelor and Master of Arts Degree and Teacher Certification program may count ED 0462 Science Methods Science Methods as their three-credit physics independent study project. Physics majors with an Education Minor should consult with Dr. Angela Biselli, education advisor, and Dr. Ryan Colwell, director of the Five-Year Integrated Bachelor and Master of Arts Degree and Teacher Certification programs.

Select one three-credit 200- or 300-level physics course, with chair’s approval 3

Total Credits 16

Substitution of the Modern Physics course must be approved by the chair.

Note: Biology and chemistry majors can minor in physics by taking two lecture courses and one laboratory course beyond the requirements of their major. Engineering majors can minor in physics by taking one lecture course and one laboratory course beyond the requirements of the major.

Politcs

The Department of Politics offers a vibrant and balanced program of study that prepares students to exercise leadership, teamwork and civic engagement to make a difference in local, national and international affairs. The curriculum introduces students to the major political science subfields of American politics, comparative politics, international relations and political theory, while offering several avenues for professional development, including methods, service learning, field experiences, and internships.

Through its internship director, the Politics Department works closely with students to prepare for, identify, and approve internships locally and in state government, Washington, DC, and international placements. Special competitive opportunities include PO 0296 State Legislature Internship and PO 0297 Washington Semester Internship, as well as internships through designated study abroad programs.

The curriculum’s upper level electives are grouped thematically around courses on law and justice, power and political action, and globalization and inequality. Students choose one upper level course in each subfield in any combination within or across these three themes. Students complete their major with a culminating seminar that prepares them for professional writing, research, analysis and presentation. Students choose a culminating seminar to work with faculty in their areas of expertise.

Politics professors are closely involved with International Studies, American Studies Asian Studies, Environmental Studies, Irish Studies, Humanitarian Action, Latin American and Caribbean Studies, Peace and Justice Studies, and other interdisciplinary programs. Many Politics courses count toward majors or minors in these programs. The politics curriculum is appropriate for many career orientations, including law, government, media, teaching, consulting, business, and non-profit organizations, as well as for graduate and professional degree programs in many fields.

Programs

• Politics Major (p. 196)
• Politics Minor (p. 197)

Courses

PO 0101 Introduction to American Politics 3 Credits
Attributes: ASGW American Studies: Gateway, ASPO American Studies: Politics, PMAP Politics Major: American Politics
Students examine the American political system and the American cultural context; consider the major political institutions in relation to policy perspectives; examine the ability of the political system to deal with societal problems; and analyze proposals for reform of the political system. Previously PO 0011.

PO 0102 Introduction to Comparative Politics 3 Credits
Attributes: PMPT Politics Major: Comparative Politics, WDIV World Diversity
This course introduces students to the concepts and theories used to understand the structures and processes of diverse political systems. Comparing similarities and differences between different political systems will enable students to identify interesting questions about politics in specific countries, and to make systematic comparisons across countries. Previously PO 0012.

PO 0103 Introduction to Political Ideas That Shape the World 3 Credits
Attributes: PMPT Politics Major: Political Theory
This course introduces students to the field of Western political theory. It analyzes the liberal political theories of Thomas Hobbes, Jean-Jacques Rousseau, John Locke, J.S. Mill, and Karl Marx, and compares and contrasts them to a variety of communitarian, socialist, and anarchist political theories. Previously PO 0014.

PO 0104 Introduction to International Relations 3 Credits
Attributes: HACA Humanitarian Action Minor Context Course, FJST Peace and Justice Studies
This course introduces International Relations (IR) theories to students, providing concepts, frameworks and approaches that will help them make sense of global politics historically and today in a systematic and critical manner. The goal of the course is to familiarize students with these tools and to help them use them to understand and address challenges at a global scale, particularly different manifestations of violence, development and social injustice, including from war to economic, social, gendered, and political marginalization. Previously PO 0130.

PO 0201 Introduction to Peace and Justice 3 Credits
This course introduces students to the concepts of peace and justice, the connections between them, and the relationship of these concepts to the idea of faith. The course focuses on case studies beginning with an analysis of the crisis of America’s cities and finds the causes in de-industrialization and its resulting poverty. In both cases, the course views poverty as the effect of unjust economic and social structures including exaggerated military budgets at home and the militarization of developing countries. Examining these fundamental problems in peace and justice, according to the principles of Marxism, liberalism, and Catholicism, provides a theoretical basis for the study. Each of these traditions has its own perspective for understanding these problems and for responding to them. In this way the course provides an awareness of the major problems in peace and justice as well as an understanding of the different ways to think about them. Previously PO 0115.
PO 0202 Urban Politics  3 Credits
Attributes: ASPO American Studies: Politics, PMAP Politics Major: American Politics
This course examines structures and processes of urban politics and considers the major participants and policy areas of urban political processes. It sets the evolution of urban areas in historical perspective, discusses major contemporary problems, and analyzes alternative solutions. Previously PO 0150.

PO 0203 Public Administration  3 Credits
Attributes: ASPO American Studies: Politics, PMAP Politics Major: American Politics
The course focuses on the role of the bureaucracy within the political process, examining the problems of efficiency and accountability, and studying the classic models of bureaucratic organization and function in juxtaposition to the reality of bureaucratic operation. It analyzes proposed reforms to determine the viability of change. Previously PO 0155.

PO 0204 American Presidency  3 Credits
Attributes: ASGW American Studies: Gateway, ASPO American Studies: Politics, ASUP American Studies Upper Level, PMAP Politics Major: American Politics
The course will examine the expansion of presidential powers by 20th and 21st century modern presidents, focusing on the constitutional and political development in the President's role as chief executive, legislative leader, and administrative head of state. It will also explore explanations for differences and patterns among presidents in their foreign and domestic policy success, evaluating changes in the recruitment process (primaries, conventions, and elections), issues of psychology, race, religion, economic forces, political parties, political time, and media. Previously PO 0161.

PO 0205 United States Congress  3 Credits
Attributes: ASPO American Studies: Politics, ASUP American Studies Upper Level, PMAP Politics Major: American Politics
This course firstly examines the development of rules, procedures, and structures of Congress as the foremost institution of representation within American democracy, exploring its place in contemporary American politics and its often contentious relationship with the other branches of national government, the Presidency and Courts. It will also introduce some primary theoretical approaches to the study of Congress as a deliberative body designed to produce national policy outcomes. Finally, it will develop students' understanding of individual members of Congress: their relationship to constituents, their differing styles of representation, and the effects of race, gender, ideology, and money on their legislative work. Previously PO 0162.

PO 0206 Supreme Court I  3 Credits
Attributes: ASPO American Studies: Politics, ASUP American Studies Upper Level, PMAP Politics Major: American Politics
This examination of the politics of the Supreme Court analyzes the relationship between the Court and the remainder of the political system; examines the Court’s treatment of government power including commerce clause, taxing power, and relations between the branches; and emphasizes the political consequences of Court decisions. Previously PO 0163.

PO 0207 Supreme Court II  3 Credits
Attributes: ASPO American Studies: Politics, ASUP American Studies Upper Level, PMAP Politics Major: American Politics
This examination of the individual and the Court pays direct attention to Supreme Court decisions regarding civil liberties, including freedoms of speech, press, religion, and assembly. It also examines the rights of accused persons and the 14th amendment equal protection, emphasizing the political implications of these decisions as well as the political environment in which the Court functions. Previously PO 0164.

PO 0208 Political Parties and Interest Groups  3 Credits
This course examines various linkage models that describe representation of citizens by leaders. Moreover, it examines political parties, interest groups, and public opinion in terms of their contributions to popular control of American politics. What mechanisms do citizens have to gain compliance for their policy preferences? How responsive are decision makers in the American system to citizens' demands? The course considers these and other questions. Previously PO 0165.

PO 0209 American Public Policy  3 Credits
Attributes: ASPO American Studies: Politics, ASUP American Studies Upper Level, PMAP Politics Major: American Politics
This course examines the policy process in the United States by examining a variety of contemporary policy issues. Students investigate different policy domains to uncover the politics and societal myths affecting different stages of the complicated policy process, paying special attention to people and institutions that formally and informally influence public policy in the United States, including media, elected officials, bureaucrats, consumers, private citizens, workers, political activists, corporations, interest groups, lobbyists, and political parties. Previously PO 0166.

PO 0210 Media and Politics  3 Credits
Attributes: ASPO American Studies: Politics, PMAP Politics Major: American Politics
This course examines the impact of the media on the American political system and, conversely, how government attempts to influence the media for its purposes, and implications of the electronic media for a democratic and informed society. The course pays close attention to the media's impact on national elections and analyzes the media as an agent of political socialization. Previously PO 0167.

PO 0212 United States Environmental Politics and Policy  3 Credits
Attributes: ASPO American Studies: Politics, ASUP American Studies Upper Level, EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science, PMAP Politics Major: American Politics
This course introduces students to the processes, actors, causal factors, and theoretical approaches central to the creation and implementation of US environmental policy. The first section examines the history of US environmental politics, the policy process, and prominent theories that seek to explain that process. The second section examines the role of key institutions, including the President, Congress, courts, federal agencies, environmental groups, and corporations. The third section examines key current issues, including risk assessments, economic tools, air and water pollution, toxic chemicals, public lands endangered species, water shortages, and climate change. Previously PO 0169.
PO 0213 State and Local Politics 3 Credits
Attributes: PMAP Politics Major; American Politics
This course examines the role of state and local governments within the United States. State and local governments are unique subnational governments with their own political culture and identity and very greatly within and across the American political system. This course explores the political processes and the institutions of state and local governments. The course highlights the multifaceted, and often difficult, issues facing sub-national governments; the philosophies of state and local governments; their responsibility and function regarding election administration and voting; and their role within the larger national government. Previously PO 0172.

PO 0214 Public Opinion and Polling 3 Credits
Attributes: PMAP Politics Major; American Politics
A central feature to American democracy is that the public must play an active role in governing. This course invites students to think about and reflect on the role of public opinion, the tools used to measure it, and its impact on policies and elections, in American democracy. Students will examine what public opinion is, publics’ knowledge of politics, how citizens are socialized politically, group differences in public opinions, and various methods employed to measure public opinion. By the end of the course, students will be able to determine when and how public opinion influences various aspects of American politics. Previously PO 0172.

PO 0215 Campaigns and Elections 3 Credits
Attributes: PMAP Politics Major; American Politics
In a democratic political system, elections are the means by which the transition of power occurs. Thus, understanding the nature of American elections and campaigns is necessary to understand our political system. This class focuses on American elections: discussing how the actions of the players influence outcomes, the behavior of voters, the politics of election administration, and the laws that govern the rules to the game. We will observe and analyze both empirical research and the reality of campaigns today as both have significant implications for our democracy. Previously PO 0173.

PO 0231 21st Century Power Politics 3 Credits
Attributes: PMPT Politics Major; Political Theory
How does power operate in the 21st century? This course engages this question by focusing on how contemporary thinkers from the Global North and South assess the world in which we live. The course will take on issues of globalization, democratization, cosmopolitanism, poverty, race, gender, citizenship, and environmentalism. The work of key thinkers such as Karl Marx, Hannah Arendt, Franz Fanon, Julius Nyerere, Michel Foucault, Kwame Anthony Appiah, Judith Butler, and Wendy Brown will be examined. These theorists present a critical assessment of the nature and value of contemporary society’s cherished ideals of social and economic progress, secularization, and scientific reason, and individual autonomy and liberty. This course explores and evaluates these controversial critiques of life that shape our understanding power in the 21st century. Previously PO 0112.

PO 0232 Utopian Politics 3 Credits
Attributes: PMPT Politics Major; Political Theory
This course examines the nature and function of utopian thinking and utopian communities. What is the value of utopian reflection? What forms of critical thinking and imaginative speculation does it enable? What are the limits to or dangers of utopian thought and practice? What kinds of challenges do utopian communities face? This course explores and critically assesses utopian, and dystopian themes from utopian fiction, political theory, science fiction, and popular culture. The course involves students in building model utopias that resolve major world problems. Previously PO 0116.

PO 0233 American Political Thought 3 Credits
Attributes: ASGW American Studies: Gateway, ASPO American Studies: Politics, PMPT Politics Major: Political Theory
This course considers the philosophical roots of American political thought and the influence of the American revolutionaries, constitution-makers, Federalists, Jeffersonians, Jacksonians, Alexis de Tocqueville, examiners of the welfare state, pragmatists, and new frontiersmen on the contemporary American mind and institutions. The course also covers challenges and reform of the American political system within the scope of political science through an application of the concepts of human nature, idealism, constitutional power, and nationalism. Previously PO 0118.

PO 0234 Sex, Sexuality, and Gender 3 Credits
Attributes: ASGW American Studies: Gateway, ASPO American Studies: Politics, PJST Peace and Justice Studies, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
This course focuses on how men and women ally together and separately to alter the landscape of sex, sexuality, and gender in the U.S. as part of a global wave of political change. The course examines how race, class, religion, age, disability, and other identity variables intersect with male and female, masculine and feminine, and the full range of sexualities in order to understand the theories and practices related to identity that shape twenty-first century politics. Previously PO 0119.

PO 0235 Modern Political Ideologies 3 Credits
Attributes: ISIC Italian Studies: Italy Component, PJST Peace and Justice Studies, PMPT Politics Major: Political Theory
This course primarily examines the political belief systems in the United States including conservatism, liberalism, democratic socialism, and the idea of industrial policy. It analyzes these “isms” with reference to democracy’s ability to deal with the contemporary problems of American society. It also explores Marxism in terms of the basic political and economic ideas of Marx and Engels as well as the modifications made in their system by Lenin; discusses the basic concepts of racism; and briefly analyzes the meaning of totalitarianism. Previously PO 0123.

PO 0236 Politics of Race, Class, and Gender 3 Credits
This course investigates how race, class, and gender function in American political culture. Students explore how the theoretical ideas of central thinkers such as Thomas Jefferson, Martin Luther King Jr., and Susan B. Anthony shape the political practices of the people who express themselves in songs, speeches, art, and music. The focus on race, class, and gender enables students to engage with historically challenging questions about equality, freedom, individualism, republicanism, liberalism, and American exceptionalism from alternative perspectives. The course does so by assessing whether or not the contemporary Hip Hop movement can overcome the barriers of race, class, and gender. Previously PO 0153.

PO 0250 European Politics and the European Union 3 Credits
Attributes: ISIC Italian Studies: Italy Component, ISIF Italian Studies: Italy-Focused, PMCP Politics Major: Comparative Politics
This analysis of political institutions and dynamics of Great Britain, France, Germany, and Italy emphasizes the relationship between the political culture and the political system and analyzes alternate methods of dealing with societal problems. Previously PO 0139.
PO 0251 Islam and Muslim Politics 3 Credits
Attributes: PMCP Politics Major: Comparative Politics, WDIV World Diversity
Islam is most often treated as a monolithic force when in fact the relationship between Islam, politics, and society is varied and dynamic. The aim of this course is to introduce students to the pluralism of Islam-influenced practices (such as in politics, education, charitable aid, and business) drawing on examples from Turkey, Indonesia, Central Asia, and China. Previously PO 0140.

PO 0252 African Politics 3 Credits
Attributes: BSFC Black Studies Focus Course, BSSS Black Studies: Social and Behavioral Sciences, HACA Humanitarian Action Minor Context Course, PMCP Politics Major: Comparative Politics, WDIV World Diversity
This course examines political patterns in Africa with an emphasis on the relationships between politics and culture, and politics and economy. Themes and concepts, not country studies, structure the course, which extracts patterns that are universal or typical in sub-Saharan Africa, examines the colonial legacy on which contemporary states build, and considers the political problematic that the colonial experience imparts with respect to cultural issues of identity, tribalism, and ethnicity in Africa. The course also examines the role of force and violence in consolidating political rule, the economic constraints that fetter Africa, and considers prospects for Africa's politics. Previously PO 0141.

PO 0253 Latin American Politics 3 Credits
Attributes: LCEL LACS Minor: Elective, PMCP Politics Major: Comparative Politics, WDIV World Diversity
This course examines contemporary Latin American politics, with particular attention to the challenges and opportunities for democracy and human rights in the region. In order to do this, the course provides a historical background that examines the challenges and opportunities presented by domestic and international dynamics in the region. The course covers the causes and consequences of democratic breakdowns in the region and the transition to democracy in the later part of the twentieth century. It also addresses the difficulties these young democracies face today and the continuous and uneven efforts to advance human rights in the region. Previously PO 0142.

PO 0254 Caribbean Politics 3 Credits
Attributes: BSFC Black Studies Component Course, BSSS Black Studies: Social and Behavioral Sciences, LCEL LACS Minor: Elective, PMCP Politics Major: Comparative Politics, WDIV World Diversity
Racism and ethnic conflict, colonialism and neocolonialism, grating poverty and bustling tourism all have their impact on the politics of these struggling countries. This course examines migration across the first world's borders in countries that include Cuba, Puerto Rico, the Dominican Republic, Haiti, Jamaica, Trinidad, Guyana, and Suriname. Students will complete a research project. Previously PO 0143.

PO 0255 Middle Eastern Politics 3 Credits
Attributes: PJST Peace and Justice Studies, PMCP Politics Major: Comparative Politics, WDIV World Diversity
This course examines the modern Middle East by familiarizing students with the most significant contemporary problems and controversies in the region. Themes and concepts, not individual country studies, structure the course. Some of the topics covered are youth, war, revolution, oil, political Islam, economic reform, and the Arab spring. Previously PO 0144.

PO 0256 Asian Politics 3 Credits
Attributes: PMCP Politics Major: Comparative Politics, WDIV World Diversity
This course examines the domestic politics of Asian countries. Asia is a vibrant region politically and economically, and is very important to the United States for international security and economic stability. Given its importance, this course provides broad and essential knowledge about Asian nations. The course begins with historical background of various countries in Asia, and then examines politics in selected Asian countries. Country studies are intended to introduce major issues in comparative politics such as democracy, economic development, ideology and political conflict. Previously PO 0145.

PO 0257 Northern Ireland: Politics of War and Peace 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, PJST Peace and Justice Studies, PMCP Politics Major: Comparative Politics
This course focuses on "the Troubles" in Northern Ireland from 1969 to the present beginning with historical background that emphasizes England's role from the 17th century through the present. It examines the 20th century conflict primarily as a national liberation struggle against a sectarian regime in the North supported by England. The course follows a chronological format starting with the civil rights marches in the late 1960's, the state repression that followed and subsequent community responses including the hunger strikes and electoral campaigns. It concludes with the peace process and grassroots efforts by former paramilitaries from both Catholic and Protestant communities to work together on issues of common concern. Previously PO 0147.

PO 0258 Political Violence 3 Credits
Attributes: PMCP Politics Major: Comparative Politics
This course offers a comparative study of political violence including civil war, terrorism, and separatist movements. We will examine a variety of theoretical and empirical approaches to violence. The course is designed to introduce students to core debates as well as cutting edge research on violence. Students will also learn about political violence across the globe through single country studies. Previously PO 0148.

PO 0259 The Development Gap 3 Credits
Attributes: PJST Peace and Justice Studies, PMCP Politics Major: Comparative Politics, WDIV World Diversity
This course introduces a comparative approach to studying the forces affecting development in the Third World. Examples are selectively drawn from Asia, Africa, Latin America, and the Middle East. It examines the roots of wealth and poverty, obstacles to development, responses to globalization, and current debates over the development prospects of the Third World. Previously PO 0149.

PO 0261 Authoritarianism and Film 3 Credits
Attributes: PMCP Politics Major: Comparative Politics
Almost half of the world population lives under authoritarian or totalitarian regimes. Moreover, several democracies around the world are far from consolidated and exist at risk of democratic breakdowns. This is an interdisciplinary course that combines politics and film studies to introduce students to the enduring phenomena of authoritarianism and totalitarianism. Political science further our understanding of the causes and enduring legacies of authoritarianism and totalitarianism, while film studies help us understand how cinema communicates specific narratives in such a way that they strengthen or challenge these regimes.
PO 0271 United Nations Security Council Crisis Simulation 3 Credits
Attributes: HACA Humanitarian Action Minor Context Course, PMIR Politics Major: International Relations, WDIV World Diversity
This course gives students a hands-on learning experience in world diversity by simulating a United Nations Security Council crisis in international peace and security. The objective is to introduce students to the challenges of global governance in light of the different perspectives they encounter representing different constituencies of the UN Security Council who come from diverse cultural, historical, and geo-political regions of the world. A key goal of the course is to bring to light whether and how power disparities limit the global South’s effective representation, and the stakes in reform of the Security Council. While the topic of the simulation will vary, the focus is on a crisis in a non-Western region of the world. Previously PO 0127.

PO 0272 Politics of Humanitarian Action 3 Credits
Attributes: PMIR Politics Major: International Relations, WDIV World Diversity
This course introduces students to complex humanitarian crises and the challenges of responding. Students explore why the often-troubled governance practices of humanitarian intervention makes this a highly contested, yet indispensable arena of global politics. The course examines enduring political and normative tensions at the core of the international humanitarian system run by states, non-governmental organizations (NGOs), the United Nations and its lead agencies, and increasingly, the private sector. Students use critical theories, ethical frameworks and other skillsets to explore questions such as the accountability of humanitarian actors to the people they aid in risk-laden operational environments. Previously PO 0129.

PO 0273 Humanitarian and Disaster Response Field Training 3 Credits
Attributes: HASM Humanitarian Action Minor Skills/Method Course, PMIR Politics Major: International Relations
This course offers training in humanitarian action and disaster response in collaboration with local emergency response agencies and related regional, national, and global networks. Students acquire training and certification in humanitarian standards, become registered volunteers with the American Red Cross, learn from local FEMA Community Emergency Response Teams, and participate in immersion experiences and simulations on international humanitarian crises. The course contextualizes aid work through a range of critical, ethical and moral theories. The course first introduces competing paradigms, second explores principles and field training, and third concludes with intersectionality and other critical perspectives on responding to needs.

PO 0274 International Environmental Policies 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science, PMIR Politics Major: International Relations
This course examines important issues in the practice and study of international environmental policy. The course consists of four interrelated sections designed to provide the factual knowledge and conceptual frameworks required for working in this field: the process and difficulty of creating effective International environmental policy; factors that assist effective policy; history, trends, and actors; and key current issues including climate change, biodiversity, toxic pollution, trade and the environment, sustainable development, and environment and security, among others. Previously PO 0131.

PO 0275 Climate Change: Politics and Policy 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, HACA Humanitarian Action Minor Context Course, PMIR Politics Major: International Relations
This course examines key political, scientific and economic issues surrounding global climate change. Topics include: the causes and impacts of climate change; policy-making under uncertainty; key technological, energy and economic issues; and, in particular, climate policy at the global, national, state and local levels; Students will gain the ability to understand and analyze climate policy options at the global, national and local levels. Previously PO 0132.

PO 0276 United States Foreign Policy 3 Credits
Attributes: ASGW American Studies: Gateway, ASPO American Studies: Politics, PMIR Politics Major: International Relations
How is foreign policy made in the United States? This course examines the impact of domestic and international actors and processes in the formation and conduct of United States foreign policy. It also provides a historical background on the basis of which it analyzes contemporary United States economic foreign policy, security foreign policy, environmental and energy foreign policy, and the promotion of democracy and human rights in different regions of the world, including Asia, Latin America, Western Europe, Africa, and the Middle East. Previously PO 0133.

PO 0277 Globalization: Who Rules the World? 3 Credits
Attributes: PMIR Politics Major: International Relations
In a globalizing world, understanding the link between wealth and power is increasingly important. This course seeks to explore the international and global context of the intersection of politics and the economy today. It examines the impact of globalization on states, markets, societies, businesses, and people by posing such questions as “In whose interest?” and “Who benefits?” Previously PO 0134.

PO 0278 International Law 3 Credits
Attributes: HACA Humanitarian Action Minor Context Course, PJST Peace and Justice Studies, PMIR Politics Major: International Relations
This course is an introduction to international law, which addresses the questions of what is international law, who makes international law and who is bound by it, and why states and other actors obey international law even though there is not world government to enforce it. The course also introduces students to the substance of international law on different areas such as human rights, the environment and the use of force in international politics. Finally, the course provides a practical overview to the United Nations system, focusing both on the five principal organs (the Security Council, the General Assembly, the Secretariat, ECOSOC and the International Court of Justice) and the specialized agencies (UNICEF, UNDP, and more). Previously PO 0135.

PO 0279 Threats to Global Security in the 21st Century 3 Credits
Attributes: HACA Humanitarian Action Minor Context Course, PMIR Politics Major: International Relations
This course is designed as an introduction to global security. It considers, traditional and new security topics, from interstate and civil wars to environmental degradation and famines. We will look at these topics through the lenses of major paradigms in International Relations (IR) theory, such as Realism, Liberalism and Constructivism and also from the perspective of Feminist, Critical and Peace studies’ theories. In addition to learning to think about global security in a systematic and critical way, in this this course we will consider the political, ethical and social dimensions of threats to global security today. Previously PO 0137.
PO 0280 Border Politics 3 Credits
Attributes: HACA Humanitarian Action Minor Context Course, PJST Peace and Justice Studies, PMIR Politics Major: International Relations, WDIV World Diversity
This course explores how border politics have evolved from historical practices of territori
and the rise of the nation-state system, including the social construction of "imagined communities" and the boundaries that define them. Yet this system faces many challenges. Drawing from critical theories of identity, state formation and intersectionality, students explore erosions of state sovereignty through globalization, climate change, crisis migration, refugee flows, asylum seekers, transnational crime and terrorism. As case studies from the global north and south illustrate, states are increasingly turning to global and domestic disciplinary regimes to wall up, fence out, surveillance, detain and deport the "other." Students examine these trends in the context of the moral, political, security, corporeal and human rights questions at stake. Previously PO 0138.

PO 0295 Research Methods 3 Credits
Attributes: PMAP Politics Major: American Politics
This course is designed to help students understand the methodological process to scientific inquiries. Students will learn how to properly study and think scientifically about political science and politics. This class will teach students how to identify research questions about the political world, generate meaningful measurements of the concepts being studied, create a research design for collecting data (i.e. evidence), construct testable hypotheses, conduct the necessary statistical analysis to test the hypotheses, interpret the results of the statistical analysis, and apply these results to the original theory of inquiry in a meaningful way.

PO 0296 State Legislature Internship 6 Credits
Prerequisites: PO 0101; two other politics courses.
Politics majors participate in the Connecticut General Assembly Legislative Internship Program, where students become acquainted with the legislative process by serving as aides to a legislator. Students complete a required research paper. Students must have a GPA of 3.0 or higher. Enrollment by departmental permission only.

PO 0297 Washington Semester Internship 3-15 Credits
Prerequisites: PO 0101; two other politics courses.
Politics majors work full-time as interns in a variety of public and private sector positions in the nation's capital, giving them the opportunity to experience governmental problems firsthand and apply what they have learned. Students earn nine credits for working as an intern, three for a course taken in Washington, DC, and for a major research paper. Students must have a GPA of 3.0 or higher. Enrollment by departmental permission only.

PO 0298 Internship 3 or 4 Credits
Prerequisites: Three politics courses.
Politics majors gain firsthand experience working off campus in fields related to their major. Typically, an internship requires 10 to 12 hours per week on site. The internship requires a journal and a term paper. An on-site supervisor and a politics professor evaluate student work. Students must have a GPA of 3.0 or higher. Enrollment by departmental permission only.

PO 0299 Special Topics (Shell) 3 Credits
Prerequisite: six hours of politics credits or permission of instructor.
This course offers a focused examination of a significant political issue or topic chosen from the areas of American Politics and Public Policy, Political Theory, Comparative Politics, and International Relations. Content will vary in successive offerings of this course. May be repeated for credit when topic varies. Previously PO 0190.

PO 0300 Politics Seminar 3 Credits
This course offers an in-depth investigation of a significant political issue or topic and is conducted in a seminar format and contains a significant research component. Open only to juniors and seniors by permission of the instructor. Previously PO 0390.

PO 0301 The Battle Over Family Values in American Politics 3 Credits
Attributes: ASPO American Studies: Politics, ASUP American Studies Upper Level, PMAP Politics Major: American Politics, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Contemporary American politics is marked by numerous debates about the family in American society. Issues of gay marriage, abortion, abstinence/ pre-marital sex, shifting gender roles within the family, and new parenting and reproductive methods are some of the hotly debated policy issues, illustrating the political struggle to define the soul of America and the role of the family within. This course explores such contemporary political debates over the family, their policy implications and significance to current elections, also examining the historical context and previous ideological battles that characterize the tenuous relationship between the family and the American state. Previously PO 0170.

PO 0302 Seminar on Feminist Theory 3 Credits
Attributes: ASPO American Studies: Politics, ASUP American Studies Upper Level, PJST Peace and Justice Studies, PMPT Politics Major: Political Theory, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
This course explores advanced topics in feminist theory, examining a number of trends in contemporary feminist theory. Topics include conceptions of the female body in Western culture, feminist theories of the family, global feminisms, theories of feminist subjectivity and gender performativity, and the intersections among gender, race, class, and sexuality. Previously PO 0220.

PO 0303 Gender, War, and Peace 3 Credits
Attributes: HACA Humanitarian Action Minor Context Course, PMIR Politics Major: International Relations, WDIV World Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
This course examines the complexities of the gendered impact of war on men, women, families and children. Students learn about the gendered dimensions of war institutions, social structures and narratives of war. They explore the topic especially from the voices and perspectives of women in war zones and post-conflict settings around the world, including historical memories. Students learn how the forces of globalization and existing conditions of structural violence make women extremely vulnerable as societies slide toward war. Previously PO 0136.

PO 0304 Sem on Global Environ Politics 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, PMIR Politics Major: International Relations
The causes, consequences and potential solutions to environmental problems are increasingly important subjects in global politics. This seminar explores critical, current issues in the theory and practice of global environmental politics. Readings and class discussion examine important new debates, including those on: reason for policy effectiveness; international regimes; accountability; the 2015 Paris climate agreement; why global ozone policy remains a relatively unique example of effective global environmental policy; the most prominent theoretical lenses employed by researchers and policy-makers; and the activities of international institutions. Previously PO 0210.
PO 0305 Seminar on the Middle East  
**Attributes:** PMCP Politics Major: Comparative Politics
The affairs of the Middle East continue to engage a great deal of international attention. This course offers the opportunity to examine a significant problem or issue concerning politics in the MENA (Middle East and North Africa) region conducted in a seminar format. In various semesters the seminar may be taught with a different focus. Previously PO 0344.

PO 0398 Independent Study  
**Prerequisites:** PO 0101, two other politics courses.
Upon request and by agreement with an individual professor in the department, a politics major may conduct a one-semester independent study on a defined research topic or field of study. Students must have a GPA of 3.0 or higher. Enrollment by departmental permission only.

Select three upper-level politics courses taken in any politics subfield or as internships or independent study offered by the department.

Total Credits 18

Psychology

The Department of Psychology introduces students to the content and methods of the science of psychology. Students survey the foundations of the field, learn about statistics and experimental design, and have an opportunity to pursue specific interests through upper-level seminars, applied internships, and supervised and independent research. The psychology major prepares students for graduate work in areas of psychology, or for work in related fields such as medicine, law, education, social work, and public policy. Students with a degree in psychology are
courses related to criminology and the law. The Health Studies minor comprises the Health Studies minor, which also includes a number of relevant policy-related courses.

Throughout their time at Fairfield, students should work with their advisors to refine their interests. Together they can then identify specific courses within and outside of the major that will enrich their understanding of those areas of interest.

**Programs**

- Psychology Major - Bachelor of Arts (p. 202)
  - Concentration in Behavioral Neuroscience
- Psychology Major - Bachelor of Science (p. 202)
  - Concentration in Behavioral Neuroscience
- Behavioral Neuroscience Minor (p. 204) (intended for students not majoring in psychology)
- Psychology Minor (p. 204)
- Five-Year Integrated Bachelor and Master of Arts in Industrial/ Organizational Psychology (p. 204)

**Courses**

**PY 0101 General Psychology**

This course introduces the science of mental processes and behavior by addressing a range of questions including: How is brain activity related to thought and behavior? What does it mean to learn and remember? How do we infer our own and another’s attitudes and actions? What are the primary factors that shape a child’s mental and emotional development? How and why do we differ from one another? What are the origins and most effective treatments of mental illness?

**PY 0111 Developmental Psychology for Non-Majors**

The course encompasses a developmental psychology approach to the growth of the individual from birth to old age, tracing motor, perceptual, language, cognitive, and emotional growth and emphasizing normal development. Psychology majors and students who have taken PY 0211 or PY 0212 may not take this course.

**PY 0118 Psychology of Death and Dying**

Attributes: HSSS Health Studies: Social Science

Recent biomedical research, psychological theory, and clinical experience provide the foundation for this life-cycle study of death, dying, and bereavement. Some topics include the funeral process, cultural differences, suicide, the hospice approach, end-of-life issues, and euthanasia.

**PY 0121 Fundamentals of Social Psychology**

Attributes: HSSS Health Studies: Social Science

This course surveys the major areas of concern in social psychology, emphasizing current issues and research in the fields of social influence and conformity, human aggression, prejudice, interpersonal attraction, propaganda, and persuasion. Psychology majors and students who have taken PY 0221 may not take this course.

**PY 0122 Psychology and the Law**

Attributes: HSSS Health Studies: Social Science

Implicit psychological assumptions about human behavior and how it should be controlled form the basis for the legal system, particularly our criminal justice system, from its code to its enforcement. This course examines those assumptions in light of current psycho-legal theory and research. It covers the treatment of traditional psychiatric populations (the mentally ill, mentally retarded, homeless) by the justice system in contrast to that received by normal people; clinical issues such as the insanity defense, predicting dangerousness, the validity of psychiatric examinations and lie detectors; and jury selection, eyewitness testimony, decision-making, sentencing, and parole.

**PY 0124 Introduction to Industrial/Organizational Psychology**

Attributes: HSSS Health Studies: Social Science

This course introduces the field, contributions, and methods of industrial/organizational psychology. It covers the history of this branch of applied psychology and the psychologist’s role, along with other scientist-practitioners concerned with the world of work, in developing and maintaining human work performances and work environments. The course explores current concepts and methods in several specialties within this field: personnel, organizational behavior and development, counseling, labor relations, consumer, and engineering/ergonomic psychology. Topics include recruitment, selection, training and development, and appraisal of individuals and groups; development and change of organizational cultures; and relations between organizations and their stakeholders. The course emphasizes the unique contributions of psychological science to understanding human work skills, interests, attitudes, motivations, satisfactions and stresses; work careers, management, leadership, communication, group processes, and organization.

**PY 0131 Abnormal Psychology for Non-Majors**

Attributes: HSSS Health Studies: Social Science

This course introduces students to the field of abnormal behavior, presenting the classic behavior patterns in the classification system and discussing the possible causes and remediation of such. Psychology majors and students who have taken PY 0231 may not take this course.

**PY 0201 Statistics for Life Sciences**

Attributes: EVAP Environmental Studies: Applied Professional Skills

Corequisite: PY 0201L

This introductory course in statistical methodology and analysis includes descriptive statistics such as frequency distributions, central tendency, variability, and correlation as well as an introduction to probability, sampling theory, and tests of significance including the t-test, chi-squared, ANOVA, and non-parametric statistics. This course is open to majors in the behavioral, biological, and physical sciences. The lab complements the course by giving students supervised computation and problem-solving exercises using calculators and computers. Note: This course does not fulfill any core requirements.

**PY 0201L Statistics for Life Sciences Laboratory**

This lab course is designed to complement PY 0201, focusing on the practical application of statistical concepts through hands-on exercises.
PY 0201L Statistics Lab 0 Credits
Attributes: EVAP Environmental Studies: Applied Professional Skills
Corequisite: PY 0201.

PY 0202 Research Methods in Psychology 4 Credits
Prerequisites: PY 0101, PY 0201.
Building on PY 201 Statistics, this course teaches students to read, evaluate, design, conduct, and report psychological research. The course emphasizes critical thinking and effective oral and written communication. Students work through several different research projects.

PY 0211 Developmental Psychology for Majors 3 Credits
Prerequisite: PY 0101.
Using a research-oriented approach, this course focuses on the principal themes, processes, and products of human development from conception through adolescence. Students who have taken PY 111 or PY 212 may not take this course.

PY 0212 Developmental Psychology for Majors with Lab 4 Credits
Prerequisite: PY 0101.
Although the content of this course is identical to PY 0211, it offers psychology majors the opportunity to participate in a laboratory experiential learning component in preschool Head Start classrooms. Specific hands-on assignments complement course material. Students who have taken PY 0111 or PY 0211 may not take this course.

PY 0215 Adult Development and Aging 3 Credits
Prerequisite: PY 0101.
This course examines the theoretical underpinning and current research related to a number of key issues in the field of adult development and aging including physical, cognitive, and social-emotional changes, diseases, and disorders, as well as successful aging and resiliency.

PY 0217 Cross-Cultural Perspectives on Lifespan Development 3 Credits
Prerequisite: PY 0111 or PY 0211 or PY 0212.
This course explores various developmental processes and cultural practices across the lifespan such as rites of passages, marriage, parenting, and gender equality from cultures across the globe. How do different cultures view various developmental milestones? What is similar across cultures? What is different? Ultimately, from a psychological perspective, what exactly is culture? And what variations in the course of development can be traced to the influence of culture?

PY 0221 Social Psychology 3 Credits
Prerequisite: PY 0101.
This course surveys the major areas of concern in social psychology, emphasizing current issues and research in the fields of social influence and conformity, human aggression, prejudice, interpersonal attraction, propaganda, and persuasion. Students who have taken PY 0121 may not take this course.

PY 0222 Stereotyping, Prejudice, and Discrimination 3 Credits
Attributes: PJST Peace and Justice Studies, UDIV U.S. Diversity
Prerequisite: PY 0101.
This course will familiarize students with basic and applied social psychological research on stereotyping, prejudice, discrimination, and minority experience. After considering the cognitive and motivational factors that contribute to stereotyping and prejudice, we will proceed to examine prejudice in the "real world," exploring literature on discrimination-related policies, effects of stereotyping, prejudice, and identity on achievement and status, and prejudice reduction programs. The course will take a primarily empirical approach, focusing on the ways in which scientific methods and empirical evidence can inform our understanding of these emotionally-charged and socially consequential issues.

PY 0231 Abnormal Psychology for Majors 3 Credits
Attributes: HSSS Health Studies: Social Science
Prerequisite: PY 0101.
This advanced course in abnormal behavior offers an in-depth analysis of current research and theories of psychopathology. It examines the biological and psychological antecedents of abnormal behavior. The course emphasizes oral and written analysis.

PY 0232 Theories of Personality 3 Credits
Prerequisite: PY 0101; PY 0111 or PY 0211 or PY 0212.
The advanced presentation, analysis, and evaluation of theories of personality from Freud through Skinner broadens student understanding of the normal human personality in terms of theoretical structure, function, and dynamics, while enriching theoretical and historical understanding of the topic.

PY 0233 Gender and Mental Health 3 Credits
Attributes: WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: PY 0101.
This course will explore the relationship between gender and mental health. Topics to be discussed include gender identity, gender differences in development throughout the lifespan, the impact of social and societal gender expectations on functioning, as well as gender differences in the response to trauma and victimization. The course will also include an in-depth examination of sex differences in clinical disorders such as depression, anxiety, eating disorders, PTSD, and personality disorders.

PY 0234 Theories in Psychotherapy 3 Credits
Prerequisites: PY 0101, PY 0231.
This course explores similarities and differences across a wide range of psychotherapeutic endeavors by means of lectures, films, and tapes. The course covers traditional psychoanalytic techniques and more recent innovations.

PY 0236 Human Neuropsychology 3 Credits
Attributes: HSST Health Studies: Science and Technology
Prerequisites: PY 0261.
Human neuropsychology is a branch of psychology that focuses on functional structures and systems of the human brain and how they support various higher order psychological processes (e.g., learning, attention, executive functioning, higher-order thinking, memory, language, emotion, and motor skills). This course thus concentrates on the brain-behavior relationships beyond the cellular-molecular level, with an emphasis on typical life-span development and common neuropathological syndromes (e.g., strokes, dementia, and traumatic brain injury) in relation to functional structures and systems of the human brain. Assessment and treatment interventions of neuropsychological disorders are addressed within this context.

PY 0238 Psychological Testing 3 Credits
Prerequisites: PY 0101, PY 0201.
This course offers an introduction to the principles of psychological test construction, administration and interpretation, and reviews the roles that these tests have in a broad clinical assessment and research. Specific evaluation of test reliability and validity are applied to test construction and to various published tests of intelligence, achievement, personality, and neuropsychological functioning.

PY 0251 Cognitive Psychology 3 Credits
Prerequisite: PY 0101 or PY 0261.
How can we study the mind? This course surveys topics in cognitive psychology, including attention, memory, thought, imagery, language, problem solving, and decision making. Through lectures, readings, demonstrations, and exercises, students learn about how we think and about scientific explorations of the mind.
PY 0252 Learning and Applied Behavior Analysis  
Prerequisite: PY 0101 or PY 0261.
This course focuses on the environmental determinants of behavior and behavior change. The first two-thirds of the course highlight current concepts and research in Pavlovian and operant conditioning, reinforcement, discrimination, extinction, punishment, avoidance learning, etc. The remaining third of the course emphasizes applied behavior analysis (aka: behavior modification) that is, how these learning concepts and principles can be successfully applied to education, parenting, therapy, medicine, and everyday life.

PY 0261 Behavioral Neuroscience  
3 Credits
Understanding the brain is one of the last and most challenging frontiers of science. Our brain functioning determines what we see, hear, know, think, or feel. Starting with the molecular and cellular machinery of neurons and the anatomy of the nervous system, the course proceeds through the neural basis of sensation, perception, memory, emotion, language, sexual behavior, drug addiction, depression, schizophrenia, etc. The enormous strides made by neuroscience in the last several decades show every sign of continuing and increasing; this course provides the foundation upon which a thorough understanding of brain-behavior relationships can be built.

PY 0262 Sensation and Perception  
Prerequisite: PY 0101 or PY 0261.
How do we see, hear, touch, taste, and smell? What about individual differences? This course deals with basic sensory mechanisms and with perceptual processing. Students examine color, depth, pattern, and motion perception and complete an integrative final project. Students may do experiential learning to enrich their understanding of individual differences in sensation and perception.

PY 0272 Hormones and Behavior  
Prerequisite: BI 0171, BI 0172; or PY 0261.
This upper level course in psychology will provide students with an overview of behavioral neuroscience, with an emphasis on behavioral endocrinology (hormones and behavior). Topics include the description of major classes of hormones, the techniques used in behavioral neuroscience, and the discussion of hormone-mediated behaviors including male and female reproductive behaviors, stress / fear, memory and cognition, parental behaviors, ingestive behaviors, and circadian rhythms. After weekly mini-review sessions of the relevant text, this course will emphasize primary research (journal) articles with student-led discussions.

PY 0274 Drugs and Behavior  
Attributes: HSSS Health Studies: Social Science  
Prerequisite: PY 0261.
This survey course discusses the psychopharmacological properties of the more significant drugs used for research and by society in general. Drug classes include alcohol and nicotine, depressants and stimulants, tranquilizers, opium derivatives, and hallucinogenic compounds. The course emphasizes drug action sites in the central nervous system as well as behavioral alteration in controlled and uncontrolled environments.

PY 0281 Special Topics (Shell)  
Prerequisite: PY 0101.
This intermediate level course focuses on a specific issue or topic in one of the major areas of psychology, including but not limited to social, cognitive, clinical, developmental, or biological psychology. In successive offerings, the content of this course will vary considerably. Thus, students may take more than one section of the course provided the content is different.

PY 0281F Special Topics: Community Behavioral and Mental Health  
3 Credits
This course will provide an overview of the social and psychological foundations of community mental health practice. Using psychological knowledge of healthy human development across the lifespan, major public health issues will be explored. Particular emphasis will be placed on identifying risk and protective factors relevant to the development of effective preventative and remedial interventions to address important public health problems such as homelessness, drug, alcohol, and tobacco addiction, family violence (child, spouse, elder), community violence, depression and suicide, teen pregnancy and sexually transmitted diseases, obesity, insufficient nutrition, etc.

PY 0291 Internship in the Teaching of Psychology  
3 Credits
Prerequisite: PY 0101.
Racism, sexism, classism, and their attitudinal and behavioral corollaries, bias, prejudice, and discrimination are characteristics of American culture that have plagued society and compromised America’s democratic ideals throughout its history. The course explores the notion of race as a social construct and the development of individual cultural and racial identities, as well as ethnocentrism, racism, and ways to counter racism. All cognition takes place in the context of culture. The course also explores the influence of culture on cognition, between people in monicultural race/ethnic groups and within bicultural groups. An experiential component offers multicultural exposure.

PY 0295 Supervised Research  
Prerequisites: PY 0202.
The course provides research training experience in a supervised setting in which students work closely with a faculty mentor on various research projects. Such work may include assisting in designing and running lab research, data analysis, field experience, and library research. This hands-on experience enhances students’ understanding of issues in research design and analysis, and prepares them for more advanced research opportunities should they choose to pursue them (e.g., independent research). Student researchers are expected to spend a minimum of 10 hours per week in their faculty mentor’s lab. Enrollment by permission only.

PY 0301 Senior Seminar: Modern Psychology: History and Current Issues  
3 Credits
This seminar introduces students to the major historical perspectives in psychology; encourages critical thinking and the generation of creative ideas; and helps students engage in thoughtful questioning of the theory and knowledge base that constitutes the science of psychology. Open to senior psychology majors. Permission of the instructor is required for junior psychology majors.

PY 0321 Current Issues in Social Psychology  
3 Credits
This seminar engages with current issues in social psychological research. Although the specific topics covered in the course will change from semester to semester, the course will be structured to present an overview of each topic domain (through review articles and seminal empirical articles) followed by more contemporary readings on the topic and a discussion of current debates and open issues. Throughout the course, we will focus on applying insights from social psychological research to "real world" issues such as increasing individual well-being, supporting and maintaining healthy social relationships, creating more just and equitable communities, and improving judgment and decision-making.
PY 0322 Senior Seminar: Health Psychology 3 Credits
Attributes: HSSS Health Studies: Social Science
This course provides an in-depth survey of the discipline of health psychology framed within the context of socio-cultural factors such as ethnicity, gender and socio-economic status. Among the topics covered: stress, coping behaviors, biomedical and biopsychosocial models of health and illness, health behaviors, patient-provider communication. The students explore new ways to integrate theory and research with the advances in the science and practice of health psychology, and present their work in a final independent project. Open to senior psychology majors. Permission of instructor is required for junior psychology majors and non-majors.

PY 0331 Senior Seminar: Abnormal Child Psychology 3 Credits
Prerequisites: PY 0111 or PY 0211 or PY 0212.
This course provides a survey of the theory and research in the field of clinical psychology related to children and adolescents. More specifically, the seminar explores: the diagnostic characteristics of the major types of child psychological disorders, the etiology of each disorder from the different theoretical perspectives, and effective approaches to treatment and prevention. Open to senior psychology majors. Permission of the instructor required for junior psychology majors and non-majors.

PY 0332 Senior Seminar: Current Issues in Clinical Psychology 3 Credits
This course provides an in-depth exploration of current research and practice in the field of clinical psychology. Factors that contribute to the etiology, maintenance, identification and treatment of psychological distress will be discussed. The course will also include an in-depth examination of clinical disorders including mood, anxiety, psychotic, eating, traumatic stress, and personality disorders. Treatment, resilience and coping will also be discussed. Open to senior psychology majors. Permission of the instructor required for junior psychology majors.

PY 0351 Senior Seminar: False Memories 3 Credits
Can people repress memories for childhood trauma? How accurate are eyewitnesses at reporting what they saw? Although most of the time, our memories serve us quite well, many of the strategies and mechanisms that help us remember accurately can also lead to errors. This course examines various types of memory distortions and what they can tell us about the mechanisms of memory. Through readings and class discussions, we will explore research addressing confusions between real and imagined memories, the reliability of eyewitnesses recollections, children's suggestibility, as well as clinical issues such as repression and dissociation from a cognitive perspective. Open to senior psychology majors. Permission of instructor is required for junior psychology majors.

PY 0361 Senior Seminar: Current Issues in Behavioral Neuroscience 3 Credits
Prerequisite: PY 0261.
This hands-on laboratory course in behavioral neuroscience will introduce students to comparative neuroanatomy using rat, sheep, and human brain specimens. Students will participate in animal handling, brain sectioning, small animal surgeries, and drug administration, and will gain experience with rodents on a number of behavioral assays, including tests for spatial memory and reproductive behaviors. In small group exercises, students will become proficient in critiquing and presenting scientific literature, and will help in all stages of an experiment, from design to data collection to analysis and the writing up and presentation of results. In addition, students may work on a service-learning project with a community partner during the semester. Enrollment by permission only.

PY 0365 Neuroanatomy and Behavior 3 Credits
Prerequisite: PY 0261.
This hands-on laboratory course in behavioral neuroscience will introduce students to comparative neuroanatomy using rat, sheep, and human brain specimens. Students will participate in animal handling, brain sectioning, small animal surgeries, and drug administration, and will gain experience with rodents on a number of behavioral assays, including tests for spatial memory and reproductive behaviors. In small group exercises, students will become proficient in critiquing and presenting scientific literature, and will help in all stages of an experiment, from design to data collection to analysis and the writing up and presentation of results. In addition, students may work on a service-learning project with a community partner during the semester. Enrollment by permission only.

PY 0365L Neuroanatomy and Behavior Lab 1 Credit
Corequisite: PY 0365.

PY 0381 Senior Seminar: Special Topics (Shell) 3 Credits
In this seminar, students undertake an in-depth study of a current topic in psychology, using mostly primary sources. Coursework emphasizes discussion and writing. Open to junior and senior psychology majors or by permission of instructor.

PY 0391 Internship in Applied Psychology 3 Credits
Senior psychology majors gain practical, career-related experience in a variety of supervised field settings through the internship program. Student interns choose from a wide selection of placements in traditional psychology-related programs: mental health, social service, school psychology, early child and special education, probation, and hospital administration. Intern placements in related disciplines include human factors engineering, human resource development, advertising, and public relations. Internships emphasize the integration of learning, both cognitive and experiential. Interns may register for one or two semesters, depending on the availability of appropriate placement sites and qualified supervisors. Interns spend a minimum of 10 hours per week in on-site work and complete the required academic component specified by the faculty coordinator. Enrollment by permission only.

PY 0392 Internship in Applied Psychology 3 Credits
Senior psychology majors gain practical, career-related experience in a variety of supervised field settings through the internship program. Student interns choose from a wide selection of placements in traditional psychology-related programs: mental health, social service, school psychology, early child and special education, probation, and hospital administration. Intern placements in related disciplines include human factors engineering, human resource development, advertising, and public relations. Internships emphasize the integration of learning, both cognitive and experiential. Interns may register for one or two semesters, depending on the availability of appropriate placement sites and qualified supervisors. Interns spend a minimum of 10 hours per week in on-site work and complete the required academic component specified by the faculty coordinator. Enrollment by permission only.

PY 0395 Independent Research 1-4 Credits
Prerequisite: PY 0202.
This course involves a limited number of upper-division students (usually seniors) in all aspects of an advanced research project. Students must obtain the consent of the professor with whom they will work prior to registering for this course. Frequently a research proposal is required prior to acceptance into this course; early planning is essential. Enrollment by permission only.

Total Credits 15

1 When offered with an emphasis on Behavioral Neuroscience.
2 With a project in Behavioral Neuroscience.
Select at least one course from each of the following five content areas:

**Understanding Biological Processes**
- PY 0261 Behavioral Neuroscience
- PY 0274 Drugs and Behavior

**Understanding Developmental Processes**
- PY 0211 Developmental Psychology for Majors
- PY 0212 Developmental Psychology for Majors with Lab

**Understanding Cognitive and Learning Processes**
- PY 0251 Cognitive Psychology
- PY 0252 Learning and Applied Behavior Analysis

**Understanding Individual, Social, and Cultural Processes**
- PY 0221 Social Psychology
- PY 0222 Stereotyping, Prejudice, and Discrimination
- PY 0232 Theories of Personality

**Understanding Clinical Processes and Applied Contexts**
- PY 0231 Abnormal Psychology for Majors
- PY 0236 Human Neuropsychology
- PY 0238 Psychological Testing

Select at least three elective courses from the content areas above or from the following:

**Experiential Learning**
- PY 0291 Internship in the Teaching of Psychology
- PY 0295 Supervised Research
- PY 0365 Neuroanatomy and Behavior
- PY 0391/0392 Internship in Applied Psychology
- PY 0395 Independent Research

**Additional Electives**
- PY 0122 Psychology and the Law
- PY 0215 Adult Development and Aging
- PY 0217 Cross-Cultural Perspectives on Lifespan Development
- PY 0233 Gender and Mental Health
- PY 0234 Theories in Psychotherapy
- PY 0262 Sensation and Perception
- PY 0274 Drugs and Behavior
- PY 0281 Special Topics (Shell)
- PY 0420 Introduction to Industrial and Organizational Psychology

Select one Senior Seminar

Total Credits: 38

---

1. When a student takes more than one course in one of the five content areas, the additional course counts as an elective.
2. May be taken only once.
3. Permission of the instructor is required. Students are allowed a maximum of two applied internships and one teaching internship.

Note: Psychology majors may be required to participate in a departmental assessment during their senior year, such as an exit questionnaire, interview, focus group, or Major Field Test in Psychology.

---

**Previous Curriculum**

*This curriculum applies to students in the Class of 2020 and earlier.*

Five-Year Integrated Bachelor and Master of Arts in Industrial/ Organizational Psychology

This program has been designed for Fairfield University undergraduate students who are interested in a pathway other than an MBA to work in organizations and who want to develop the skills necessary to work as industrial/organizational specialists.

Graduates of the program assume positions in profit and non-profit organizations in human resources, training, consulting, research, organization development, recruiting and similar specialties. They have been employed in companies such as GE, Shell Oil, Gartner, Survey Sampling, Bank of Montreal, Deloitte Touche, Hewitt Associates, Toyota and Merrill Lynch; and by the Red Cross, the Justice Department, and a number of universities such as Loyola, UConn, and Fairfield University.

The skills, psychological principles and methodologies mastered in the program may be applied in a variety of organizational settings depending upon the student’s interests and career choices.

To be eligible for admission students need to have an overall GPA of 3.0 in their undergraduate courses. They also must earn grades of at least B+ in the three required applied psychology courses taken while they are undergraduates:

Current Fairfield University undergraduates should apply by January 15 of their senior year, for admission to the MA program the summer immediately following their graduation.

Religious Studies

The Religious Studies curriculum presents a critical inquiry into the religious dimension of human experience. After an introduction to the nature of religion and the methods employed in its study, students can select from a variety of courses exploring specific topics such as sacred texts, issues in sexual ethics, questions of life and death, and the wide variety of devotions and practices that animate religious communities.

The study of religion allows for an informed appreciation of the motivations and values given expression in religious belief, and the way in which culture shapes, and is shaped by, that belief. Students may take courses offered by the Religious Studies Department as part of the required core curriculum, as electives, or as part of a major or minor program in religious studies under the direction of a departmental advisor.
Majors and minors in Religious Studies are eligible for induction to Theta Alpha Kappa, the national honor society for religious studies and theology. In addition, each year the department honors the academic achievement of an outstanding senior with the Mary Irene Gallagher Theology Medal, Fairfield’s oldest academic award.

Core Curriculum Options

Area III of the core curriculum requires students to take a minimum of two religious studies courses. All students must take RS 0101 Exploring Religion. Students may then select a 200-level course based on their interests, keeping in mind that it may not be a second section of RS 0101. A third course in religious studies, at the 200 or 300 level, may also be chosen to complete the five-course requirement of Area III.

Programs

- Religious Studies Major (p. 211)
- Religious Studies Minor (p. 212)
- Religion in America Minor (p. 211)

Students interested in a minor, a major, or a double major should contact the religious studies department chair.

Courses

RS 0101 Exploring Religion (Shell) 3 Credits
This course invites students to explore the religious dimensions of human experience, emphasizing the themes of scripture, community and practice. In a critical appraisal of one or more of the great religious traditions of the world, students will analyze sacred texts in context, discover how social patterns shape religious communities, and survey a wide variety of religious devotions and practices, both personal and communal. Students in this course will learn to investigate the religious lives, beliefs, experiences and values of others, in their scope and diversity, respecting both the differences from, and the similarities to, their own. While several sections of the course will offer a variety of lenses for such a critical understanding, all sections will inquire about the relationship between religion and culture, employing the tools of the humanities and the social sciences. See RS 0101A, RS 0101B, RS 0101C, RS 0101D, RS 0101E.

RS 0101A Exploring Religion: Religion and the Critical Mind 3 Credits
This subsection of RS 0101 examines some of the themes in the study of religion and offers a comparative analysis of the nature, function, and purpose of religion as found in a variety of models of religion. A wide variety of contemporary religious practices will serve as discussion points for scholarly analysis.

RS 0101B Exploring Religion: Asian Religions 3 Credits
Attributes: WDIV World Diversity
This subsection of RS 0101 examines the basic religious systems of India and China, including their fundamental differences, performative functions, and worldviews. The course evaluates Euro-American theories of religion in light of Asian religious expressions.

RS 0101C Exploring Religion: Common Questions, Traditional Response 3 Credits
Attributes: JST Judaic Studies Minor
This subsection of RS 0101 examines the major questions addressed by most world religions, with special emphasis on how they are answered in a specific major tradition. Topics include the nature of the sacred and its relationship to human persons; the problem of evil and innocent suffering; religion’s call for social responsibility; and the nature and function of ritual.

RS 0101D Exploring Religion: Religion in a Comparative Key 3 Credits
This subsection of RS 0101 examines different kinds of religious experience, doctrine, and practice through a close examination of two different religious traditions, engaging the traditions as these appear in a variety of cultural contexts.

RS 0101E Exploring Religion: Peoples of the Book, Sacred Texts, and Their Communities 3 Credits
Attributes: JST Judaic Studies Minor
This subsection of RS 0101 examines the relationship between sacred text and the historical communities of Judaism, Christianity and Islam. Focusing on shared narratives, such as Adam and Eve in the Garden, the course illustrates the different ways that texts are interpreted and the various roles that Scripture plays in these communities.

RS 0201 Hebrew Bible/Old Testament 3 Credits
Attributes: JST Judaic Studies Minor
Prerequisite: RS 0101.
This course will survey the texts that are normative for Judaism and Christianity today; the Hebrew Bible (TaNaKh) and the Christian Testament. These texts will be studied according to a wide range of modern methods of biblical criticism which consider carefully their literary and historical aspects. Special effort will be made to situate these texts within their historical and cultural setting in the ancient near east.

RS 0205 Women in the Bible 3 Credits
Attributes: JST Judaic Studies Minor, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: RS 0101.
This course examines stories about women that appear in both Jewish and Christian Scriptures by applying various methodological approaches. Conventional methods of interpretation, namely literary and historical-critical, will be used and critiqued. While the focus will be on images of women in the Hebrew Bible/Old Testament (viz., the Jewish TaNaKh and the Christian Scriptures), other non-canonical stories about women will also be considered. This course does not presume any previous knowledge of the biblical texts themselves or biblical methodology.

RS 0207 Prophetic and Apocalyptic Voices 3 Credits
Prerequisite: RS 0101.
This course studies the major prophetic voices of the Hebrew and Christian scriptures, concentrating on each prophet's unique vision of God and of the requirements of justice. The course blends these themes with the later apocalyptic consciousness, which demands rectification of the wrongs of hatred and injustice, and offers hope for a better future.

RS 0209 Jewish Interpretations of Scriptures 3 Credits
Attributes: JST Judaic Studies Minor
Prerequisite: RS 0101.
This course explores ways in which Jews have understood the Hebrew Bible from the first centuries of the Common Era through today. Focusing on specific biblical texts, the course draws interpretations from early classical, legal, and non-legal rabbinic material; medieval commentaries and codes; mystical literature; and modern literary, theological sources.

This course examines ways in which Judaism has been defined and has developed as both a way of thought and a way of life. Included will be discussions of central Jewish concepts (e.g., covenant, holiness, and commandment), holidays, life-cycle ceremonies, and contemporary Jewish religious movements.

The course examines the origin and development of Judaism and the Jewish people. It begins with the Hebrew Bible as the source of Judaism and follows its development to the modern era. This overview introduces the Jewish religion, its history, and development.

What has it meant and what does it mean today to be a Jew in America? Viewing Judaism and Jewishness as inseparable from one another, Jews remain a distinct though by no means homogeneous religious and ethnic group in American society. This course explores the religious, cultural, social, economic, and political diversity among American Jews as well as distinctive beliefs, concerns, and experiences that continue to unite them. The course gives special attention to issues concerning immigration, acculturation, gender, and Black-Jewish relations.

This course examines ways in which women have understood and experienced Judaism from the Biblical period through the present, drawing on historical writings, novels, theological essays, and films and giving particular attention to the traditional religious roles and status of women, the many ways in which women have understood Jewish self-identity, and recent feminist efforts to re-evaluate and transform contemporary Jewish life.

This course explores the complexity and horror of the holocaust and its contemporary historical, social, political, and theological implications. What historically made the attempted annihilation of European Jewry possible and how were some Jews able to survive? Was the holocaust unique? Could it have been prevented? What impact did it have on Western faith in humanity and God? What lessons, particularly in light of the resurgence of anti-semitism in Europe today, can it teach us?

This course examines the texts and recurring themes of the writings attributed to Paul, with particular emphasis on Paul's treatment of ethical situations, community, and religious experience.

This course examines the Gospels of Matthew, Mark, Luke, and John according to contemporary exegetical and literary methodologies. The course examines and compares the theological positions of early Christianity as represented by each writer and by other early Christian gospels.

This course examines the text of the gospel and epistles attributed to John, placing particular emphasis upon the recurring themes in these writings, the distinctive view of Christianity they represent, and the development of early Christianity to which they witness.

This course presents a historical overview of early Christianity between the end of the first century and the close of the sixth. The focus of the course is on the institutional and theological development of the early Church after the final books of the New Testament were written. Topics examined include: Jesus and Judaism, Christianity and the Roman Empire, heresies of the Early Church, and the development of Christian theology (in particular the doctrines of Christ and the Trinity).

This introduction to the beliefs, doctrines, ideas, and practices that shape the unity and diversity of the Catholic tradition explores theological, devotional, and spiritual forms of expression in their historical and cultural contexts in order to appreciate the particularity of Catholic themes. The course also considers how these themes engage contemporary Catholic life and exercise an influence on the wider culture.

This historical and theological examination of the Christian doctrine of God pays special attention to the problematic aspects of the development of this doctrine through the ages, exploring this development in biblical sources; patristic, medieval, Reformation, and modern times. The course concludes with a consideration of the challenge of post-Enlightenment atheism and of the efforts of contemporary theologians to recast the classical conception of God.

A systematic treatment of the person and work of Jesus Christ, this course examines different interpretations of the meaning of the Christ event from the scriptural sources to contemporary developments.
RS 0235 Liberation Theology 3 Credits
Prerequisite: RS 0101.
This course analyzes contemporary theological movements that emphasize the relationship of religious faith and praxis to the sociopolitical realm. The course treats at length the development of the Latin American theology of liberation and examines its theological principles, tracing the influence of this theological outlook on other Third World theologies and on North American and European theological reflection. The course proceeds to a constructive proposal for a contemporary political theology.

RS 0236 Christian Feminist Theology 3 Credits
Attributes: CARS Catholic Studies: Religious Studies, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: RS 0101.
Participants study the religious reform of the 16th century. The course addresses the following questions: What is evil? What are the roots of evil? What effect does one's understanding of evil have on one's understanding of the human being, of God, and of religion? What is our responsibility in the face of evil?

RS 0237 Counterreformation 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: RS 0101.
This course analyzes contemporary theological movements that emphasize the relationship of religious faith and praxis to the sociopolitical realm. The course treats at length the development of the Latin American theology of liberation and examines its theological principles, tracing the influence of this theological outlook on other Third World theologies and on North American and European theological reflection. The course proceeds to a constructive proposal for a contemporary political theology.

RS 0238 Evil 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: RS 0101.
This course explores the problem of evil from the perspectives of theology and philosophy. The course considers God and evil, classical theodicies (reasonable justifications of God before the prevalence of evil), modern philosophical accounts of evil, social evil, and the possibility of belief in the face of evil. Within the context of these subjects, the course addresses the following questions: What is evil? What are the roots of evil? What effect does one's understanding of evil have on one's understanding of the human being, of God, and of religion? What is our responsibility in the face of evil?

RS 0239 Last Things: The Catholic Belief in Life After Death 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: RS 0101.
This course first explores the Christian understanding of life after death, affirmed in such beliefs as the resurrection of the body, the last judgment, heaven and hell, and the forgiveness of sins. It then goes on to examine the Catholic tradition's particular contributions to these beliefs in its teachings on purgatory and the communion of the saints. The course asks why these ancient beliefs continue to resonate in contemporary popular culture, and examines modern theological efforts to re-construct these hopeful beliefs for our own times.

RS 0240 The Medieval Church 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: RS 0101.
This course surveys the development of Christianity in medieval Western Europe through the lens of the Western/Latin Church. It presents a broad history of the social, political and religious aspects of the Church as found in a variety of primary sources: mystical and theological writings, hagiographical literature and rules for monastic communities, and official Church documents. Through these sources students are introduced to the critical analysis of primary texts (dating from c. 300-1500) by giving proper attention to the social and cultural context in which they were written. Topics discussed in this course include: monasticism, the rise of papal power, the First Crusade, and the development of cathedrals and universities.

RS 0241 Encountering God in Medieval Christian Thought 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: RS 0101.
This course presents a historical overview of religious thought in the medieval era (c. 500-1500), with a focus on the institutional and theological developments within Christian monasteries and universities. We will first treat the development of Benedictine monasticism and the types of theological literature associated with the monasteries, before looking at the development of the University system in Western Europe and the types of theology produced in the schools. Finally, we will treat the pervasive presence of "mystical theologians" who were often neither monks nor university professors, but developed a rich theology grounded in human experience.

RS 0244 Finding God in All Things: The Spiritual Legacy of Ignatius of Loyola 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: RS 0101.
The course aims at a deeper understanding of the origins, development, and present forms of Ignatian spirituality. Students are invited to study in an open yet critical fashion: the life and history of Ignatius of Loyola; the founding and development of the Society of Jesus; the historical context of the major themes of Jesuit spirituality and ways in which these have been worked out in history; strengths, weaknesses, and potential lacunae of this particular charism in the church; its relevance to contemporary spiritual needs, especially in the context of university life; its potential for nurturing lives characterized by love for others and justice for the world. Students are also exposed to the dynamics of the Spiritual Exercises, a variety of prayer forms developed by Ignatius; and a service learning project. The course culminates in a creative project designed by each student.

RS 0245 The Reformation Era 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisite: RS 0101.
Participants study the religious reform of the 16th century. The course begins by probing the seeds of reform in the late scholastic tradition and in popular spirituality, and proceeds by tracing the development of the ideas and impact of the reformers: Luther, Zwingli, Calvin, Munzer, and Schwenckfeld. The course concludes with an investigation of the Roman Catholic response to reform in the events of the Council of Trent and the Counterreformation.
This course leads students to an understanding of the characteristically Catholic ways of engaging the world intellectually. The course examines key ideas of symbol, analogy and sacrament, and central Catholic motifs such as theology as "faith seeking understanding," the synthesis of faith and reason and the peculiarly Catholic expression of humanism, as expressed in the work of Catholic philosophers and intellectuals. It attends to feminist and non-Western critiques of the tradition, to Catholicism's approach to some contemporary social problems, and to some examples of the role of the Catholic imagination in the arts.

**RS 0249 American Catholic Theologians**

**Attributes:** ASRS American Studies: Religion, ASUP American Studies

**Upper Level, CARS Catholic Studies: Religious Studies**

**Prerequisite:** RS 0101.

This lecture/reading course gives students insight into the modern development of Catholic theology in America and what makes it specifically American. Discussion/analysis covers the work of Gustav Weigel, John Courtney Murray, George Tavard, Frank Sheed, Walter Burghardt, and Robley Whitson.

**RS 0250 Contemporary Morality: Basic Questions**

**Attributes:** CARS Catholic Studies: Religious Studies

**Prerequisite:** RS 0101.

This course introduces the fundamental concepts in moral theology, drawing on major traditions in contemporary Christian thought. The course examines the moral foundations of conscience, freedom and responsibility, virtue and character, and methods of moral decision-making. To deepen the study of basic questions in Christian morality, the course concludes by examining selected applied issues in contemporary morality.

**RS 0252 Contemporary Moral Problems**

**Attributes:** CARS Catholic Studies: Religious Studies, EDCG Educational Studies Cognate

**Prerequisite:** RS 0101.

This theological examination of contemporary moral problems considers selected ethical issues in contemporary society and leading approaches to moral decision-making. The course investigates moral problems such as euthanasia and physician-assisted suicide, the death penalty, violence and just war theory, bioethics, sexual and reproductive ethics, global poverty, environmental ethics, and issues in business and legal ethics.

**RS 0253 The Morality of Marriage in Christian Perspective**

**Attributes:** CARS Catholic Studies: Religious Studies

**Prerequisite:** RS 0101.

This course explores marital commitments by exploring the many phases of partnership - courtship, marriage, intimacy, parenting, death - and the specialized skills or virtues these phases require. The course considers questions such as: What kinds of communities, especially faith communities, support marital commitments? What are the forces of society and culture that might threaten them? How might vices, such as physical or sexual abuse, alcoholism, and addiction, erode commitments? The course concludes by assessing how virtuous families might promote peace and justice, and developing an integrated theological account of the moral project we call marriage.

**RS 0255 Catholic Social Teaching**

**Attributes:** CARS Catholic Studies: Religious Studies, PJST Peace and Justice Studies

**Prerequisite:** RS 0101.

This course examines the modern teachings of the Catholic Church on peace and justice; Christian/humanist attitudes towards war; pacifism and the just war theory; and changes in global political and economic structures that seem necessary to ensure a peaceful and just world order.

**RS 0257 Christian Spirituality**

**Attributes:** CARS Catholic Studies: Religious Studies

**Prerequisite:** RS 0101.

This course examines the foundations and elements of a spirituality of everyday life from a lay perspective. It considers issues related to the spirituality of university life and to one's broader, future developmental calling on personal, spiritual, and professional levels. Themes of the course include historical overview of Christian spiritual traditions; key theological foundations such as creation, incarnation, doctrine of the Holy Spirit, grace, priesthood of all believers, action, and contemplation; exploration of the practical implications of such a spirituality; and reflection on action for justice.

**RS 0260 Religion in the United States**

**Attributes:** ASRS American Studies: Religion, UDIV U.S. Diversity

**Prerequisite:** RS 0101.

This course explores the story of religion in America from a multicultural, multi-faith perspective. Students will examine how different religious peoples and traditions have interacted across time and how these interactions and exchanges have both complicated and enriched the American religious landscape. Much attention will be paid to those voices often left out of the master narrative of American religion for reason of race, gender, ethnicity, class, or even peculiarity. The course is a survey, thus students will encounter a variety of topics varying from indigenous religious practices, revivalism, the early roots of traditions like Judaism and Islam, new religious movements, to secularization.

**RS 0262 Afro-Caribbean and African American Religions: Shout, O Children!**

**Attributes:** ASRS American Studies: Religion, BSAH Black Studies: Arts and Humanities, BSFC Black Studies Focus Course, UDIV U.S. Diversity

**Prerequisite:** RS 0101.

This course examines the evolution and innovation of the religions of African people as they were shaped through the middle passage, merged with other religions during the institution of slavery, and created anew on the American continent and throughout the Caribbean Sea. Students will examine how Caribbean traditions like Vodou and Santeria and American iterations of Christianity and Islam arose out of and against institutions and cultures that sought to subjugate them. Further, students will explore how elements of black religious life, from preaching style to music to liturgy to religious thought, have left an indelible mark upon American and Caribbean religious cultures and traditions.
This course examines new religious movements, more pejoratively known as "cults," and their schismatic cousin "sects," on their own terms and in their American context. Students examine multiple religious traditions, including those born and grown in the United States, as well as those imported from outside the United States. Among those traditions studied are the Church of Latter-day Saints, the Theosophical Society, the Branch Davidians, and Scientology. Throughout the course, students seek to answer the following questions: why do new religious traditions arise, how do they thrive, and does the context of American culture have anything to do with their success or failure?

**RS 0275 Islam in America**

**Attributes:** ASRS American Studies: Religion, ASUP American Studies Upper Level, UDIV U.S. Diversity

**Prerequisite:** RS 0101.

This course is a survey of Muslim life and religious movements connected to Islam in North America. The course traces the history of Islam on the continent from the Atlantic slave trade to the post-9/11 era. We will investigate the many ways in which Islam, as both a religion and idea, has appeared on the American horizon and in the American imagination. The historic diversity of Muslim communities on the continent will be explored through their respective beliefs, cultures, and sense of identity. Special attention will be paid to the African-American and Immigrant Muslim communities.

**RS 0276 Islamic Theology**

**Attributes:** ASRS American Studies: Religion

**Prerequisite:** RS 0101.

This course is a survey of major tenets of Muslim belief, points of difference, and schools of theological thought. We will explore important points of faith and investigate the debates that have emerged over the course of Islamic history. Special attention will be paid to the areas of doctrinal formulation, scholastic theology and mystical thought. Our primary readings will consist of both primary sources in translation and current secondary literature.

**RS 0280 Hinduism**

**Attributes:** WDIV World Diversity

**Prerequisite:** RS 0101.

This course introduces the seminal texts, concepts, and images of the major religious tradition of India. Topics include Vedic ritualism; Upanishadic mysticism; yoga meditation; the Bhagavad Gita; the caste system; Vedanta philosophy; the cults of Rama, Krishna, Shiva, and the Goddess; and Gandhi's philosophy of non-violent action. The course views Hinduism as a historical phenomenon, a formative influence on Indian culture and society, and a response to the human condition.

**RS 0285 Buddhism**

**Attributes:** WDIV World Diversity

**Prerequisite:** RS 0101.

This course explores the Indian Buddhist tradition, from its beginning in the life of Shakyamuni Buddha through the present revival of neo-Buddhism in the activism of oppressed classes. The course considers the early formative ideas of the Buddha - the Awakened One - as they unfold in the course of Indian history and society, and discusses Buddhist meditation and philosophy as procedures devised to elicit the awakened state. Using written and visual works, the course examines developments in Buddhist religious orders, lay social life, and the rise of the Great Vehicle tradition. Art and archaeology provide a context for Buddhism's compelling missionary activity throughout Central and Southeast Asia.

**RS 0286 Buddhism in the United States**

**Attributes:** UDIV U.S. Diversity

**Prerequisite:** RS 0101.

This course will explore the history, sources and forms of Buddhism that have prospered in the United States since the mid 19th century; with the emigration of Chinese to California. Subsequent developments will also be examined: Pure land, beat zen, hippie Buddhism, Tibetan Buddhism, and emigrant communities from Japan, China and Southeast Asia among others. The "two communities" model (impoverished emigrant vs. wealthy convert Buddhism) will be explored. Visits to Buddhist centers in the Northeast will be part of the program, and if possible, visits from Buddhist representatives to the class. Film, literature and other media will inform the course as well.
RS 0299 Tantrism 3 Credits
Attributes: WDIV World Diversity
Prerequisite: RS 0101.
The course covers the medieval formation of tantrism, a pan-Indian approach to religion that was to develop separate but related subcultures in Buddhism, Hinduism, and Jainism. With its ability to sacralize formulations of power and sexuality, it went on to become the most widely spread form of Buddhism, with premodern forms found in Tibet, China, Japan, and Eastern Europe. Recent expressions have been found all over the world. The course examines questions of tantrism’s medieval origins, its espousal of antinomian conduct, its geographical spread, attempts at its domestication, and its recent developments in India and abroad.

RS 0299 Special Topics (Shell) 3 Credits
Prerequisite: RS 0101.
Students and faculty in this course will engage in an in-depth exploration of a significant topic in the field of Religious Studies. The content will vary in successive offerings of this course, depending on the professor. The course may be repeated with the consent of the professor.

RS 0300 Second Temple Judaism and the Dead Sea Scrolls 3 Credits
Attributes: JST Judaic Studies Minor
Prerequisites: RS 0101 and one 200-level Religious Studies course.
The Dead Sea Scrolls have rightly been called the greatest manuscript discovery of the twentieth century. Discovered in 1947, they have made a tremendous impact on how scholars today understand Judaism and Christianity in antiquity. Our examination of the community, texts, and archeology of the Dead Sea Scrolls will begin with a study of the Second Temple Period (520 BCE-70 CE), one of the most important in the history of Judaism. This course will examine the political, social, and theological developments of this period so that the community of the Dead Sea Scrolls and their writings may be situated within their proper context. Students will learn to read primary texts closely and secondary texts critically as they consider the influence and relationship between texts and their community.

RS 0315 Modern Jewish Theology 3 Credits
Attributes: JST Judaic Studies Minor
Prerequisites: RS 0101 and one 200-level religious studies course.
This course explores ways in which Jews have sought to know God. While Judaism has long maintained that ultimately God is unknowable, divine and human action, reason, revelation, mystical insight, and prayer are among the paths taken by Jews to gain theological knowledge. Included will be a discussion of works by several 19th- through 21st c. theologians (e.g., Buber, Baeck, Rosenzweig, Heschel, Fackenheim, Greenberg, Plaskow) in drawing on these paths and in discussing such topics as the nature of the divine covenant, the role of human autonomy, liturgical images of God, and faith after Auschwitz.

RS 0325 Quest for the Historical Jesus 3 Credits
Prerequisites: RS 0101 and one 200-level religious studies course.
This course examines the increasingly public debate over whether an adequate basis exists for reconstructing a description of the life of Jesus of Nazareth. It examines the evidence available from all sources, the criteria by which that evidence has been interpreted, and the resulting, often contradictory, portrayals. The course also discusses the relationship between this "historical Jesus" and the subsequent faith tradition of Christianity.

RS 0343 The Papacy 3 Credits
Attributes: CARS Catholic Studies: Religious Studies, ISIF Italian Studies: Italy-Focused
Prerequisites: RS 0101 and one 200-level religious studies course.
This survey of the Roman Catholic papacy, generally focuses on a single figure, theme, or period, and places that figure, theme, or period within the larger historical, cultural, and ecclesial context. A significant part of the course treats theological issues, using as texts either papal writings, significant encyclicals, or conciliar statements and actions. The course also includes a critical assessment of the role of the papacy within the Roman Catholic Church and a consideration of the role of the papacy in interreligious dialogue and world affairs.

RS 0350 The Classic: Truth in Religion and the Arts 3 Credits
Prerequisites: RS 0101 and one 200-level religious studies course.
This course examines the idea of the classic as a model for establishing relationships between religious language on the one hand, and poetic discourse and artistic expression on the other. What truth do classics lay claim to and how do they embody it? The course compares secular and religious classics before investigating the value of the classic model in the process of doing theology.

RS 0354 Saints and Sinners: Images of Holiness in Contemporary Fiction 3 Credits
Attributes: CARS Catholic Studies: Religious Studies
Prerequisites: RS 0101 and one 200-level religious studies course.
This course examines the complexity of current understandings of what it is to be holy. It begins with a brief consideration of traditional models of holiness. It turns next to several influential theories of spiritual growth, and then, in the light of these theories, looks at a series of 20th-century novels that examine the idea of holiness. Authors vary but include Georges Bernanos, Shusaku Endo, Mary Gordon, Graham Greene, David Lodge, Flannery O’Connor, Gloria Naylor, Muriel Spark, and Jean Sullivan.

RS 0360 I’m Spiritual, Not Religious: The American Spiritual Tradition 3 Credits
Attributes: ASRS American Studies: Religion, ASUP American Studies Upper Level
Prerequisites: RS 0101 and one 200-level religious studies course.
This course examines a strand of anti-institutionalism in American religion, one, which has culminated in the increasingly popular and ubiquitous phrase, "I’m spiritual, but not religious." The claim to spirituality, but not to religiosity, has a rich history in the United States context, beginning in the earliest periods of European settlement. In this course, students will investigate the evolution of this thoroughly American phenomenon across U.S. history and through the examples of spiritual Americans. Students will consider whether the phrase, "I’m spiritual, but not religious," though often intended as a statement of one’s separateness from religious institutions, has become the marker of a distinctive religious affiliation.

RS 0363 Religious Values in Film 3 Credits
Prerequisites: RS 0101 and one 200-level Religious Studies course.
This course focuses on the search for meaning in human life as experienced and depicted in 12 films by distinguished filmmakers. The first six films mirror this search in personal life, asking in various ways whether we are isolated and alone or linked and dependent on others. They also grapple with the problem of evil and the experience of salvation. The second six films concern themselves with the meaning of life in society. In different historical contexts they ask whether the universe is indifferent or friendly to our community building, and raise the problem of God and the religious significance of secular achievement.
RS 0379 Islam, Race, Power 3 Credits
Prerequisites: RS 0101 and one 200-level Religious Studies course.
Students will undertake a critical investigation of "race" and "ethnicity" within Islam from the classical period to the present. The course examines how different Muslims approached the concepts as well as how those concepts were applied to or imposed upon particular Muslim communities. The historical experience of Black Muslims serves as a recurring case study. Moreover, the relationship of race to power is also a central analytical theme. Topics to be discussed include the construction of "race," slavery and its abolition, the Blackamerican Muslim experience, and Muslim theologies of liberation and resistance. The course is research and writing intensive.

RS 0398 Independent Study 1-3 Credits
Prerequisites: RS 0101 and one 200-level Religious Studies course.
Students, in consultation with a department director, define their course of study.

RS 0399 Religious Studies Seminar 3 Credits
Prerequisites: RS 0101 and one 200-level Religious Studies course.
This seminar offers an in-depth investigation of a significant figure, issue, or problem in religious studies. Enrollment requires the permission of the instructor.

Courses taken in fulfillment of the core requirement in Religious Studies may be counted toward the minor.

Religious Studies Major

Learning Outcomes
Graduating Religious Studies majors should be able to:

1. Demonstrate knowledge of the beliefs, practices, and texts of more than one major religious tradition.
2. Understand the diversity and complexity of religious traditions flourishing today.
3. Comprehend the various ways religious beliefs and practices change in distinct temporal and geographical settings.
4. Critically analyze significant questions and problems through the careful study of religious intellectual traditions.
5. Develop scholarly skills to conduct sophisticated research within the discipline.

Requirements
For a 30-credit major in Religious Studies, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>RS 0101</td>
<td>Exploring Religion (Shell)</td>
<td>3</td>
</tr>
<tr>
<td>Select no more than five courses at the intermediate (200) level</td>
<td>15</td>
<td></td>
</tr>
<tr>
<td>Select no fewer than four courses at the advanced (300) level</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>30</td>
</tr>
</tbody>
</table>
In addition, in consultation with the major advisor, students should also:

- Ensure that the courses selected at the 200- and 300-level include courses that emphasize three of these five world religions: Judaism, Christianity, Islam, Hinduism, and Buddhism.
- Ensure that at least one of the courses selected at the 200- or 300-level is a course on scripture.

Courses taken in fulfillment of the core requirement in Religious Studies are counted toward the major.

**Religious Studies Minor**

**Learning Outcomes**

Graduating Religious Studies minors should be able to:

1. Demonstrate knowledge of the beliefs, practices, and texts of more than one major religious tradition.
2. Understand the diversity and complexity of religious traditions flourishing today.
3. Comprehend the various ways religious beliefs and practices change in distinct temporal and geographical settings.
4. Critically analyze significant questions and problems through the careful study of religious intellectual traditions.

**Requirements**

For a 15-credit minor in Religious Studies, students complete the following:

</tbody>
</table>

Courses taken in fulfillment of the core requirement in Religious Studies may be counted toward the minor.

**Russian, East European, and Central Asian Studies**

The end of the Cold War, along with the collapse of the Soviet Union and communist regimes in Eastern Europe, offers a unique opportunity to take a fresh look at an old field: Russian and East European area studies. Formerly caught within the framework of the Cold War, new societies are emerging, struggling to come to grips with their pasts and forging their own unique futures.

The Russian, East European, and Central Asian studies minor, an interdisciplinary program developed jointly by the College of Arts and Sciences and the Charles F. Dolan School of Business, offers students an opportunity, from a base major either in international studies or one of the disciplines, to develop a focus on this dynamic area of the world.

**Programs**

- Russian, East European, and Central Asian Studies Minor (p. 212)

**Courses**

**RES 0310 Capstone Seminar: Current Topics in Russia, Eastern Europe, and Central Asia**

This interdisciplinary seminar, team-taught by faculty members from different disciplines or available as an independent project, focuses on current and changing developments in Russia, Eastern Europe, or Central Asia and covers culture, politics, business, and economics, enabling students to integrate their different disciplines in a case-study format. The course includes oral and written assignments in addition to a special seminar project, designed by students in close consultation with instructors. Open to juniors and seniors only.

**RES 0395 Internship in Russian and East European Studies**

Candidates work a minimum of eight hours per week during the semester either for the Russian, East European and Central Asian Studies Program director, helping with publicity, coordination, and public events, or for an organization or business in the area doing work in Russia, Eastern Europe, or Central Asia. Under the direction of a faculty member in Russian, East European and Central Asian studies, interns regularly report on their work and write an evaluation of the experience at the end of the summer. The internship is available only to juniors and seniors seeking a minor in Russian, East European, and Central Asian studies.

</tr>
</thead>
<tbody>
<tr>
<td>Select five courses in Russian, East European, and Central Asian Studies</td>
<td>15</td>
<td></td>
</tr>
</tbody>
</table>
Independent study and internships are encouraged, and can be substituted for any course with the approval of appropriate faculty and the program director. Students are also encouraged to apply for a junior semester or year abroad in Russia, Central or Eastern Europe, or Central Asia from a wide range of affiliated programs, including American Councils (St. Petersburg), the Consortium on International Educational Exchange (Prague, Budapest, St. Petersburg, Yaroslavl), and Fairfield’s own programs at St. Petersburg’s Herzen University, the St. Petersburg State University of Economics and Finance, Pomor University (Arkhangelsk), Cherepovets State University (Cherepovets), Immanuel Kant University (Kaliningrad), Kazakhstan, or Kyrgyzstan.

Sociology and Anthropology

The Sociology and Anthropology Department at Fairfield University challenges students to critically examine the social and cultural dimensions of the modern world. The program integrates quantitative and qualitative approaches to understand and engage major social problems faced by societies, our own and others.

Sociology is the scientific study of human society and social behavior. It seeks to understand why individuals form groups and how membership in groups influences a person’s behavior. Why do human beings live in families? Why do the rich act, and even think, differently from the poor? What makes some people break social rules and others obey them? What holds societies together? Why do they sometimes break apart? Why do all societies change over time? These are questions that sociologists ponder.

Anthropology asks similar questions, while emphasizing cross-cultural, interdisciplinary and longer-term perspectives. The discipline includes four subfields: biological anthropology, archaeology, linguistics, and cultural anthropology. This integrative and comparative approach highlights patterns of similarity and difference among human groups and helps people understand their own practices and those of others in a broader cross-cultural and historical context.

The department offers two majors and two minors. Students may choose the sociology major or the joint sociology-anthropology major. For minors, students pursue a sociology minor or an anthropology minor.

Sociology and anthropology students are supported by a committed faculty, dedicated to developing their knowledge of these disciplines. Sociology and sociology-anthropology majors at Fairfield University begin their study by taking several fundamental courses that provide them with an understanding of the basic concepts and methodologies of the field. Students build on this foundation by selecting from a wide variety of elective courses. The diversity and flexibility of the curriculum provides unique opportunities for majors and minors to work with faculty to clarify their career goals and build an excellent foundation for graduate school, or for finding careers in fields such as business, marketing and communication, criminal justice, social work, health services, and education.

<td>Who are we, where do we come? Why is life unfair, and why do intolerance, poverty and inequality persist? Anthropologists hold no monopoly on truth or explanation, but they do employ a wide range of methods to explore what it means to be human. In this introductory anthropology course we survey the four sub-fields that comprise this multi-disciplinary science: biological anthropology, archaeology, sociocultural anthropology, and linguistics. Over the course of the semester, we will explore what anthropology and its sub-fields contribute to our understanding of ourselves, our histories, and our world.</td>

<td>This seminar-style class explores biological anthropology to examine the dynamic relationship between health, biology, and culture. Across cultures, geography, and time, we uncover the underlying processes that inhibit or enhance human health. From the biology of stress to the eradication of tuberculosis and Ebola, we'll see biological anthropology's invaluable contributions to modern medicine, public health, and global health management. Students will learn theoretical and applied approaches to understand the evolution and ecology of disease; human development and metabolism; and sexuality and gender; as well as health policy and medical practice (in terms of cultural universals, differences, and disparities). This course meets the core natural science requirement and not the social science requirement.</td>

<td>Prerequisite: Junior standing. This course provides students with an overview of refugee movements with a focus on cultural encounters across the world. Students will focus on the social integration and identity adjustments of refugees in their host communities and/or country. The course will also allow students to learn about cultural adjustments of both refugees and host communities whether it is in the United States, Europe, Middle East, or Africa. Students will explore how features of the specific societies serve to inhibit or augment cultural adjustments and meet the new needs and realities of populations in movement.</td>

</tr>
</tbody>
</table>
AY 0163 Culture and Inequality  3 Credits
Attributes: PJST Peace and Justice Studies
This course focuses on the concepts of "culture" and "inequality," two terms employed to deal with "difference" in a range of intriguingly different and morally charged ways. The course explores recent work in anthropology, economics, and sociology using culture and/or inequality as a lens through which to view various issues in contemporary social theory. In the process, students work to discover what kind of lens culture and/or inequality provides, how our implicit understandings of these ideas shape how we think about the world, and how we might better use such ideas to do our thinking.

AY 0168 Sex, Gender, and Sexual Orientation  3 Credits
Attributes: WDIV World Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Through a comparison of selected Asian, Middle Eastern, African, and Native American societies, this course explores the ways that culture can mold the biological facts of sexual difference into socially accepted behavior, creating two, and sometimes more, genders. Topics include the allocation of work, power, and prestige between men and women; the belief systems that legitimate gender roles; and some possible causes for the wide variation that exists among cultures.

AY 0175 Sustainable Development: Anthropological Perspectives  3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective
This course examines the concept of sustainability from anthropological perspectives. With a focus on the contested meaning of both "sustainability" and "development," students will grapple with various theoretical, methodological, and ethical perspectives on how to build a just future on a planet with finite resources. Learning is practice driven; students write blogs and reflective essays, they learn ethnographic research methods, and pursue independent research on sustainability in our campus community. Students integrate experiential learning with readings on ecology and economic development to critically examine the values, assumptions and data that underpin different perspectives on social change and the future of humankind.

AY 0180 Grant Writing for the Social Sciences  3 Credits
Attributes: EVAP Environmental Studies: Applied Professional Skills, EVPE Environmental Studies Elective
This course will introduce students to the practicalities of international research, with particular emphasis on qualitative social science methods and the eventual aim of producing a viable grant proposal. The course will be taught from an anthropological perspective, but the skills developed should be broadly applicable to the social sciences and humanities.

AY 0189 Theory and Practice in Anthropology  3 Credits
This course focuses on the production of ethnographic knowledge, a form of intellectual inquiry at once art and science, evocation and explication. Emerging in the 20th century as the preeminent form of anthropological expression, ethnographies are one of the few scholarly means of understanding other cultures and societies in meaningful depth. At the same time, ethnographies reveal as much about the disciplines and societies in which they are produced as they do about distant "others."

AY 0199 Philosophy and Economic Anthropology  3 Credits
Attributes: PMMP Philosophy Major: Major Philosopher
Prerequisite: PH 0101.
This course examines the economy from philosophical and anthropological perspectives. We will investigate why people produce and exchange things, why they seek to amass things in some circumstances and give them away in others, and how our modern understandings of value, debt, and rationality emerged.

AY 0200 Anthropological Research Methods  3 Credits
Attributes: HASM Humanitarian Action Minor Skills/Method Course
How does anthropological field research help us understand our lives, our communities, and our world? How might anthropological research methods help you explore and pursue your own passions or professional ambitions? In this course students conduct original anthropological field research, write an original journal article manuscript, and they develop an online portfolio to share results and conclusions beyond our classroom. Over the course of our semester, students learn and practice techniques for designing, proposing, conducting, analyzing, and sharing anthropological field research. The class is divided into four sections: Developing Your Research Question, Your Anthropology Toolkit, Anthropological Analysis and Writing, and a final Research Symposium.

AY 0390 Special Topics (Shell)  3 Credits
Special Topics in Anthropology provides an opportunity for students and faculty to explore compelling themes that are not covered in the department's regular course rotation and curriculum.

AY 0390C Special Topics: Anthropology and Education  3 Credits
This course addresses key topics in anthropology and education including: the study of schools and school systems, informal education, cross-cultural early childhood education, race, class, and the production/reproduction of inequality, (dis)ability, communication, and technology. Course readings focus on classic and contemporary anthropology and education texts including philosophies of education, ethnographies, and accounts of informal education in families, neighborhoods, and communities. Course requirements will be student-driven to expand upon and enhance research interests in a collaborative environment.

AY 0399 Independent Study  1-3 Credits
Independent studies experiences provide intellectually curious students with opportunities to take the reins of their education, and delve deeply into the ideas and subjects that truly inspire them. Upon request and by agreement of an individual professor in the department, students undertake a one-semester independent study on a defined research topic in anthropology.

Sociology
SO 0011 Introduction to Sociology  3 Credits
This introduction to sociology provides students with a sense of sociology's orientation; its particular way of looking at human behavior in the context of people's interaction with each other. The course emphasizes the kinds of questions sociology asks, the methods it uses to search for answers, and how it applies the answers to problems of people's everyday lives and issues of social policy.
This course analyzes the dominant ideology and values that have shaped American culture – namely the Protestant ethic – and how and why these values are changing. The course also analyzes major institutional trends that have transformed and continue to transform America and the modern world - bureaucratization, industrialization, urbanization, the rise of the business corporation, science, and technology - and the effects of these institutions in producing new personality types, mass society, and rapid social change. The course provides a macro-sociological framework.

SO 0142 Sociology of the Family
Attributes: ASSO American Studies: Sociology, WSGC Women, Gender, and Sexuality Studies: Gender Component

The family is a basic social institution of all societies. This course, which examines family systems as they exist in other cultures and in times past, focuses on understanding the contemporary American family system. Students consider American patterns of dating, mate selection, sexual behavior, marriage, parenting, and aging, as well as alternative life styles and family instability.

SO 0144 Sociology of Sexuality
Attributes: ASSO American Studies: Sociology, WSGF Women, Gender, and Sexuality Studies: Gender Focused

This course explores the social construction of human sexual behavior, examining the influence of social institutions on sexuality, social responses to variations in behaviors, and the organization of sexual identities.

SO 0151 Sociology of Religion
Attributes: ASSO American Studies: Sociology, UDIV U.S. Diversity

This course offers a combined theoretical and empirical treatment of the sociology of religion, the character of religious institutions, the relations of religious institutions with other institutions in society, and the internal social structure of religious institutions. It gives particular attention to the process of secularization in the modern world and the crisis this poses for traditional religion.

SO 0161 American Class Structure
Attributes: ASGW American Studies: Gateway, ASSO American Studies: Sociology, EDCG Educational Studies Cognate, EDDV Educational Studies Diversity, PJST Peace and Justice Studies, UDIV U.S. Diversity

This course examines the roots and structure of class in the United States and the consequences of this hierarchical arrangement on everyday life. It focuses primarily on social class; however, the dynamics and consequences of social class cannot be fully understood without addressing the complex interconnections between class, race, and gender.

SO 0162 Race, Gender, and Ethnic Relations

This course analyzes sociological and social psychological dimensions of race relations, ethnic interaction, and the changing role and status of women. It focuses on the American scene but also examines problems of women and minorities in other parts of the world and their importance for world politics. It also considers what sociologists and social psychologists have learned about improving dominant/minority relations.

SO 0163 Urban/Suburban Sociology. NYC
Attributes: ASSO American Studies: Sociology, BSCC Black Studies Component Course, BSJS Black Studies: Social and Behavioral Sciences

This course explores the nature of the city and growth of metropolitan regions in the contemporary world; the ecological approach and the use of demographic data in the analysis of modern urban communities; social organization of metropolitan regions and the emergence of urban-suburban conflict; big-city politics, community control, and regional government as dimensions of organization and disorganization in city life; and city planning and urban development at local and national levels as efforts to solve the urban crisis.

SO 0165 Race, Cities, and Poverty
Attributes: ASSO American Studies: Sociology, BSFC Black Studies Focus Course, BSJS Black Studies: Social and Behavioral Sciences, EDCG Educational Studies Cognate, PJST Peace and Justice Studies, UDIV U.S. Diversity

The geography of cities is in constant flux. People move in and out, businesses open and close, city government institutes social policy in response to existing changes in different communities. Many of the changes in cities have been influenced by racial-ethnic and economic dynamics. In this course we will examine the ways race has shaped our perceptions of and responses to community. Why are urban areas "racialized"? Why does talk of the underclass imply black Americans and Latinos? We will focus primarily on black Americans, but will also consider white ethnic groups and other ethnic groups in discussion. In our examinations we will focus on case studies of urbanization and race such as post-Katrina New Orleans, southern migration to Chicago, and Bridgeport.

SO 0166 Feminism, Gender, and Everyday Life
Attributes: ASGW American Studies: Gateway, ASSO American Studies: Sociology, PJST Peace and Justice Studies, WSGF Women, Gender, and Sexuality Studies: Gender Focused

This course provides an introduction to the study of gender through a feminist lens. The central themes of the course are the changes and continuities of gender roles within the United States, the social processes that influence our gender identities, and the connections between gender, power, and inequality. The course addresses the ways in which the media, popular culture, work, and schools have been pivotal sites for the creation and maintenance of gender performances, and explores sites of resistance in art and activism. The course pays special attention to the ways in which race, class, and sexualities intersect processes of gender relations and social change.

SO 0169 Women: Work and Sport
Attributes: ASSO American Studies: Sociology, PJST Peace and Justice Studies, WSGF Women, Gender, and Sexuality Studies: Gender Focused

Sex and gender stratification exists in most areas of everyday life throughout American society. This course concentrates on women in the workplace and in sport. It analyzes women's occupational status and the accompanying roles from the colonial period to the present from a variety of theoretical perspectives. Since sport is a microcosm of society, the course treats the perceptions and experiences of female athletes in 20th-century America as a mirror of the inequality within the larger world.

SO 0171 Criminology
Attributes: ASSO American Studies: Sociology

This course examines crime rates and crime trends in the U.S. Theories of criminal behavior are critically analyzed. It also explores victimless crime, white collar crime and organized crime. Societal responses to crime and criminals are addressed.
SO 0175 Sociology of Law
Attributes: ASSO American Studies: Sociology
Based in the relationship of law and society, this course explores the meaning of law, civil disobedience, and other challenges, and law as an agent of social change. It takes as its major theme legal equality versus social inequality and analyzes this theme in terms of discrimination against the poor, women, and various racial groups. Students discuss the role of lawyers, the police, and the courts in American society in the second half of the semester.

SO 0179 Death Penalty in America
Attributes: ASSO American Studies: Sociology, PJST Peace and Justice Studies
This course is an in-depth analysis of capital punishment. The history of the death penalty and its contemporary status in the U.S. is explored. Public opinion and the decisions of the courts, prosecutors, and juries are addressed. Some of the questions raised include the following: Is the death penalty a deterrent? Is it racially biased? Does it victimize the poor? Are the innocent ever convicted and executed? What sociological factors influence clemency decisions? How is the U.S. position on the death penalty perceived by the international community?

SO 0184 Population: Birth, Death, and Migration
Attributes: HSSS Health Studies: Social Science, WDIV World Diversity Demography, the study of population, is the basis of this course. It examines the causes and consequences of population change. The course addresses global population problems and those faced by the United States. Students analyze real demographic data during weekly demographic techniques sessions.

SO 0185 Introduction to International Migration
This course examines the causes, processes, and concerns of international migration, which are explored through the use of case studies that include a wide range of countries from different world regions. These case studies include international migrants, such as refugees, labor migrants, and undocumented migrants. In addition to studying the migrants and the reasons for their international movement, participants have the opportunity to discuss opposing perspectives on the immigration policies of developed countries.

SO 0188 Contemporary Latin American and Caribbean Society
Attributes: LCEL LACS Minor: Elective
This course introduces the basic political, economic, and sociological elements of contemporary Latin America and the Caribbean. It begins with an overview of the historical events that have shaped the region. While examining the region as a whole, this course also emphasizes the political, economic, and cultural diversity that characterizes Latin America and the Caribbean. Drawing from several disciplines, while emphasizing sociological approaches, this course explains some of the positive, as well as the more dubious events in contemporary Latin American and Caribbean society. Topics include popular culture, migration, political change, regional integration, urbanization, gender, and inequality, among others. Case studies will be selected for more detailed discussion based on current events.

SO 0189 Sociology of Europe
Attributes: LCEL LACS Minor: Elective, WDIV World Diversity
This course introduces the basic political, economic, and sociological elements of contemporary Europe. It begins with an overview of historical events that have shaped the region. While examining the region as a whole, this course also emphasizes the political, socioeconomic and more recent cultural diversity that characterizes the European continent. Topics include political developments and regional integration such as the creation of the European Union, geopolitical dilemmas, popular culture, migration, social change, public policies, inequality and secularization. A comparative macro-sociological framework will be used to discuss differences and similarities with contemporary American society.

SO 0190 Globalization
Attributes: ASSO American Studies: Sociology
The single most powerful force transforming the world in which we live is the accelerating process of globalization. Information from the Internet, ideas, technology, products, services (and even people, the slowest to move) are all moving within and across national boundaries every hour of every day. As Joseph Stiglitz, former chief economist for the World Bank, puts it, "Globalization is like a giant wave that can either capsize nations or carry them forward on its crest." The goal of this course is to begin to understand the complex causes and effects of globalization. What's driving it and what kind of future is it likely to bring?

SO 0191 Social Change in Developing Nations
Attributes: LCEL LACS Minor: Elective, WDIV World Diversity
This course examines the major societal changes occurring in developing countries, seeking answers to two basic questions: To what extent are the current modernization efforts of Third World nations comparable to the earlier experience of the United States and Western Europe? How do existing inequalities and dependencies between developed countries and Third World nations affect their chances of modernizing? Students complete a semester-long Web-based study of a particular country.

SO 0192 Social Work: An Introduction
Attributes: HSSS Health Studies: Social Science
This overview of the social work profession emphasizes the knowledge base, theories, values, and skills that underlie generalist social work practice with individuals, groups, families, and communities. Students consider a range of social problems and social policy concerns as well as the impact of these issues on diverse client populations. The course also conducts a related exploration of the role of the social worker in agency settings and the various fields of practice.

SO 0193 History of Social Welfare
Attributes: ASSO American Studies: Sociology, HSSS Health Studies: Social Science, PJST Peace and Justice Studies
The course explores the development of the social work profession within the context of the evolution of social welfare in the United States, emphasizing the political, economic, social, and philosophical forces that have forged social welfare policy and helped shape the social work profession. Exploration of the importance of divisions in American society regarding social justice and issues of class, race, ethnicity, and gender provide a framework through which to view current controversies such as welfare reform and the feminization of poverty.
SO 0194 Sociology of Education 3 Credits
Attributes: BSFC Black Studies Focus Course, BSSS Black Studies: Social and Behavioral Sciences, EDCG Educational Studies Cognate, EDDV Educational Studies Diversity, UDIF U.S. Diversity
This course introduces students to sociological perspectives on education. We will focus on the structure, practices, content, and outcomes of schooling in contemporary society. Throughout the semester, we address three fundamental questions. What are the primary goals of American education? Why are there systematic patterns of race, class, and gender inequality in education? How can we use the sociological lens to understand, contextualize, and alleviate educational problems in the real world? Drawing upon readings dealing primarily with American education, we discuss how educational experiences influence important life outcomes including lifetime earnings, health status, and interaction with the criminal justice system.

SO 0221 Statistics: Social and Political Data Analysis 4 Credits
Attributes: EVAP Environmental Studies: Applied Professional Skills
Prerequisite: SO 0011.
This course provides a basic introduction to the role of statistical analysis in understanding social and political data, with an emphasis on actual data analysis using the University's computer facilities. It uses an extensive social and political data archive including 2000 Census data, political polls, and national survey data for computer analysis.

SO 0222 Methods of Research Design 4 Credits
Attributes: ASSO American Studies: Sociology, EVAP Environmental Studies: Applied Professional Skills
Prerequisite: SO 0011.
This course examines the nature and function of scientific methods as applied to the field of sociology, emphasizing survey research design and secondary analysis of existing data. Student teams design and conduct research projects as part of the course assignments.

SO 0228 Classical Social Theory 3 Credits
Prerequisite: SO 0011.
This course in sociological theory concentrates on the writings of Smith, Marx, Durkheim, and Weber, placing their theories in the context of the social, economic, political, and intellectual turmoil of the late 18th and early 19th centuries. The course includes a focus on the development of sociology as a discipline in the early 20th century and the enduring concerns of the perspective to analyze "modern" industrialized societies.

SO 0229 Contemporary Social Theory 3 Credits
Prerequisite: SO 0011.
This course focuses on contemporary American and European sociology and its development after 1945, examining critical social theory, structural functionalism, symbolic interactionism, ethnomethodology, feminism, world systems theory and post modernism. Contemporary application is a central concern in the course.

SO 0279 Criminal Justice System Seminar 3 Credits
Attributes: ASUP American Studies Upper Level, PJST Peace and Justice Studies
This seminar explores in detail the workings and problems of the criminal justice system in the United States. In addition to investigating the sources of criminal behavior, the course focuses on the arraignment process, probation, the trial, sentencing, prison reform, and parole.

SO 0390 Special Topics (Shell) 3 Credits
Special Topics in Sociology provides an opportunity for students and faculty to explore compelling themes that are not covered in the department’s regular course rotation and curriculum.

SO 0397 Field Work Placement 3 Credits
In this one- or two-semester internship program, students are placed in professional and service settings where they work under supervision and acquire experience in the area chosen for placement. In addition, they integrate their experiences with the intellectual foundation acquired in their academic courses. Open to senior majors only.

SO 0398 Field Work Placement 3 or 6 Credits
In this one- or two-semester internship program, students are placed in professional and service settings where they work under supervision and acquire experience in the area chosen for placement. In addition, they integrate their experiences with the intellectual foundation acquired in their academic courses. Open to senior majors only.

SO 0399 Independent Study 1-3 Credits
Upon the request and by agreement of an individual professor in the department, students undertake a one-semester independent study on a defined research topic or field.

Sociology and Anthropology Major

Requirements

For a 30-credit joint major in Sociology and Anthropology, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AY 0010</td>
<td>Introduction to Four-Field Anthropology</td>
<td>3</td>
</tr>
</tbody>
</table>
Sociology Minor

For a 15-16 credit minor in sociology, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SO 0011</td>
<td>Introduction to Sociology</td>
<td>3</td>
</tr>
<tr>
<td>SO 0222</td>
<td>Methods of Research Design</td>
<td>3-4</td>
</tr>
<tr>
<td></td>
<td>or SO 0228 Classical Social Theory</td>
<td></td>
</tr>
<tr>
<td>Select 3 elective sociology and anthropology courses $^1$</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 15-16

$^1$ May include 3 credits (one course) in anthropology.

Anthropology Minor

For a 15-credit minor in anthropology, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AY 0010</td>
<td>Introduction to Four-Field Anthropology</td>
<td>3</td>

<tr>
<td>or AY 0111 Cultural Anthropology</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select 3 electives in anthropology $^1$</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 15

$^1$ May include 3 credits (one course) in sociology.

Visual and Performing Arts

The Major

Visual and Performing Arts offers six different programs of study. Students may choose to major in: Art History (30 credits); Film, Television, and Media Arts (39 credits); Music (30 credits); Studio Art (33 credits); and Theatre (33 credits). We also offer an interdisciplinary minor in Graphic Design.

The Minor

A minor in Visual and Performing Arts can be obtained upon completion of 18 credits in one of the five areas of concentration: Art History; Film, Television, and Media Arts; Studio Art; Music; or Theatre. The minor in Graphic Design is an interdisciplinary 18-credit minor. For further information about the curriculum and areas of concentration, consult the program directors:

Art History: M. Rose
Film, Television, and Media Arts: L. Porter
Graphic Design: L. Porter
Music: B. Torff
Studio Art: M. Rose
Theatre: L. Porter

Department Mission and Goals

The arts are an integral part of human existence, and study of the arts is a hallmark of a liberal education. Students in the Visual and Performing Arts Department acquire knowledge of the history, context, and theory of the interaction of art, society, and the self. They learn to communicate, produce, collaborate, meet deadlines, think critically, creatively problem
solve, manage time, and be responsible to others, all while participating in life's ongoing cultural conversation.

**University Core Course Requirement**
The core curriculum requires that all Fairfield undergraduate students complete two semesters of coursework in Visual and Performing Arts. Our courses are divided between those that cover material from an historical/theoretical point of view, and those that involve the use of applied skills with which you actually make or perform works of art. The core curriculum requires that at least one of your two courses in this department be a history/theory course.

**Department Core Learning Outcomes**

**History**
- Students will have a deep understanding of the historical, theoretical, and critical constructs of a specific arts discipline.
- Students will gain factual knowledge about works of art and will be able to identify and analyze them in terms of discipline-specific concepts and language, as well as style, genre, and historical context.
- Students will demonstrate knowledge of discipline-specific artistic traditions, as well as the fundamental principles, generalizations, and theories behind those artistic traditions.
- Students will apply course material by analyzing and evaluating works of art, both in speaking and in writing.
- Students will develop, through the study of art, insights into how art affects and reflects cultures and contexts, providing students with opportunities to access, express, and integrate the meaning of the arts across a variety of disciplines.

**Applied**
- Students will have a deep understanding of the creative processes involved in making art and develop a portfolio of their own artistic creations.
- Students will create a portfolio of their own work, which captures not only the ongoing process of creation and revision, but also demonstrates students' developing mastery of discipline-specific artistic techniques.
- Students will be able to critically evaluate their own artistic output, as well as that of others, both in speaking and in writing, using the evaluative norms and competencies of their art, as well as using discipline-specific concepts, language, and techniques.
- Students will develop the essential means for expressing ideas, experiences, feelings, and deepest beliefs, both of themselves and of the wider community.

**Additional Fees**
Studio Art courses require a materials fee. There are also separate charges for private music lessons. Students enrolling in these courses will be billed an additional fee per course on their term bill.

**Facilities and Resources**
- The Bellarmine Museum of Art stewards a rich collection of paintings, sculptures, and decorative art objects, including the Samuel H. Kress Collection of Italian Paintings, a large selection of historic plaster casts, a range of non-Western art objects, and a loan of twenty objects from the Metropolitan Museum of Art/The Cloisters Museum. The BMA mounts up to five temporary exhibitions each year.
- The Thomas J. Walsh Gallery features temporary exhibitions of modern and contemporary art.
- Experimental art galleries feature student work.
- Our historic plaster cast collection began in 1991 and it is comprised of long-term loans and gifts from the Metropolitan Museum of Art, representing masterpieces from ancient Greece, Rome, and Renaissance Italy. Additional gifts from the Metropolitan Museum of Art, the Acropolis Museum, and individual donors, have expanded the collection to eighty casts. The collection provides students in the Art History and Studio Arts programs, and Classical Studies, additional opportunities for study in the Bellarmine Museum of Art and the casts rooms in Loyola Hall.
- The Mutrux Visual Resources Collection (VRC) is the primary visual teaching resource and laboratory for the Art History Program, with state of the art computer and digital imaging equipment. The VRC has a burgeoning digital image library used by all of the faculty many of whom also access images through the university's subscription to ARTstor, an online repository of over 1,000,000 digital images.
- A computer-music lab with state-of-the-art music-based computer software.
- A recording studio.
- The Aloysius P. Kelley prosenium theatre and the Wien Experimental Black Box theatre in the Regina A. Quick Center for the Arts host frequent student performances presented by the music and theatre programs.
- The Media Center in Xavier Hall contains exceptional equipment and facilities for students in Film, Television, & Media Arts, including an instructional television studio, a production television studio, a satellite uplink truck, and Campus Television Network head-end. Production capabilities are supported by state-of-the-art computer-based digital graphic design and editing technology.
- The PepsiCo Theatre, with its intimate theatre, dance studio, and design studio, is the home of Theatre Fairfield, the production wing of the theatre program.

**Internships**
Visual and Performing Arts majors are eligible for internship programs in the local and regional art communities. Students may receive credit for gaining valuable practical experience in a variety of activities. Students have interned at Sotheby's, Atlantic Records, Viacom and many other sites in both New York City and Connecticut. There are also internships at the University's Bellarmine Museum of Art, Thomas J. Walsh Art Gallery, local galleries, museums, historical societies, television and radio stations, art studios, professional theatres, and production companies.

**Performance Opportunities**
In addition to its regular courses, the Music Program sponsors a number of student performing groups including the Fairfield University Orchestra and Jazz Ensemble. Members of these performing groups receive one credit for each semester. Students may apply up to six of these credits toward a major or minor in music; however, these credits do not count towards the 38 three-credit courses required for graduation. The Fairfield University Glee Club, Chamber Singers, and Pep Band are non-credit performing organizations sponsored by Student Affairs.

Theatre Fairfield is the academic production wing of the Theatre Program. The annual season includes professionally directed and designed productions; performances that feature the work of advanced directing, acting and design students; and independent projects created by junior
and senior majors. Participation in Theatre Fairfield productions is open to all members of the University community.

**Programs**

- Art History and Visual Culture Major (p. 238)
- Concentration in Visual Arts Administration
- Art History and Visual Culture Minor (p. 239)
- Film, Television, and Media Arts Major (p. 240)
- Film, Television, and Media Arts Minor (p. 241)
- Graphic Design Minor (p. 241)
- Music Major (p. 242)
- Music Minor (p. 243)
- Studio Art Major (p. 243)
- Studio Art Minor (p. 244)
- Theatre Major (p. 244)
- Theatre Minor (p. 245)

**Courses**

**Art History**

**AH 0010 Origins and Transformations in Western Art**

*Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course*

From the mysterious depths of Paleolithic cave painting to the soaring heights of Gothic cathedral vaulting, this course surveys the early history of Western art. The course begins with the origins of art-making in prehistoric, Mesopotamian, Egyptian, Greek, and Roman cultures before viewing the transformations of these ancient arts traditions in early Christian and medieval societies. The course offers students a working vocabulary with which to compose visual analyses of works of art and evaluate them in a social and historical context. One class takes place at the Metropolitan Museum of Art in New York City.

**AH 0011 Visual Culture Since 1400: Expression and Experimentation**

*Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course*

This course surveys the history of painting, sculpture, and architecture from the 15th century to today, in Europe and the United States, including a review of classical and medieval antecedents. A central focus of this class is the study of the original contexts of works of art; most of the art we will study this semester was not made to be looked at in a museum or gallery. By seeking the original context of a work of art, one can begin to understand why, how, by, and for whom art was created and how it fits into the larger picture of human creativity. Students will visit the Metropolitan Museum of Art in New York City.

**AH 0013 Art of Africa, the Caribbean, and the Americas**

*Attributes: BSCC Black Studies Component Course, GDAH Graphic Design: Art History, LCEL LACS Minor: Elective, VPCH Visual and Performing Arts Core: History Course, WDIV World Diversity*

This course introduces major monuments of the arts of Africa, including architecture, painting, sculpture, ceramics, and prints. Following a roughly chronological progression spanning over three millennia, the course emphasizes contact between African civilizations, including South, Southeast, Central, and East Asia, as well as artistic exchanges between Asia and the West. Foci include: ancient funerary arts, the development of Buddhist art throughout the continent, and secular arts associated with imperial courts and the rise of cities. The course highlights collections of Asian art at the Bellarmine Museum, Yale University, and in New York City.

**AH 0014 Art of Asia**

*Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course, WDIV World Diversity*

This introductory course surveys the major periods and key monuments in the history of architecture — largely in the West — from antiquity to the present. Topics include Greek and Roman temples and civic architecture; Medieval mosques and cathedrals; Renaissance and Baroque cities and their monuments; Early Modern factories and gardens; Machine Age museums and houses; and contemporary architectural developments of all sorts. Students will work with actual buildings in writing assignments, and learn the skills necessary to critique and interpret the built environment of the past and present in the United States and beyond.

**AH 0015 History of Architecture**

*Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course*

This introductory course surveys the major periods and key monuments in the history of architecture — largely in the West — from antiquity to the present. Topics include Greek and Roman temples and civic architecture; Medieval mosques and cathedrals; Renaissance and Baroque cities and their monuments; Early Modern factories and gardens; Machine Age museums and houses; and contemporary architectural developments of all sorts. Students will work with actual buildings in writing assignments, and learn the skills necessary to critique and interpret the built environment of the past and present in the United States and beyond.

**AH 0102 Art of East Asia**

*Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course, WDIV World Diversity*

This course surveys the art and architectural history of China, Korea, and Japan, emphasizing cultural and artistic contact between these cultures. Periods of focus include the Shang, Han, Tang, Song, and Qing dynasties in China; the Jōmon, Nara, Heian, Kamakura, Edo and Meiji periods in Japan; and the Three Kingdoms period, Goryeo, and Joseon dynasties in Korea. The course highlights collections of Asian art at Yale University and in New York City, incorporating special exhibitions of East Asian art relevant to the course.
AH 0109 Jewish Art: Moses to Modernity 3 Credits
Attributes: GDAH Graphic Design: Art History, JST Judaic Studies Minor, VPCH Visual and Performing Arts Core: History Course
The earliest known written description of the Jewish people is a visual record on an ancient victory monument. Dated from the 13th century B.C.E., a carved stele dedicated to Pharaoh Merneptah presents a hieroglyphic relief inauspiciously boasting: "Israel is laid waste; his seed is no more." Tracing 4,000 years of Jewish art, culture, and ritual, this course is a panoramic overview of visual expression of a people wandering through six continents, innumerable styles and artistic identities. How did the ineffable theophany at Sinai spark the complexity of Judaism’s struggle with Greco-Roman paganism versus attempts at capturing the “spirit of God with wisdom and discernment and the knowledge of workmanship into a living art?

AH 0111 Greek Art and Archaeology 3 Credits
Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course
This survey covers the major developments in architecture, sculpture, and painting from the time of Homer to the collapse of the Hellenistic world. The course considers the formation of the Pan-Hellenic sanctuaries of Olympia and Delphi in the geometric and archaic periods and the rise of democracy under the leadership of Pericles in Athens, culminating in the Parthenon of the high classical period and the creation of an empire under Alexander the Great. Students explore the legacy of Greek achievement in the context of its impact on the Roman world and later art. The course emphasizes objects in area museums and includes field trips.

AH 0112 Etruscan and Roman Art and Archaeology 3 Credits
Attributes: GDAH Graphic Design: Art History, ISIF Italian Studies: Italy-Focused, VPCH Visual and Performing Arts Core: History Course
In this course we will examine art of the Roman Republic and empire, beginning with an introduction to Etruscan Italy before Roman conquest. The major themes of the course are: society as reflected in portraiture; religion as communicated in temple and domestic architecture and decoration; the organization and architecture of urban spaces; the architecture and decoration of houses. These themes will also be related to the art of other places and times, including that of the ancient Greeks and our own society. The course emphasizes objects in area museums and includes trips to world-class museums in our region.

AH 0113 Art and Archaeology of Ancient Egypt: Images for Eternity 3 Credits
Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course, WDIV World Diversity
In this course, students will examine the art of ancient Egypt, from the unification of the pre-historic cultures of the Nile Valley to the Roman conquest. We focus on thematic examinations of various aspects of ancient Egyptian culture, as illustrated through the art, monuments, artifacts, and anthropological evidence that remains in the archaeological record today. Throughout the course, students will analyze and discuss the influence of scholarly biases and issues in cultural heritage management, and museum collecting ethics. By examining the life cycles of these works, from first creation to modern reinterpretation, students will understand that these works not only reflect a society as complex as our own but also serve an important role in contemporary culture. Students will visit the Metropolitan Museum of Art.

AH 0120 Medieval Art of Western Europe 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, FREN French Course Taught in English, GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course
This introduction to medieval art and architecture in Western Europe, from its Roman, Jewish, and Early Christian sources through the Gothic period, explores continuity and change in art and its relationship to society and culture. We will consider the physical and sensory original environments of the artworks, including sound, smell, and touch. Other topics include the relationship of belief and ritual to religious imagery and architecture, the impact of imperial patronage on art, and the influence of Islam on Western medieval art and iconography. The class will use material from the Fairfield University Art Museum’s loan collection from the Metropolitan Museum of Art and the Cloisters, and will take a field trip to the Metropolitan Museum of Art.

AH 0121 Celtic and Early Irish Art 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course
This course traces Celtic art from its sources and history on the European continent (1200 B.C.E. to the first century C.E.) to its migration to the British Isles and its subsequent transformation as it interacts with native cultures there, particularly the Irish culture. It examines native Irish art from the stone circles and passage graves of 3000-2000 B.C.E. to the introduction of the Celtic style and the golden age of Ireland’s conversion to Christianity. Rich new art forms such as illustrated bibles, jeweled chalices and reliquaries, high crosses, and the introduction of monastic and ecclesiastical architecture will be discussed. The course also considers the medieval revivals in the 19th and 20th centuries and includes a first-hand examination of Fairfield University’s facsimile of the Book of Kells.

AH 0130 Early Renaissance Art in Italy 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, GDAH Graphic Design: Art History, ISIF Italian Studies: Italy-Focused, VPCH Visual and Performing Arts Core: History Course
In this panoramic overview of Italian art, culture, and society between 1300 and 1520, we explore the city of Florence as the ”cradle of a new world.” From its art workshops and urban planning studios, the monumental Duomo of Brunelleschi rises to symbolize a new era for human creativity. Viewing masterpiece artworks, we discover the exciting shift from medieval formalism to a new aristocratic elegance, opulence, and classical humanism. In this interdisciplinary humanities course, we contrast and compare aspects of Florentine culture as symbolized and visualized in the arts. Artworks depict banking, science, engineering, diplomacy, women’s traditional roles of domesticity in the court, and a new appreciation for clothing fashions. Course includes visits to world-renowned area museums allowing students to study first-hand prime examples of Florentine art. No prerequisite beyond a curiosity to learn how Renaissance art of the past enriches our lives in the present.

AH 0131 High Renaissance and Mannerism in Italy 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, GDAH Graphic Design: Art History, ISIF Italian Studies: Italy-Focused, VPCH Visual and Performing Arts Core: History Course
This course examines the achievements of artists during one of the richest art-historical eras. We trace the rise of artistic giants such as Leonardo da Vinci, Michelangelo, and Raphael and the socio-cultural contexts in which they worked. Innovations of Mannerists such as Pontormo, Bronzino, and Correggio will be considered, as well as the reaction to these artists in the wake of religious reform.
AH 0140 Baroque Art  
Attributes: CAOT Catholic Studies: Non-Religious Studies, GDAH Graphic Design: Art History, ISIF Italian Studies: Italy-Focused, VPCH Visual and Performing Arts Core: History Course  
The 17th century in Europe was marked by profound shifts in politics, religion, and culture, which are reflected in the art produced during then. This course surveys painting, sculpture, architecture, and urbanism of the Baroque era, with a focus on Italy, Spain, and France. Among the themes explored are: the impact of religious reform on the visual arts of Catholic lands; the notion of classicism as an artistic ideal; the role of academies and the market in promoting the arts; the popularity of portraiture and self-portraiture; and the shaping of cities as works of art.

AH 0152 Modern Art  
Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course  
In this course we explore a diverse range of art works and issues, which were central to the practice of Modern Art in Europe and the United States from the mid-nineteenth century to the mid-twentieth century. This course focuses on the artists who challenged the institution of Western art, re-interpreted its norms, and used Modernism as both subject and context. Class revolutions, industrialization, urbanization, imperialism, and capitalism are addressed through a close study of various artists and artworks. The enormous impact of European Modern Art on the rest of the world is considered with the examination of Orientalism, primitivism, and "colonial" modernisms. A variety of sources such as novels, philosophical and political texts, films, newspapers, and music are used to inform our understanding of these -isms and Modern Art.

AH 0164 American Art and Media Culture  
In tracing the themes and artistic statements of American artists, the course takes special notice of unifying national myths such as the Founding Fathers, Manifest Destiny, America as the new Eden, the frontier from the Rockies to the lunar surface, heroes from Davy Crockett to Superman, and America as utopia. Through the masterpieces of Church, Cole, Homer, Eakins, Sloan, Hopper, Pollock, Rothko, Wyeth, Warhol, and the Downtown art scene, the course answers the question: What is uniquely American about American art?

AH 0165 The Black Experience: African-American Art and Criticism in the 20th and 21st Centuries  
This course explores black art and culture in the twentieth century. We will focus on the artworks themselves and, when possible, the artist's dialogue. Events in United States history such as the emancipation from slavery and the Civil War Era, the Harlem Renaissance, Jazz Age, Great Depression, Civil Rights Movements, AIDS crisis of the 80's, and the Los Angeles race riots of the 90's are used as context to understand black art and culture. While art works created by African-American artists are the primary focus, Cuban and Haitian art and artists are also considered. Throughout the course there is a focus on thinking critically when looking at art as well as how to articulate ideas in writing.

AH 0172 History of Photography  
Attributes: GDAH Graphic Design: Art History, VPCH Visual and Performing Arts Core: History Course  
Students will learn the general historical development of photography from the 1830s to the present day. Concentrating primarily on Europe and the United States, this survey examines some of the themes threaded throughout photography's short history: the interrelationships between photography and other arts, the effect of technology on the medium, identity construction by and through photographs, and the tradition of the popular photograph. Social, cultural, and economic issues are considered as well as important photographers and photographic movements. Throughout the course there is a focus on thinking critically when looking at a photograph as well as how to articulate ideas in writing.

AH 0191 Art and Mythologies of Nazi Germany, Fascist Italy, Bolshevik Russia: Comparative Systems & Outcomes  
Attributes: GDAH Graphic Design: Art History, GMEL German Major or Minor Course, GMEN German Course Taught in English, ISIF Italian Studies: Italy-Focused, JST Judaic Studies Minor, VPCH Visual and Performing Arts Core: History Course  
This interdisciplinary approach to the visual Zeitgeist of these major political/nationalist crises in Europe between 1917 and 1945 surveys the visual rhetoric of Nazi Germany, Fascist Italy, and Bolshevik Russia through the widest possible definition of the visual arts. The course includes the traditional fine arts of painting, sculpture, and architecture as well as the mass cultural outlets of film, radio, propaganda posters, and the staging of public events. The class eliminates the distinctions between high and utilitarian mediums of expression; all means of persuasion are fair game. This course allows students to better understand the complexities of these political/nationalist issues; the "window" is the lens provided by the visual arts and mass media. In doing so, students recognize how the symbolic languages of mythology were married to political ideologies and shaped public opinion from the national consciousness.

AH 0192 The History, Theory, and Practice of Museums  
Attributes: VPCH Visual and Performing Arts Core: History Course  
This course focuses on the history and theory of museums, their operations and roles in society and the practical application of museum theory. Students will put the rapidly evolving field of museum studies into a meaningful context while simultaneously gaining a clearer understanding of contemporary industry standards and modes of best professional practice.

AH 0193 Inside Museums and Galleries: Taste, Place, Public Space  
Attributes: VPCH Visual and Performing Arts Core: History Course  
This course explores the interactive role of the curator and the museum and gallery visitor in the dynamic cultural spaces of museums, galleries, and public historic spaces, parks, monuments, etc. We explore the responsibilities, ethics, and educational goals for the professional staff of not-for-profit museums in terms of serving the common good of the general public. If museums are "temples of culture," then we need to understand the ways these public "faiths" act while open and engaging for all. In contrast, we highlight the similarities and differences when artworks or collectible objects are placed into a commercialized, for-profit-galler/auction house context. This is an introductory course, welcoming students ready to experience and learn about the rich spectrum of museums, galleries, auction houses, and cultural institutions within the Tri-State area. Field trips include visits with top professionals who share their expertise and experiences.
AH 0209 The Historic Plaster Cast Collection at Fairfield University 3 Credits
Prerequisite: One 100-level or lower art history course.
Students will study the history of plaster cast collections in Europe and the U.S. including Fairfield's growing collection. Emphasis will be given to the Fairfield collection by conducting research on the plaster casts. Students will assist with museum and website projects. Students will clean and apply light restoration to plaster casts in preparation for their display in different areas on campus. Class visits to the Slater Museum, the Institute for Classical Architecture, and the Metropolitan Museum of Art will be scheduled. Opportunities to visit the Slater Museum, the Institute for Classical Architecture, and the Metropolitan Museum of Art will be scheduled. Consultation with curators and sculptors will provide additional guidance to students.

AH 0210 Myth in Classical Art 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
Prerequisite: One 100-level or lower art history course or permission of the instructor.
Greek and Roman art serve as a rich depository of Greek mythology with a wide range of representations that evolved across the centuries. As a source of information, classical art sometimes preserves myths that are otherwise unknown in the surviving literature. In some cases visual representations date earlier than an extant literary description or differ in the story details. This course focuses on ancient sources, visual and literary, to study the Olympian gods; the heroes, Perseus, Herakles, Theseus, and Odysseus; the Trojan War; and battles such as the gods and giants, Lapiths and Centaurs, and Amazons and Greeks. Students will analyze the appearance of select myths on monuments in the classical world, emphasizing examples in the Metropolitan Museum of Art, the Yale University Art Gallery, and the Historic Plaster Cast Collection at Fairfield.

AH 0221 The Arts of Ireland and the British Isles, 500-1000 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, VPCH Visual and Performing Arts Core: History Course
Prerequisite: One 100-level or lower art history course or permission of the instructor.
This course explores the art and architecture produced in Ireland, England, and Scotland during the early medieval period, often called the "Golden Age of Insular Art." It was an era of rich cultural exchange during which Irish and continental monks were instrumental in the spread of Christianity throughout the British Isles; Irish settled in Scotland; the Anglo-Saxon kingdom was established in England; and Vikings invaded Ireland and Britain. Arts in all media combined pre-Christian Celtic and Germanic traditions with new Christian forms. Irish monasteries throughout the British Isles were centers of production for sumptuous manuscripts such as the Book of Kells and liturgical vessels including the Ardagh Chalice. Monastic architecture and high crosses will also be considered, as well as secular objects such as aristocratic jewelry.

AH 0222 Byzantine Art 3 Credits
Attributes: CAOT Catholic Studies: Non-Religious Studies, VPCH Visual and Performing Arts Core: History Course
Prerequisite: One 100-level or lower art history course or permission of the instructor.
This course focuses on the art of the medieval Byzantine Empire, a period of strong imperial patronage that saw the rise of Christianity and its associated new forms of art and architecture. The course is organized chronologically, from Byzantine art's late antique Pagan Roman, Early Christian, and Jewish sources to its relationship to Islamic art and its later impact on the development of the arts of Western Europe and Russia. The major themes of the course are: the relationship of belief and ritual to religious imagery and architecture; cultural exchange and influence on art forms and iconography; and the impact of imperial patronage on art and architecture. These themes will also be related to the art of other places and times, including our own. We will explore continuity and change in the content and style of Byzantine Art over time, while constantly being aware of the relationship between art and society.

AH 0290 Special Topics in Art History 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
Prerequisite: One 100-level or lower art history course or permission of the instructor.
Students conduct an in-depth study of a specific subject in the history of art.

AH 0292 Museums, Art, Ethics, and the Law 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
Prerequisite: One 100-level or lower art history course or permission of the instructor.
This course examines the complex legal and ethical issues surrounding the conception, creation, communication, display, reproduction, ownership, transfer, and protection of works of art. The first unit is devoted to defining "art" and discussing artists' rights. The legal and ethical constraints affecting museums, collectors and the art market generally will be covered in the second unit, while the third unit will grapple with the problematic area of cultural property (with particular emphasis on looting, plunder, identity, trade, restitution and restitution). In each of these three segments, we shall read and discuss relevant case law, as well as a number of commentaries authored by leading experts in the field.

AH 0300 Independent Study 1-3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
This in-depth exploration of a specific topic in art history involves students in independent research and field study. Open to students with approval of a faculty member and the director of the Art History program.

AH 0310 Internship 1-3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
Internships allow students to gain hands-on experience in fields related to art history through supervised work for galleries, museums, auction houses, and other venues. Internships give students experience in a professional environment, help them to identify possible career paths, and give them skills that they do not acquire in the classroom. Students may apply for on-campus internships at Fairfield's Bellarmine Museum of Art or Thomas J. Walsh Art Gallery, or pursue placement in local or New York City arts institutions. Internships require permission from the Art History program's internship coordinator before registration.
AH 0330 Senior Capstone Seminar 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
Required of all art history majors in the spring semester of the senior year, this seminar offers rotating topics that reflect the areas of expertise and research among Fairfield’s art history faculty members and culminates in an in-depth research project.

AH 0330A Senior Capstone Seminar 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
See AH 0330.

Film, Television, and Media Arts

FTM 0010 Introduction to Film Studies 3 Credits
Attributes: ENPC Digital Journalism Production Component, VPCH Visual and Performing Arts Core: History Course
Fee: $60 Materials Fee
This course explores the fundamentals of film form (including narrative modes, visual design, performance styles, editing, and sound design), and the relationship between a film’s style and its overall meaning. By learning how to “read” film as a text and utilize sophisticated cinematic language, you will begin to critically understand film as both an art form and a product of culture. Each week’s meetings will include lecture, discussion, and a separate, dedicated screening of a feature film.

FTM 0011 Introduction to Film and Video Production 3 Credits
Attributes: ENPC Digital Journalism Production Component, VPC2 Visual and Performing Arts Core: Applied Course
This course introduces and familiarizes students with all the production tools of the Film, Television, and Media Arts program, including: cameras; lighting instruments and grip equipment packages; audio equipment, including microphones, audio recorders, mixers, windscreens, etc. Each class consists of two parts – an instruction and discussion of the theoretical elements of the class topics, and a hands-on demonstration of the theory just presented. The course features multiple practicum assignments designed to provide a thorough learning experience and to illustrate camera, lighting and audio theory.

FTM 0090 Production Practicum in Film, Television, and Media Arts 1 Credit
Film, Television, and Media Arts majors must take this course for at least one semester during each of their freshman, sophomore and junior years. They will participate in a variety of film, television or radio productions beyond those assigned within individual courses, including: regular programs on the Ham Channel or WVOF; independent student films; student TV broadcasts of annual campus events; Media Center productions or broadcasts; or senior capstone projects. Enrollment by permission only.

FTM 0101 American Cinema: History and Analysis 3 Credits
Attributes: ASGW American Studies: Gateway, GDFT Graphic Design: Film and Television, VPCH Visual and Performing Arts Core: History Course
American cinema has evolved from its origins as a technological novelty at the end of the 19th century to become a key component of a multibillion-dollar industry that profoundly influences popular culture in the United States and around the world. This course examines important American films of the past 100 years and the technological, economic, and cultural developments that have influenced their creation, along with the theoretical concepts necessary for their analysis.

FTM 0102 American Television: History and Analysis 3 Credits
Attributes: ASGW American Studies: Gateway, GDFT Graphic Design: Film and Television, VPCH Visual and Performing Arts Core: History Course
An introduction to the study of television in the United States, this course reviews the historical roots of television content and technology and its relationship to radio and film, and its evolution new media platforms. Students examine the evolution of the many program types found in broadcast and cable television, explore their narrative conventions, and define criteria for analyzing story, structure, formats, performance, and production values.

FTM 0103 World Cinema 3 Credits
Attributes: ENDE Digital Journalism Elective, GDFT Graphic Design: Film and Television, VPCH Visual and Performing Arts Core: History Course
This course surveys the development of world cinema with a particular emphasis on its canonical texts. We will examine the cinematic medium in its various global, cultural, and social contexts by studying key film movements and styles, including German Expressionism, Soviet Montage, Italian Neo-Realism, various “new wave” cinemas, and certain global film movements. We will also study the development of popular national genres and evaluate the relationship between art, commerce, and taste as it pertains to the distribution and U.S. reception of world cinema. Students will gain factual knowledge and learn to analyze and critically evaluate points of view that may not be their own.

FTM 0104 Documentary Cinema 3 Credits
Attributes: GDFT Graphic Design: Film and Television, VPCH Visual and Performing Arts Core: History Course
This course surveys the historical, political, social and cultural significance of non-fiction (documentary) storytelling traditions in the U.S. and abroad. Students will study canonical and independently produced documentaries directed by domestic and international filmmakers to deepen their overall understanding of the technological and aesthetic contributions that national cinemas have contributed to nonfiction filmmaking. Major themes to be discussed are tradition vs. modernization, colonialism, religion, cross cultural relationships, class, gender, ethnicity, nationalism, the human condition, hegemony, and displacement. Students will gain factual knowledge and learn to analyze and critically evaluate points of view that may not be their own.

FTM 0108 Sports Broadcasting and Remote Television Production 3 Credits
Attributes: ENPC Digital Journalism Production Component, VPCH Visual and Performing Arts Core: History Course
This course introduces students to the principles and practice of the world of sports broadcasting. Topics include the history of the industry, its developing techniques, the aesthetic and narrative structure of television sportscasting, its economic impact on the industry, media law and ethics applied to the sports world, and its significant place within the general broadcast world.

FTM 0120 Beginning Screenwriting for Film and Television 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
This beginning course introduces students to screenwriting by developing their understanding of visual storytelling for short documentary films, fiction films, and the television sitcom. The main goal of the course is to develop creative capacities in storytelling and creative written expression while introducing students to fundamental principles of conventional fiction and non-fiction screenwriting. This course utilizes lecture, discussion, screenings, readings, and reflective essay writing to grapple with issues of narrative structure, characterization, conflict, aesthetics, and the politics and ethics of writing as well as other related topics. Students will participate in regular writing workshops in which fellow classmates will respond to their work.
FTM 0130 Nonlinear Editing for Film and Television
Fee: $60 Materials Fee
Prerequisites: FTM 0010, FTM 0011.
This course examines the technical and theoretical conventions of film and video editing that have emerged during more than one hundred years of motion picture and television history. Through readings, discussions, and lectures, as well as editing assignments, students will explore how to make meaning through the assembly of images and sound. Students will also gain experience with post-production software, including Adobe Premiere Pro, Adobe Audition, and DaVinci Resolve.

FTM 0131 Intermediate Film Production
Prerequisites: FTM 0010, FTM 0011.
This course introduces FTM majors to the major elements and principles of film, television and media production, and its three stages of preproduction, production, and post-production. Each student author and collaborator produces short narrative, documentary, and experimental pieces on a common theme.

FTM 0201 Filmmaker Studies (Shell)
Prerequisites: FTM 0010
Each semester that it is offered, this course takes up the study of one or more individual filmmakers - primarily directors - and surveys that person's (or pairs' or group's) body of work, examining major themes, techniques, motifs, topics, collaborations. In so doing, it seeks to measure and evaluate his or her contribution to the history and craft of film. Filmmakers who have included Alfred Hitchcock, Clint Eastwood, Quentin Tarantino, Women Directors, and Ang Lee. May be taken twice.

FTM 0201A Filmmaker Studies: Women Directors
Prerequisites: FTM 0010
Attributes: ASVP American Studies: Visual and Performing Arts, GDFT Graphic Design: Film and Television, WPSG Women, Gender, and Sexuality Studies: Gender Focused
This course introduces students to the film and television work of female filmmakers. It examines the aesthetic, artistic, cultural, social, and political contributions of women to the field of film and television through the films of women directors from the 1920s to the present. The course will be structured around the themes of representation, race, ethnicity, sexuality, and gender, as well as the ways in which these themes are represented in the films of women directors.

FTM 0201B Filmmaker Studies: Italian Cinema
This survey of Italian films as textual, cultural, and historical artifacts analyzes movements such as neorealism, commedia all’italiana, the spaghetti western, and new Italian cinema through the works of selected directors. The course follows a chronology from the silent period to present day, with special emphasis on the “golden ages” of Italian cinema, neo-realist of the postwar period, the 1960s’ comedy of manners, and the new Italian cinema of the ‘80s and ‘90s. Students analyze the works of Rossellini, De Sica, Fellini, Visconti, Germi, Antonioni, Wertmüller, Leone, Pasolini, Moretti, Benigni, and others.

FTM 0201C Filmmaker Studies: Hitchcock
Attributes: VPCH Visual and Performing Arts Core: History Course
This course will examine questions of cinematic authorship through one of the medium’s most influential figures: Alfred Hitchcock. We will trace Hitchcock’s formal and thematic development across major films from the 1940s, 1950s, and 1960s and then place this body of work in dialogue with filmmakers such as Michael Powell, Luis Buñuel, Roman Polanski, Brian De Palma, Chantal Akerman, Bette Gordon, and more. Themes relating to voyeurism, psychosis, perversion, surveillance, paranoia, gender, and sexuality will feature prominently. In addition to gaining insight into authorship and the workings of the cinematic apparatus more generally, students will also develop proficiency with frameworks for critical analysis, including genre, ideology, form, psychoanalysis, feminist critique, and queer theory, among others.

FTM 0204 African American Cinema
Attributes: ASUP American Studies Upper Level, BSAH Black Studies: Arts and Humanities, BSBC Black Studies Focus Course, GDFT Graphic Design: Film and Television, UDIV U.S. Diversity, VPCH Visual and Performing Arts Core: History Course
Prerequisite: FTM 0010.
This course explores the historical, social and cultural significance of African American cinema from the silent era until present-day. Students will grapple with issues concerning the politics of representation of people of African descent in the American film industry and deepen their overall understanding of ways that African American filmmakers have achieved artistry and expression in spite of obstacles posed by race, class, and gender. Through regular screenings, readings, and presentations students will deepen their overall understanding of the impact of historical events and key filmic technological advancements on the establishment of the separate and unequal African American film industry.

FTM 0205 Survey of Film Music: Hearing the Movies
Attributes: VPCH Visual and Performing Arts Core: History Course
Prerequisite: FTM 0010 or MU 0103 or MU 0104.
This course provides an overview of film music from 1900 to today. Students investigate the defining characteristics of the major historical periods of film music; explore the social and historical events that shaped the industry; learn to actively listen to a score; and discuss salient features of a given score. The object in this course is to develop skills in analyzing the sound track, music’s role in the sound track, and the relation of sound track and image track on small-scale and large-scale (narrative) levels. The course develops critical listening and viewing skills as well as a film-music historical survey.

FTM 0206 American Film: Decades (Shell)
Attributes: VPCH Visual and Performing Arts Core: History Course, WDIV World Diversity
Prerequisite: FTM 0010.
This course examines the use of film form (e.g., cinematography, editing, sound design) in American movies made during a given 10-year period, as well as the social, cultural, historical and ideological contexts of the era in which they were made. Each iteration of the course is organized around particular themes relevant to the decade under discussion, e.g. “1970s - Rebels with Causes.” See FTM 0206A, FTM 0206B, FTM 0206C, FTM 0206D, FTM 0206E.

FTM 0206A American Films: Decades: 1950s
Attributes: VPCH Visual and Performing Arts Core: History Course
This course examines the use of film form (e.g., cinematography, editing, sound design) in American movies made during the 1950s, as well as the social, cultural, historical and ideological contexts of the era in which they were made. Each iteration of the course is organized around particular themes relevant to the 1950s, e.g. “Bust a Move” or “Rock Around the Clock.” Students will explore the impact of historical events and key filmic technological advancements on the establishment of the separate and unequal African American film industry.

FTM 0206B American Films: Decades: 1960s
Attributes: VPCH Visual and Performing Arts Core: History Course
This course examines the use of film form (e.g., cinematography, editing, sound design) in American movies made during the 1960s, as well as the social, cultural, historical and ideological contexts of the era in which they were made. Each iteration of the course is organized around particular themes relevant to the 1960s, e.g. “1960s - Rebels with Causes.” Students will explore the impact of historical events and key filmic technological advancements on the establishment of the separate and unequal African American film industry.

FTM 0206C American Films: Decades: 1970s
Attributes: VPCH Visual and Performing Arts Core: History Course
This course examines the use of film form (e.g., cinematography, editing, sound design) in American movies made during the 1970s, as well as the social, cultural, historical and ideological contexts of the era in which they were made. Each iteration of the course is organized around particular themes relevant to the 1970s, e.g. “1970s - Rebels with Causes.” Students will explore the impact of historical events and key filmic technological advancements on the establishment of the separate and unequal African American film industry.
FTM 0206D American Films: Decades: 1980s 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0206E American Films: Decades: 1990s 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207 Film Genres (Shell) 3 Credits
Prerequisite: FTM 0010.
Genres are categories of film characterized by recognizable conventions that include settings, stock characters, narrative patterns, stylistic devices, historical contexts, and themes. Genres interact with filmmakers' and audiences' shared expectations and evolve over time. Each iteration of this course examines a specific genre (e.g. the Western, Horror, Science Fiction, etc.) and evaluates it in terms of film form and its own evolving set of conventions. See FTM 0207A, FTM 0207B, FTM 0207C, FTM 0207D, FTM 0207E, FTM 0207F, FTM 0207G, FTM 0207H, FTM 0207I.

FTM 0207A Film Genres: Classic Comedy 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207B Film Genres: Cult Cinema 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207C Film Genres: Disaster/Apocalypse 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207D Film Genres: Film Noir 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207E Film Genres: Hollywood Musical 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207F Film Genres: Horror 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207G Film Genres: Independent Film 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207H Film Genres: Science Fiction 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0207I Film Genres: The Western 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0208 Television Genres (Shell) 3 Credits
Prerequisite: FTM 0010.
Basic to understanding television as an art form is the concept of genre. This course introduces students to the defining characteristics and the critical analysis of television genre. On a rotating basis, the course focuses on drama, serial, situation comedy, news and documentary, and reality television, examining distinct conception, writing, production, directing, editing and other conventions of each. Social and historical elements of the genre are also addressed. See FTM 0208A, FTM 0208B, FTM 0208C, FTM 0208D, FTM 0208E.

FTM 0208A TV Genres: Comedy 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0208B TV Genres: Contemporary Drama 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0208C TV Genres: Crime Dramas 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0208D TV Genres: Reality TV 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0208E TV Genres: Sitcoms 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course

FTM 0209 Gender, Sexuality, and Cinema 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course, WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisite: FTM 0010.
This course examines how American movies have portrayed gender and queer sexuality (lesbian, gay, bisexual, transgender/transsexual, and questioning) to create a range of stereotypical and multi-dimensional characters. From "coded" sexual references in classical films, to timid New Hollywood-era films, to today's thriving independent cinema, this representational genealogy includes condescending myth and bold truth-telling, works that both mirror and shape their cultural moment.

FTM 0210 Special Topics (Shell) 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
These courses, offered periodically, focus in depth on a specific theme or issue, and may draw upon films from one or more countries, from among numerous directors, and from various periods in film history from the dawn of cinema to the present. Special applied courses may also be offered in this category. May be taken twice.

FTM 0220 Intermediate Screenwriting 3 Credits
Attributes: VPCh Visual and Performing Arts Core: Applied Course
Prerequisite: FTM 0120.
Writing a feature film script can be one of the most difficult and daunting tasks for a writer/filmmaker, yet it remains the dominant format in filmmaking practice. This class builds upon the foundation of FTM 0120, expanding upon the narrative techniques at play in short films and applying them to the roughly 90 page format. The majority of this class is structured like a writers room/group, where students write, write, write and foster a collaborative environment where they share, critique and develop script ideas.

FTM 0230 Lighting and Cinematography 3 Credits
Attributes: VPCh Visual and Performing Arts Core: Applied Course
Prerequisites: FTM 0010, FTM 0011, FTM 0131.
This advanced motion picture production course focuses on the production of narrative fiction films. Students study and practice advanced techniques of film production- including preproduction, production and postproduction responsibilities of the producer relating to management, financing, contracts, distribution and other business elements of filmmaking. Students in the class collaborate to produce significantly more complex narrative films with more advanced camera, lighting, audio, and editing equipment.

FTM 0231 Documentary and Experimental Film Production 3 Credits
Attributes: VPCh Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
Prerequisite: FTM 0131.
This course is designed to develop skills and critical perspectives needed to produce documentary work that promote social activism and awareness. Through lectures, discussions, screenings, readings, and hands-on demonstrations, students will learn about pre-production, production, and post-production for documentary work. By the end of the semester students will write, produce, direct, and edit short documentaries focusing on social issues. By periodically presenting their own work, students will engage one another in discussions sharing constructive criticism concerning individual projects.
FTM 0232 Studio Television Production 3 Credits
Attributes: ENPC Digital Journalism Production Component, VPC2 Visual and Performing Arts Core: Applied Course
Prerequisites: FTM 0010, FTM 0011, FTM 0131.
This course offers a theoretical and hands-on introduction to the art and technology of television production within a studio context. Students receive instruction on the creative and aesthetic use of the elements and technology of studio television production - cameras, audio, lighting, editing, set design, and program development - and participate in a series of projects completed individually and as part of a team.

FTM 0234 Directing for Film, Television, and Media 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Prerequisites: FTM 0010, FTM 0011, FTM 0131.
This course explores what a film director does, how he/she manipulates and manages the divergent elements of cinema into a coherent whole, and often, into a unique and personal vision. The specific tasks of a director related to her/his role with crew and with actors, and in the development of a film from start to finish, are studied from practical and theoretical perspectives.

FTM 0235 Digital Motion Graphics 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
Prerequisite: FTM 0010.
The digital revolution has arrived for production of television and video. This course introduces the theory and basics of digital graphic design and editing, incorporating three-dimensional graphics, music, and sound effects. Students master nonlinear programs and technology such as Final Cut Pro, Avid, Photoshop, Flash, and Dreamweaver.

FTM 0236 Digital Audio Workstation 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Prerequisite: FTM 0011, FTM 0130; or MU 0150 or MU 0156.
This course will provide the student with an in-depth knowledge of the practical application of the Digital Audio Workstation (DAW). This course is primarily designed for students interested in audio editing as it applies to producing recordings, creating sound effects, and soundtrack design for film/TV/radio. Creating samples, recording techniques, waveform manipulation, mixing, and the role of the Digital Audio Workstation in the overall process of sound design will be explored. Students will be proficient at using Logic Pro audio software to manipulate MIDI and audio. Students will learn how to record live sound effects from the environment and manipulate the recordings to create Foley sound effects, and apply them to a film segment. Students will learn to mix and master a segment of multi-track audio.

FTM 0237 Acting for the Camera 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Prerequisite: TA 0030.
This course is an experiential introduction to the specialized techniques used in successful on-camera acting. On-camera exercises will emphasize the importance of listening, truthful moment-to-moment response, and effective communication skills. Students will practice their skills and apply their training to commercials, current television scripts, and screenplays. Initial classes examine the difference between acting for the stage and acting for the camera. Students will practice a variety of on-camera styles including comedy, crime drama, and commercials. The course builds towards longer scene work from a screenplay. Topics include script analysis, nuance and depth of performance, and relaxation and confidence on-camera.

FTM 0305 Independent Study 1-3 Credits
Prerequisite: Usually open only to students majoring or minoring in Film, Television, and Media Arts with a concentration in film. This course allows a student to pursue in depth a topic or project in film or television or media arts history/theory or production, in close consultation with a faculty member of the Film, Television, and Media Arts program. Enrollment by permission of instructor only. May be taken twice.

FTM 0306 Internship in Film, Television, and Media Arts 1-3 Credits
Prerequisite: In consultation with a faculty member, upper-level major and minor students arrange a semester-long internship with one of many film production companies located within Connecticut and the New York metropolitan area. The course combines on-site supervision and meetings with faculty advisors with weekly journal submissions and an assigned paper at the end of the internship. Enrollment by permission of instructor only. May be taken twice.

FTM 0310 Capstone Seminar I 3 Credits
Prerequisite: Completion of all other major requirements.
This course provides an opportunity for Film, Television, and Media Arts majors in their senior year to produce a creative work that pulls together the theoretical concepts and technical skills they have acquired during their years in the Program. This course is required for all Film, Television, and Media Arts majors, who must take it in the fall semester of their senior year. The capstone project is completed in FTM 0311 in the spring semester of a major's senior year.

FTM 0311 Capstone Seminar II 3 Credits
Prerequisites: FTM 0310.
This course provides an opportunity for Film, Television, and Media Arts majors in their senior year to produce a creative work that pulls together the theoretical concepts and technical skills they have acquired during their years in the Program. This course is required for all Film, Television, and Media Arts majors, who must take it in the spring semester of their senior year.

Graphic Design

GD 0201 Graphic Design I: Making Meaning 3 Credits
Prerequisite: Completion of four preparatory classes in the Graphic Design minor.
In today’s world, we are literally surrounded by graphic design, from billboards to soda cans, from Facebook pages to political ads. The graphic designer develops engaging material that communicates a pointed message and persuades an audience. This class focuses on the basic ingredients of graphic design: typography, image, and color. We further explore the combination of these elements into compositions, utilizing proximity, alignment, contrast and repetition. We engage in the complexity of the creative process, developing a strong designer’s process, working both by hand and on the computer. Being critical of design is an essential element of designing. Therefore, we will analyze designs for their efficacy, as we lay the foundation for further study in graphic design. In addition to personal sketchbooks, we will use Adobe Photoshop, Illustrator, InDesign, and AfterEffects software.
GD 0202 Graphic Design II: Clients and Collaboration
Prerequisite: GD 0201.
This course will address the relationship between the graphic designer and the client. What can a designer do when the client specifies a "cleaner" logo? How can a designer respond when a client says, "I don’t know what I want, but it’s not that"? We will practice essential research and analysis skills, as well as the questions that designers can ask clients, to help both parties understand the goals of any given design. We will also examine the variety of delivery systems for graphic design, from printed to electronic media, and how they affect both layout and file formats. We will continue to develop expressive skills using text, image and layout. We will also continue to engage in the complexity of the creative process, developing a strong designer’s process, working both by hand and on the computer. We will also continue to develop our design sense by critically analyzing designs.

MU 0101 The History of Jazz
This course traces the development of American jazz from its origins in African-American musical traditions. Students examine the roots of jazz in ragtime, blues, work songs, and march music and study the development of different jazz styles such as Dixieland in the '20s, swing in the '30s, bop in the '40s, and continuing to the present. The course emphasizes the connection between historical periods and the music of jazz: America's original art music.

MU 0102 History and Development of Rock 3 Credits
This course surveys the musical and social trends that resulted in the emergence of rock and roll as an important musical and cultural force in America. The course traces the roots of rock, blues, and country styles, showing how they merged with popular music. Students examine periods from the 1950s to the present, along with Elvis Presley, Chuck Berry, Little Richard, the Beatles, the British invasion, folk music, Bob Dylan, jazz and art rock, Jimi Hendrix, the west coast movement, and the music industry. Students learn to understand, discuss, and differentiate between stylistic periods and their historical relevance to American culture.

MU 0103 History of Music: 400-1700 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
From the humble beginnings of prayer set to chant, through the golden age of polyphony, to the masters of the baroque, this course surveys the origin of western art music. Students learn the basic elements of music and chart the evolution of these elements through the centuries. Students also learn about the cultural and intellectual environment that gave birth to different music genres and styles.

MU 0104 History of Music: 1700-1964 3 Credits
Attributes: MUEM European Music, VPCH Visual and Performing Arts Core: History Course
This course explores the ways in which composers manipulated musical language to meet the growing demands of the middle class. After learning the basic elements of music, students explore the world of the Enlightenment and Haydn, Mozart, and Beethoven. In the romantic period, the course explores the interaction of all the arts and the influence of politics and economics on compositional style. With the dawn of the 20th century, the course explores what "modern" means, learns about attempts to expand and replace musical language, and studies the impact of American culture on music.

MU 0112 Music of Black Americans 3 Credits
This musical and historical survey of African-American music and its important contributions to American culture examines African heritage, slave songs, and the colonial era, followed by the role of African-Americans in the music and culture of the Revolutionary and Civil War periods. Students examine the evolution of spirituals, minstrel songs, and ragtime as they relate to dance forms; the role of African-Americans as performers and composers in classical music and music of the theatre; and the blues as it evolves into jazz, soul, reggae, funk, disco, and rap. This course takes a look at racism and issues of gender in America, and how musicians of diverse backgrounds have collaborated and contributed to the evolution of American music despite prejudice and adversity.

MU 0120 The History of American Song 3 Credits
This course examines the history of our most popular form of American music - the song. It explores the origins of song, the impact of immigrants, war, women, and political agendas on the development of this genre, as well as popular American songwriters, singers, and styles. Through critical analysis, we will see the patterns that shaped the music of today.

MU 0122 World Music History and Ensemble 3 Credits
Attributes: BSAH Black Studies: Arts and Humanities, BSFC Black Studies Component Course, EDCG Educational Studies Cognate, EDEV Educational Studies Diversity, LCEL LACS Minor: Elective, VPCH Visual and Performing Arts Core: History Course, WDIV World Diversity
The course includes a survey and hands-on instrumental experimentation with world music including African, Brazilian, African-American, Native American, Latin American, Indian, and South Asian styles. Students attend a formal lecture and a practice or performance session each week. During the latter session, students learn to play (primarily African) percussion instruments, coming to view them as the first building blocks of much larger units of ethnic, folk, traditional, or popular ensembles. The course raises student awareness of corresponding songs and traditions; links history, tradition, music, and culture; and introduces students to the contribution of a wide range of cultures to the music world and to the widespread belief that music is a universal language. Students perform as a class or an ensemble on set show-and-tell occasions that may be open to invited guests and/or the University community. No previous musical experience is required.

MU 0124 Bach and Beethoven 3 Credits
Attributes: GMEL German Major or Minor Course, GMEN German Course Taught in English, VPCH Visual and Performing Arts Core: History Course
This course examines the history of our most popular form of American music - the song. It explores the origins of song, the impact of immigrants, war, women, and political agendas on the development of this genre, as well as popular American songwriters, singers, and styles. Through critical analysis, we will see the patterns that shaped the music of today.

MU 0126 History of Choral Music 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
From Palestine’s masses to Verdi’s Requiem, this course explores the history of music through choral music. The composers themselves often considered these masterpieces to be the culmination of their compositional development and work. A basic ability to read music is helpful.

MU 0132 Critical Issues in American Popular Music: Blues to Hip Hop 3 Credits
This course provides an in-depth look at the important musical, social, and racial issues in American popular music, from the media exploitation of the blues in the 1920s through current issues in hip hop. Subject areas will include blues and its origins, jazz and modernism, the obstacles of race in music, the death of rhythm and blues, rock’s evolution in the ‘50s, rap and hip hop culture, and issues in both postmodernism and perversity as seen by many music and art critics.
MU 0150 Music Theory and Composition I 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
This course introduces students to the basic concepts of music theory and beginning compositional skills. Starting with the notation of pitch and rhythm, the course investigates the major/minor key system, intervals, chord construction, melody writing, and rudimentary harmonization. No background in music is expected.

MU 0155 Popular Music Theory and Composition 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
This course, designed for majors and minors in jazz performance, gives students a working knowledge of jazz and pop harmony. Students attain keyboard proficiency through an emphasis on ear-training, voicings, tritone substitutions, and improvisation theory; this proficiency can be used on other instruments. Students learn all upper-structure chords in all keys as well as ways to improvise on various chord structures. Students should be able to play through lead sheet material with reasonable proficiency using jazz voicings and voice-leading techniques. Basic knowledge of the keyboard is recommended, but the course is open to all instrumentalists and vocalists. Enrollment by permission of the instructor only.

MU 0156 Introduction to Music Technology: History and Practice3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
This course provides students with an introduction to the use of musical instrument digital interface and its various formats. Participants study principles of MIDI, the use of computers in music, and music software as it applies to composition, arranging, sequencing, and music notation, examining how these formats enhance the performance of music and music production. Students learn the technology used in pop music, soundtracks, and commercial music. This course requires a basic knowledge of music and is open to students with some musical background.

MU 0157 Introduction to the Music Industry 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
This course introduces students to the various aspects of the music industry. Students discuss the history and process behind the creation, manufacture, and distribution of prerecorded music. The course covers the earliest record companies, changes in the technology, and the growing awareness and sophistication of the consumer and the artists, as well as the function of managers, attorneys, musicians, and agents in the music industry.

MU 0200 Special Topics (Shell) 3 Credits
Prerequisite: One introductory or 100-level music class.
Students will undertake an in-depth study of a specific problem, period, composer, performer, or style of performing, creating, or responding to music. The course will be conducted by a leading scholar/practitioner in the field. The course may be repeated with permission of the program director.

MU 0200D Special Topics: Audio Post Production: Film, Television, and Radio 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
The focus of this course is an artistic and technical introduction to Audio Post-Production: the industry, the tools, and the processes that produce high-quality audio mixes for radio and visuals for broadcast, cinema, and internet-based media. The course will teach the technical processes to allow students to use the software and hardware of audio production, but also to provide important background information on the fundamentals of sound and the technology they are utilizing. This includes intensive analysis of these fundamentals fas they apply to the industry, the historical and scientific context of sound, and the critical listening skills needed to engage in software use.

MU 0201 Hip-Hop and Its Antecedents 3 Credits
Attributes: BSFC Black Studies Focus Course, MUAM American Music, MUHI Music History, UDIV U.S. Diversity, VPC2 Visual and Performing Arts Core: History Course
This class explores the musical, cultural, political and aesthetic foundations of hip-hop. We will trace the corporeal, visual, spoken word, literary and musical antecedents to and manifestations of hip-hop in American cultural. Students will investigate specific black cultural practices that have given rise to its various idioms. Students create material culture related to each thematic section of the course. Scheduled work in performance studio helps students understand how hip-hop is created and assessed. We will analyze the effects of corporate America and examine the images and ideas presented by an industry driven by profit. Are we really in a post-racial society? How does hop-hop help us understand race, class, gender, power, and oppression? Artists studied will not be those with the highest number of albums sold, but those with significant musical or lyrical content and impact on hip-hop as a whole.

MU 0202 Digital Audio Workstation 3 Credits
Prerequisites: FTM 0011, FTM 0130; or MU 0150 or MU 0156.
This course will provide the student with an in-depth knowledge of the practical application of the Digital Audio Workstation (DAW). This course is primarily designed for students interested in audio editing as it applies to producing recordings, creating sound effects, and soundtrack design for film/TV/radio. Creating samples, recording techniques, waveform manipulation, mixing, and the role of the Digital Audio Workstation in the overall process of sound design will be explored. Students will be proficient at using Logic Pro audio software to manipulate MIDI and audio. Students will learn how to record live sound effects from the environment and manipulate the recordings to create Foley sound effects, and apply them to a film segment. Students will learn to mix and master a segment of multi-track audio.

MU 0215 American Musical Theatre: History and Practice 3 Credits
Attributes: UDIV U.S. Diversity, VPC2 Visual and Performing Arts Core: History Course
Prerequisite: One Music or Theatre course.
Musical theatre is a complex genre that has developed in tandem with the developing American nation. It is a serious art form that, in its finest iterations, represents total works of art unique in and of themselves. This course expands students' knowledge of the range and diversity of the genre as codified in the middle 20th century by Rodgers and Hammerstein and their imitators. Embedded in great musical theatre pieces is the essence of what it means to be an American living in the United States at a particular time in history.

MU 0242 Music of the Classical Era 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: History Course
During the classical era (about 1750 to 1830), music shifted from an aristocratic concern to the favorite popular art of the middle class. The course examines the lives and music of the three most important composers of this period: Haydn, Mozart, and Beethoven.

MU 0243 19th Century Romanticism in Music 3 Credits
Attributes: ISIF Italian Studies: Italy-Focused, ITEN Italian Course Taught in English, VPC2 Visual and Performing Arts Core: History Course
This comprehensive survey of 19th-century romanticism in music considers the music of Beethoven, Chopin, Verdi, and Wagner, among others. The music of the romantic era contains some of the richest masterpieces in music history. The course considers the relationship between music and the other arts.
MU 0244 Music of the 20th Century 3 Credits
**Attributes:** VPCH Visual and Performing Arts Core: History Course
This introduction to the mainstreams of music of our time begins with Debussy, Ravel, and the French moderns. After investigating the music of Stravinsky, Bartók, and other European composers, the course concludes with such modern trends as electronic music, film music, jazz, and popular music.

MU 0245 Survey of Film Music: Hearing the Movies 3 Credits
**Attributes:** VPCH Visual and Performing Arts Core: History Course
**Prerequisite:** FTM 0010 or MU 0103 or MU 0104.
This course provides an overview of film music from 1900 to today. Students investigate the defining characteristics of the major historical periods of film music; explore the social and historical events that shaped the industry; learn to actively listen to a score; and discuss salient features of a given score. The object in this course is to develop skills in analyzing the sound track, music's role in the sound track, and the relation of sound track and image track on small-scale and large-scale (narrative) levels. The course develops critical listening and viewing skills as well as a film-music historical survey.

MU 0250 Music Theory and Composition II 3 Credits
**Attributes:** VPC2 Visual and Performing Arts Core: Applied Course
**Prerequisite:** MU 0150.
In this continuation of MU 0150, students build a theoretical and compositional foundation by studying 7th chords, part-writing, harmonic progressions, and harmonic rhythm. In addition, students compose original melodies and learn how to harmonize them, and undertake simple analysis projects to further understand how music is put together.

MU 0255 Instrumental Ensembles 1 Credit
**Prerequisite:** Orchestra or symphonic band performance experience.
This ensemble helps instrumental musicians develop their skills further through public concert performances. Students learn ensemble performance ethics and stylistic interpretation, as well as performing pieces from a wide variety of genres and time periods. This course may be taken repeatedly.

MU 0256 Jazz Ensemble 1 Credit
**Prerequisites:** Instrumental or vocal performance experience; selection through audition.
Jazz Ensemble is open to musicians who wish to develop their skills in jazz performance. Students rehearse and receive instruction in performing and improvising in different styles of jazz, from swing to fusion. This course may be taken repeatedly.

MU 0300 Independent Study 1-3 Credits
**Attributes:** MUHI Music History, VPCH Visual and Performing Arts Core: History Course
By arrangement with music faculty, students work independently on special topics within the field of music. Open to music majors and minors only. Enrollment by permission only.

MU 0301 Independent Study in Music Theory 1-3 Credits
**Attributes:** MUAP Applied Music, VPC2 Visual and Performing Arts Core: Applied Course
By arrangement with music faculty, students continue the work of MU 0250 with an advanced study of music theory and composition. This course may be taken more than once. Open to music majors and minors only. Enrollment by permission only.

MU 0305 Internship 1-3 Credits
**Attributes:** VPC2 Visual and Performing Arts Core: Applied Course
Internships are available in a number of organizations. Students receive semester credit in exchange for working a minimum of 10 hours per week. Students may count no more than six credits towards a major, and no more than towards a minor. Open to music majors and minors only. Enrollment by permission only.

MU 0306 Performing Arts Administration Principles and Practices 3 Credits
**Attributes:** VPC2 Visual and Performing Arts Core: Applied Course
**Prerequisites:** Two courses in music or theatre.
This course explores the fundamental principles associated with not-for-profit performing arts organizations. This course is for all arts students, as the study of arts administration core principles sets a foundation of essential knowledge vital for employment within a non-profit arts organization. Such training also is for practicing artists and those with for-profit intentions. Students will come away with knowledge and skills, as well as a strong self-awareness of their leadership and management capacities.

MU 0310 Senior Capstone Project I 3 Credits
**Attributes:** MUHI Music History, VPCH Visual and Performing Arts Core: History Course
The capstone project provides opportunities for majors to work at a very high level, reflecting their expertise and ongoing research. Enrollment by permission only.

MU 0311 Senior Capstone Project II 3 Credits
**Attributes:** MUAP Applied Music, VPC2 Visual and Performing Arts Core: Applied Course
The capstone project provides opportunities for majors to work at a very high level, reflecting their expertise and ongoing research. Enrollment by permission only.

**Studio Art**

SA 0011 Introduction to Drawing 3 Credits
**Attributes:** GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
**Fee:** $60 Materials Fee

This beginning sculpture course is an introduction to working three-dimensionally. Promoting an understanding of the creative process, students will construct objects in both abstract and realistic styles. The course emphasizes concepts, contemporary art and theory through a wide variety of materials and aesthetic categories such as collage, sculptural construction, and installation.

SA 0012 Introduction to Drawing 3 Credits
**Attributes:** GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
**Fee:** $60 Materials Fee

This course focuses on the act of seeing and its intimate connection with mark-making. Experiences develop observational, expressive, and conceptual skills. Students explore the formal elements of drawing, such as line, value, composition, and form, and how they can be used to express an awareness of one's self and the world around one. The course explores a variety of materials and processes through in- and out-of-class projects. Students participate in critiques of these projects and, through writing and speaking, develop a language of aesthetic awareness and a sense of artistic quality.
SA 0013 Introduction to Figure Drawing 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This introduction to drawing from the human figure uses a wide variety of media and techniques. The course emphasizes understanding, interpretation, and expressive use of the figure in contemporary studio practice. Students discover proportion and form through line, value, perspective, anatomical studies, and analysis of structure. Students participate in critiques of their projects and, through writing and speaking, develop a language of aesthetic awareness and a sense of artistic quality.

SA 0014 Introduction to Printmaking 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course is an introduction to traditional, contemporary and experimental approaches to making prints. By exploring etching, monoprinting, digital imaging and photographic techniques students learn skills fundamental to the printmaking process. In this course we will explore visual language in a broader studio arena, incorporating color theory and an exploration of ideas based on individual experiences and a response to and reflection on current issues and concerns.

SA 0015 Introduction to Painting 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course introduces the methods, techniques, and language of oil painting. Students explore principles of color, construction, paint handling, delineation of form and space, light and shadow, surface, texture, and composition. Students paint primarily from observation and employ representational and abstract modes. Materials and historical concerns are integral parts of directed and individual investigations.

SA 0016 Introduction to 2-D Design 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course is an introduction to the aesthetic dimension of human existence through the appreciation and practice of pictorial design, a fundamental aspect of our larger visual culture. Studio exercises will familiarize students with concepts such as line, rhythm, shape, balance, texture, and pattern. A hands-on studio environment with computer-based assignments will involve students in practical and creative problem-solving. Adobe Illustrator and Photoshop will be the software programs used on all assignments. Across the semester students become more familiar and conversant in the elements and principles of design as well as the two software programs.

SA 0100 Experiments in Drawing 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
In this introductory course students will gain an expanded view of how seeing, drawing, and thinking contribute to organizing and expressing one's visual thoughts and ideas. Through hands-on studio projects, visual thinking will be emphasized as a creative practice that augments intellectual thought and teaches problem-solving skills. Through an interdisciplinary approach, students will discover new ways of organizing visual space and reflect on the myriad of approaches to working with their hands and new materials both found and new. Projects will include a wide range of mark making, collage, collotypes and other layering techniques. This course is designed to be open and accessible to all students.

SA 0101 Introduction to Digital Tools in Art Making 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
In this introductory studio course, students will explore digital graphics software and how it may be used in conjunction with traditional art media (such as painting and drawing in pencil, ink, charcoal, pastels, and gouache) to develop a unique visual voice. Through projects that build on one another's idea-based and technical components, students will develop an understanding of vocabulary fundamental to visual language and technology's relationship to art now and throughout history. Projects will emphasize that digital technology is not an end in itself, but a means to realizing ideas.

SA 0105 Color Workshop 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course investigates fundamental color theory through studio projects using contemporary and historical references. Students focus on the development and exploration of ideas using a variety of color media and study the practical mixing and application of pigments. The course stresses perception, visual awareness, sensitivity, attitude, and judgment, and is typically offered fall semester. This course is designed to be open and accessible to all students.

SA 0132 Sculpture: Construction and Subtraction 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
An introduction to three-dimensional form and the area that it inhabits, this broad-spectrum course offers an in-depth focus on developing studio skills in sculpture. Hands on collaborative and individual projects introduce students to the themes of space and the environment through an exploration of abstraction and representation. A consideration of the evocative nature of materials is central to this course, as visual organization in the world around us is investigated. This course is designed to be open and accessible to all students.
SA 0133 Alternative Processes Photography 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $110 Materials Fee
This course covers alternative techniques in photography, including Cyanotypes, Kallitypes, collage, and instant photography. Additionally, students will have readings pertaining to the history of the medium, and will be introduced to contemporary concepts and use of the photographic image. A digital camera, while not required, will be useful. There are a small number of manual and digital loaner cameras available through the Studio Art Program, but loans are available on a first come basis. This course is designed to be open and accessible to all students.

SA 0134 Digital Photography 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $110 Materials Fee
This course covers basic techniques of digital photography, including print production, the development of concepts and theory in photography, the relationship of photography to other visual media, and the study of historical and contemporary precedents. In addition, students will explore the manipulation of photographic images in both black and white and color through the use of Adobe Photoshop. Students must provide their own digital camera. For this course, cameras must have a manual override option. There are nine possible loaner cameras available through the Studio Art Program, but loans are available on a first come basis. This course is designed to be open and accessible to all students.

SA 0136 Artist Book Construction 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
In this course, students will engage in book making, book altering, and book deconstruction as a creative endeavor, examining how visual language and written language differ and interact, and will consider the book as a metaphor for any technology that preserves and transmits information. The course will examine our changing relationship with books in the 21st Century by introducing you to the methods and thought processes of working artists as well as social, natural and/or political issues common to practicing contemporary artists. This course is designed to be open and accessible to all students.

SA 0137 Motion and Time-Based Art 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course uses a wide variety of media to develop and present performance and installation art, emphasizing interconnections with video, computer, telecommunications, photography, film, live performance, music, and sound. It is typically offered every other spring semester. This course is designed to be open and accessible to all students.

SA 0138 From Drawing to Painting 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course specializes in teaching students to work with drawing as a way to develop subject matter and transition into painting. The first part of the semester is focused on collecting and drawing from visual references such as nature, the figure, interiors and still life. Working with sketches, students learn to develop a visual vocabulary to articulate ideas that are meaningful and personal to them. This practice is used as a starting point to develop a language of expression and transition into painting. This course is designed to be open and accessible to all students.

SA 0139 Watercolor 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course is an introduction to the methods, techniques and language of watercolor. In exploring the fundamentals of watercolor this course helps students develop their abilities to see and explore washes of color in relation to pictorial space and form. Value, composition, color, transparency, and wet into wet processes are explored. This course is designed to be open and accessible to all students.

SA 0199 Special Topics (Shell) 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Students will have the opportunity to work in a specific medium or technique, or on a particular subject, not available in our regular course offerings.

SA 0230 Advanced Painting 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
Prerequisite: SA 0015.
This course builds on the experience of Introduction to Painting and stresses fluency in paint and the advanced development of technical and expressive skills. It focuses on the generation of ideas as a central component in the process of painting. Individual direction is developed in consultation with the instructor. This course includes individual and group criticism.

SA 0231 Advanced Printmaking 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
Prerequisite: SA 0014 or SA 0136.
This course focuses on the development of technical and conceptual skills as a central component in the process of printmaking, with an emphasis on developing individual direction through studio work, drawing, writing, and research. Students explore intaglio, silkscreen, and painterly methods of mono-printing.

SA 0232 Advanced Sculpture 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
Prerequisite: SA 0011 or SA 0132.
This course builds on the experience of Sculpture I and stresses the advanced development of technical and expressive skills. It focuses on the generation of ideas as a central component in sculpture. Individual direction is developed in consultation with the instructor. This course includes individual and group criticism.
SA 0233 Advanced Photography 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This course builds upon the fundamentals of photography learned in previous photography courses, and depending on the semester focuses on either digital or darkroom techniques. If the focus is digital, a digital camera is required for this course.

SA 0235 Advanced Drawing 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Prerequisite: SA 0012 or SA 0013 or SA 0100 or SA 0101 or SA 0138.
This course builds upon the experience of SA 0012 and stresses advanced development of skills. It focuses on the generation of ideas as a central component in the process of drawing and emphasizes individual direction and inventive drawing through studio projects developed in consultation with the instructor. This course includes individual and group criticism.

SA 0299 Advanced Projects Seminar 3 Credits
Attributes: GDSA Graphic Design: Studio Arts, VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
Prerequisites: Three courses in Studio Art.
Required for students majoring and an option for students minoring in Studio Art, this course helps students develop a unique body of work representative of their explorations, discoveries and development. Emphasis is on preparing a portfolio reflective of their individual practice. Students read and discuss contemporary and art historical issues. Visiting artists and critics are a feature of the class. Open to majors and minors only.

SA 0301 Exhibition Seminar 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
Students in this course build on Advanced Projects experiences and continue to develop a unique body of work representative of their explorations, discoveries and deep reflection. Students regularly read and discuss contemporary, art theory and art historical issues. Emphasis is placed on preparing a portfolio and Senior exhibition. Visiting Artists and critiqués are a feature of the class. Open to senior Studio Art majors only.

SA 0302 Independent Study 1-3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
By arrangement with studio faculty, juniors and seniors may work independently on specific studio projects. Progress is reviewed through individual critiques. Students regularly read and discuss contemporary and art historical issues. Students must finalize independent studies with the studio program director.

SA 0304 Studio Internship 1-3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Internships are for students who have completed at least three studio courses and whose academic work has prepared them for professional work related to internships as studio assistants to professional artists or for work in museums, galleries, or art-related non-profit organizations in the New York City and local areas. Internships require faculty sponsorship and departmental approval, and are developed by each student in consultation with the supervising professor.

Theatre

TA 0011 Introduction to Theatre 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
Fee: $60 Materials Fee
When we can download any movie we want to our computer and watch it from the comfort of the residence hall, why do live theatre? Why see live theatre? Does live theatre have anything to offer that movies and TV cannot? Is it worth doing or seeing? Actually, the act of witnessing live theatre challenges us to think more deeply, more critically, and more thoughtfully about our society and ourselves. Theatre can change the world. This course is about understanding why we need theatre in our lives, and becoming more active, more engaged, more attentive audience members.

TA 0030 Acting I 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Fee: $60 Materials Fee
This class is an intensive introduction to technique and training essential to acting. Manifesting the understanding of key concepts through demonstrating skills is the primary focus of the course. Physical openness and responsiveness are explored and developed in pursuit of performance that is dynamically immediate and wholly engages audience, ensemble, and performer. Students will learn and practice Viewpoints, an approach to performance that allows performers to develop stage presence, play as a member of an ensemble, and make exciting performance choices. The class also introduces vocal technique for stage, the key ingredient to theatrical storytelling.

TA 0094 Theatre Fairfield: Performance Practicum 1 Credit
Students gain first-hand training in performance under the guidance of theatre professionals. Everyone cast in a Theatre Fairfield production is automatically enrolled in this one-credit practicum. Students may also earn credit by enrolling in weekly Performance Workshops, which focus each semester on introducing a particular performance skill. Some of the topics covered in previous Performance Workshops include: clowning, stage combat, physical performance, and puppetry. This course may be repeated but may not be included in the 120 credits required for graduation.

TA 0095 Theatre Fairfield: Production Practicum 1 Credit
Students gain first-hand training in theatre production under the guidance of theatre professionals. Everyone working on a crew of a Theatre Fairfield production is automatically enrolled in this one-credit practicum. Students must consult with theatre faculty regarding placement as a crew head in stage management, technical, or front-of-house duties. This course may be repeated but may not be included in the 120 credits required for graduation.

TA 0106 Theatre Management 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
When considering a theatre event, we usually think of actors performing for an audience. Yet, there is a network of factors ensuring a successful actor/audience connection. On the management side, there is the stage manager, making sure that every moment of the performance runs smoothly. On the administration side, there are other issues: Where did the money come from? How did the audience learn about the production? What is the overriding purpose of the theatre company? This course introduces the numerous managerial and administrative matters that are necessary for theatre production.
TA 0110 World Theatre I
Attributes: VPCH Visual and Performing Arts Core: History Course
Theatre serves as a vehicle to consider the social, political, and economic forces that shaped societies and their entertainments. This course surveys theatre and performance as a mirror of the people and times that shaped them. It begins with a consideration of the human need for mimesis and entertainment, and swiftly moves into the golden age of Greek drama. Other topics include Roman theatre, medieval religious drama, Japanese theatre, Renaissance spectacle and pageantry, censorship, the advent of women on the stage, and popular theatre forms through the 18th century. The course includes theatre trips.

3 Credits

TA 0111 World Theatre II
Attributes: VPCH Visual and Performing Arts Core: History Course
This course examines 19th- and 20th-century theatre and performance in the context of the people and societies that shaped them. It begins by examining the impact of technology on the theatrical world and continues to the present day with a consideration of the avant-garde and contemporary forms such as performance art. The course includes theatre trips.

3 Credits

TA 0120 American Drama
Attributes: ASGW American Studies: Gateway, ASVP American Studies: Visual and Performing Arts, E_AF English Literature After 1800, UDIV U.S. Diversity, VPCH Visual and Performing Arts Core: History Course
This course examines the development of American theatre from the 18th century to the present day. It includes a study and analysis of the special problems affecting the development and changes in American society as seen through American playwriting and theatre production. Students read over twenty plays that grapple with issues of race, ethnicity, gender, class, and what it means to be an American. The course includes theatre trips.

3 Credits

TA 0123 American Women Playwrights
Attributes: ASGW American Studies: Gateway, ASVP American Studies: Visual and Performing Arts, E_AF English Literature After 1800, UDIV U.S. Diversity, VPCH Visual and Performing Arts Core: History Course
Gender Focused
This course traces the evolution of plays by women from the Revolutionary War to plays reflecting the 21st-century concerns of African American, Asian, American, and Latina playwrights. Plays are discussed in light of the social, political, and economic climates that produced them. Special emphasis is given to questions of sex, gender, race, ethnicity, and class, as we explore how American women, despite considerable obstacles, have developed their own theatrical voices. Our study is further informed by the work of feminist performance theorists.

3 Credits

TA 0135 Modern and Contemporary Dance
Attributes: VPCH Visual and Performing Arts Core: Applied Course
This course explores the movement principles of the major dance figures in the 20th century, including Martha Graham, Doris Humphrey, Hanya Holm, Jose Limon, and Merce Cunningham. Students complete research, compositional assignments, and structured improvisations to support the classroom activity. Overall, students gain a historical perspective of modern dance as an art form and improve their own dance technique in terms of strength, alignment, and flexibility.

3 Credits

TA 0138 Folk and Social Dance
Attributes: VPCH Visual and Performing Arts Core: Applied Course
This course explores dance as social interaction and communal activity. Students discuss and participate in various kinds of folk dances originating from different ethnic cultures and explore their common roots in primitive rituals, religious worship, courtship, recreation, celebration, and therapeutic or healing experiences. The course also explores contemporary forms of ballroom, disco, and club dancing. Students complete research, compositional assignments, and structured improvisations to support classroom activity.

3 Credits

TA 0150 Introduction to Entertainment Technology
Attributes: VPCH Visual and Performing Arts Core: Applied Course
This course is an introduction to the technical aspects of theatre production. Students learn basic techniques of set construction, rigging and stage lighting. Lectures serve as foundational information for a series of lab sessions held throughout the semester. In labs, students construct, rig and light a fully realised Theatre Fairfield production. Proper use of hand and power tools is emphasized. Lab schedules are created during the first weeks of class, in consultation between the instructor and students. To compensate students for the lab requirement, students earn one credit through enrollment in TA 0095.

3 Credits

TA 0153 Stage Makeup and Costume Construction
Attributes: VPCH Visual and Performing Arts Core: Applied Course
This course introduces the basic principles, skills, and techniques of applying theatrical makeup and building costumes. The makeup portion explores two- and three-dimensional makeup techniques including corrective makeup, age makeup, facial hair, and prosthetic makeup. The costume portion focuses on hand and machine sewing techniques, fabrics and fabric modification, and garment construction. Students are required to participate in costume construction for Theatre Fairfield productions. To compensate students for the lab requirement, students earn one credit through enrollment in TA 0095.

3 Credits

TA 0155 Design I
Attributes: GDTA Graphic Design: Theatre, VPCH Visual and Performing Arts Core: Applied Course
Designing for the theatre involves a series of interrelated actions: play analysis, visual research, ideation, development, drawing/painting, and collaborating with others. In this class, students study and practice all of these areas of the creative process. In addition, students study the underlying theories and principles that affect scenery, costume and lighting design.

3 Credits

TA 0158 Scene Painting
Attributes: GDTA Graphic Design: Theatre, VPCH Visual and Performing Arts Core: Applied Course
This workshop introduces the basic principles, skills, and techniques of the scenic artist. Through a series of painting projects, students explore common painting techniques. The course gives special attention to matching the paint project to the paint elevation, as well as developing creative thinking skills. Projects emphasize craftsmanship and the ability to work as part of a team in addition to dealing with the time factors of actual production. Students research various techniques, styles, and visual textures in addition to hands-on work in the class. Students serve as members of a paint crew for a Theatre Fairfield production.
TA 0210 Theatre in Production 3 Credits
Students take this course in conjunction with a particular Theatre Fairfield production. This course offers an immersion experience, as students engage in focused theatrical research in the classroom and immediately apply the concepts in the production. The class/production format makes particularly challenging scripts and/or artistic approaches possible. Some of the topics covered in previous semesters include Restoration comedy, performing Shakespeare, and devised theatre.

TA 0215 American Musical Theatre: History and Practice 3 Credits
Attributes: UDIV U.S. Diversity, VPCH Visual and Performing Arts Core: History Course
Prerequisite: One Music or Theatre course.
Musical theatre is a complex genre that has developed in tandem with the developing American nation. It is a serious art form that, in its finest iterations, represents total works of art unique in and of themselves. This course expands students’ knowledge of the range and diversity of the genre as codified in the middle 20th century by Rodgers and Hammerstein and their imitators. Embedded in great musical theatre pieces is the essence of what it means to be an American living in the United States at a particular time in history.

TA 0230 Acting II 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Prerequisite: TA 0030.
This is an intensive acting course that builds upon the basic acting principles taught in Acting I. In this course, students apply what they have learned about the art, analysis, and interpretation of acting to a variety of dramatic styles. Students explore several period acting styles through exercises, scenes and monologues. Students gain a well-rounded and thoughtful understanding of acting as a practical and intellectual art that prepares them for further work in theatre and related performing arts.

TA 0231 Acting for the Camera 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Prerequisite: TA 0030.
This course is an introduction to the specialized techniques used in successful on-camera acting. On-camera exercises emphasize the importance of listening, truthful moment-to-moment response, and effective communication skills. Initial classes examine the difference between acting for the stage and acting for the camera. Students practice a variety of on-camera styles including comedy, crime drama, and commercials. The course builds towards longer scene work from a screenplay. Topics include script analysis, nuance and depth of performance, relaxation and confidence on-camera.

TA 0240 Directing 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
Prerequisite: TA 0030.
This course for advanced students covers the theory, practice, and history of directing for the theatre. In a workshop format, students explore various ways of bringing a play script from conception to full production. The course includes sessions in text analysis, working with actors and designers, and the role and responsibility of the director to the overall production. Students direct several in-class scenes and a one-act play that is produced in Director’s Cut, part of Theatre Fairfield’s season.

TA 0253 Costume Design 3 Credits
Attributes: GDTA Graphic Design: Theatre
Prerequisite: TA 0155.
Before a character even speaks, we have a strong sense of who that person is, based on our impression of the costume design. This class focuses on how costume designers engineer strong connections between the world of the play and the audience’s experience. Play analysis, historical research, visual research, idea-generation, design development and rendering styles are addressed. Emphasis is placed on a sound creative process, as well as grounding our designs with historical accuracy.

TA 0256 Stage Lighting 3 Credits
Prerequisite: TA 0150 or TA 0155.
With light on stage, we create a vast array of environmental moods. In order to accomplish these effects, students must grasp two separate fields of information. First, there are technical elements: the nature of light, electricity, reflection, refraction, lighting instruments and control systems. Then there is light in the context of the theatrical production. This involves play analysis, visual research, and manipulating light in the theatre space. Both the technical and aesthetic aspects are covered in this class. Safe use of electricity and lighting equipment is emphasized.

TA 0288 Scene Design 3 Credits
Attributes: GDTA Graphic Design: Theatre
Prerequisite: TA 0155.
In a play, scenery provides the context, allowing the audience to connect to the characters and their dramatic journey. Not merely locale, scenery is a visual accompaniment to the action of the play. In this course, students develop their drafting, rendering and model-making skills, as these are the designer’s principle communication tools. The course includes play reading, analysis and historical research. Emphasis is placed on a sound creative process, as well as grounding designs with historical accuracy.

TA 0300 Special Topics (Shell) 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
In this class, students undertake an in-depth study of a specific problem. This might include period research, dramaturgy, a particular style of acting, a particular style of design, or other aspect of production. The course is conducted by a leading scholar/practitioner in the field. The course is open to invited students only.

TA 0310 Capstone: Theory of Production 3 Credits
Attributes: VPCH Visual and Performing Arts Core: History Course
This course is an in-depth exploration of theatre aesthetics and production theory. Students consider what theatre is, can, and should be, while studying varying perspectives on theatrical design, directing, and staging practices. Class sessions focus on analyzing the writings of such major figures as Antonin Artaud, Peter Brook, Edward Gordon Craig, Robert Edmond Jones, and Susan Sontag. This is the capstone class for theatre majors and minors but other interested students with sufficient background are welcome.

TA 0395 Internship 3 Credits
Attributes: VPC2 Visual and Performing Arts Core: Applied Course
With faculty sponsorship, students work with professional theatre companies and theatre artists. Students develop their skills in real-world situations, while networking and gaining invaluable work experience. Internships are also available on-campus, within Theatre Fairfield. Students interested in becoming interns must consult with theatre faculty well in advance of the desired internship semester. Internships for summer work are encouraged.
TA 0399 Independent Study 1-3 Credits

Attributes: VPCH Visual and Performing Arts Core: History Course

This course allows students to intensively explore a particular aspect of stage management, design, acting, directing or dramaturgy under the guidance of a faculty member. Students must have the approval of the theatre faculty before registering for this course.

Art History and Visual Culture Major

The study of Art History and Visual Culture provides essential tools for experiencing and understanding humanity’s creative visual achievements, while enhancing critical thinking and communication skills. The program in Art History and Visual Culture offers a curriculum covering the major periods of art from prehistory until today, across the globe, as well as classes in museum studies.

Among the many outstanding resources available to students are: specially arranged visits to major museums in New York and Connecticut with behind-the-scenes tours; internships at the Fairfield University Art Museum and New York City and regional museums, businesses, and cultural organizations; and research on the Fairfield University Art Museum’s collection and the historic Plaster Cast Collection.

Many Art History and Visual Culture majors enrich their experience further by spending a semester or year abroad including our signature programs at Florence University for the Arts and IAU in Aix-en-Provence, France. Our alumni work in museums, galleries, and auction houses as well as in education, law, the non-profit sector, marketing, public relations, development and fundraising, publishing - nearly every occupation that requires observation, analysis, and communication. Our dedicated alumni are valuable resources for current students, returning to campus regularly to give career advice and participating in job shadow programs and intern hiring.

Students in introductory Art History and Visual Culture courses should be able to meet the following learning outcomes:

• Demonstrate factual knowledge within the discipline of Art History.
• Demonstrate understanding and appreciation of art as a cultural activity.
• Apply course material in order to improve critical thinking and problem solving.
• Find and use resources effectively to answer questions and solve problems.

Students in upper-level seminars should be able to show proficiency in the above outcomes, as well as:

• Demonstrate writing and research skills necessary in the field of Art History and Visual Culture
• Demonstrate creative capacities in oral and written expression.
• Analyze and critically evaluate ideas, arguments, and points of view.

Students may choose the traditional Art History and Visual Culture major or an Art History and Visual Culture major with a concentration in Visual Arts Administration.
### Requirements

For a 30-credit major in Art History and Visual Culture, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

Select three courses from the following: ¹

| AH 0102 | Art of East Asia                            |         |
| AH 0109 | Jewish Art: Moses to Modernity              |         |
| AH 0111 | Greek Art and Archaeology                   |         |
| AH 0112 | Etruscan and Roman Art and Archaeology      |         |
| AH 0113 | Art and Archaeology of Ancient Egypt: Images for Eternity |       |
| AH 0120 | Medieval Art of Western Europe              |         |
| AH 0121 | Celtic and Early Irish Art                  |         |
| AH 0130 | Early Renaissance Art in Italy              |         |
| AH 0131 | High Renaissance and Mannerism in Italy     |         |
| AH 0140 | Baroque Art                                 |         |
| AH 0152 | Modern Art                                  |         |
| AH 0164 | American Art and Media Culture              |         |
| AH 0165 | The Black Experience: African-American Art and Criticism in the 20th and 21st Centuries | |
| AH 0172 | History of Photography                      |         |
| AH 0191 | Art and Mythologies of Nazi Germany, Fascist Italy, Bolshevik Russia: Comparative Systems & Outcomes | |
| AH 0192 | The History, Theory, and Practice of Museums |         |
| AH 0193 | Inside Museums and Galleries: Taste, Place, Public Space |       |

Select one course from the following: ²

| AH 0209 | The Historic Plaster Cast Collection at Fairfield University | |
| AH 0210 | Myth in Classical Art                                      |         |
| AH 0221 | The Arts of Ireland and the British Isles, 500-1000       |         |
| AH 0222 | Byzantine Art                                              |         |
| AH 0290 | Special Topics in Art History                              |         |
| AH 0292 | Museums, Art, Ethics, and the Law                          |         |
| AH 0300 | Independent Study ²                                        |         |
| AH 0310 | Internship ²                                                |         |

Select three additional art history courses at the 100 level or higher: ³

| AH 0330 | Senior Capstone Seminar                                   | 3       |

Total Credits: 30

¹ Students are advised to take courses from a range of time periods and geographical locations.

² AH 0300 and AH 0310 are available to advanced students. Only one may be counted toward the major in Art History and Visual Culture.

### Concentration in Visual Arts Administration

For a 30-credit major in Art History and Visual Culture with a concentration in Visual Arts Administration, students complete the following:

<table>
<thead>
<tr>

Select one of the following Business courses: ³

| AC 0011 | Introduction to Financial Accounting                      |         |
| MG 0101 | Introduction to Management                                |         |
| MG 0240 | Leading and Managing People                               |         |
| MG 0335 | Entrepreneurship: Ideation and Validation                 |         |
| MG 0370 | Managing Non-Profit Organizations                         |         |
| MK 0101 | Principles of Marketing                                   |         |
| ENW 0339| Grant and Proposal Writing                                |         |
| AH 0310 | Internship                                                 |         |
| AH 0330 | Senior Capstone Seminar                                   | 3       |

Total Credits: 30

It is recommended that AE 0291 Business Ethics be one of the courses taken for fulfillment Area III of the Core Curriculum. Additional DSB courses listed above are recommended as electives.

### Art History and Visual Culture Minor

For an 18-credit minor in Art History and Visual Culture, students complete the following:

| AH 0330 | Senior Capstone Seminar                                   | 3       |

Total Credits: 30
productions of our students and staff. This truck enables Fairfield to
produce sports, news, public affairs, and entertainment programs virtually
anywhere, with immediate broadcast via satellite to the nation or the
world. The Media Center is also home to the student television channel,
StagsTV, with offices and work areas for their production efforts. Full-
time personnel of the Media Center are professional video and digital
producers, writers, editors, and design and repair technicians, and many
also teach courses within the program.

Majors are also encouraged to explore the interconnections between this
program and other disciplines of studio art, music, theatre, and art history
as offered within the Department of Visual and Performing Arts.

The academic major is a good introduction for students interested
in continuing as professionals in the film and television industries.
Since Fairfield has an excellent reputation and is situated in the greater
New York region, many opportunities exist for internships in media
production and significant internships are available at the Media Center
and in production companies throughout the metropolitan area. After
graduation, many students in this program acquire solid entry-level jobs
in various media fields or continue to develop their interest through
graduate studies.

**Film, Television, and Media Arts Major**

The Film, Television, and Media Arts Program at Fairfield University seeks
to educate students in:

- hands-on production skills and practices used in the film and
television industries;
- the historical and intellectual traditions of cinema and television in
the United States and around the world;
- critical analysis of media artifacts and their production through
academic research and writing;
- finding and developing their creative and critical voices.

Since the Film, Television, and Media Arts Program exists within
a comprehensive, liberal arts university, its curriculum strives to
provide a coherent awareness of the aesthetic, artistic, and communicative
capabilities of these media by offering courses in theory, history, genres, styles, and structures
with hands-on production courses. The program curriculum reflects
the convergence of traditional media of film and television into new
media of creative possibilities. Students learn the theory, analysis and
and collaborative practice of all aspects of visual storytelling: writing, moving-image design, producing, directing, cinematography, sound design, digital
-imaging, and editing.

Students understand the expressive power of these media and
experiment with their own creative voices, engaging their imagination
and intellect with the tools of these crafts. Many of the program's faculty
members come from the ranks of working professionals, ensuring that
information transmitted in the classroom is at the cutting edge of the
field.

The home of the program is in the University's award-winning Media
Center, a 15,000-square-foot facility on the ground floor of Xavier Hall.
The Media Center facility consists of two fully equipped television studios
and control rooms, two nonlinear editing suites with more than 25 editing
bays, three media class and screening rooms, digital-imaging and audio
labs, and offices for Media Center personnel and equipment distribution.
We have a custom-designed 32-foot Mobile Satellite Uplink Production
truck with high definition cameras and a Grass Valley Switcher — for
productions of our students and staff. This truck enables Fairfield to

### Requirements

For a 39-credit major in Film, Television, and Media Arts, students

Total Credits: 39

1 Additional 200- or 300-level courses in other departments may satisfy this requirement, including the following:
   • CI 0251 New Chinese Cinema
   • IT 0271 Italian Cinema
   • SP 0271 Hispanic Film

2 May be taken twice.

3 Complete either fall or spring semester during freshman, sophomore, and junior years.

**Film, Television, and Media Arts Minor**

For an 18-credit minor in Film, Television, and Media Arts, students complete the following:

**Graphic Design Minor**

In today’s world, we are literally surrounded by graphic design, from billboards to soda cans, from social media posts to political ads. The graphic designer develops engaging material that communicates a pointed message and persuades an audience. The form of the communication can be physical or virtual, and may include images, words, or graphic forms. The work can happen at any scale, from the design of a single postage stamp to a national postal signage system. It can also be for any purpose, whether commercial, educational, cultural, or political. However you define it, graphic design is ubiquitous.

The interdisciplinary minor in Graphic Design asks students to learn, reflect, and act as designers, preparing students for work in the increasingly complex role of design in virtually all facets of business, in both for-profit and not-for-profit fields. The minor complements students’ other fields of study, with the concepts, theories and competencies of design.

Part of being a graphic designer is using Adobe digital graphics software, which is upgraded frequently. Hence, designers also must keep up with the changes in the software. The graphic design courses feature a few software tutorials, but students are expected to train themselves in the digital graphics software. Numerous tutorials for the Adobe software are available through Lynda.com.

**Goals and Learning Outcomes**

Students seeking a minor in Graphic Design demonstrate proficiency in design principles, design process, theory, history and contemporary design practice. Students develop an understanding of design process and problem solving methods and explore the effect graphic design has upon the human environment from social responsibility, sustainability and interdisciplinary perspectives. Students demonstrate proficiency in identified technical skills, understand and apply basic principles in the process of creating, analyzing, and evaluating graphic design solutions in relation to specific end uses and consumer needs. Students demonstrate proficiency in research, writing, communication and presentation skills.

Graphic Design students demonstrate the following knowledge and skills:

- Acquire, articulate, and apply specialized terminology and knowledge relevant to graphic design including relationships to other disciplines and to contemporary global issues.
- Assess, predict, and articulate the influence and importance of graphic design issues within the human environment from social responsibility, sustainability and interdisciplinary perspectives.
- Acquire and demonstrate competency in technical skills applicable to graphic design.
- Demonstrate the ability to use design thinking strategies in an iterative design process.
- Demonstrate the ability to analyze, synthesize, and develop probable solutions.

The Graphic Design minor prepares students for a range of post-graduate opportunities, including in the non-profit sector and graduate school.

Music Major

Music allows for analytic, critical, and speculative humanistic inquiry, but is built on a foundation of mathematics and science. It allows creativity and personal interpretation and requires a rigorous understanding of syntax and abstract reasoning; it provides insight into culture and history and relates to and illuminates what is happening here and now; it is a language by which we can communicate with one another and is an art that expresses what words cannot.

As one of the original seven liberal arts, music maintains a place in the university as a subject of broad and passionate interest to educators, historians, performers, composers, and theorists, as well as those interested in arts management, recording, music industry, and the interaction of music with other arts such as film and theatre. At Fairfield, all of these form a community dedicated to furthering a knowledge and love of music. We not only want students to understand, evaluate, and analyze music, but also want to make music a meaningful part of their life. We want students to find the passion in music and to actively engage with the issues and the contexts surrounding, impacting, and influencing music.

The study of music is not just about preserving knowledge of the past; it is a field of study that provides forums for debate and action, and also delivers content that gives context to learning.

The goals of the Music program are to:
• Offer students a variety of opportunities to develop musical skills and knowledge.
• Acquaint students with the growing scope and substance of musical thought and practice.
• Advance the historical, theoretical, and critical study of music.
• Equip students with technical, cognitive, and creative skills that will enable them to use their knowledge effectively in any field or discipline.
• Foster students’ understanding of both the creative process in music and the products of musical creation.
• Develop the ability to write critically and analytically, and express a well-developed opinion both orally and in writing.
• Provide students the knowledge and modes of inquiry characteristic of other disciplines.
• Cultivate in students the desire for continued musical and intellectual growth throughout their lives.

Applied Music Lessons
The department provides private lesson instruction for all interested students and University members in most areas of music performance. Instruction carries an extra charge beyond tuition and includes 10 private lessons per semester. Students may enroll for 45-minute lessons and earn 1 credit or one-hour lessons and earn 2 credits. Lesson times are arranged individually with the instructor.

These credits do not count towards the 38 three-credit courses required for graduation, but six may be counted towards the music major or minor. Students interested in registering for lessons must do so before the end of the Add/Drop period as identified on the University Academic Calendar. More information and registration forms are available from the Department Coordinator in Canisius Hall, Room 3. For more information, please contact Dr. Laura Nash.

Lesson Fees are:

Ten 60-minute lessons (two credits) $575
Ten 45-minute lessons (one credit) $500

Performing Ensembles
For information about performance ensembles, students are encouraged to contact Dr. Nash or Prof. Torff.

Requirements
For a 30-credit major in music, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select 10 courses in Music, including:</td>
<td>30</td>
</tr>
<tr>
<td></td>
<td>At least two courses from each of the three categories:</td>
<td></td>
</tr>
<tr>
<td></td>
<td>American, European, and Experiential music</td>
<td></td>
</tr>
<tr>
<td></td>

<td></td>
</tr>
<tr>
<td></td>
<td>At least one course emphasizing Pre-20th Century music</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>30</td>
</tr>
</tbody>
</table>

1 At least one of these must be at the 200 level.

The remaining credits to complete the major may be fulfilled with a combination of:

• internship
• independent study
• additional course(s) from any of the three areas
• performance ensembles (Students may accumulate more than 6 credits, but no more than 6 performance credits may count toward the major.)

Music Minor
For an 18-credit minor in music, students complete the following:

<table>

</tbody>
</table>

Studio Art Major
The Studio Art program promotes the development of creative inquiry, expression of ideas, and critical thinking. Through the use of traditional and new materials and techniques, students increase skills of visual expression and problem-solving. Through art-making, discussions, readings, writings, and museum and gallery visits, students expand their understanding of visual art and its process, while gaining analytical skills and factual knowledge to aid their perception of art and the world around us.

Students who take Studio Art core courses (10- and 100-level) will be able to:

• Demonstrate development of creative capacities.
• Apply factual knowledge about visual art (terminology, classifications, methods, trends).
• Apply course material to improve problem solving skills.
• Demonstrate an understanding and appreciation of visual art.

Students who take upper-level Studio Art core courses (200- and 300-level) will be able to:

• Demonstrate continued development of creative capacities and an artistic voice.
• Apply increased factual knowledge about visual art (terminology, classifications, methods, trends).
• Apply course material to improve problem solving skills.
• Apply fundamental principles and theories about visual art.

Requirements
For a 30-credit major in studio art, students complete the following:

</tr>
</tbody>
</table>

Select any four additional 10-level, 100-level, or 200-level Studio Art courses 12

Select one Art History and Visual Culture course 3

Total Credits 18

### Theatre Major

The Theatre Program at Fairfield offers students a liberal arts education balanced between theory and practice: we study theatre and we make theatre. Students work with theatre professionals in acting, dance, design, direct, playwriting, production, and entertainment technology, and study with professors specializing in history, literature, and criticism of the stage. Students leave Fairfield with a solid foundation in theatre production skills, as well as a strong understanding of the cultural and intellectual contributions theatre continues to make in our world.

Goals for students taking theatre core courses are:

- To gain factual knowledge of all aspects of theatre in practice and theory.
- To develop the specific skills required for working theatre professionals.
- To develop creative capacities as artists, thinkers, and problem solvers.

In advanced courses, students’ abilities are enhanced through rigorous engagement in analyzing, critically evaluating, and creating theatre art.

Theatre Fairfield is the production company of the program. Participation in Theatre Fairfield productions is open to all students at the University, regardless of major or minor. We think of Theatre Fairfield as our practical laboratory, where we experiment and refine concepts we are learning in the classroom. Theatre Fairfield’s season includes professionally directed and designed productions as well as pieces that feature student playwrighting, directing, designing and acting. In any given four-year period, we produce plays from many historical periods and styles: musicals, comedies, serious plays, period plays, contemporary works, and original plays. Every student has the opportunity to be a performer, writer, director, producer, designer, technician, dramaturg, and critic, and there are many opportunities for advanced work in all of these areas. A group of four production interns, chosen by competitive scholarship, works closely with faculty and staff in administering Theatre Fairfield’s season.

Recent productions have included:

- *The Spitfire Grill* by James Valcqc and Fred Alley
- *Antigone* by Sophokles, in a new translation by Anne Carson
- *The Taming of the Shrew* by William Shakespeare
- *Pack of Lies* by Hugh Whittemore
- *The Art of Dining* by Tina Howe
- *A Man’s World* by Rachel Crothers
- *Avenue Q* by Robert Lopez, Jeff Marx and Jeff Whitty
- *Dancing at Lughnasa* by Brian Friel
- *Measure for Measure* by William Shakespeare
- *Stop Kiss* by Diana Son
- *Rhinoceros* by Eugene Ionesco
- *An Enemy of the People* by Henrik Ibsen
- *The Glass Menagerie* by Tennessee Williams
- *Dead Man’s Cell Phone* by Sarah Ruhl
- *Romeo and Juliet* by William Shakespeare, directed by distinguished guest artist Barbra Berlovitz
- *Machinal* by Sophie Treadwell
- *The Rocky Horror Show* by Richard O’Brien
- *Cabaret* by John Kander and Fred Ebb
- *The Importance of Being Earnest* by Oscar Wilde
- *Picasso at the Lapin Agile* by Steve Martin
- *Dead Man Walking* by Tim Robbins
- *The Birds* by Aristophanes
- *Lend Me a Tenor* by Ken Ludwig
- *The Laramie Project* by Moisés Kaufman

In helping students become well-rounded theatre people, this program emphasizes good research and good communication skills, which are essential to work in the theatre, as well as to all aspects of life. Courses stress the development of written, verbal, and artistic abilities. The program also advocates double-majors and/or minors with other disciplines such as English, psychology, sociology, history, philosophy, communication, and modern languages, as well as double-majors with the School of Business.

Studying in the Theatre Program prepares students for any career that requires creativity, communication skills, and good business practice. Our graduates include managers, lawyers, and educators, as well as theatre professionals working in all aspects of the industry.

### Credit for Theatre Fairfield Productions

In order to understand the nature of theatre, you must engage in the process of making theatre. Therefore, major and minor coursework is supplemented by required participation in Theatre Fairfield productions.

Students earn course credit for such participation. This acknowledges and embraces the educational nature of production work. Grades in these classes are figured in the student GPA, but the class hours count over and above the 120 credit hours required for graduation.
1. TA 0094 Theatre Fairfield: Performance Practicum is a one-credit course that enrolls all students who perform in Theatre Fairfield shows.

2. TA 0095 Theatre Fairfield: Production Practicum is a one-credit course that enrolls all students who are on crews for Theatre Fairfield shows.

</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

Theatre minors must participate in the majority of the annual Theatre Fairfield Productions, through TA 0094 and TA 0095.

### Women, Gender, and Sexuality Studies

Women, Gender, and Sexuality Studies is an interdisciplinary program that challenges the cultural, intellectual, social, and political assumptions about sex, gender, and sexuality systems. A unique field, Women, Gender, and Sexuality Studies draws on scholarship from multiple disciplines to develop its own theories, methods and epistemologies. The inextricable linkage of theory and practice forms the foundation of the field. Courses in the program critically engage issues of race, ethnicity, class, gender, sexuality and other key components of identity, and the ways they intersect.
The Women, Gender, and Sexuality Studies program offers you opportunities to:

- Identify intersecting systems of power; including race, class, ethnicity, gender, sex, and sexuality.
- Gain specialized knowledge and acquire proficiency in course content.
- Apply theories, methods, and epistemologies to course materials and lived experience.
- Analyze and critically evaluate the implications of specialized knowledge put into practice.

As an interdisciplinary program, Women, Gender, and Sexuality Studies offers a unique way to combine elements from other disciplines and bring them together in especially powerful ways. Women, Gender, and Sexuality Studies encourages research and scholarship that integrate diverse ideas.

**Programs**

- Women, Gender, and Sexuality Studies Minor (p. 246)

**Courses**

**WS 0299 Internship**

**Attributes:** WSGF Women, Gender, and Sexuality Studies: Gender Focused

The internship program allows students to gain on-site experience that can be related to the discipline of Women, Gender and Sexuality Studies. Internship areas include health, publishing, communications, politics, and many other fields. Students consult the program director for a list of internship opportunities before registering for this course. Faculty supervision helps students integrate their experiences with the intellectual foundation acquired in their academic courses.

**WS 0301 Women, Gender, and Sexuality Studies Capstone Seminar**

**Attributes:** PJST Peace and Justice Studies, WSGF Women, Gender, and Sexuality Studies: Gender Focused

Students take this final course in the minor sequence in the senior year after completing the other five required courses. The course integrates feminist approaches across the disciplines, emphasizing the relationship between theory and practice. It is open to seniors only; juniors may enroll with the permission of the program director.

**WS 0399 Independent Study**

**Attributes:** WSGF Women, Gender, and Sexuality Studies: Gender Focused

By arrangement with Women, Gender, and Sexuality Studies faculty, students may choose to work independently on special topics. See the program director for details.

**Faculty**

**Director**

Lawrence (History)

**Coordinating Faculty**

Brennan (Communication)
Brunn-Bevel (Sociology and Anthropology)
Garvey (English)
Harriott (Biology)

Hartwell (Marriage and Family Therapy, GSEAP)
Hohl (History)
Kelley (English)
Labinski (Philosophy)
McClure (Psychology)
Nuru (Communication)
Orlando (English)
Rodrigues (Sociology and Anthropology)
Willsky-Ciollo (Religious Studies)

**Women, Gender, and Sexuality Studies Minor**

For an 18-credit minor in Women, Gender, and Sexuality Studies, students complete the following:

**Courses**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select five courses from the list below, including: 1</td>
<td>15</td>
<td></td>
</tr>
<tr>
<td>WS 0301</td>
<td>Women, Gender, and Sexuality Studies Capstone Seminar</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

1. Courses must be chosen from at least two disciplines.

2. With permission of the director(s), other capstone experiences that focus on women, gender and sexuality topics may be counted in place of WS 0301. If another capstone experience is substituted, then a sixth WGSS course must be completed from the list of approved courses.

Director, Women, Gender, and Sexuality Studies

Faculty

William M. Abbott
Associate Professor of History
BA, University of California, Berkeley
DPhil, Oxford University, England

Jennifer Adair
Assistant Professor of History
BA, Vassar College
MA, PhD, New York University

Sergio Adrada Rafael
Assistant Professor of Modern Languages and Literatures
BA, University of Zaragoza, Spain
BA, University of Valladolid, Spain
MA, San Diego State University
MS, PhD, Georgetown University

Gayle Alberda
Assistant Professor of Politics
BS, MPA, Central Michigan University
PhD, Wayne State University

Gwendolyn Alphonso
Associate Professor of Politics
BA, LL.B, National Law School of India University
BCL, Oxford University - Lincoln College
JSD, Cornell University Law School
PhD, Cornell University

Catherine J. Andersen
Assistant Professor of Biology
BS, MS, PhD, University of Connecticut
Michael Andreychik  
Associate Professor of Psychology  
BA, MS, PhD, Lehigh University

M. Covadonga Arango-Martín  
Instructor of the Practice of Modern Languages and Literatures  
BA, Universidad de Valladolid, Spain  
MA, University of Wisconsin, Madison

Alfred Babo  
Assistant Professor of Sociology and Anthropology  
BA, MA, PhD, University of Bouaké, Ivory Coast

Paul Baginski  
Associate Professor of Mathematics  
BS, MS, Carnegie Mellon University  
PhD, University of California, Berkeley

Peter Bayer  
Professor of English  
BA, Villanova University  
MA, New York University  
PhD, University of Rhode Island

Steven Bayne  
Associate Professor of Philosophy  
BA, Evangel College  
MA, PhD, The Ohio State University

Patricia E. Behre  
Associate Professor of History  
BA, MA, PhD, Yale University

Christopher R. Bernhardt  
Professor of Mathematics  
BA, MSc, PhD, University of Warwick

James E. Biardi  
Associate Professor of Biology  
BS, University of California, Irvine  
PhD, University of California, Davis

Angela Biselli  
Professor of Physics  
BS, Università di Genova  
MS, PhD, Rensselaer Polytechnic Institute

Elizabeth H. Boquet  
Professor of English  
BA, Nicholls State University  
MA, University of Southern Mississippi  
PhD, Indiana University of Pennsylvania

Jocelyn M. Boryczka  
Associate Vice Provost for Scholarly, Creative, and Community Engagement  
Professor of Politics  
BA, The College of William and Mary  
MA, Louisiana State University  
MA, Wayne State University  
PhD, City University of New York

Professor of English  
BA, Colby College  
MA, Middlebury College  
PhD, Carnegie Mellon University

Dorothea D. Braginsky  
Professor of Psychology  
BA, Queens College  
MA, PhD, University of Connecticut

Phyllis C. Braun  
Professor of Biology  
BS, Fairfield University  
PhD, Georgetown University

Niall Brennan  
Assistant Professor of Communication  
BA, University of California, Santa Cruz  
MA, The New School for Social Research, N.Y.  
PhD, London School of Economics and Political Science

Lindy E. Brigette  
Assistant Professor of the Practice of English  
BA, MS, University of Southern Maine  
MA, University of Massachusetts, Boston  
PhD, University of Rhode Island

Sara Brill  
Professor of Philosophy  
BA, Trinity University  
PhD, The Pennsylvania State University

Patrick Brooks  
Assistant Professor of Film, Television and Media  
BA, University of Chicago  
MFA, University of California, Los Angeles

Diane J. Brousseau  
Professor of Biology  
BS, PhD, University of Massachusetts, Amherst

Rachelle Brunn-Bevel  
Associate Professor of Sociology  
BA, University of Delaware  
MA, PhD, University of Pennsylvania

Cecelia F. Bucki  
Professor of History  
BA, University of Connecticut  
MA, PhD, University of Pittsburgh

Ashley (Soyong) Byun  
Associate Professor of Biology  
BSc, York University  
PhD, University of Victoria, British Columbia, Canada

Claudia Calhoun  
Assistant Professor of VPA  
BA, Mount Holyoke College  
MA, MPhil, PhD, Yale University

Javier F. Campos  
Professor of Modern Languages and Literatures  
Pedagogía en Español, Universidad de Concepción (Chile)  
PhD, University of Minnesota
Mary Ann M. Carolan
Professor of Modern Languages and Literatures
BA, Dartmouth College
MA, MPhil, PhD, Yale University

Professor of Politics
BA, Catholic University
MS, Hunter College
PhD, City University of New York

Suzanne Chamlin-Richer
Associate Professor of Visual and Performing Arts
BA, Barnard College
MFA, Yale University

Geoffrey A. Church
Health Professions Advisor
Assistant Professor of Biology
BS, Clarkson University
MS, PhD, Albert Einstein College of Medicine

Matthew P. Coleman
Professor of Mathematics
BA, LaSalle College
MA, PhD, Pennsylvania State University

David L. Crawford
Professor of Sociology and Anthropology
BA, California State University, Fullerton
MA, PhD, University of California, Santa Barbara

Michael W. Creane
Visiting Instructor of Psychology
BA, University of Connecticut
MA, Quinnipiac University

Nancy A. Dallavalle
Associate Professor of Religious Studies
BMus, Benedictine College
MA, St. John's University
PhD, University of Notre Dame

Bidyut Das
Visiting Assistant Professor of Physics
MS, Indian Institute of Technology, K Famur
PhD, City University of New York

Ronald M. Davidson
Professor of Religious Studies
BA, MA, PhD, University of California, Berkeley

Carol Ann Davis
Professor of English
BA, Vassar College
MFA, University of Massachusetts, Amherst

Anthony J. DeCristofaro
Instructor of the Practice of Biology
BS, Union College
MS, Southern Connecticut State University

Christopher J. DiBiase
Assistant Professor of the Practice of English
BA, Fairfield University

Mark F. Demers
Professor of Mathematics
BA, Amherst College
MS, PhD, Courant Institute, New York University

Sara E. Diaz
Assistant Professor of the Practice of Modern Languages and Literatures
BA, MA, PhD, New York University

David L. Downie
Associate Professor of Politics and Environmental Studies
BA, Duke University
MA, PhD, University of North Carolina

Ryan Drake
Associate Professor of Philosophy
BA, University of Oregon
PhD, Pennsylvania State University

Matthew Duckett
Visiting Instructor of Mathematics
BA, Syracuse University
MS, Fairfield University

Christine Earls
Instructor of the Practice of Biology
BS, Fairfield University
MS, University of Bridgeport

Philip I. Eliasoph
Professor of Visual and Performing Arts
BA, Adelphi University
MA, PhD, State University of New York at Binghamton

Robert Epstein
Professor of English
BA, University of Pennsylvania
MA, PhD, Princeton University

Zoe Erotopoulos
Assistant Professor of the Practice of Modern Languages and Literatures
BA, College of New Rochelle
MA, MPhil, PhD, Columbia University

Michelle L. Farrell
Associate Professor of Modern Languages and Literatures
BA, Colby College
MS, PhD, Georgetown University

Anita Fernandez
Associate Professor of Biology
BA, University of Michigan
MS, PhD, University of Wisconsin

Benjamin Fine
Professor of Mathematics
BA, Brooklyn College
MS, PhD, Courant Institute, New York University

Lucrecia Garcia Iommi
Assistant Professor of Politics
BA, Universidad de San Andrés
Johanna X. K. Garvey
Associate Professor of English
BA, Pomona College
MA, PhD, University of California, Berkeley

Laura Gasca Jiménez
Assistant Professor of Modern Languages and Literatures
BA, Universidad Complutense de Madrid
MA, Kent State University
PhD, University of Houston

Shannon Gerry
Associate Professor of Biology
BS, Bucknell University
PhD, University of Rhode Island

Joel D. Goldfield
Associate Professor of Modern Languages and Literatures
BA, Dartmouth College
MA, Brandeis University
PhD, PhD, Université Paul Valéry, Montpellier III

Christopher Goodrich
Assistant Professor of Mathematics
BS, Creighton University
MS, University of Nebraska - Omaha
PhD, University of Nebraska - Lincoln

Richard Greenwald
Dean
Professor of History
BA, Queens College, City University of New York
PhD, New York University

Kimberly K. Gunter
Associate Professor of English and Director of Core Writing
BA, MA, Middle Tennessee State University
PhD, University of Illinois

Francis T. Hannafey, S.J.
Associate Professor of Religious Studies
BS, Southern Connecticut State University
MBA, PhD, Loyola University of Chicago
MDiv, STM, Jesuit School of Theology at Berkeley

Shannon Harding
Associate Professor of Psychology
BA, College of the Holy Cross
MS, University of Connecticut
PhD, New York University

Clarance E. Hardy, III
Visiting Associate Professor of Religious Studies
AB, Princeton University
MDiv, PhD, Union Theological Seminary in the City of New York

Amanda S. Harper-Leatherman
Associate Professor of Chemistry
BA, St. Olaf College
PhD, University of North Carolina at Chapel Hill

Olivia Harriott

Linda A. Henkel
Professor of Psychology
BA, Friends World College
MA, PhD, State University of New York at Stony Brook

Imara Liz Hernandez
Visiting Assistant Professor of Modern Languages and Literatures
BA, MA, Houston University

Elizabeth Hohl
Visiting Assistant Professor of History
BA, Stonehill College
MA, Sarah Lawrence College
PhD, Union College

David W. Hollingsworth
Assistant Professor of Psychology
BA, Morehouse College
MS, PhD, Oklahoma State University

Sonya Huber

DOLAN SCHOOL OF BUSINESS

A Message from the Dean

Today more than ever the business world is in need of ethical leaders who are able to adapt to and succeed in a global environment. At the Dolan School of Business, we echo this need in our Jesuit mission and vision of educating women and men for others. Competitive forces both domestically and abroad produce markets that are in constant flux. As a result of the exchange of technology, entrepreneurial insight, and dynamic innovation, organizations are seeking leaders who can anticipate such forces and act accordingly. An education from Fairfield’s Dolan School of Business makes this possible by providing:

Faculty who are both national scholars and highly engaged and informed teachers in the classroom. As thought-leaders in their disciplines, Dolan School faculty members use scholarly research to inform their teaching. As a result, students benefit from lectures and course activities that bring real world issues into the classroom.

Curricula that challenge and inspire students while also providing them with the necessary tools to become true leaders in organizations. At the undergraduate level, business education is purposively infused with a broad and rich arts and sciences university core curriculum. This results in forming engaged students who are critical thinkers, informed participants in the larger society, and highly competent contributors to both profit and not-for-profit endeavors. Regarding graduate study, the Dolan MBA and various specialized MS programs afford students opportunities to study advanced business topics and master quantitative skills. Thus, Dolan students are sought after for positions in public accounting, analytics, finance and investing, human resources, and marketing.

Personal and professional development opportunities tailored to complement one’s academic experiences. A rigorous academic curriculum is paramount for success; however, it is also important to develop one’s character for the business world. Workshops, seminars, lectures, and experiential activities ranging from field trips to mock interviews to study abroad options are some of the many resources available to further enhance students’ personal and professional capabilities.

Businesses are looking for informed, dynamic individuals who have the skills and confidence to be not only decision-makers but also “game changers!” If you are forward-thinking, highly motivated and open to challenges, then an education from the Dolan School of Business is definitely for you. I look forward to welcoming you to our community.

Zhan Li, DBA
Dean, Dolan School of Business

Overview

Students in the Dolan School of Business take the general education core curriculum required of all undergraduate students, ensuring that they receive a broad knowledge of the humanities, mathematics, social sciences, and natural sciences. In addition, students complete a business core curriculum introducing the fields of accounting, business ethics, economics, finance, global strategy, information systems, the legal environment of business, management, marketing, business analytics, and statistics.

The balance of the program depends on the major: accounting, finance, information systems, international business, management, or marketing. Minors are available to all students in accounting, accounting/information systems, business analytics, business law and ethics, entrepreneurship, finance, information systems, management, marketing, and sports leadership and management.

All members of the business faculty serve as academic advisors. Faculty members have substantial business experience, helping them to be invaluable guides for students choosing a course of study to further specific career goals. The combination of general education and business core courses with those in the major areas of study develops in students the flexibility of mind that is a critical asset for business leaders.

Students are motivated to continue to grow intellectually and be prepared for a professional career and future graduate study. A broad perspective on society and the proper role of business, based on an appropriate set of ethical values, are emphasized. In consultation with faculty, students follow an approved curriculum that reflects the depth and breadth of modern business practices.

School Activities/Programs

Complementing the Dolan School of Business’ traditional pedagogical mission is a series of diverse and distinctive programs that serve to enrich the University community and its various constituencies.

- **Dean’s Lecture Series.** The Dolan School of Business brings to the classroom setting leaders from the corporate or financial communities who address students on a specific topic related to the subject matter within an identified major area of study within the school. The unique perspective that business practitioners can bring to the academic environment is a welcome and valuable element to a student’s business education.

- **Professional Development Series.** The Professional Development Series consists of events and workshops designed to complement student development throughout their four years at Fairfield and provide a structured forum for students to gain the necessary knowledge, skills, and networking strategies to supplement their business education. The purpose of this series is to provide students with a competitive edge when entering the labor market.

- **Fairfield StartUp Entrepreneurship Competition.** This competition features student teams from across the University presenting their pitches to a panel of expert judges including venture capitalists, social entrepreneurs, and business executives. Substantial cash prizes go to winners to be applied toward developing entrepreneurial businesses. This event attracts a standing-room-only crowd from both the University and the Fairfield community.

- **Student Co-curricular Activities.** Students can participate in faculty-advised activities including: NY Society of Security Analysts Case Competition, Rotman School (University of Toronto) Trading Competition, American Accounting Association Conferences, Beta Gamma Sigma (Business Honor Society) Student Leadership Conference, Beta Alpha Psi (Accounting Honor Society) Conference, Student Managed Investment Fund, Fairfield Investment Group, Institute of Management Accounting Student Conference, and departmental clubs in accounting, finance, entrepreneurship, management, and marketing.

- **Dean’s Student Advisory Council.** In order to receive student feedback directly, the Dean’s Office hosts two meetings each semester with the Dean’s Student Advisory Council (DSAC), a group of 12-15 high-achieving business students representing a variety of disciplines.
Events and updates within the Dolan School of Business are discussed, and students provide a range of excellent suggestions.

### Degrees

#### Bachelor of Science

##### Major Areas of Study

Six major areas of study are available to students in the Dolan School of Business. It is advised that students decide on a major, in consultation with their advisors, prior to the end of the sophomore year (before course registration for the junior year in April). Once a major is selected, students have the option to change their major without penalty provided there is a sufficient period of time to complete the degree. The process of selecting and changing a major requires the student to complete and submit the Change of Major form, available in the Dean’s office.

Majors available in the Dolan School of Business include:

- Accounting (p. 261)
- Economics (p. 263)
- Finance (p. 267)
- Information Systems (p. 269)
- International Business (p. 272)
- Management (p. 274)
- Marketing (p. 280)

##### Minor Areas of Study

Dolan School of Business minors are available to all university students. It is the student’s responsibility to complete the requisite Minor Application and submit to the Dolan School of Business Dean’s office. To ensure the feasibility of minor completion, students are strongly encouraged to declare business minors by the end of the fall semester of the junior year. The completion of the minor is contingent upon course availability and the student’s individual progress.

Minors available in the Dolan School of Business are as follows:

- Accounting
- Accounting/Information Systems
- Business Analytics
- Business Law and Ethics
- Economics
- Entrepreneurship
- Finance
- Information Systems
- Management
- Marketing
- Sports Leadership and Management

### Change of School

Students may transfer into the Dolan School of Business from the College of Arts and Sciences, Marion Peckham Egan School of Nursing, or School of Engineering if their overall grade point average is 2.80 or better.

### Internship Program

The Dolan School of Business offers optional internships for qualified students. The presence of a large number of corporate offices in the Fairfield area provides a range of rewarding career preparation opportunities. These internships may be undertaken for credit, for pay, or for both credit and pay. When pursuing an internship for academic credit, an on-the-job supervisor, the DSB Director of Internships, and a faculty member monitor student progress. Students interested in internships should discuss arrangements as early as possible with the DSB Director of Internships. Students must have an overall GPA of 2.50 or higher to qualify for the internship program, and all internships must be approved by the appropriate Department Chair through the Director of Internships.

Three-credit internships may be pursued by qualified juniors and seniors in any business discipline. These internships do not fulfill any requirements toward the major or minor; rather, they satisfy either the Business Elective or a free elective requirement. One-credit internships may be pursued by qualified sophomores, juniors, and seniors in any business discipline. One-credit internships do not satisfy any graduation requirements.

Students may earn up to eight internship credits (two 3-credit internships and two 1-credit internships).

### Courses

#### General Business

**BU 0211 Legal Environment of Business** 3 Credits

Prerequisite: Junior standing.

This course examines the broad philosophical as well as practical nature and function of the legal system, and introduces students to the legal and social responsibilities of business. The course includes an introduction to the legal system, the federal courts, Constitutional law, the United States Supreme Court, the civil process, and regulatory areas such as employment discrimination, protection of the environment, and corporate governance and securities markets.

**BU 0220 Environmental Law and Policy** 3 Credits

Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science, MGEL Management: General Elective

This course surveys issues arising out of federal laws designed to protect the environment and manage resources. It considers in detail the role of the Environmental Protection Agency in the enforcement of environmental policies arising out of such laws as the National Environmental Policy Act, the Clean Water Act, and the Clean Air Act, among others. The course also considers the impact of Congress, political parties, bureaucracy, and interest groups in shaping environmental policy, giving special attention to the impact of environmental regulation on business and private property rights.
BU 0311 The Law of Contracts, Sales, and Property 3 Credits
Prerequisite: BU 0211.
This course examines the components of common law contracts including the concepts of offer and acceptance, consideration, capacity and legality, assignment of rights and delegation of duties, as well as discharge of contracts. The course covers Articles 2 and 2A of the Uniform Commercial Code relating to leases, sales of goods, and bailments. The course also considers personal and real property, and bankruptcy.

BU 0312 The Law of Business Organizations and Financial Transactions 3 Credits
Prerequisite: BU 0211.
This course offers an analysis of legal principles related to the law of agency, sole proprietorships, partnerships, corporations, limited liability companies, and other business forms. The second half of the course addresses several sections of the Uniform Commercial Code, such as negotiable instruments, bank collections and deposits and secured transactions. Finally, the course examines the law of suretyship, debtor-creditor relationships, and bankrupcty.

BU 0320 Employment Law and Discrimination in the Workplace 3 Credits
Attributes: MGEL Management: General Elective, UDIV U.S. Diversity
This course examines a variety of legal issues related to the workplace including the doctrine of employment at will, employee privacy, and the history and development of labor unions and the legal protections afforded by the National Labor Relations Act. A study of the role of the Civil Rights Act of 1964 and the Equal Employment Opportunity Commission in eradicating discrimination based on race, sex, religion, national origin, age, and disability occupies a major portion of the course. Other employment issues include affirmative action, worker safety, and compensation.

BU 0391 Seminar in Business Law and Ethics 3 Credits
Prerequisites: AE 0291, BU 0211, two additional courses in law or applied ethics.
This interdisciplinary study of these two aspects of the business environment is cross-listed as AE 0391. Topics focus on the interaction of law and ethics, and the regulatory public policy issues in such areas as multiculturalism, work and family, the environment, product safety, international business, and advertising. This course is the capstone experience for students earning a minor in business law and ethics.

BU 0395 Internship 3 Credits
Prerequisite: Junior standing.
Students will engage in a work experience that is designed to be relevant to the student's academic pursuits, personal development, and professional preparation. The internship provides students with the opportunity to gain experience in workplace settings and to translate classroom learning into practice. The internship is a substantive career development experience. It can be paid or unpaid with the intent of the experience being for the student to be exposed to ideas and concepts in a professional setting while being mentored. At the end of the internship experience, students will be able to reflect on their personal and professional growth and make a more informed decision on their career path. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

BU 0396 Internship 3 Credits
Prerequisite: Junior standing.
Students will engage in a work experience that is designed to be relevant to the student's academic pursuits, personal development, and professional preparation. The internship provides students with the opportunity to gain experience in workplace settings and to translate classroom learning into practice. The internship is a substantive career development experience. It can be paid or unpaid with the intent of the experience being for the student to be exposed to ideas and concepts in a professional setting while being mentored. At the end of the internship experience, students will be able to reflect on their personal and professional growth and make a more informed decision on their career path. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

BU 0397 Internship 1 Credit
Prerequisite: Junior standing.
Students will engage in a work experience that is designed to be relevant to the student's academic pursuits, personal development, and professional preparation. The internship provides students with the opportunity to gain experience in workplace settings and to translate classroom learning into practice. The internship is a substantive career development experience. It can be paid or unpaid with the intent of the experience being for the student to be exposed to ideas and concepts in a professional setting while being mentored. At the end of the internship experience, students will be able to reflect on their personal and professional growth and make a more informed decision on their career path. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

BU 0398 Internship 1 Credit
Prerequisite: Junior standing.
Students will engage in a work experience that is designed to be relevant to the student's academic pursuits, personal development, and professional preparation. The internship provides students with the opportunity to gain experience in workplace settings and to translate classroom learning into practice. The internship is a substantive career development experience. It can be paid or unpaid with the intent of the experience being for the student to be exposed to ideas and concepts in a professional setting while being mentored. At the end of the internship experience, students will be able to reflect on their personal and professional growth and make a more informed decision on their career path. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

Other Subjects
Consult the pages for each department for courses in the following fields:

• Accounting (p. 261)
• Economics (p. 264)
• Finance (p. 267)
• Information Systems and Operations Management (p. 269)
• Management (p. 274)
• Marketing (p. 280)

Core Curriculum
The Dolan School of Business undergraduate business core curriculum provides a solid foundation in business, while giving students more time to delve into their individual areas of study.

<sup>1</sup> Some students, contingent on Math placement, will satisfy the DSU’s math core requirement with two (vs. three) courses, resulting in 20 (vs. 21) courses and 60 (vs. 63) general education core credits. For these students, one additional "free elective" course (3 credits) will be needed to complete the requisite 41 courses / 123 credits to graduate.

General Education Core Curriculum

21 courses, 63 credits.

The general education core curriculum provides a truly liberal education, drawing upon five major areas of knowledge. For each of these five areas of competency, business majors select courses as follows:

AREA I: MATHEMATICS AND NATURAL SCIENCES
- Two or three semesters of mathematics, depending on placement:
  - At least one semester must be a calculus course: MA 0119, MA 0120, MA 0145, MA 0146, MA 0171, or MA 0172.
  - MA 0217 is required.
  - EC 0278 may substitute for MA 0217. EC 0278 does not satisfy a mathematics core requirement.
- Two semesters of a natural science. Any two courses in any of the natural sciences, as well as AY 0110, AY 0115, or PY 0261, fulfill this requirement.

AREA II: HISTORY AND THE SOCIAL AND BEHAVIORAL SCIENCES
- Two semesters of history. One 100-level history course is required, plus one 200- or 300-level course.
- EC 0011 Introduction to Microeconomics
- EC 0012 Introduction to Macroeconomics

AREA III: PHILOSOPHY AND RELIGIOUS STUDIES
- Two semesters of philosophy. PH 0101 is required, plus one 200-level course.
- Two semesters of religious studies: RS 0101 is required, plus one 200-level course.
- AE 0291 Business Ethics

AREA IV: ENGLISH AND VISUAL AND PERFORMING ARTS
- Three semesters of English: EN 0011 and EN 0012 are required, plus one 100-level English literature course. Writing courses (ENW) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement; see listings under Classical Studies (p. 86) as well as Modern Languages and Literatures (p. 163).
- Two semesters of visual and performing arts.

- One semester must be in the area of art history, film, television, and media arts history; music history; or theatre history. (Attribute: VPCH)
- The other semester may be selected from any of the three-credit course offerings in art history, film, television & media arts; music; studio art, and theatre. (Attribute: VPCH or VPC2)

AREA V: MODERN AND CLASSICAL LANGUAGES
- Two sequential semesters of one language selected from the offerings of the Department of Modern Languages and Literatures (p. 163) or the Classical Studies Program (p. 86).

Diversity Requirements

All students must complete one U.S. and one world diversity course from a designated list of courses. The courses may be chosen from the University core, business core, major, or electives.

Business Core Requirements

9 courses; 27 credits.

Total Credits 27

<sup>1</sup> These courses should be completed in the first year.
<sup>2</sup> These courses should be completed in the second year.
<sup>3</sup> This course may not be taken until the junior year.
<sup>4</sup> This course may not be taken until the senior year.

Business Major Requirements

6 courses; 18 credits.

Descriptions and requirements of each of the six majors are detailed in the respective departmental sections that follow. Course descriptions are also included.

Business Elective

1 course; 3 credits.

Each of the majors in the Dolan School of Business requires the completion of one business elective course of three credits. This elective course may be taken from any business offering, including an approved 3-credit internship, provided all prerequisites are met.

Free Electives

4 courses; 12 credits.

All business students must complete a minimum of four free electives totaling 12 credits. A free elective is a three- to four-credit course chosen by students without any restrictions related to their majors. Students can (and often do) use the free electives toward the completion of a double
Accounting

The accounting program in the Charles F. Dolan School of Business offers students a complete liberal arts education combined with an innovative and integrated approach to business studies. Through the program, students acquire the conceptual and technical knowledge to develop, measure, analyze, and validate financial information.

The curriculum emphasizes the role of accounting as a key component of all business enterprises. Our faculty takes a personal interest in developing our student’s professional foundation and personal potential. Majors acquire excellent accounting and communication skills, and are well versed in the various fields of business. Throughout, you learn how to record, examine, and communicate information concerning an individual’s or organizations financial performance.

- Accounting Information Systems Minor (p. 263)

Courses

AC 0011 Introduction to Financial Accounting 3 Credits
This course introduces students to financial accounting. Students learn to read and comprehend published financial statements and are introduced to the financial reporting process. Topics include financial statement analysis; accrual accounting; revenue and expense recognition; and accounting for assets, liabilities, and equities.

AC 0012 Introduction to Management Accounting 3 Credits
Prerequisite: AC 0011.
This course introduces students to managerial accounting and the role of accounting information in managerial decision-making. Topics include a description of basic cost elements; the interrelationship between fixed costs, variable costs, and profit; and methods of accumulating the costs associated with producing products and providing services (e.g., activity-based costing), so that students can make recommendations about performance evaluation, project evaluation and other management decisions.

AC 0203 Intermediate Accounting I 3 Credits
Prerequisite: AC 0011.
This course provides an in-depth study of financial accounting theory and concepts, and the presentation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP). The course emphasizes balance sheet valuations and their relationship to income measurement and determination.

AC 0204 Intermediate Accounting II 3 Credits
Prerequisite: AC 0203.
This course continues the in-depth study of financial accounting theory and concepts, and the presentation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) begun in AC 0203. In addition to balance sheet valuation and income measurement issues, the course includes special topics such as earnings per share, accounting for income taxes, leases, and cash flows.

AC 0265 Accounting Information Systems 3 Credits
Prerequisite: AC 0012.
This course analyzes the methods used to capture, process, and communicate accounting information in a modern business enterprise. Students learn to document business transaction cycles using data-flow diagrams and flowcharts. They analyze the accounting information system, identify weaknesses, and recommend improvements to internal control. Students process accounting information through a modern database management application program such as a general ledger package or an enterprise resource planning system.

AC 0310 Advanced Accounting 3 Credits
Prerequisites: AC 0204; junior or senior standing.
This course focuses on accounting for various financial investments, including financial instruments, derivatives, and business combinations. Students also study the role of financial instruments in hedging foreign currency exposures and the complications encountered in financial reporting in a global environment.

AC 0320 Cost Management 3 Credits
Prerequisites: AC 0012, AC 0203, junior or senior standing.
This course focuses on the proactive management of costs and the effect of costs on managers’ decision-making, planning, and control. Students learn to accumulate costs and assign them to products and services using various techniques such as activity-based costing. Other topics include profit planning and resource allocation through the budgeting process; the evaluations of organizational performance in cost, profit, and investment centers; and the importance of cost in the strategic management of the organization.

AC 0320L Cost Management Lab 1 Credit
Corequisite: AC 0320.
In this lab, students practice applying cost accounting concepts. Activities include using computer applications (e.g., Excel) to solve and present solutions to cost management problems. Note: This optional lab is not required, but highly recommended.

AC 0330 Auditing 3 Credits
Prerequisites: AC 0204; junior or senior standing.
This course introduces the audit of financial statements by independent CPAs. It bridges the gap between knowledge of accounting principles and the professional practice of accounting and auditing in the working world. Students learn about the role of auditing in society and the professional standards for behavioral and technical competence. They also study the factors entering into judgments about audit risk and the fair presentation of financial statement assertions. The course presents programs and procedures for defining audit objectives, gathering evidence, making decisions, and exercising professional skepticism.

AC 0343 Federal Income Taxation I 3 Credits
Prerequisites: AC 0204; junior or senior standing.
This course introduces students to income tax, adjusted gross income, deductions from adjusted gross income, itemized deductions, property transactions, filing status and exemptions, passive activity losses, tax credits, and tax computations. The course also includes tax compliance and preparation considerations for individuals.
AC 0344 Individual Taxation: Socioeconomic Applications  3 Credits
Attributes: UDIV U.S. Diversity
Prerequisites: AC 0343, junior or senior standing.
This course builds on the knowledge students obtained from AC 0343 Federal Income Taxation I. In addition to reviewing the fundamentals of individual income tax theory and the associated various forms and schedules, the course will provide students with practical experience in preparing and filing individual tax returns and the procedures used to enforce the individual taxation system. Students will become familiar with using the tax forms, calculating different tax credits and deductions, and conducting research to answer tax questions. The course will also address different social, economic, and ethical perspectives of the taxation system. Students will apply professional tax software, and will be required to obtain the necessary certification and volunteer in a Volunteer Income Tax Assistance (VITA) site as tax preparers.

AC 0345 Federal Income Taxation II  3 Credits
Prerequisites: AC 0343; junior or senior standing.
This course continues the study of taxation begun in AC 0343. The topics include formation of the corporation, distributions, liquidations, and reorganizations. The course covers tax return preparation, tax planning, research, and compliance issues throughout, and also includes personal holding companies, Subchapter S corporations, and partnerships.

AC 0380 Not-for-Profit Accounting  3 Credits
Prerequisites: AC 0204; junior or senior standing.
This course examines accounting theory and concepts, and the reporting principles promulgated by the Financial Accounting Standards Board (FASB) as they relate to voluntary health and welfare organizations, healthcare organizations and universities and all types of not for profit organizations. Learning will be enhanced by a service learning experience.

AC 0391 Internship  3 Credits
Prerequisites: Junior standing.
Students gain practical experience in accounting. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

AC 0392 Internship  3 Credits
Prerequisites: Junior standing.
Students gain practical experience in accounting. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

AC 0393 Internship  1 Credit
Prerequisites: Junior standing.
Students gain practical experience in accounting. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

AC 0394 Internship  1 Credit
Prerequisites: Junior standing.
Students gain practical experience in accounting. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

AC 0397 Independent Study  3 or 6 Credits
Prerequisite: Senior standing.
This course provides students with the opportunity to study and research a specialized topic under faculty guidance. Students must have a GPA of 2.5 or higher. Open to Accounting majors only. Enrollment by permission only.

AC 0398 Independent Study  3 or 6 Credits
Prerequisite: Senior standing.
This course provides students with the opportunity to study and research a specialized topic under faculty guidance. Students must have a GPA of 2.5 or higher. Open to Accounting majors only. Enrollment by permission only.

Accounting Major

Accounting majors take courses appropriate for careers in public and private accounting, internal auditing, and government and not-for-profit accounting. Many students find that undergraduate studies in accounting are excellent preparation for a wide range of corporate positions.

Requirements

For a 48-credit major in accounting, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Core Requirements</td>
<td>27</td>
<td></td>
</tr>
<tr>
<td>AC 0203</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>AC 0204</td>
<td>Intermediate Accounting II</td>
<td>3</td>
</tr>
<tr>
<td>AC 0310</td>
<td>Advanced Accounting</td>
<td>3</td>
</tr>
<tr>
<td>AC 0320</td>
<td>Cost Management</td>
<td>3</td>
</tr>
<tr>
<td>AC 0330</td>
<td>Auditing</td>
<td>3</td>
</tr>
<tr>
<td>AC 0343</td>
<td>Federal Income Taxation I</td>
<td>3</td>
</tr>
</tbody>
</table>
Select one Business Elective 3

Total Credits 48

Accounting majors must maintain a GPA of at least 2.5 in accounting.

**Accounting Minor**

The accounting minor offers students an extensive understanding of accounting content and function in areas of business. It is not designed to prepare a student for the Certified Public Accountant exam.

For a 15-credit minor in accounting, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AC 0011</td>
<td>Introduction to Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>AC 0012</td>
<td>Introduction to Management Accounting</td>
<td>3</td>
</tr>
<tr>
<td>AC 0203</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>AC 0204</td>
<td>Intermediate Accounting II</td>
<td>3</td>
</tr>
<tr>
<td>AC 0265</td>
<td>Accounting Information Systems (or a 300-level accounting elective course)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 15

Accounting minors must maintain a GPA of at least 2.5 in all accounting courses.

**Accounting Information Systems Minor**

The accounting information systems minor highlights the impact of technology on the accounting profession as well as the regulatory and internal control issues associated with accounting information.

For an 18-credit minor in accounting information systems, students must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AC 0011</td>
<td>Introduction to Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>AC 0203</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>AC 0265</td>
<td>Accounting Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>IS 0100</td>
<td>Introduction to Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>IS 0210</td>
<td>Fundamentals of Business Analytics</td>
<td>3</td>
</tr>
<tr>
<td>IS 0260</td>
<td>Database Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 18

Accounting majors may double count AC 0203 for the accounting major and the accounting information systems minor. Information systems majors may double count IS 0210 for the information systems major and the accounting information systems minor. Accounting information systems minors may not declare a second minor in accounting or information systems.

**Economics**

The curriculum of the Department of Economics blends basic economic concepts and their applications with contemporary issues. Courses develop reasoning capacity and analytical ability in students. By focusing on areas of application, students use economic principles to stimulate their powers of interpretation, synthesis, and understanding. The department’s individualized counseling encourages majors to tailor their study to career and personal enrichment goals. A major in economics provides an excellent background for employment in the business world while maintaining the objectives of a liberal education. The economics degree pairs nicely with a wide variety of double majors and minors, including finance, math, international studies, area studies, and other social sciences. In fact, many economic elective courses “double count” towards other major, minor, and core requirements. Economics majors regularly use a variety of up-to-date analytical tools, including Microsoft Excel and PowerPoint, and are introduced to Stata, a sophisticated statistical package. The economics major also prepares students for advanced study in graduate or professional schools.

**Learning Outcomes for Economics Students**

Students who study in the economics department should be able to use models and analytical tools, within an institutional framework, to understand and evaluate economic outcomes.

**Goal I**

Students will understand the tradeoffs between efficiency and equity that are made as resources are allocated among economic actors

Learning Objectives: Students will be able to
- appraise various market models
- use welfare measures to analyze economic tradeoffs

**Goal II**

Students will describe economic concepts and apply them to real world issues.

Learning Objectives: Students will be able to
- use theory to explain economic events
- evaluate the success or failure of policies used to achieve intended economic outcomes

**Goal III**

Students will acquire quantitative skills to analyze data and use that data and analysis to support logical positions

Learning Objectives: Students will be able to
- acquire data-gathering skills in order to analyze an existing economic argument or present an economic argument of their own
- experience using statistical software packages to analyze economic data,
- formulate empirically testable hypotheses

**Goal IV**

Students will use qualitative and quantitative models to interpret the impact of public policy choices

Learning Objectives: Students will be able to
- identify how economic policies can be utilized to overcome market inadequacies
- construct economic arguments using both quantitative and non-quantitative forms of evidence

Courses

**EC 0011 Introduction to Microeconomics**  
3 Credits  
This course analyzes the behavior of individual consumers and producers as they deal with the economic problem of allocating scarce resources. The course examines how markets function to establish prices and quantities through supply and demand, how resource costs influence firms’ supply, and how variations in competition levels affect economic efficiency. Topics may include antitrust policy, the distribution of income, the role of government, and environmental problems. The course includes computer applications.

**EC 0012 Introduction to Macroeconomics**  
3 Credits  
This course develops models of the aggregate economy to determine the level of output, income, prices, and unemployment in an economy. In recognition of the growing importance of global economic activity, these models incorporate the international sector. The course examines and evaluates the role of public economic policy, including fiscal and monetary policy. Topics may include growth theory and price stability. The course includes computer applications.

**EC 0112 Economic Aspects of Current Social Problems**  
3 Credits  
Attributes: LCEL LACS Minor: Elective  
This course uses a policy-oriented approach to study contemporary economic issues. Topics include government spending, the role of federal budgets in solving national problems, poverty, welfare, social security, population, the limits to growth controversy, pollution, energy, and regulation.

**EC 0114 The Economics of Race, Class, and Gender in the American Workplace**  
3 Credits  
Attributes: EDCG Educational Studies Cognate, EDDV Educational Studies Diversity, UDIV U.S. Diversity, WSGF Women, Gender, and Sexuality Studies: Gender Focused  
This course examines the impact of race, class, and gender differences on decisions made in households and in the workplace. It begins with an in-depth analysis of labor supply decisions and responsibilities of households, moving to an examination of labor demand decisions and wage-rate determination. The course reviews applications of theoretical predictions as they relate to important public policy issues such as child and elder care, social security, pay equity, the glass ceiling, affirmative action, sexual harassment, and poverty.

**EC 0120 Environmental Economics**  
3 Credits  
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science, LCEL LACS Minor: Elective, WDIV World Diversity  
This course, which presents an overview of the theory and empirical practice of economic analysis as it applies to environmental issues, first establishes a relationship between the environment and economics. It then develops the concept of externalities (or market failures) and the importance of property rights before exploring the valuation of nonmarket goods. It examines the practice of benefit-cost analysis and offers economic solutions to market failures, while highlighting pollution control practices, especially those based on incentives. Throughout, the course examines current issues regarding environmental protection around the globe.

**EC 0140 Health Economics**  
3 Credits  
Attributes: HSSS Health Studies: Social Science  
This course begins by applying microeconomic theory to the health sector of the U.S. economy. The U.S. experience will be generalized to global health issues and alternative health care systems. Topics include the demand for health care and health insurance, managed care and the role of government, physician compensation, and specialty choice, the role of nurses and other healthcare professionals, the hospital sector, and medical cost inflation.

**EC 0150 Media Economics**  
3 Credits  
This course analyzes the operation and consumption of the music, television, and entertainment industries within a microeconomic framework. Students will learn what forms of competition drive the production and distribution of media in the context of a changing technical environment. Theories of different media market settings will be illustrated and then concepts reinforced by real-world examples, including the changing operation of music production and distribution as the internet evolves, and the ways in which current media companies integrate seemingly different products. To explain these processes the topics of competition, pricing, industry structures, and regulatory environments will be explored.

**EC 0152 Economics of Sport**  
3 Credits  
This course develops and examines the tools and concepts of economic analysis as they apply to the sports industry. Topics in professional sports include free agency, salary cap, and new franchises. The course also explores economic issues and institutional structures of sports such as golf and tennis, and the broader industry including the National Collegiate Athletic Association, sports equipment, advertising, minor leagues, and the Olympics. Students gain an increased understanding of how economics affect them through this combination of sports and economics.

**EC 0185 Regional Economic Development**  
3 Credits  
This course includes two key components: a theoretical examination of the basic theories of regional economic development such as growth poles, spillovers, infrastructure requirements, and center-periphery analysis; and an application of these theories to a specific economic issue. Students participate in a comprehensive study of a significant economic issue facing a Connecticut community, in cooperation with a regional agency, resulting in detailed analysis of the issues and potential solutions. Fieldwork is required.
EC 0204 Intermediate Microeconomic Theory 3 Credits
Prerequisite: EC 0011.
This course builds upon and expands the theoretical models of EC 0011. The course introduces indifference curves to explain consumer behavior; short- and long-run production functions, showing their relationship to product costs; and the efficiency of various competitive market structures. Topics include marginal productivity theory of income distribution, monopoly, and general equilibrium theory.

EC 0204L Intermediate Microeconomic Theory Lab 1 Credit
Corequisite: EC 0204.
In this lab, students actively engage in the science of economics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer simulations. Note: This lab is required of all students pursuing the BS in economics; it is optional for students earning the BA.

EC 0205 Intermediate Macroeconomic Theory 3 Credits
Prerequisite: EC 0012.
This course, which includes computer applications, analyzes the determination of national income and output; fiscal and monetary tools; and growth, inflation, and stabilization policies.

EC 0205L Intermediate Macroeconomic Theory Lab 1 Credit
Corequisite: EC 0205.
In this lab, students actively engage in the science of economics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer simulations. Note: This lab is required of all students pursuing the BS in economics; it is optional for students earning the BA.

EC 0210 Money and Banking 3 Credits
Attributes: BUEL Business Elective
Prerequisite: EC 0012.
This course covers the commercial banking industry, the money market, Federal Reserve operations and policy making, and monetary theory.

EC 0224 Labor Economics and Labor Relations 3 Credits
Prerequisites: EC 0011, EC 0012.
Nearly 70 percent of income earned in the United States is a return to labor. This course applies the fundamentals of microeconomic and macroeconomic analysis to important decisions that people make in labor markets. From an employee’s perspective, questions include: Should I work in exchange for a wage? If so, how much? How will my work affect my lifestyle and family decisions? Should I go to school to improve my skills? From an employer’s perspective, questions include: Should I hire workers? If so, how many? How should I pick workers out of a pool of applicants? What techniques should I use to provide incentives for these workers? Many of the answers to these questions require complex analysis and an understanding of the impact of government policy on the workplace. The course explores a variety of public policy issues such as minimum wage programs, government welfare programs, workplace regulatory requirements, Title IX, immigration, and the union movement.

EC 0225 Environmental Economics 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVPE Environmental Studies Elective, EVSS Environmental Studies: Social Science, PJST Peace and Justice Studies
Prerequisites: EC 0011, EC 0120.
This in-depth examination of the economic tools used in environmental economics and policymaking builds on basic environmental economic concepts and provides the opportunity to put these concepts into practice. The course explores common externalities and market failures in the United States and analyzes governmental policies used to control them.

EC 0230 Comparative Economic Systems 3 Credits
Attributes: LCEL LACS Minor: Elective, WDIV World Diversity
Prerequisites: EC 0011 or EC 0012.
Is communism dead? Is capitalism the only real economic system left? This course explores the various economic systems that are used to distribute resources, i.e., to decide “who gets what” in a nation’s economy. The course considers the differences between alternative distribution mechanisms, what it means to transition from one system to another, and how these economic decisions are affected by political and national realities. Because there are so many international alternatives to be explored, each semester focuses on an economic region of the globe: Asia, Eastern Europe and Central Asia, Africa, or Latin America. This course, where appropriate, is available for credit in international studies or area studies programs.

EC 0231 International Trade 3 Credits
Prerequisite: EC 0011.
This course covers international trade theory, U.S. commercial policy (tariffs, quotas), common markets, trade with and among developing nations, balance of payments disequilibria, and multinational enterprises.

EC 0233 International Economic Policy and Finance 3 Credits
Prerequisite: EC 0012.
This course explores international financial relations. Topics include the international monetary system, exchange rate systems, balance of payments adjustment mechanisms, and changes in international finance relations. It treats theoretical concepts and considers governmental policy approaches to the various problems.

EC 0235 Economic Development of Third World Nations 3 Credits
Attributes: LCEL LACS Minor: Elective, WDIV World Diversity
Prerequisites: EC 0011, EC 0120.
This course considers the nature and causes of problems facing low-income nations, with a focus on the impact that various economic policies have on promoting economic development.

EC 0250 Industrial Organization and Competitive Strategy 3 Credits
Prerequisite: EC 0011.
Using microeconomic theory, this course examines the economic behavior of firms and industries, identifying factors affecting the competitive structure of markets and using these structural characteristics to evaluate the efficiency of resource use. Topics include mergers, measures of concentration, pricing, entry barriers, technological change, and product development.

EC 0252 Urban Economics 3 Credits
Prerequisites: EC 0011, EC 0012.
This course analyzes the development of modern urban areas by applying the tools of economic analysis to their problems. Topics include transportation, housing, and the provision and financing of public services.
EC 0270 Engineering Economics 3 Credits
Prerequisite: EC 0011.
Engineering projects must be analyzed based upon their technical soundness, but also upon their ability to attract investment dollars in a market economy. This course prepares engineering students to apply microeconomic, finance, and statistical methods as they analyze the economic feasibility of projects. Students will learn about capital budgeting, risk and uncertainty, demand analysis, production and cost modeling, and linear programming. They will apply Excel and other computer-based simulations to analyze data. The goal of the course is ultimately to provide the student with the economic decision-making skills he or she needs to plan, design, and finance engineering projects.

EC 0275 Managerial Economics 3 Credits
Prerequisite: EC 0011.
This course prepares economics and business students to apply microeconomic, financial, and statistical methods as they analyze the economic feasibility of projects. Students will learn about capital budgeting, risk and uncertainty, demand analysis, regression analysis, production and cost modeling, and linear programming. They will apply Excel and other computer-based simulations to analyze data. The goal of the course is ultimately to provide students with the economic decision-making skills they need to plan, design, and finance projects, and to understand how various divisions of a firm must work together to achieve goals.

EC 0276 Public Finance 3 Credits
Prerequisites: EC 0011, EC 0012.
This course examines government expenditure and tax policies with an emphasis on evaluation of expenditures; the structure of federal, state, and local taxes; and the budget as an economic document.

EC 0278 Economic Statistics 3 Credits
Attributes: EVAP Environmental Studies: Applied Professional Skills
Prerequisites: EC 0011, EC 0012.
This course introduces students to descriptive statistics, probability theory, discrete and continuous probability distributions, sampling methods, sampling distributions, interval estimation, and hypothesis testing. A weekly lab provides opportunities for active exploration and application of course concepts.

EC 0278L Economic Statistics Lab 1 Credit
Corequisite: EC 0278.
In this lab, students actively engage in the science of statistics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer applications appropriate to statistical analysis. Note: This lab is required of all students pursuing the BS in economics; it is not required for students earning the BA.

EC 0290 Mathematical Economics 3 Credits
Prerequisites: EC 0011, EC 0012, MA 0016.
This course applies mathematical models and concepts to economic problems and issues. Mathematical techniques include calculus and matrix algebra. Economic applications include the areas of consumer theory, theory of the firm, industrial organization, and macroeconomic modeling.

EC 0298 Independent Study 1-3 Credits
For economic majors only, this course is open to seniors by invitation or mutual agreement with the instructor.

EC 0299 Internship 3 or 4 Credits
Students, placed in a professional environment by the department, use economic and analytical skills acquired from their courses in a non-academic job setting. Students submit a written assignment detailing their internship experience to a faculty sponsor by the end of the term. Enrollment by permission only.

EC 0320 Financial Markets and Institutions 3 Credits
Prerequisite: EC 0210.
Topics include capital markets, financial intermediaries, equities, bonds, options, futures, security analysis, portfolio theory, and the efficient markets hypothesis. Students manage a hypothetical portfolio and use a computer model.

EC 0380 Econometrics 3 Credits
Prerequisites: EC 0011, EC 0012; EC 0278 or MA 0217.
This course introduces students to the process used to formulate theories of economic behavior in mathematical terms and to test these theories using statistical methods. The course discusses the technique and limitations of econometric analyses as well as methods available for overcoming data problems in measuring quantitative economic relationships.

EC 0397 Microeconomics Seminar 3 Credits
This seminar seeks to familiarize participants with recent developments in the discipline and sharpen research skills. Students complete a research project concerning a topic of their choice. The course includes computer applications. Enrollment by permission only.

EC 0398 Macroeconomics Seminar 3 Credits
This seminar seeks to familiarize participants with recent developments in the discipline and sharpen research skills. Students complete a research project concerning a topic of their choice. The course includes computer applications. Enrollment by permission only.

Economics Major

Economics majors in the Dolan School of Business test the claims of theory against the everyday experience of the marketplace. Courses develop reasoning capacity and analytical ability in students, while internships and service learning courses prepare students for a variety of jobs in business, finance, and government.

Requirements

For a 48-credit major in economics, students complete the following:

<table>
<thead>

1 No more than one 100-level economics course may be counted toward the major.

Investigative Learning Experience

Starting with the Class of 2021, students who complete either the BA or BS degrees in Economics will complete an Investigative Learning Experience as a graduation requirement. This written assignment will ask graduating students to reflect on their learning in the economics major, and to make connections across courses and other experiences, such as internships or study abroad. Students will write up these reflections as a paper and submit it to the department chair before graduation.

Finance

The Finance program at the Dolan School of Business is designed to develop individual competency in the financial theory and tools necessary to conduct sound financial analysis to support the financial decision-making of individuals and organizations. Through the use of lecture, case studies, and computer-based problem solving and simulation, the finance major blends financial theory and practice.

Business core coursework includes accounting and financial reporting, business organization, production and operations, management, marketing, information systems, business law, and ethics. Major courses focus on financing and investing decision-making at the level of the individual and organizations.

<td>This course provides an in depth analysis of fixed income securities and markets. The primary focus of the course is the analysis and valuation of fixed income securities. The course also provides an overview of fixed income markets and an introduction to fixed income portfolio management. Topics to be discussed include interest rate exposure (duration and convexity), credit risk analysis, hedging with swaps and futures, and the term and credit structure of interest rates.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
FI 0305 Financial Trading and Strategic Simulations 3 Credits
Attributes: BUEL Business Elective, FIEL Finance Elective
Prerequisites: FI 0210, FI 0215.
This course introduces students to the forces at work that create a market for various types of financial securities. The emphasis of the course will be to understand the microstructure of financial markets and to investigate the risks and returns of various trading strategies. Students who complete the course satisfactorily will be able to design and execute trading strategies with a firm understanding of their potential outcomes.

FI 0310 Portfolio Analysis 3 Credits
Prerequisites: FI 0210, junior standing.
This course deals with the principles and applications of modern portfolio theory from the point of view of both the institutional and the individual investor. More specifically, the course analyzes portfolio objectives, efficient portfolio construction, performance evaluation, and portfolio risk management using derivatives.

FI 0315 Futures and Options Markets 3 Credits
Prerequisites: FI 0210, junior standing.
This course deals with options and futures on financial assets, as well as commodities. The course covers the basic uses of these instruments and the various pricing methodologies based on equilibrium conditions.

FI 0320 Financial Modeling 3 Credits
Prerequisites: FI 0210 or FI 0215: junior standing.
In this course, students will build financial models in a spreadsheet environment. Emphasis is placed on the use of financial models to conduct quantitative analysis and aid in decision making using advanced spreadsheet analytical tools and commands including simulation. The modeling assignments cover a wide range of topics in corporate finance and investment topics. The course requires group work and a final project.

FI 0325 Seminar in Real Estate 3 Credits
Attributes: FIEL Finance Elective
Prerequisites: FI 0210 or FI 0215; junior or senior standing.
This course provides an in-depth analysis of real estate debt and equity markets. Both primary and secondary markets will be studied. The course will cover the following topics: analysis of real estate markets; valuation of residential and commercial real estate; investment and financing of residential and commercial real estate property; application of financial mathematics to the calculation of payment streams, outstanding loan balances, equity returns and other basic financial measurements; secondary mortgage market securitization and the market for residential and commercial mortgage-backed securities; Real Estate Investment Trusts.

FI 0330 Case Studies in Finance 3 Credits
Prerequisites: FI 0210, FI 0215, senior standing.
This course examines and applies the principles developed in financial management and investments in a domestic and international context with the objective of integrating finance practice and theory using case studies.

FI 0391 Internship 3-4 Credits
Prerequisite: Junior standing.
Students may take up to two semesters of a department-approved internship. Students must have a GPA of 2.5 or higher.

FI 0392 Internship 3 Credits
Prerequisite: Junior standing.
Students may take up to two semesters of a department-approved internship. Students must have a GPA of 2.5 or higher.

Finance Major

Finance majors study the theory and practice of financial management and investments in the required foundation courses. The finance major builds upon a solid foundation in math and statistics, economics, and accounting. Finance electives provide for the study of more specialized topics within financial management and investments such as financial modeling, futures and options, portfolio analysis, real estate, and other specialized topics. All finance majors complete a capstone experience project.
in their final semester that synthesizes their business and finance knowledge in analyzing case studies in a wide variety of applications. The finance major prepares students to enter into a wide variety of finance positions with corporate, not-for-profit, and governmental organizations.

### Requirements

For a 48-credit major in finance, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FI 0210</td>
<td>Principles of Investment</td>

### Information Systems and Operations Management

What do today's leading companies have in common? Most were founded and are managed by Information Systems (IS) professionals! Through the IS major (or minor), you will learn about and be exposed to the various tools, software, apps and other technologies that enable you to create, implement and manage such visionary businesses. The Information Systems and Operations Management (ISOM) Department offers one major and three minor areas of study as detailed below. One of these minors is Business Analytics, which is a hot area in business currently. It was designed to complement your existing major through exposure to various data analysis tools and software.

All of the ISOM courses offer students valuable hands-on experience, and most include a semester-wide team project, which can involve real organizations as clients. Coursework includes systems analysis and design, database systems, data mining, project management, and business analytics. We encourage you to explore the transformative world of Information Systems and Operations Management by talking to our awesome faculty!

### Programs

- Information Systems Major (p. 271)
- Accounting Information Systems Minor (p. 271)
- Business Analytics Minor (p. 272)
- Information Systems Minor (p. 272)

### Courses

**IS 0100 Introduction to Information Systems**  
3 Credits  
This course helps students understand the role of Information Systems in the contemporary business environment. It introduces them to the use of information systems concepts and techniques in solving a wide range of business problems. Working in small teams, students develop, analyze, and present solutions to a business problem using information technology.

**IS 0135 Fundamentals of Web Design**  
3 Credits  
Students learn the theory and practice of front-end web design. Theoretical content will primarily focus on website design, with a heavy emphasis on developing sites that conform to standards and are responsive to the needs of practical applications and mobile devices. Hands-on work will help develop technical skills, such as HTML, CSS, XML, and other web client technologies. Students will learn to use a professional-quality toolset and to follow generally accepted best practices. The course includes weekly web-programming assignments and a semester project.
IS 0210 Fundamentals of Business Analytics  3 Credits
Attributes: BUEL Business Elective
Prerequisite: Junior or senior standing; EC 0278 or MA 0017 or MA 0217 or PY 0201 or SO 0221.
This course introduces fundamental knowledge and essential skills in business analytics, including modeling and analyzing data using spreadsheet software, such as Excel and its add-ons, as well as tools for optimization, descriptive analytics, visualizing and exploring data, predictive modeling, regression analysis, time series analysis, portfolio decisions, risk management, and simulation. Business models relevant to finance, accounting, marketing, and operations management are set up and solved, with managerial interpretations and "what if" analyses to provide further insight into real business problems and solutions.

IS 0240 Systems Analysis and Logical Design  3 Credits
Prerequisite: IS 0100.
This course focuses on the introduction of new systems and technology into the firm. Students learn to analyze and design information systems to meet specific business needs. Coverage includes structured and object-oriented methodologies, with an emphasis on current best practice. CASE tools employing the Unified Modeling Language are used as appropriate. As part of a semester project, students analyze requirements for an information system of moderate size and complexity, and then architect and evaluate alternative systems that meet the requirements. The semester projects are "juried" by a team of experienced professionals from the field.

IS 0260 Database Systems  3 Credits
Prerequisite: IS 0100.
This course introduces the concepts of data modeling, as they apply in the business world, within the context of a client/server environment. Topics include relational databases, object-oriented databases, and Internet databases, along with the Structured Query Language that is used to create and manipulate databases. Students are also introduced to the architecture of Data Warehouses. Formerly IS 0340.

IS 0310 E-Business Applications  3 Credits
Prerequisite: IS 0100.
This course examines e-business applications such as knowledge management, enterprise resource planning (ERP), customer relationship management (CRM), and mobile applications in inter-organizational, national, and global business environments. Students explore new e-business applications, the economics of e-business, value chains and value networks, related legal and ethical issues, information privacy and security, disaster planning and recovery, and the impact of emerging e-business and mobile applications. The course includes a brief introduction to technical architecture, technology, solutions, and financing required for effective e-business applications. Students investigate emerging opportunities, challenges, and trends through interactive team exercises, case studies, and individual research projects and presentations.

IS 0315 Data Mining and Applications  3 Credits
Attributes: BUEL Business Elective
Prerequisite: IS 0210.
This course provides the students with an understanding of the practices of data mining, with a special focus on business analytics. To assure the practical relevance of this course, this course focuses on the applications of techniques and tools that help realize data mining in terms of business analytics and actionable intelligence. The pillar of this course is laid out along with the well-accepted data mining process: starting with data collection techniques, such as collecting/extracting web/text/social media data from heterogeneous resources; following with the discussions toward data preparation techniques (quality and relevance control). Applications of these techniques and tools on different subareas, such as web/text/social media analytics are covered.

IS 0320 Systems Design and Implementation  3 Credits
Prerequisites: IS 0260, IS 0240; one programming course.
Students work in collaborating teams to design and build a networked information system. Emphasis is placed on development as an ongoing iterative and incremental process. Standard CASE tools, design patterns, and business practices are used to ensure proper communication and integration across development teams.

IS 0391 Internship  3 Credits
Prerequisite: Junior standing.
Students may take up to two semesters of a department-approved internship. Students must have a GPA of 2.5 or higher.

IS 0392 Internship  3 Credits
Prerequisite: Junior standing.
Students may take up to two semesters of a department-approved internship. Students must have a GPA of 2.5 or higher.

IS 0393 Internship  1 Credit
Prerequisite: Junior standing.
Students may take up to two semesters of a department-approved internship. Students must have a GPA of 2.5 or higher.

IS 0394 Internship  1 Credit
Prerequisite: Junior standing.
Students may take up to two semesters of a department-approved internship. Students must have a GPA of 2.5 or higher.

IS 0395 Systems Project  3 Credits
Prerequisites: IS 0240; Senior status.
This course applies skills that have been learned in the information systems major and the business core. These skills span the areas of project management, systems analysis, systems design, business communication, organizational behavior, software development, operations management, and business processes. Students demonstrate their knowledge by engaging in a student-defined project that provides a business solution for a client. The primary deliverables for the course are a system or a set of alternatives to solve the business problem, along with all related documentation.

IS 0397 Seminar in Information Systems  3 or 6 Credits
This special program involving independent study and research is also intended for students accepted in an approved internship. This course, administered by the Office of the Dean, requires a formal application by the student to the faculty project advisor and the department chair. The course does not count toward fulfilling the requirements for the information systems major, but does count toward meeting University credit requirements. Open only to senior Information Systems majors. Enrollment by permission only.
IS 0398 Seminar in Information Systems 3 or 6 Credits
This special program involving independent study and research is also intended for students accepted in an approved internship. This course, administered by the Office of the Dean, requires a formal application by the student to the faculty project advisor and the department chair. The course does not count toward fulfilling the requirements for the information systems major, but does count toward meeting University credit requirements. Open only to senior Information Systems majors. Enrollment by permission only.

IS 0399 Independent Study 3 Credits
Students pursue topics of special interest through independent study, research, and/or completion of an information systems project under the supervision of a full-time faculty member. The department chair and dean must approve the work. The student and a faculty project advisor who agrees to conduct the work according to a mutually agreeable schedule must complete an application form. Once the form is completed and submitted to the registrar, the student may register for the course, which is taught during the fall and spring semesters. If any work is expected to occur at any time other than the semester registered, students must obtain the approval of the faculty project advisor and the department chair prior to commencing any work. Normally, students completed at least two advanced information systems courses before taking this course.

OM 0101 Operations Management 3 Credits
Prerequisites: EC 0278 or MA 0017 or MA 0217; Sophomore standing.
This course provides the primary exposure to service and manufacturing operations management within the business core curriculum. Topics include process modeling, quality management and control, decision analysis, capacity planning, supply chain management, and project planning and control. Special attention is given to showing how concepts and models presented in lectures and readings apply to real-world business situations. Examples of international operations are studied, and ethical issues are explored within the context of decisions such as where to locate facilities.

OM 0140 Project Management 3 Credits
Prerequisite: EC 0278 or MA 0017 or MA 0217.
This course introduces students to project management and its role in business operations, with applications in such functional areas as accounting, finance, information systems, management, and marketing. Topics include the linkage between projects and organizational strategy, project planning and scheduling, project development and implementation, applying best practices and tools, evaluation methodologies and control techniques, and critical success factors. Special attention is given to showing how concepts and models presented in lectures and readings apply to real-world projects.

Information Systems Major
The Information Systems major prepares students to design and deliver business solutions that integrate people, processes, and technology. Students learn to:

- identify and analyze business opportunities
- acquire and assess business solutions
- lead and facilitate strategic initiatives
- enable informed decision making
- manage relationships with technology providers and customers

Information Systems majors study the analysis, design, development, and management of information systems in organizations. They develop an understanding of the need for information, its use in the decision-making process, and the procedures by which information is provided to management.

Requirements
For a 48-credit major in information systems, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IS 0135</td>
<td>Fundamentals of Web Design</td>
<td>3</td>

<td></td>
</tr>
</tbody>
</table>

Students must maintain at least a 2.5 average in all information systems and operations management major courses.

Accounting Information Systems Minor
The accounting information systems minor highlights the impact of technology on the accounting profession as well as the regulatory and internal control issues associated with accounting information.

For an 18-credit minor in accounting information systems, students must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Accounting Information Systems</td>
<td>18</td>
</tr>
</tbody>
</table>
Business Analytics Minor

Business analytics focuses on developing new insights and understanding for solving business problems based on data and statistical techniques, which complements the other disciplines within the school. Business analytics refers to the skills, technologies, applications and practices for continuous iterative exploration and investigation of past business performance to gain insight and drive business planning.

Student earn a 15-credit business analytics minor by completing the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IS 0100</td>
<td>Introduction to Information Systems</td>

Total Credits 15

International Business

The International Studies Program at Fairfield University draws from a group of interdisciplinary faculty, practitioners, and students from many parts of the world with a commitment to thinking critically about global challenges, promoting social justice, and engaging in service. Students pursuing the major in International Business must complete a co-curricular major or minor in the Dolan School of Business. The International Business major seeks to heighten global awareness in the ways we situate ourselves geographically, and encounter conflict, gender, race, class, nationality, environmental challenges, as well as business and economic development.

International Business Major

Students majoring in International Business begin with foundational coursework in international relations, economics, geography, and anthropology, and complete their degree requirements with a senior research project. To prepare for this, they develop their own specialization taking courses from the thematic areas of Global Development; Conflict, Diplomacy, and Peace building; and Social Justice and Humanitarianism; and by choosing a complementary major or minor in the Dolan School of Business. Students take courses on multinational organizations and regional trade pacts, economic and political systems, socio-cultural
structures, microfinance, and other diversities that have operational
significance for community and economic development and international
business.

Co-Curricular Business Requirement
Students pursuing the major in International Business are required to
complete a co-curricular major or minor within the Dolan School of
Business.

Complementary Studies and International Opportunities
The International Studies Program reinforces multidimensional learning
with real-world experience through foreign language studies, service
learning, Model United Nations, the Undergraduate Journal of Global
Citizenship, the International Business/International Studies Club,
international internships and study abroad opportunities, and through
work with our faculty on research projects and as student teaching
assistants. Therefore students are expected to engage in one or more of
these forms of experiential learning.

Graduation with Honors
Fairfield University has a campus chapter of Sigma Iota Rho, the national
honor society for international studies. Students must have attained a
junior standing and completed at least twenty-one hours of course work
toward the International Studies or International Business major, or nine
hours towards the International Studies minor. Students with an overall
GPA of 3.3 or greater and a GPA of 3.4 or higher in their International
Studies or International Business major, or nine
hours of course work

Requirements
For a major in International Business, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Core Requirements</td>
<td>27</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
</tbody>
</table>

1 The Business elective is automatically fulfilled by the required co-
curricular major or minor in the Dolan School of Business. The
required number of co-curricular credits varies, contingent on the major
or minor chosen.

International Business courses completed abroad must be pre-approved
by the Assistant Dean of the Dolan School of Business and the Director of
International Studies.

Management

The management program in the Dolan School of Business offers an innovative experience in the areas of leadership, strategic planning and decision-making in business organizations. Management theory is linked to the realities of the business world through case studies, field work, research projects and internships. Students are given the option to choose from four concentrations: business and society, entrepreneurship, hospitality and tourism management, or human resource management.

Our faculty is composed of business professionals and scholars. Their experience offers a connection between the practice and theory of the profession. As a major in the program, students will build a foundation of modern business experience and relevant theory to understand the behavioral, social, and environmental factors that impact performance. Throughout, students will learn the nature of management and the relationship between business and society.

Programs

- Management Major (p. 278)
  - Concentration in Business and Society
  - Concentration in Entrepreneurship
  - Concentration in Hospitality and Tourism Management
  - Concentration in Human Resources
- Business Law and Ethics Minor (p. 279)
- Entrepreneurship Minor (p. 279)
- Management Minor (p. 280)
- Sports Leadership and Management Minor (p. 280)

Courses

MG 0101 Introduction to Management 3 Credits
Prerequisite: Sophomore standing.
This course integrates, through theory and its application, the various topics, concepts, and modalities that make up the Management discipline. Its purpose is twofold: 1) to provide all business students with a strong grounding in how individuals and organizations function to support the strategic goals of business, and 2) to provide a foundation for further study by management majors and minors. The course introduces students to team/group work; the relationship of business to local, national, and global communities; the ethical implications of business decisions and models; organizational behavior; human resource management; leadership and organizational culture.

MG 0235 Managing Human Resources 3 Credits
Prerequisite: Junior standing.
This course introduces students to how effective management of people can contribute to firm performance and competitive advantage. The course explores human resource management activities: human resource planning, recruiting, selection, training, performance appraisal, compensation, and labor relations. Through extensive use of cases, simulations, and exercises, students actively learn to implement various human resource management strategies to better serve organizational and employee interests.
MG 0240 Leading and Managing People 3 Credits
Prerequisite: Junior standing.
This course prepares students for the task of leading and managing people. The purpose of the course is to address advanced organizational behavior topics as well as to illuminate the research and practice associated with effective leadership. The first segment of the course reviews the leadership literature, including trait theory, aspects of leadership style, leader emergence, contingency theories, and charismatic/transformational leadership practices. The second segment involves skill practice in managing people in the areas of communication, conflict resolution, empowerment, delegation, influence, teamwork, problem solving, and diversity issues. The third and final segment explores strategic leadership from the CEO perspective, and addresses how leaders create change and transform organizations.

MG 0300 Business Strategies in the Global Environment 3 Credits
Prerequisites: Matriculation in a business program, senior standing, completion of business core.
This capstone course, required for senior level students in the School of Business, integrates the business core through the concept of strategic management. It offers an opportunity for students to put together all they have learned in their discipline and to see the “big picture” of how business organizations function. The primary goal is to prepare students to think like top managers and to understand that strategic decision-making encompasses all parts of the organization, internal and external, bringing together all disciplines of management. The course includes lectures, readings, cases, and a capstone group project.

MG 0302 Topics in Human Resources 3 Credits
Prerequisite: Junior standing.
This course examines topics in human resource management as they relate to contemporary organizations. The course gives students an in-depth understanding of current issues or topics in the area of human resources, giving special attention to the strategic aspect of human resource management: how human resources can create value for the organization. Topics may include strategic human resource management; human resource systems; human resource planning; quality of work life; flexible work; diversity; affirmative action; legal aspects of employment; and work-family issues.

MG 0303 Topics in Management (Shell) 3 Credits
Attributes: HSTE Health Studies: Traditions, Delivery, and Ethics, MGEL Management: General Elective
Prerequisite: Junior standing.
This course gives students an in-depth understanding of current issues and topics in management. The focus is on the application and analysis of managerial principles in contemporary problem solving. The faculty member teaching this course constructs course content around current developments in his or her research area. Topics may include decision-making in a chaotic environment; change management; organizational structure and design; health care; social justice; the political and social context of organizations; the consequences of the free market logic; leadership; the environment; diversity and gender; e-business; and managing virtual teams and organizations.

MG 0303C Topics in Management: Sports Media Platforms and Strategies 3 Credits
Attributes: MGEL Management: General Elective
Prerequisite: Junior standing.
The course allows questions to be framed, and answers sought, with regard to the challenge of diversity in the work environment. The course uses readings, exercises, and real-world projects to formulate the following: a definition of diversity; an awareness of its impact on businesses and their managers; the identification of challenges that diversity presents and the opportunities it allows for even more productive workplace interactions; and the necessary skills, attitudes, and patterns of critical thinking needed for effective leadership in this important area. The course presents issues in the specific real-life context of ethnic, racial, gender, and class groups.

MG 0303D Topics in Management: Healthcare Management 3 Credits
Attributes: MGEL Management: General Elective, MGEN Management: Healthcare Management
Prerequisite: Junior standing.
This course examines topics in human resource management as they relate to contemporary organizations. The course gives students an in-depth understanding of current issues or topics in the area of human resources, giving special attention to the strategic aspect of human resource management: how human resources can create value for the organization. Topics may include strategic human resource management; human resource systems; human resource planning; quality of work life; flexible work; diversity; affirmative action; legal aspects of employment; and work-family issues.

MG 0303E Special Topics: Entrepreneurship Consulting 3 Credits
Attributes: MGEL Management: General Elective, MGEN Management: Entrepreneurship Elective
Prerequisite: Junior standing.
The Business Model Canvas/Strategyzer methodology will be utilized to build business plans for local entrepreneurial startups.

MG 0303F Special Topics: Building High Performance Teams 3 Credits
Attributes: MGEL Management: General Elective
Prerequisite: Junior standing.
The theory and experiential frameworks for effective team building and leadership in the business environment.

MG 0320 Diversity in the Workplace 3 Credits
Attributes: UDIV U.S. Diversity
Prerequisite: Junior standing.
This course allows questions to be framed, and answers sought, with regard to the challenge of diversity in the work environment. The course uses readings, exercises, and real-world projects to formulate the following: a definition of diversity; an awareness of its impact on businesses and their managers; the identification of the challenges that diversity presents and the opportunities it allows for even more productive workplace interactions; and the necessary skills, attitudes, and patterns of critical thinking needed for effective leadership in this important area. The course presents issues in the specific real-life context of ethnic, racial, gender, and class groups.

MG 0330 Career Planning 3 Credits
Prerequisites: MG 0235 or MG 0240; Junior standing.
This course prepares students for the job search while exploring theoretical issues in career development over the life span. Theories of career development covered include: life stage and career stage models, aspects of politics that shape careers, issues of derailment, technical career paths, gender issues in careers, mentoring, and new career models, such as the boundaryless career, the protean career, and the kaleidoscope career. Students undertake a resume revision process, develop a sample cover letter, participate in workshops on Internet job searching techniques, and practice mock interviews. An in-class session with members of the Career Planning Center is included. Students may also receive credit for a job shadowing assignment, attendance at Career Fairs, and other career-related activities. Open to management majors and minors only.
MG 0335 Entrepreneurship: Ideation and Validation  
Prerequisite: Junior standing.
This course is a practical introduction to the problems, practices, and opportunities that exist for early stage startups which are examined from the conception of the opportunity through customer discovery and customer validation utilizing an experiential learning approach. Participants will explore business model possibilities for a venture of their own devising. Emphasis will be placed on clear statement of hypotheses, effective testing of the problem the venture aims to address, and appropriate testing of the product/service developed to address the problem in order to develop suitable product-market fit. Student teams will assess and iterate upon business model elements including value propositions, customer segments and customer relationships, in addition to channels that may be used to interact with or deliver products/services to customers. Although the course will not cover the launch of a scalable business, student teams will undertake real-world investigation and testing to discover customer wants and needs and to validate their conception of the problems and product/service solutions that their ventures would use to address those problems. Students will also gain experience with crafting business pitches and delivering those pitches via regular in-class presentations as they hone their ventures’ business models.

MG 0336 Social Entrepreneurship  
Attributes: MGEL Management: General Elective, MGEN Management: Entrepreneurship Elective  
Prerequisite: Junior standing.
This course examines the tremendous opportunities that exist for creating value in the social sector. Using entrepreneurial frameworks and business metrics, social entrepreneurs are effecting change in domains that markets have failed to address. The objective of this course is to sensitize students to ways that firms can influence societal outcomes while continuing to be revenue generating, self-sustaining enterprises. The primary learning strategy will be through case presentations and discussions of current social entrepreneurs and their organizations. During the term, students will develop a business plan to support a viable social enterprise.

MG 0337 Entrepreneurship: Product Development and Commercialization  
Prerequisite: Junior standing.
Building upon the Business Model Canvas of Osterwalder and Pigneur and the Lean Launchpad framework of Blank, Engel, and Dorf, this course provides students the skill sets necessary to progress from basic entrepreneurial ideation and validation to formalized product development with the concomitant required business models. Mechanisms are developed for identifying markets, assessing competition in those markets, and the associated market entry strategies. Included is the identification of key resources: financial, human, and intellectual capital; as well as the associated acquisition strategies. Key partnerships are identified in the categories of strategic alliances, “coopetition,” joint new business development efforts, and key supplier relationships. Associated with this is the investigation of the choice between physical and web/mobile channels in getting products from company to customers, and the associated strategies of customer retention and growth. Revenue and pricing models, both in the business-to-customer and business-to-business contexts are discussed in detail.

MG 0338 Managing a Family Business  
Prerequisite: Junior standing.
This course provides a foundation for understanding family businesses, which represent over 80% of the world’s free economies. The dynamics of first generation start-ups or multi-generational family businesses are often unique, yet tenuous to manage. Regardless of whether you are a member of the managing family or assuming a position within the firm, comprehension of the idiosyncrasies of successfully managing their complex operations is imperative. Through class discussions, case studies, articles, role plays and your research project based on auditing a locally-based family enterprise, this course will enable you to analyze and consider participating in a family business. Guest lectures from local family businesses will provide real-world application of the theories and concepts discussed in class.

MG 0350 International Law  
Attributes: HASM Humanitarian Action Minor Skills/Method Course, WDIV World Diversity  
Prerequisite: Junior standing.
This course is a study of international laws, legal institutions, and the societal and cultural institutions that impact and regulate business activity throughout the world. The student is introduced to the risks of international business and how those risks differ from doing business domestically; the function and importance of public international law; the international commercial transaction and its potential problems; and the basic structure and principles of international trade law and negotiations for trade. Also discussed are the legal and ethical problems facing multinationals operating in a number of countries, including licensing and protection of international property rights, and a comparative analysis of host country employment laws. Special emphasis is placed on the developing countries and emerging markets, such as China, Russia, India, Africa, Latin America, the Middle East, and the Caribbean, with a comparative legal and cross-cultural perspective.

MG 0355 High Performance Learning Teams  
Prerequisite: Junior standing.
This course is informed by the assumption that solving complicated business problems is an innately collaborative, interdisciplinary endeavor where expert knowing invariably demands doing, with others. Accordingly, the course provides students with a laboratory experience, putting select core management themes such as leadership, decision-making, teamwork, and hands-on problem-solving literally to work unraveling a succession of increasingly complex and interconnected organizational and experiential problems. As the course unfolds, students will learn to self-monitor and self-correct; gain direct experience in peer-to-peer project planning and management, experience real-time thinking through analysis and design; work collectively; and, not least, learn from reversals.

MG 0360 Negotiations and Dispute Resolution  
Attributes: EVAP Environmental Studies: Applied Professional Skills  
Prerequisite: Junior standing.
This course builds skills in negotiating and managing disputes and explores various theories concerning negotiation styles, strategy and tactics, alternative dispute resolution, and the major legal and ethical issues in the field. The course strengthens negotiation skills, introduces the many formal and informal processes available for dispute resolution, and develops managers’ ability to resolve and prevent disputes. The heart of the course is a series of experiential exercises that create opportunities to practice and develop the principles learned in the course.
MG 0365 Ethics and Technology in Business 3 Credits
Prerequisite: Junior standing.
This course examines the ways computer technologies may pose new kinds of ethical issues that call for fresh approaches to thinking ethically about business. The purpose of the course is to help students prepare to deal effectively with ethical issues of a technology they are likely to face in their careers.

MG 0370 Managing Non-Profit Organizations 3 Credits
Attributes: HASM Humanitarian Action Minor Skills/Method Course, MGHR Management: HR Elective
Prerequisite: Junior standing.
This course provides students with an understanding of the nonprofit sector and exposure to fundamentals in managing nonprofit organizations. It explores a broad range of topics including: the role of nonprofits in society, executive leadership and governance relationships in nonprofit organizations, the legal framework of nonprofits, human resource management of staff and volunteers, marketing and public relations, fundraising, and financial management, and strategic planning in the nonprofit sector. Special emphasis will be placed on leadership and the unique challenges that nonprofit leaders face in local, national, and global environments.

MG 0375 Sports Management 3 Credits
Prerequisite: Junior standing.
This course examines effective and efficient management within the culture of sports organizations. It distinguishes the management requirements in sports organizations. Current issues in the various sports industries are analyzed and the actions of the industries’ management are reviewed and critiqued. Different types of organizational structures are studied and their method for motivating, managing, and evaluating the performance of employees, individually and in teams, is discussed. This course also identifies effective management styles and places emphasis on the importance of sound communication skills and goal setting. The fundamental purpose of this class is to provide students with an understanding of how to apply the principles of business and/or the elements of organization to sport. Over the semester, students will have the opportunity to explore basic theories of management, human resource management, politics, finance, marketing, resource acquisition (fundraising and corporate support), sports law, broadcast properties, media and publicity, future trends in facilities as well as philosophical, sociological, and culture considerations of sport.

MG 0380 Performance, Compensation, and Reward 3 Credits
Prerequisite: Junior standing.
This course covers theories and practices for effective compensation management. Topics include strategic perspectives of compensation systems, determining pay structure, job analysis, and job evaluation, design and administration, external pay competitiveness, designing pay levels, employee contributions and individual pay, subjective performance evaluation and merit pay, alternative reward systems, employee benefits, government’s role and compliance, pay discrimination, budgets and pay administration, and union role in wages and salary administration.

MG 0385 Managing People for Global Business 3 Credits
Attributes: WDIV World Diversity
Prerequisite: Senior standing.
This course recognizes the complexities of managing human resources in the global business arena. Modern-day business is characterized by the relentless pace of globalization, through formation of international collaborations, mergers, joint ventures, and the opening up of new markets such as China, India, and Eastern Europe. There has been a dramatic increase in virtual work teams across several countries, globally outsourced work, and cultural diversity in the workplace as more people move across national borders to work. As a result, human resource management practices like recruitment, training, compensation, performance management, and employee relations are more complex. Additionally legal and regulatory requirements of foreign countries, cultural differences, expatriate management, and workforce mobility become important considerations. This course analyzes these complexities along with in-depth study of the people-related issues in different countries in Asia, Africa, Latin America, and Eastern Europe.

MG 0390 Cross-Cultural Management 3 Credits
Attributes: WDIV World Diversity
Prerequisite: Senior standing.
Globalization, the internationalization of markets and corporations, has changed the way modern corporations do business. This course examines major themes and issues in the area of cross-cultural management. It focuses on three perspectives: the values, attitudes, and behaviors that are common to a cluster of countries, specific to one country, or specific to a major cultural subgroup or subgroups within one country. It explores what happens when cultures clash, and the need to understand different approaches to doing business in a diverse world.

MG 0391 Internship 3 Credits
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MG 0392 Internship 3 Credits
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MG 0393 Internship 1 Credit
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MG 0394 Internship 1 Credit
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MG 0397 Seminar in Management 3 or 6 Credits
Attributes: MGEL Management: General Elective
This special program involving independent study and research under faculty guidance is also intended for students accepted in an approved internship. Open only to seniors majoring in management and approved by the department chair. Students must have a GPA of 2.5 or higher.
MG 0398 Seminar in Management 3 or 6 Credits
This special program involving independent study and research under faculty guidance is also intended for students accepted in an approved internship. Open only to seniors majoring in management and approved by the department chair. Students must have a GPA of 2.5 or higher.

Management Major
Management majors study the theory and the practice of managing people and organizations. Emphasis is given to the nature of the management function; the management of people; the relationship between business and society; and to the behavioral, social, and environmental factors that influence effective organization and managerial performance. Research efforts in the field are examined to develop fundamental principles and concepts, which can serve as a rational basis for managerial action. Students may choose one of four concentrations: business and society, entrepreneurship, hospitality and tourism management, or human resource management.

Requirements
For a 48-credit major in management, students complete the following:

**Hospitality and Tourism Management Concentration**

The purpose of the Hospitality and Tourism Management Concentration is to provide a professional and academic environment for students to gain expertise in the areas of hospitality, tourism, and the culinary arts. This concentration is an innovative combination of Dolan School management courses and courses taken at our partner institution, Florence University of the Arts (FUA). Drawing on FUA’s 20-year experience, this unique international immersion curriculum allows students to pursue a course of study faithful to the articulated vision of the hospitality management program at FUA and consistent with the Jesuit ideals of Fairfield University and the business curriculum of the Dolan School of Business.

The basic structure of the concentration allows Fairfield students to take their University core and business core courses in their first two-and-a-half years at Fairfield. In the spring semester of their junior year, students take courses in FUA’s Hospitality Management program, including an experiential course of managing in an operational restaurant. During the summer, students engage in a supervised special project and an internship, drawing on FUA’s relationships with Florence hospitality and tourism firms. In the fall of their senior year, students will complete their FUA curriculum, followed by their final semester at Fairfield University. Please contact Dr. Carl Scheraga, Management Department Chair, for further information.

**Human Resources Concentration**

**Entrepreneurship Minor**

This minor offers students across the University exposure to entrepreneurship, from concepts of creativity, technology, and innovation to implementing business plans. Students may explore opportunities in both the for- and non-profit sectors.

For a 15-credit minor in entrepreneurship, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MG 0335</td>
<td>Entrepreneurship: Ideation and Validation</td>
<td>3</td>
</tr>
<tr>

<td>Managing a Family Business</td>
<td></td>
</tr>
<tr>
<td>BU 0320</td>
<td>Employment Law and Discrimination in the Workplace</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 18

1 No more than two courses may be selected from each group.

Note: One course may count for both the business law and ethics minor and the management major.

For a 15-credit minor in entrepreneurship, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MG 0335</td>
<td>Entrepreneurship: Ideation and Validation</td>

<tr>
<td>BU 0320</td>
<td>Employment Law and Discrimination in the Workplace</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 15

1 It is strongly recommended that students take the BU 0211 Legal Environment of Business section with an Entrepreneurship emphasis.
2 Non-management majors choose one course from Group 1 and two courses from Group 2. Management majors choose three courses from Group 2. No courses may double-count for the entrepreneurship minor and the management major.
3 DSB students may not select MG 0101 as an entrepreneurship elective.
Management Minor

This minor offers students in the non-management disciplines an opportunity to examine some of the theories, principles, and issues that influence their growth and development as managers in their chosen fields.

For a 15-credit management minor, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MG 0101</td>
<td>Introduction to Management</td>
<td>3</td>

Total Credits 15

Sports Leadership and Management Minor

This interdisciplinary minor provides students with a foundational business skill set that facilitates students’ interest in careers in the sports management industry and with corporations who have partnerships and client relations with sports organizations. It has a primary focus on leadership in the sports industry, and specifically (as consistent with the University mission) leadership that is ethics-based.

For a 15-credit Sports and Leadership Management minor, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MG 0240</td>
<td>Leading and Managing People</td>
<td>3</td>
</tr>
<tr>
<td>MG 0375</td>
<td>Sports Management</td>

<tr>
<td>MG 0380</td>
<td>Performance, Compensation, and Reward</td>
<td>3</td>
</tr>
<tr>
<td>MK 0261</td>
<td>Sports Marketing</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 15

1. Students must take at least one elective outside of the Department of Management.
2. Management majors may not double-count courses for the Management major for any of the 3 electives. However, MG 0240 Leading and Managing People does double-count as a required course for both the Management major and the Sports Leadership and Management minor.

Marketing

Fairfield University offers students the opportunity to study marketing in the contexts of a broad liberal education and a dynamic and flexible business curriculum. Here, students develop the skills to determine the product and service needs of consumers and industries, as well as the challenges of creating and delivering these products and services.

As a marketing major, you are introduced to accounting, statistics, information systems, business law, competitive strategy, and the global business environment. This curriculum educates you on the motivations and behaviors of consumers, advertising and promotion, digital and social media marketing, and branding and marketing techniques.

Programs

- Marketing Major (p. 282)
  - Concentration in Marketing Communications
  - Concentration in Relationship Marketing
- Marketing Minor (p. 283)

Courses

MK 0101 Principles of Marketing 3 Credits

Prerequisite: Sophomore standing.

This course introduces the fundamental concepts and theories that drive day-to-day marketing decisions. A thorough understanding of the marketplace (consumer or business-to-business) is at the heart of such decision making. In this course, students will learn to identify and satisfy customer’s wants and needs. The core tools that enable managers to move from decision-making to action are addressed, namely, product development, pricing, channel management and structure, and promotions (including advertising and sales). Additional topics include global marketing, societal and marketing ethics, and digital marketing. Students are required to work in a team to construct a marketplace analysis for a chosen product/service.
MK 0212 Consumer Behavior 3 Credits
Prerequisites: MK 0101; Junior or senior standing.
This course provides students with an understanding of the behavior of consumers in the marketplace, using an interdisciplinary approach that employs concepts from such fields as economics, psychology, social psychology, sociology, and psychoanalysis. Topics include motivation, perception, attitudes, consumer search, and post-transactional behavior.

MK 0221 Sales and Sales Management 3 Credits
Prerequisites: MK 0101; junior or senior standing.
This course is intended to give the student an understanding of the important role of the sales function in the overall marketing effort of the firm and in the firm's overall success. The course focuses on the sales process (prospecting, making presentations, handling objections and closing the sales), and the management of the sales force (recruiting, training, motivating, compensating, and supervising salespeople). Ethical issues in selling and new technologies that impact the sales effort are also covered.

MK 0231 Advertising 3 Credits
Prerequisites: MK 0101; junior or senior standing.
This course focuses on strategic management of a firm's integrated marketing communications, the most notable element of which is advertising. It emphasizes the importance of seamlessly and synergistically coordinating numerous promotional mix elements to create a uniquely memorable voice with which to communicate and engage the target audience in a lasting relationship with the firm's brand. Topics include advertising message strategy, creative strategy and execution, media strategy, and various relationship-building promotional tools. Also discussed are current events and ethical issues in advertising and promotion. Through activities and projects, students prepare for careers in advertising and related industries.

MK 0241 Digital Marketing 3 Credits
Prerequisites: MK 0101; junior or senior standing.
From social networks to mobile applications, marketing in the digital age is markedly different than in the past. The course identifies marketing strategies that work in this new environment. Students will study how e-business and digital marketing continue to alter the business landscape and how certain theoretical frameworks can help to explain some of the current issues in the field. Specifically, students will examine how digital marketing has affected product, pricing, distribution, research, communication, and public policies.

MK 0251 Social Media Marketing 3 Credits
Prerequisites: MK 0101; junior or senior standing.
The course takes an in-depth look at social networks and social media platforms (e.g., blogs, discussion forums, Facebook, Twitter, other forums of user-generated content) from a strategic perspective. The primary focus of this course will be on understanding social media as part of a brand's marketing communications, how to build strategies and tactics to help brands differentiate and rise above the noise on the social web, and how to track their effectiveness. Topics to be covered include constructing a brand strategy on social media, engaging influencers, content development, social media analytics and measurement, and social media platforms.

MK 0261 Sports Marketing 3 Credits
Prerequisites: MK 0101; Junior or senior standing.
This course is offered to address the growing interest in the sports industry as a business career. The course will provide an overview of how sports marketing can work as a component of a fully integrated marketing communication strategy. The course is designed to help students better understand the sports consumer, and how corporations and sports organizations can apply core marketing concepts to help achieve their business objectives. Marketing strategies such as market segmentation, target marketing, and the marketing mix are covered within the context of sporting event sponsorships and professional sports teams. Additional topics such as sports governing organizations, sports media, licensing and hospitality will be covered.

MK 0311 Marketing Research 3 Credits
Prerequisites: MK 0101; EC 0278 or MA 0017 or MA 0217 or PY 0201 or SO 0221; junior or senior standing.
This course gives students an appreciation of the role of marketing research in understanding customers to better address their needs and wants, as well as in reducing the risks associated with marketing decisions. Topics include problem formulation, research design, data collection instruments, sampling, data analysis, and communication of results. Students will get hands-on experience with different stages of the marketing research process.

MK 0312 Global Marketing 3 Credits
Attributes: WDIV World Diversity
Prerequisites: MK 0101; junior or senior standing.
This course instills in students an appreciation of the complexities encountered in marketing products and services in global markets. The course discusses differences that exist among consumers in different cultures and also provides students with an understanding of the role of external elements such as economic, political, legal, cultural, geographic, and social environments on the formulation of a firm's marketing strategy in foreign markets.

MK 0321 Marketing Channels 3 Credits
Prerequisites: MK 0101; junior or senior standing.
This course provides a management focus and managerial framework to the discipline of distribution and channel management, emphasizing the design and management of marketing channels as a key strategic tool in satisfying the needs of the customers in the new millennium. The course integrates theory and practice, and applies them to the decision-making processes. The course also discusses the importance of the Internet as a marketing channel for the distribution of goods and services.

MK 0322 Business-to-Business Marketing 3 Credits
Prerequisites: MK 0101; Junior or senior standing.
This course examines the characteristics that differentiate industrial from consumer marketing. Topics include the nature of industrial demand; buyer characteristics; industrial market research; competitive bidding; selling of industrial products; sales and advertising strategies in marketing to business, government, and non-profit organizations; and practices and policies in the distribution of industrial goods.

MK 0331 Media Strategy 3 Credits
Prerequisites: MK 0101; Junior or senior standing.
This course examines the basic processes involved in strategic media planning including budgeting, selecting media forms and media vehicles, media timing, and media audience measurement. Students understand the role of traditional and non-traditional media, as well as new media such as the Internet, as channels for communicating promotional messages to consumers. The course also covers varied media allocation models.
Marketing Major

MK 0332 Public Relations 3 Credits
Prerequisites: MK 0101; Junior or senior standing.
This course facilitates the fundamental understanding of audiences: receiving information from them, advertising management of their attitudes and responses, helping to set policies that demonstrate responsible attention to them, and constantly evaluating the effectiveness of all public relations programs. This inclusive role integrates all activities associated with ascertaining and influencing the opinions of a group of people. The course pays increasing attention to the use of electronic technology for messages from fax machines to e-mail to specialized networks in cyberspace.

MK 0341 Brand Management 3 Credits
Prerequisites: MK 0101; Junior or senior standing.
This course focuses on one element in the marketing mix: the product. It examines such questions as how should a firm effectively and efficiently manage its current product line and develop potential new products. Consideration is also given to strategic planning.

MK 0342 Contemporary Issues in Marketing 3 Credits
Prerequisites: MK 0101; Junior or senior standing.
This seminar on current marketing issues familiarizes students with the latest issues, events, and problems in marketing. The subject matter for the course draws upon recent events in marketing and course materials are derived from current periodicals and cases.

MK 0391 Internship 3 Credits
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MK 0392 Internship 3 Credits
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MK 0393 Internship 1 Credit
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MK 0394 Internship 1 Credit
Prerequisite: Junior standing.
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher. Enrollment by permission only.

MK 0397 Seminar in Marketing 3 or 6 Credits
Prerequisites: MK 0101; Senior standing.
This is a special program involving independent study and research under faculty guidance. Open only to seniors majoring in marketing and approved by the department chair. Students must have an overall GPA of 2.5 or higher.

MK 0398 Seminar in Marketing 3 Credits
Prerequisites: MK 0101; Senior standing.
This is a special program involving independent study and research under faculty guidance. Open only to seniors majoring in marketing and approved by the department chair. Students must have an overall GPA of 2.5 or higher.

Marketing Major

Marketing majors examine the exchange processes by which consumers and organizations satisfy their needs and wants. In a sense, it is the most humanistic of the business majors; it requires students to understand consumer behavior, the motivation of sales personnel, the impact of advertising and communication on the potential consumer, the characteristics of consumers, the cultures involved in international marketing, market research techniques, and the role of marketing in the digital environment. Marketing majors may further specialize by choosing one of two concentrations: relationship marketing or marketing communications.

Requirements

For a 48-credit major in marketing, students complete the following:

<table>

Todd Martin  
Instructor of the Practice of Economics  
BA, New England College  
MBA, University of Bridgeport

Valeria Martinez  
Associate Professor of Finance  
BS, Instituto Tecnológico Autónomo de México  
MS, University of Warwick, England  
PhD, University of Texas at San Antonio

Dawn W. Massey  
Professor of Accounting  
Coordinator, Graduate Accounting Programs  
BS, MBA, Fordham University  
PhD, University of Connecticut, CGMA  
CPA, Connecticut

John McDermott  
Chair, Finance Department  
Associate Professor of Finance  
BS, U.S. Coast Guard Academy  
MBA, Columbia University  
PhD, University of Connecticut

Michael B. McDonald  
Assistant Professor of Finance  
BS, MA, Clemson University  
PhD, University of Tennessee

Sharlene A. McEvoy  
Professor of Business Law  
BA, Albertus Magnus College  
MA, Trinity College  
JD, University of Connecticut  
PhD, University of California at Los Angeles

Kathi Mettler  
Instructor of the Practice Accounting  
BS, Birmingham-Southern College  
MS, The University of Alabama  
CPA, Connecticut

Camelia C. Micu  
Chair, Marketing Department  
Associate Professor of Marketing  
BS, MS, Polytechnic University, Romania  
PhD, University of Connecticut

Jeff Moretz  
Assistant Professor of Management  
BA, Michigan State  
MBA, Michigan State  
PhD, University of Texas at Austin

Thomas Murray  
Associate Professor of Economics  
BA, Stonehill College  
MA, PhD, University of Notre Dame

Iman Naderi  
Assistant Professor of Marketing  
BS, MBA, Sharif University of Technology, Iran  
PhD, University of North Texas

Kathryn A. Nantz  
Professor of Economics  
BA, Western Kentucky University  
MS, PhD, Purdue University

Yasin Ozcelik  
Chair, Information Systems and Operations Management Department  
Associate Professor of Information Systems and Operations Management  
BS, Bilkent University, Turkey  
MS, Purdue University  
PhD, Purdue University
Milo W. Peck, Jr.  
Assistant Professor of Accounting  
AB, Middlebury College  
MS, Northeastern University  
JD, Suffolk University  
LL.M, Boston University  
CPA, Massachusetts  

Patricia M. Poli  
Associate Professor of Accounting  
BS, University of Connecticut  
MPhil, PhD, New York University  
CPA, Connecticut  

Michael Puleo  
Assistant Professor of Finance  
BS, BA, University of Florida  
MS, University of Florida  
PhD, Temple University  

Rajasree K. Rajamma  
Associate Professor of Marketing  
B.Tech (Electrical & Electronics Engineering), Kerala University, India  
MBA, Cochin University of Science and Technology, India  
MBA, Indiana University of Pennsylvania  
PhD, University of North Texas  

Carl A. Scheraga  
Chair, Management Department  
Professor of Business Strategy and Technology Management  
ScB, MA, Brown University  
PhD, University of Connecticut  

David P. Schmidt  
Director of Applied Ethics  
Associate Professor of Ethics  
BS, Illinois State University  
MA, PhD, University of Chicago  

Michael R. Sciandra  
Assistant Professor of Marketing  
BS, John Carroll University  
MBA, John Carroll University  
PhD, University of Pittsburgh  

Hedieh Shadmani  
Assistant Professor of Economics  
BS, Allameh Tabatabai University, Iran  
MA, Alzahra University, Iran  
PhD, Kansas State University  

Nazuk Sharma  
Assistant Professor of Marketing  
B.Tech, Punjab Technical University  
MBA, Youngstown State University  
PhD, University of South Florida  

Norman A. Solomon  
Professor of Management  
Former Dean, Dolan School of Business  
BS, Cornell University  
MA, PhD, University of Wisconsin  

Debra M. Strauss  
Professor of Business Law  
BA, Cornell University  
JD, Yale University  

Jie Tao  
Assistant Professor of Information Systems and Operations Management  
BS, Hefei University for Science and Technology, China  
MS, University of Shanghai for Science and Technology, China  
PhD, Dakota State University  

William E. Vásquez-Mazariégos  
Associate Professor of Economics  
BS, MS, Francisco Marroquin University, Guatemala  
MA, PhD, University of New Mexico  

Vishnu Vinekar  
Associate Professor of Information Systems and Operations Management  
BS, Manipal Institute of Technology, India  
MS, Texas A&M International University  
PhD, University of Texas at Arlington  

Ying Zhang  
Associate Professor of Finance  
BS, Jinan University, Guangzhou, China  
MS, PhD, University of Texas Arlington

SCHOOL OF ENGINEERING

A Message from the Dean

Welcome to the School of Engineering at Fairfield University. We are devoted to serving students as they successfully pursue undergraduate and graduate engineering degrees. The School provides opportunities for students to combine study with experience and professional practice through classroom instruction and industrial internships, offering the prospect for the best in engineering education.

The School of Engineering strives to maintain the highest level of instructional integrity, and remains committed to the Ignatian ideals of education, finding bigger answers to society's problems, and providing service to socially and economically disadvantaged populations.

In pursuit of this mission, we are committed to expanding student engagement in the engineering professions. The School's graduates will have mastered theoretical and practical knowledge of engineering skills, and will have strong foundational knowledge in communications, critical judgment, social responsibility, economics and ethics to use in building their professional careers.

On our website, you will find an explicit description of the educational objectives of each of the engineering programs offered in the School of Engineering. The curricula and degree requirements are linked to the objectives through student learning outcomes leading to national accreditation. The engineering curricula includes perhaps the most purposeful liberal arts core in the nation - the hallmark of Fairfield's education - that aim to transform our students into thinking citizens and lifelong learners, and prepare them to live an inspired life. Additionally, our ambition in the School of Engineering is to enable all our students to assume positions of technical leadership and professional responsibility, and to achieve full satisfaction in their jobs, or in graduate studies, upon graduation from Fairfield University.

On behalf of the entire School of Engineering, welcome!

Richard H. Heist, Ph.D.
Dean, School of Engineering

School Overview

Vision

As an integral component of a comprehensive Jesuit university, the School of Engineering is committed to providing a student-oriented classroom and laboratory environment enhanced by research that enables graduates to become leaders in the quest to solve society's greatest challenges in service to others.

Mission

The Fairfield University School of Engineering is dedicated to providing quality educational opportunities in engineering and computer science to a diverse student population. The School emphasizes whole-person development (cura personalis) through its commitment to a unique integration of expertise in innovative technical areas with a strong liberal arts core preparing graduates well for professional practice and graduate education.

Values

The Fairfield University School of Engineering is devoted to the success of its students. This commitment is seen in the school's dedication to teaching and mentoring provided by faculty, staff and student peers.

Through our Ignatian pedagogy, School of Engineering students are constantly challenged to reflect, analyze, and ask "why" as they seek bigger answers to address local and global issues.

Mentoring

Entering and continuing students meet with academic advisors to design jointly their schedule of courses. Students review their academic records before course registration each semester with assistance from advisors to keep abreast of their progress. The school provides counseling to students upon request so that their academic goals can be achieved efficiently and economically. Department chairs and program directors are actively involved in student advising and mentoring. Practicing engineers are often invited to participate in mentoring of interdisciplinary teams in the final senior design project.

Tutoring

Out-of-classroom assistance, provided by engineering professionals, and peer tutors is available in the school's tutorial center on a daily basis and a peer led content mastery program in foundational courses began in 2014. A schedule of tutorial/mentoring services is distributed to all students in the beginning of each term.

Facilities

The offices of the School of Engineering, along with classrooms, primary laboratory and computer facilities are located in the Bannow Science Center. The engineering reference and circulating collection is housed in the University's DiMenna-Nyselius Library. The School's laboratories are equipped with modern instrumentation and are improved annually with financial assistance of the university, the alumni and private foundations. In order to provide an environment for experiential learning that is closely integrated with classroom learning, the School of Engineering laboratories provide the capability for demonstration of phenomena, simulation of processes, measurements, and data management. Finally, a growing number of engineering courses are offered online as needed. The School's website (http://fairfield.edu/soe) offers information on the School, its programs, courses, and faculty.

Transfer Admission

General Transfer

Students with previous studies at other accredited institutions may apply for transfer to the School of Engineering. Credit for work completed elsewhere, with a grade of C or better, will be granted for equivalent Fairfield courses, in accordance with Fairfield University guidelines. The transfer student must provide an official transcript of all academic work and a catalog with course descriptions from each institution previously attended.

Transfer from Community Colleges

The School of Engineering has articulation agreements with the Connecticut College of Technology embracing the 12 community colleges in Connecticut. Under this agreement, the B.S. degree completion by graduates of community colleges with an engineering associate's degree is greatly facilitated at Fairfield University. Bridge courses to facilitate transfer, and some financial aid to transfers from community colleges, are also offered by the School of Engineering.
School Activities/Relationships with Area Industry

Engineering students at Fairfield University may join the Engineering Student Society, an umbrella organization that embraces student chapters of the American Society of Mechanical Engineers, Society of Automotive Engineers, the Institute of Electrical and Electronics Engineers, and the Society of Women Engineers. Students are encouraged to join ESS and profit from events sponsored by the chapters. Engineering students initiated an Engineers Without Borders student chapter in 2015.

The School of Engineering maintains direct relations with area industries and manufacturers. Students are encouraged to post their resumes on the University’s Career Development site, Stage4Hire (http://fairfield.edu/stags4hire), and to visit the site often to check for jobs and internships. These open lines of communication encourage the flow of information and support that keeps the engineering curriculum current and relevant to the environment in industry. These contacts are particularly useful to students in the senior design project course where they tackle real-life engineering problems encountered by practicing engineers and become involved in the mainstream of engineering activity.

School of Engineering Advisory Board

The School of Engineering (SOE) receives philanthropic support and strategic guidance from the SOE Advisory Board, a group of men and women in leading positions in industry and education. Additionally, each program area in the SOE receives program development guidance from its program advisory board.

Degrees

Bachelor of Science

The School of Engineering offers undergraduate programs leading to the Bachelor of Science in the following fields:

• Bioengineering (p. 292)
• Computer Science (p. 295)
• Electrical Engineering (p. 306)
• Mechanical Engineering (p. 315)

Students in these programs complete 126 to 134 credit hours. Students begin their studies with EG 0031 Fundamentals of Engineering I or CS 0101 Introduction to Computing and complete the degree requirements with the team-based Senior Design Project. EG 0031 is designed to introduce first-year students to important design elements and the tools of engineering and develop their skills in analysis and synthesis, and in teamwork. It further provides the basis for students to select the engineering discipline most suitable to their skills and career objectives. The Senior Design Project caps students’ engineering education by implementing engineering design principles and associated skills in designing for functionality, reliability, sustainability and economy in real-world projects undertaken by multidisciplinary teams. All School of Engineering programs include experiential learning in laboratory courses and culminate with the Senior Design Project. Students can avail themselves of opportunities for independent study and for internships in local industry. The undergraduate curriculum may be completed as a full-time traditional 4-year program or part time.

Part-Time Program

This program allows fully employed students to pursue engineering degrees on a part-time basis at a pace suited to their circumstances. Many employers provide tuition reimbursement. The curriculum requirements for the BS degrees through this program are the same as those for the full-time traditional programs. Engineering courses are available through evening and hybrid study courses. Advanced engineering classes, offered in the evening, are subscribed by both full-time and part-time students.

Core Curriculum

The general education core curriculum provides a liberal education, drawing upon four major areas of knowledge. For each of these four areas of competency, Engineering majors select courses as noted in each of the major sections of this catalog.

Diversity Requirements

All full-time and part-time students must complete one U.S. Diversity and one World Diversity course from a designated list of courses.

Major Areas of Study

Specific program objectives and curriculum requirements are provided in the sections that follow each engineering discipline. In general, the curricula consist of four areas:

• major field requirements
• major field electives
• general education core curriculum courses
• general electives

Concentration within Majors

Certain major fields of study have specialized options that can be taken to fulfill special career plans, under advisement from the department chair. Numerous elective courses afford opportunities for students to gain deeper knowledge and skills in areas of their interest. For example, computer engineering would be an area of concentration in electrical engineering; computer engineering or software engineering are concentrations in computer science.

Minors in Other Fields of Study

Engineering students are eligible for a mathematics minor with the completion of five mathematics courses. In addition, engineering majors can opt to fulfill the requirements for other minors. For example, an engineering student who wishes to gain further knowledge in economics could use the two social science electives and the two general electives in the liberal arts core, and with one summer course, s/he will complete the requirements for an economics minor. Similar arrangements can be made for a business minor or a physics minor.

Minor in Engineering

The School of Engineering offers a minor in engineering for non-engineering students. This is a 14-credit hour course of study for students who have completed two courses in calculus and two in physics. Four engineering courses of three credits each, and two laboratory courses of one credit each, are required for the completion of the minor. Students may also choose an additional engineering course to substitute for the math or science courses, provided prerequisites are met. Students who choose the engineering minor will benefit intellectually from exploring the field of engineering and will strengthen their candidacy for professional studies such as medicine or law.
An 18-credit minor in Computer Science is also available, see the Computer Science (p. 305) section for details.

University Honors Program

The School of Engineering participates in the University Honors Program (p. 143), an interdisciplinary course of study (23 credits) open to invited freshmen and sophomores and devoted to intellectual history, interdisciplinary studies, and advanced work in the student’s major field.

Five-Year Pathways to Bachelor's and Master's Degrees

- Applied Data Science Five-Year Dual Degree Program (p. 298)
- Electrical and Computer Engineering Five-Year Dual-Degree Program (p. 312)
- Management of Technology Five-Year Dual-Degree Program (p. 314)
- Mechanical Engineering Five-Year Dual-Degree Program (p. 320)
- Software Engineering Five-Year Dual-Degree Program (p. 306)

A master's degree in engineering is becoming more commonly seen as the entry level degree in the workplace. A master’s level engineering education gives a great return on your investment as well as a more focused and satisfying career.

Students can now complete a five-year pathway to both BS and MS degrees in Electrical and Computer Engineering, Mechanical Engineering, and Software Engineering. Additionally, in five years, students can also complete a BS degree in any of the undergraduate engineering programs followed by an MS in Management of Technology. Typically students should meet with their advisor during their junior year and complete detailed planning for the specific requirements for the bachelors and masters degrees that they are interested in. All of the five-year pathways require a minimum of 3.0 GPA along with approval from the faculty advisor.

Courses

General Engineering

EG 0031 Fundamentals of Engineering I 3 Credits

Prerequisite: PS 0115*

This course provides core engineering knowledge and competencies in a highly interactive class format. Topics include professional skills such as technical writing and presentation, guidelines for professional engineering practice, and career preparation. Introduction to the fields, roles, and industries of engineering also serves as a basis for selection of engineering major field. Hands-on team projects are core learning experiences. They form a structured introduction to the implementation of principles of design and engineering methodologies, system engineering management, and presentation skills. Guest presenters and field trips augment this course, which is taught by interdisciplinary faculty teams. (*indicates concurrency allowed)

EG 0060 STEM of Guitar 3 Credits

Fee: $250 Engineering Lab Fee

This course looks at the design elements, manufacturing and assembly of solid-body electric guitars. Science, technology, engineering, and mathematics (STEM) concepts that relate directly to guitars are used to help students make an applied learning connection. Each student will construct their own electric guitar. Course will cover wood species and the environment, guitar headstock design features, chemistry of finishes, math applications in a guitar, physical science aspects of the guitar such as mechanical systems, concepts of sound waves, string tension, fretboard layout, intonation, and electronics. Studio-style class, lecture and lab time combined throughout course. The $250 lab fee applies to cover materials.

EG 0130 Engineering Graphics I 3 Credits

This is a basic course in engineering graphics principles and is taught simultaneously with SolidWorks, a 3D modeling design application. Using traditional and computer design, the course stresses geometric constructions, orthographic projection, dimensioning, sectional views, 3D part modeling, assembly modeling, drafting and engineering drawings, animation and geometric tolerancing. The course stresses aesthetics and technical sketching. Students will gain a working knowledge of SolidWorks in engineering design. Course requires a computer that runs Microsoft Windows.

EG 0145 Mathematical Analysis 3 Credits

Attributes: EVAP Environmental Studies: Applied Professional Skills
Corequisites: EG 0145P, MA 0146.

Prerequisite: MA 0145.

In this course students will learn mathematical and numerical methods such as differentiation, integration, and Fourier analysis and how to apply these methods to solve scientific problems. Additionally, the course will cover statistics including data analysis, trend fitting, datacorrelation, and interpolation. Students will learn to use MATLAB as a tool but also become proficient in programming.

EG 0145P Mathematical Analysis PLG 0 Credits

EG 0260 Robots 3 Credits

Prerequisite: PS 0115.

Introductory course in robotics develops understanding of how robotic systems integrate sensors, actuators, and control systems to achieve specific goals. Principles of autonomy, programming, wireless communications, sensor applications, mechatronics, electrical power, electric motors, pneumatics, structure, and locomotion will be understood and applied. Design of robotic subsystems will utilize multiple areas of knowledge. The course will involve application of statistical analysis to quantify robot performance. Service learning is an integral part of the course. All participants will participate in weekly mentoring of a youth robotics competition team to put into practice the principles learned in class, and to learn through community interaction from other students using robots to accomplish different feats.
EG 0300 Feedback Control Systems 3 Credits
Prerequisites: MA 0251, EE 0301.
This course emphasizes analysis and synthesis of closed loop control systems using both classical and state-space approaches with an emphasis on electro-mechanical systems. The mathematical requirements include the Laplace transform methods of solving differential equations, matrix algebra, and basic complex variables. The discussion of classical control system design includes the modeling of dynamic systems, block diagram representation, time and frequency domain methods, transient and steady state response, stability criteria, controller action [Proportional (P), proportional and integral (PI), Proportional, integral, and derivative (PID) and pseudo-derivatives feedback], root locus methods, the methods of Nyquist and Bode, and dynamics compensation techniques. The discussion of state-space methods includes formulation and solution (analytical and computer-based) of the state equations and pole-placement design. The course integrates the use of computer-aided analysis and design tools (MATLAB) so as to ensure relevance to the design of real world controlled electro-mechanical systems using case studies and applications to electrical and mechanical systems. Includes lab (hardware-based) exercises. Formerly MC 0300.

EG 0305 Design of Mechatronics Systems 3 Credits
Prerequisite: Senior standing.
This course covers development of mechatronics theory and applications to systems dependent upon the integration of mechanical, electrical and computer engineering. Students assemble hardware components to create a product design that fulfills a specified task in a mechatronics system. Students develop design skills in mechanisms, electrical devices, and software to create, test, and verify system function. Formerly MC 0305.

EG 0330 Engineering Graphics II 3 Credits
This course introduces CATIA Version 5; the leading CAD/CAM/CAE application used by automotive, aerospace, shipbuilding, and consumer goods industries. It provides mechanical, electrical, automotive, aerospace, and marine engineers and architects with the design tools to take products from concept to completion - in one seamless application. This course covers basic solid modeling concepts of individual sheetmetal and machined parts from detailed drawings. "Complex Shape Modeling" using "wireframe concepts" and "surface-based" modeling is covered. Building of assemblies of components and control of their positioning and orientation, as well as motion simulation is covered. Fully detailed production drawings of components and assemblies are also covered. Formerly CD 0212.

EG 0350 Advanced Programmable Logic Control (PLC) Systems 3 Credits
Prerequisites: PS 0116, MA 0245.
This course will give students advanced concepts in programmable logic controllers and their applications and interfacing to industrial controls in the areas of automation, manufacturing, and others. Topics include bit operations, data manipulation, industrial PLC network utilizing Ethernet, ControlNet, and DeviceNet. Data sharing and distributed PLC programming techniques along with fundamentals of touch panel programming and operation are studied. State of the art software used: MultiSim, LabView, Cosivis, Veep, Automation Studio, and RS Logix 500. It will include also: input/output ports, intermittent and continuous process control, arithmetic and comparison instruction, function block diagrams, indirect and indexed addressing, and sequential function charts. The course will consist of: lectures, group discussions, case studies, a term project, and computer simulation. Formerly MF 0350.

EG 0360 Engineering Project Management 3 Credits
Attributes: HASM Humanitarian Action Minor Skills/Method Course
This course concentrates on the general methodology of managing an engineering project from concept to operational use with emphasis on the functions, roles, and responsibilities of the project manager. Study of the basic principles and techniques related to controlling resources (i.e. people, materials, equipment, contractors, and cash flow) to complete a project on time and within budget while meeting the stated technical requirements. Through group and individual activities, including case study review and field work, students will learn to apply project management tools and techniques. The course will be taught by teaching each phase of project management as we complete the relevant aspects of the project in the field. There will be some classroom time for introducing concepts, and planning. However, the majority of time each day will be spent in the field executing the project, putting into practice the phases of project management. The course will prepare students with the ability to learn the necessary background information and hands-on technical skills, to be flexible and adaptable in difficult environments. These skills will be valuable in many areas, particularly in the planning and execution of humanitarian action and engineering in developing countries. Enrollment by permission only. Students must be able to study abroad.

EG 0390 Senior Design Project I 3 Credits
Prerequisite: Completion of all non-elective program courses; completion of other program requirements to enable graduation within the year of completion of EG 0391.
In this capstone course, students work in teams on advanced projects that emphasize engineering design with due attention to design constraints and engineering standards. The overarching scope of this course is to transform engineering students to practicing engineers. Under the guidance of a faculty instructor and a mentor, each team conducts literature searches, write a technical proposal and its members develop skills in information analysis and synthesis; they model and test prototypes of their devices, and make frequent oral and poster presentations of their work to faculty and peers, and submit timely progress reports. In the process, they receive instruction in effective communication and presentation practices, and develop an appreciation of teamwork and collective success. This two-semester course begins in the fall of the academic year and concludes at the end of the spring term with a final team oral presentation and a final written report, and a working prototype of the team’s project. It also includes sample hardware fabrication in the machine laboratory.

EG 0391 Senior Design Project II 3 Credits
Prerequisite: EG 0390.
In this capstone course, students work in teams on advanced projects that emphasize engineering design with due attention to design constraints and engineering standards. The overarching scope of this course is to transform engineering students to practicing engineers. Under the guidance of a faculty instructor and a mentor, each team conducts literature searches, write a technical proposal and its members develop skills in information analysis and synthesis; they model and test prototypes of their devices, and make frequent oral and poster presentations of their work to faculty and peers, and submit timely progress reports. In the process, they receive instruction in effective communication and presentation practices, and develop an appreciation of teamwork and collective success. This two-semester course begins in the fall of the academic year and concludes at the end of the spring term with a final team oral presentation and a final written report, and a working prototype of the team’s project. It also includes sample hardware fabrication in the machine laboratory.
Consult the pages for each department for courses in the following fields:

- Bioengineering (p. 292)
- Computer Science and Software Engineering (p. 295)
- Electrical and Computer Engineering (p. 306)
- Mechanical Engineering (p. 315)

**Bioengineering**

The bioengineering curriculum provides both breadth and depth across the range of engineering domains such as mechanical, electrical, computer or software engineering. The program prepares graduates to have an understanding of biology and physiology, as well as the capability to apply advanced mathematics, science and engineering to solve the problems at the interface of engineering and biology. The bioengineering curriculum prepares graduates with the ability to make measurements on and interpret data from living systems and to address the problems associated with the interaction between living and non-living materials and systems. The bioengineering curriculum blends theoretical knowledge with hands-on experiential learning that culminates with a year-long, interdisciplinary team-based capstone design project.

The Program Educational Objectives are broad statements that describe what alumni do within a few years following graduation. The Bioengineering program is committed to graduating engineers who within a few years of their graduation are expected to:

1. **Utilize their interdisciplinary training to have successful careers in industry, research and development and in regulatory agencies, academia or clinical work.**
2. **Demonstrate the organizational, leadership, and communication skills to achieve success in their chosen careers.**
3. **Employ critical thinking and problem solving skills to support interdisciplinary teams that may include physicians, molecular biologists, physiologists, and other engineers.**
4. **Utilize lifelong learning skills and the ethical tools for successful adaptation to the rapidly changing field of bioengineering.**
5. **Build upon their sound training in mathematics, biological sciences, the liberal arts and engineering to facilitate successful pursuit of advanced degrees in medicine, law, business, engineering, or related fields.**

For the first year of study, all our engineering programs place major emphasis on the fundamentals of engineering and computer science, mathematics, and the basic sciences to provide the background for later engineering science and design courses. Following preparatory work, the fundamentals of electrical, computer, mechanical, and materials engineering concepts are developed. Advanced courses in bioengineering further develop knowledge in the discipline. The bioengineering curriculum program places much emphasis on design assignments. Students may specialize in a specific area of bioengineering by taking elective courses. Also, students on a pre-medicine track can prepare for medical school entrance by taking their elective courses in psychology, sociology, organic chemistry, biology, and biochemistry.

**Courses**

- **BEN 0201 Biomechanics**
  - 3 Credits
  - **Prerequisites:** MA 0145, PS 0115.
  - This course covers solid mechanics of bone with a focus on stress, strain, stiffness, and strength. Joint forces and muscle attachments will be analyzed using free-body diagrams. Introductory musculoskeletal physiology will be covered and Biopac Student Lab software will be used for gait and muscle force analysis.

- **BEN 0300 Biomedical Instrumentation**
  - 4 Credits
  - **Attributes:** HSST Health Studies: Science and Technology
  - **Prerequisites:** BI 0107 or BI 0170; EE 0213.
  - Instrumentation and techniques used in acquisition, processing, and presentation of biomedical signals: transducers, sensors, Fourier analysis, flow measurement, biosensors, amplifiers, bridge circuits, and measurement of physical parameters and electrophysiological signals.

- **BEN 0331 Biomedical Signal Processing**
  - 3 Credits
  - **Attributes:** HSST Health Studies: Science and Technology
  - **Prerequisites:** CS 0131 or CS 0142 or SW 0407; MA 0146.
  - This course presents an overview of different methods used in biomedical signal processing. Signals with bioelectric origin are given special attention and their properties and clinical significance are reviewed. In many cases, the methods used for processing and analyzing biomedical signals are derived from a modeling perspective based on statistical signal descriptions. The purpose of the signal processing methods ranges from reduction of noise and artifacts to extraction of clinically significant features. The course gives each participant the opportunity to study the performance of a method on real, biomedical signals.

- **BEN 0332 Biomedical Imaging**
  - 3 Credits
  - **Attributes:** HSST Health Studies: Science and Technology
  - **Prerequisite:** BEN 0331 or CR 0331.
  - This course presents the fundamentals and applications of common medical imaging techniques, for example: x-ray imaging and computed tomography, nuclear medicine, magnetic resonance imaging, ultrasound, and optical imaging. In addition, as a basis for biomedical imaging, introductory material on general image formation concepts and characteristics are presented, including human visual perception and psychophysics.

- **BEN 0333 Biomedical Visualization**
  - 3 Credits
  - **Prerequisite:** CS 0131.
  - This course is an introduction to 3-D biomedical visualization. Various technologies are introduced, including Ultrasound, MRI, CAT scans, PET scans, etc. Students will learn about spatial data structures, computational geometry and solid modeling with applications in 3-D molecular and anatomical modeling.
BEN 0390 Bioengineering Design Project I 3 Credits
Prerequisite: Completion of all non-elective program courses; completion of other program requirements to enable graduation within the year of completion of BEN 0391. In this capstone course, students work in teams on advanced projects that emphasize engineering design with due attention to design constraints and engineering standards. The overarching scope of this course is to transform engineering students to practicing engineers. Under the guidance of a faculty instructor and a mentor, each team conducts literature searches, write a technical proposal and its members develop skills in information analysis and synthesis; they model and test prototypes of their devices, and make frequent oral and poster presentations of their work to faculty and peers, and submit timely progress reports. In the process, they receive instruction in effective communication and presentation practices, and develop an appreciation of teamwork and collective success. This two-semester course begins in the fall of the academic year and concludes at the end of the spring term with a final team oral presentation and a final written report, and a working prototype of the team’s project.

BEN 0391 Bioengineering Design Project II 3 Credits
Prerequisite: EG 0390. In this capstone course, students work in teams on advanced projects that emphasize engineering design with due attention to design constraints and engineering standards. The overarching scope of this course is to transform engineering students to practicing engineers. Under the guidance of a faculty instructor and a mentor, each team conducts literature searches, write a technical proposal and its members develop skills in information analysis and synthesis; they model and test prototypes of their devices, and make frequent oral and poster presentations of their work to faculty and peers, and submit timely progress reports. In the process, they receive instruction in effective communication and presentation practices, and develop an appreciation of teamwork and collective success. This two-semester course begins in the fall of the academic year and concludes at the end of the spring term with a final team oral presentation and a final written report, and a working prototype of the team’s project.

Bioengineering Major
Requirements
Bachelor of Science in Bioengineering
132 credits
Core Curriculum
Bioengineering majors follow the Engineering Core Curriculum with the following prescribed courses:

<table>
<thead>
<tr>
<th>Code</th>

Lyon

Associate Professors
Rusu, Amalia

Professors of the Practice
Hoffman, chair

Lecturers
Freudzon
Speretta
Select two elective courses  6
Total Credits  87

1 The premed option also requires CH 0212 Organic Chemistry II with lab.
2 The premed option also requires a second 100-level biology elective with lab.
3 SO 0011 Introduction to Sociology should be substituted for the premed option.
4 PY 0101 General Psychology should be substituted for the premed option.
5 Writing courses (ENW) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement; see listings under Classical Studies (p. 86) as well as Modern Languages and Literatures (p. 163).

Major Requirements

For a 45-credit major in bioengineering, students complete the following:

<table>

Computing Accreditation Commission of ABET

A degree in Computer Science gives one both marketable skills and intellectual breadth that can be applied to many career choices. At Fairfield, students can pursue multiple degree options as follows: a BS degree in Computer Science (liberal arts track), a double major in Computer Science and Mathematics, and a minor in Computer Science that makes a strong addition to one’s resume. The Computer Science (accreditation track) is preparing for accreditation by the Computing Accreditation Commission of ABET (http://www.abet.org). Additionally, the Computer Science (accreditation track) can be continued with a specialization in Applied Data Science through a five year Bachelor/Master’s dual-degree.

Fairfield recognizes that learning is a life-long process and sees the education which it provides as the foundation upon which its students may continue to build within their chosen areas of scholarly study or professional development.

## Programs

- Applied Data Science Five-Year Dual Degree Bachelor and Master of Science Program (p. 298)
- Computer Science Major: Accreditation Track (p. 298)
  - Concentration in Computer Engineering
  - Concentration in Software Engineering
- Computer Science Major: Liberal Arts Track (p. 302)
  - Computer Science and Mathematics Double Major (p. 304)
- Computer Science Minor (p. 305)
- Software Engineering Five-Year Dual Degree Bachelor and Master of Science Program (p. 306)

## Courses

### Computer Science

#### CS 0101 Introduction to Computing 3 Credits
This course introduces the concept of computing to students with no prior computer experience. The main ideas of computing are explored and students learn the most essential information about computers and technology in today’s digital world and the latest computing trends and skills with live code exercises. Students will explore key ideas of coding at an introductory level. Topics include computer architecture, digital media, network, web, big data, computer security, and basic computer programming.

**Attributes:** BUEL Business Elective, ENPC Digital Journalism Production Component

#### CS 0131 Fundamentals of Programming 3 Credits
This course introduces the object-oriented programming. Topics include data types, control structures, arrays, I/O, file handling, GUI, and the OOP concept of encapsulation, inheritance, polymorphism, packages, interfaces, and inner classes.

#### CS 0152 Introduction to Computer Game Modeling 3 Credits
This is an introductory computer games modeling course which examines the basics of computer game design and visual effects. Students will use graphics software modeling packages to create characters and visual effects, and to develop a computer game idea, including storyline and plots. Basic programming techniques may also be taught.

#### CS 0231 Programming Workshop 3 Credits
**Corequisite:** CS 0231L or CS 0231P

**Prerequisite:** CS 0131.

This course covers advanced programming concepts in one or more current programming languages, including syntax and theories. It prepares students for adapting to various programming environments and coding in an efficient manner. Lab work will accompany the course.
what a computer really is; you may be surprised. limits to what computers can do, and in doing so, we will learn about context-free grammars, and Turing machines. We will see that there are machines, regular expressions, non-determinism, pushdown automata, simple mathematical models of computation. Topics include finite state systems, databases, and networks. They will learn Cybersecurity components of Cybersecurity including software development, operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology. This course introduces the internal operation of modern operating systems. The topics cover a brief history of operating systems, the major components of modern operating systems, and the object-oriented methodology on UNIX-like platform. Various UNIX tools will be used in the course and participants study examples using object-oriented programs as well as large system integration by object-oriented methodology.
Software Engineering

SW 0300 Software Engineering Methods 3 Credits
Prerequisite: CS 0232.
This course explores the requirements gathering, system analysis, and software design methods of software application following the software processes required for the production of high quality software. Techniques for creating documentation and using software development tools will be presented. Students will gain experience in software project management, requirements, analysis, and safety issues in software development; interpersonal skills for management and team membership; and the software engineering discernment of systems architecture. Previously SW 0201.

SW 0301 Software Design Methods 3 Credits
Prerequisite: SW 0300.
This course is the continuation of SW 0300 with in-depth projects and further discussions of design and implementation topics. Through the use of case studies and project work that has the student gradually building a large design specification, students will achieve an understanding of how complex applications are designed and built. Previously SW 0202.

SW 0304 Web Development 3 Credits
Attributes: ENPC Digital Journalism Production Component
Prerequisite: CS 0131.
This course introduces the student to developing applications for use on the World Wide Web. Students learn basic n-tier concepts for designing distributed applications and gain hands on experience through the construction of Web-based applications. The course covers concepts that allow communication over the Web. This includes designing and authoring Web pages, markup languages, the client-side document object model, usability, search engine optimization, and client-side dynamic Web pages.

SW 0305 Mobile Application Development 3 Credits
Prerequisite: CS 0131.
This project-oriented course examines the fundamental aspects of mobile computing, application architecture, and mobile application design and development. Students will learn application development on the Android platform. Students will complete a hands-on project building a prototype mobile application. Topics include user interface design and building, input and data handling, and network techniques and GPS and motion sensing. Students are expected to work on a project that produces a professional-quality mobile application. Projects will be deployed in real-world applications.

SW 0312 Agile Software Engineering 3 Credits
Prerequisite: SW 0300.
In this course, students apply in-depth techniques and experience various roles incorporated into one of the main approaches to software development which is agile methodology. It uses detailed knowledge about each of the major traditional software engineering phases to explore a more iterative approach for development of faster and more adaptable software. Proficiency in programming is expected of the students entering this course.

SW 0314 Network Concepts 3 Credits
This course covers the structure and technologies of computer networks architecture including cabling, wiring hubs, file servers, bridges, routers, and network interface cards. It discusses network software and hardware configurations protocol stacks and connecting a personal computer to a network. The course examines the OSI-model, TCP/IP protocol, and routing protocols. Students will be able to create a subnet of TCP/IP networks.

SW 0320 Software Testing and Maintenance 3 Credits
Prerequisite: SW 0300.
This course will cover in-depth methods for software testing, reliability and maintenance of software. Students will learn the principles of software testing and how to apply software testing techniques to the development of quality software and how to deploy software systems, maintain, enhance and reuse software systems.

SW 0321 Software Project Management 3 Credits
Prerequisite: SW 0300.
This course explores and practices fundamental project management skills and life cycles required for both the successful management and development of software. Quality management principles of Personal Software Process (PSP) and Team Software Process (TSP) are introduced and practiced. Students will learn how to develop a project plan, scope a project, identify project activities, create work breakdown structures, estimate and schedule resources, construct and analyze project network diagrams, finalize project schedule and cost based on resource activity, recruit team members, organize and manage a project team, monitor and control progress, understand critical path project management, and have knowledge of both agile and traditional project management methods. Previously SW 0204.

SW 0322 Visual Analytics 3 Credits
Prerequisite: Junior standing.
In this course, students investigate visual analytics tools and techniques used to synthesize information and derive insight from massive, dynamic, ambiguous, and often conflicting data and to communicate the findings effectively for decision-making. Extensive use of case studies based on real-world events will be used to illustrate course concepts. Students will apply visual analytics techniques toward a focused research problem in a real-world application or a domain of interest.

SW 0355 Database Management Systems 3 Credits
Prerequisite: CS 0232.
This course examines data formats, organizations, representations and structures; design and analysis of searching, sorting, and other algorithms; data management systems; relational database model; domains and relational integrity; structured query language; database design - logical and physical; entity-relationship diagrams; normalization; transaction processing; and database administration.

SW 0382 Special Topics (Shell) 3 Credits
This course provides an in-depth study of selected topics in software engineering of particular interest to the students and instructor. The course is counted as a major elective/specialization course. The topics and prerequisites will be announced when this course is offered.

SW 0383 Independent Study 1-3 Credits
This course is an individualized study under the supervision of the faculty member. The course emphasizes individual creativity. Students work with a faculty mentor in studying and investigating topics of current interest in software engineering. Students may earn from one to for an independent study course. Enrollment by permission only.

Applied Data Science Five-Year Dual Degree Bachelor and Master of Science Program

A five-year program is offered in Applied Data Sciences at Fairfield's School of Engineering, leading to a Bachelor of Science in Computer Engineering (liberal arts track) and a Master of Science in Applied Data Sciences dual-degree. This program embraces the educational objectives of the undergraduate program in Computer Science, Liberal Arts track (p. 302), as well as those of the graduate program in Applied Data Sciences (https://catalog.fairfield.edu/graduate/engineering/programs/applied-data-science). It emphasizes experiential learning and innovation. Graduates of the program master the knowledge and tools they need to become data scientists. Data is ubiquitous in the modern world, and data scientists with skills and knowledge to analyze that data are a valuable, sought-after resource.

1. Requirements are the same as those for the BS in Computer Science, Liberal Arts track (p. 302).
2. The two graduate concentration courses, to be taken during the final year of undergraduate study, are in addition to the required 121 credits for the BS, and will be applied to the graduate degree.
3. All remaining graduate courses can be completed in the fifth year.
4. Electives may be chosen from courses listed, SW 0483 Independent Study, or any other graduate-level course from a concentration or another area, under advisement of the department chair or academic advisor.

Note: A minimum of 30 credits must be completed at the graduate level.

Changing from Undergraduate to Graduate Status

Students may request a change of status from the undergraduate to the undergraduate/graduate combined plan of study at any point after the following conditions are met, with approval from their academic advisor and the department chair:

- Completed 60+ credits toward the BS in Computer Science (liberal arts track).
- Successfully completed 6 courses in Software Engineering or Computer Science with a GPA of 3.0 or higher.
- Have an overall GPA of 3.0 or higher.

Students will be awarded both the BS in Computer Science (liberal arts track), typically at the end of the fourth year, and MS in Applied Data Sciences, usually by the end of the fifth year, as the requirements of each degree are satisfied.

Computer Science Major: Accreditation Track

The Computer Science (accreditation track) program supports the mission of the University by providing a curriculum focusing on the most advanced practices of computer science through continued assessment by employers, alumni, faculty and students. The Computer Science (accreditation track) BS program is preparing for accreditation by the Computing Accreditation Commission of ABET (http://www.abet.org). Students may obtain a concentration in Computer Engineering or Software Engineering.

The Program Educational Objectives (PEOs) are broad statements that describe what alumni do within a few years following graduation. The Computer Science (accreditation track) Program is committed to our alumni who, within a few years of their graduation, are expected to:

1. Apply their in-depth understanding in areas of software development methods to solve problems in a modern technological society as productive computer scientists or engineers and/or enter and succeed in a graduate program.
2. Function effectively, both individually and within multi-disciplinary teams.
3. Continue as lifelong learner to develop their computing and engineering abilities, problem-solving skills, and aptitude for innovation.

4. Practice professional ethics with social responsibility through service in the framework of a global technical community.

Student Outcomes:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.

3. Communicate effectively in a variety of professional contexts.

4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

5. Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.

6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

The program emphasizes the complete process of developing computing-based solutions. Students learn how to gather requirements, design, develop, test, deploy, and maintain software using rigorous computing practices. They are taught how to leverage technology to create flexible and scalable applications and to address the challenges that arise during the development process. Also, the program exposes students to a range of other disciplines, such as the physical sciences, social sciences, economics, and business so they gain an understanding of the real world scenarios that make up the computer science environment. Theoretical courses are supported by rigorous laboratory tasks.

Fairfield’s computer science curriculum encompasses a truly unique combination of experiences:

- Experiential Hands-On Learning: A unique curriculum guarantees computer science students the equivalent of 20 months of real-world experience through a sophomore year service-learning initiative, a junior year entrepreneurial experience, and an industry-based senior capstone project.

- Cross-Disciplinary Engineering Exposure: As part of the School of Engineering, computer science students have access to other engineering disciplines and engineering-heavy industries, which expands career opportunities exponentially.

- Student Mentoring: By volunteering as high school mentors, students learn valuable management skills, they become comfortable explaining highly technical concepts simply and clearly, and they experience the satisfaction of sharing their knowledge to help others.

- Liberal Arts Core: A strong foundation in the liberal arts encourages engineers to think critically, design imaginatively, communicate clearly and collaborate productively.

- Academic/Research Activities and Internship: Companies from a variety of domains, such as The Weather Company (visualization), Servo-Robot (artificial intelligence and user interface design), Federal Aviation Administration (software engineering and data mining), Saugatuck Energy (artificial intelligence) have an on-campus presence and provide computer science students opportunities to interact with industry leaders.

<td>4</td>
</tr>
<tr>
<td>MA 0146</td>
<td>Calculus II for Chemistry, Engineering, and Physics Majors</td>
<td>4</td>
</tr>
<tr>
<td>MA 0231</td>
<td>Discrete Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>Select two Science with lab courses (100-level or higher)</td>
<td>8</td>
<td></td>
</tr>
<tr>
<td>Select two additional mathematics from the following list:</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>MA 0211</td>
<td>Applied Matrix Theory</td>
<td></td>
</tr>
<tr>
<td>MA 0217</td>
<td>Accelerated Statistics</td>
<td></td>
</tr>
<tr>
<td>MA 0235</td>
<td>Linear Algebra</td>
<td></td>
</tr>
<tr>
<td>MA 0245</td>
<td>Calculus III for Chemistry, Engineering, and Physics Majors</td>
<td></td>
</tr>
<tr>
<td>MA 0337</td>
<td>Number Theory</td>
<td></td>
</tr>
<tr>
<td>MA 0342</td>
<td>Theory of Computation</td>
<td></td>
</tr>
<tr>
<td>MA 0377</td>
<td>Numerical Analysis</td>
<td></td>
</tr>
</tbody>
</table>

| **Area II: History and Social/Behavioral Sciences**                            |         |
| Select one 100-level history course                                           | 3       |
| Select one 200- or 300-level history course                                  | 3       |
| EC 0011 | Introduction to Microeconomics ((recommended) or another Social/Behavioral science elective) | 3       |

| **Select one additional social science elective**                              | 3       |

| **Area III: Philosophy and Religious Studies**                                |         |
| PH 0101 | Introduction to Philosophy                                               | 3       |
| Select one 200-level philosophy course                                         | 3       |
| RS 0101 | Exploring Religion (Shell)                                               | 3       |
| Select one 200-level religious studies course                                 | 3       |
| AE 0287 | Engineering Ethics                                                      |         |

| **Area IV: English and Visual and Performing Arts**                            |         |
| EN 0011 | Texts and Contexts I: Writing as Craft and Inquiry                       | 3       |
| EN 0012 | Texts and Contexts II: Writing About Literature                          | 3       |

| Select one 100-level English course §                                         | 3       |
| Select one history-focused course in Visual and Performing Arts              | 3       |
| Select EG 0130 or one additional course in Visual and Performing Arts        | 3       |

| **Area V: Modern and Classical Languages**                                    |         |

---

1. To be determined by the College of Arts and Sciences in consultation with the School of Engineering.
Engineering and Computer Science (accreditation track) majors are exempt from this requirement

Total Credits 67

1 Writing courses (ENW) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement; see listings under Classical Studies (p. 86) as well as Modern Languages and Literatures (p. 163).

Major Requirements

For a 60-credit major in Computer Science (accreditation track), students complete the following:

<table>

### Total Credits

124

---

1. Choose any appropriate Core course
2. Any Economics (EC) course may be substituted as advised
3. Core Social Science course may be filled by appropriate courses in Communication, Economics, Psychology, Politics, Sociology and Anthropology, etc.
4. Major electives are chosen from the department, but may be chosen with approval of advisory from among other courses offered in the School of Engineering
5. General Electives may be chosen from any courses offered at the university, and are frequently chosen to help fulfill requirements toward a chosen minor
6. Visual and Performing Art History courses can be chosen from Art History, Music, Film/Television/Media, Theater, etc. that fulfill the VPA History requirement
Lab science electives are typically met by 100 or higher level courses in Physics, Biology or Chemistry. For final science elective no lab is required.

9 Can be Applied or History or EG 0130

Computer Science Major: Liberal Arts Track

The Computer Science (liberal arts track) program supports the mission of the University by providing a flexible curriculum focusing on the advanced practices of computer science grounded in a strong liberal arts core curriculum. Students have the flexibility to choose a wider range of elective courses, which can also allow them to pursue a variety of minors or even double majors (such as the Computer Science / Mathematics double major). Students may obtain a concentration in Computer Engineering or Software Engineering.

The Program Educational Objectives (PEOs) are broad statements that describe what alumni do within a few years following graduation. The Computer Science (liberal arts track) Program is committed to our alumni who, within a few years of their graduation, are expected to:

1. Be employed in fields of computer science.
2. Continue the process of life-long learning through formal and informal education.
3. Communicate effectively.
4. Practice professional ethics with social responsibility.

The program emphasizes the complete development of computing-based solutions. Students learn how to gather requirements, design, develop, test, deploy, and maintain software using rigorous computing practices. They are taught how to leverage technology to create flexible and scalable applications and to address the challenges that arise during the development process. Also, the program exposes students to a range of other disciplines, such as the physical sciences, social sciences, languages and literature, and the arts, so they gain a broad understanding of the computer science environment.

Fairfield's computer science curriculum encompasses a truly unique combination of experiences:

- Experiential Hands-On Learning: A unique curriculum guarantees computer science students the equivalent of 20 months of real-world experience through a sophomore year service-learning initiative, a junior year entrepreneurial experience, and an industry-based senior capstone project.
- Cross-Disciplinary Engineering Exposure: As part of the School of Engineering, computer science students have access to other engineering disciplines and engineering-heavy industries, which expands career opportunities exponentially.
- Student Mentoring: By volunteering as high school mentors, students learn valuable management skills, they become comfortable explaining highly technical concepts simply and clearly, and they experience the satisfaction of sharing their knowledge to help others.
- Liberal Arts Core: A strong foundation in the liberal arts encourages engineers to think critically, design imaginatively, communicate clearly and collaborate productively.
- Academic/Research Activities and Internship: Companies from a variety of domains, such as The Weather Company (visualization), Servo-Robot (artificial intelligence and user interface design), Federal Aviation Administration (software engineering and data mining), Saugatuck Energy (artificial intelligence) have an on-campus presence and provide computer science students opportunities to interact with industry leaders.

Requirements

Bachelor of Science in Computer Science: Liberal Arts Track

121 credits

Core Curriculum

Computer science majors follow the Engineering Core Curriculum with the following prescribed courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Area I: Mathematics and Natural Sciences</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MA 0145</td>
<td>Calculus I for Chemistry, Engineering, and Physics Majors</td>
<td>4</td>
</tr>
<tr>
<td>or MA 0171</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MA 0146</td>
<td>Calculus II for Chemistry, Engineering, and Physics Majors</td>
<td>4</td>
</tr>
<tr>
<td>or MA 0172</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MA 0231</td>
<td>Discrete Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>Select one elective in science with lab (any level)</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>Select one additional elective in science (any level)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Area II: History and Social/Behavioral Sciences</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select one 100-level history course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Select one 200- or 300-level history course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EC 0011</td>
<td>Introduction to Microeconomics (recommended; or another Social/Behavioral Science elective)</td>
<td>3</td>
</tr>
<tr>
<td>Select one additional social science elective</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Area III: Philosophy and Religious Studies</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PH 0101</td>
<td>Introduction to Philosophy</td>

<td></td>
<td></td>
</tr>
</tbody>
</table>
Select four elective courses  
Total Credits

1 Writing courses (ENW) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement; see listings under Classical Studies (p. 86) as well as Modern Languages and Literatures (p. 163).

2 The Computer Science program provides various general elective courses and it is recommended that computer science students choose general electives from the computer science, software engineering, or related courses to bring the students depth in the computing fields.

Major Requirements
For a 43-credit major in computer science, students complete the following:

<table>

Second Year

Fall
- CS 0231 Programming Workshop 3
- & 0231P Programming Workshop PLG
- HI 0100 Origins of the Modern World Since 1500 3
- MA 0231 Discrete Mathematics 3
- SW 0304 Web Development (and PLG) 3
- Science Elective with lab (any level) 7 4

Credits 16

Spring
- CR 0245 Digital Design I 3
- CR 0245L Digital Design I Lab 1
- CS 0232 Data Structures 3
- & 0232P Data Structures PLG
- Core Philosophy 200-level 1 3
- Core Social Sciences course 3 3
- General Elective 1 5 3

Credits 16

Third Year

Fall
- CS 0343 Design and Analysis of Algorithms 3
- SW 0300 Software Engineering Methods (and PLG) 3
- Science Elective without lab (any level) 8 3
- Core Visual/Performing Arts 1 9 3
- Core English 100-level Literature course 1 3

Credits 15

Spring
- SW 0301 Software Design Methods (+ PLG) 3
- CS 0354 Theory of Programming Languages 3
- Core History 200-level 1 3
- Core Visual/Performing Arts History 2 6 3
- Core Religious Studies 200-level 3

Credits 15

Fourth Year

Fall
- General Elective 2 5 3
- Major Elective I 4 3
- Major Elective II 4 3
- Core RS, PH or Ethics Option 10 3
- Core Social Sciences course 3 3

Credits 15

Spring
- Major Elective III 4 3
- Major Elective IV 4 3
- General Elective III 5 3
- General Elective IV 5 3

Credits 12

Total Credits 121

1. Choose any appropriate Core course.
2. Core Social Science course may be filled by appropriate courses in Communication, Economics, Psychology, Politics, Sociology, and Anthropology, etc.
3. General Electives may be chosen from any courses offered at the university, and are frequently chosen to help fulfill requirements toward a chosen minor.
4. Visual and Performing Art History courses can be chosen from Art History, Music, Film/Television/Media, Theater, etc. that fulfill the VPA History requirement.
5. Lab science elective is typically met by 100-level or higher course in Physics, Biology, or Chemistry plus lab.
6. Lab science elective is typically met by any level science course, no lab required.
7. Can be Applied or History or EG 0130.
8. Any PH/RS/AE 200-level or higher will fulfill requirement.
9. Two courses at the intermediate level in the same language.

Computer Science and Mathematics Double Major

Requirements

To earn a double major in computer science and mathematics, students will prepare a custom plan of study. Students generally complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CR 0245</td>
<td>Digital Design I and Digital Design I Lab</td>
<td>4</td>
</tr>
<tr>

Software Engineering Five-Year Dual Degree Bachelor and Master of Science Program

A five-year program is offered in Software Engineering at Fairfield's School of Engineering, leading to a Bachelor of Science and Master of Science dual degree. This program embraces the educational objectives of the undergraduate program in Computer Science (accreditation track) (p. 298), as well as those of the graduate program in Software Engineering. It emphasizes experiential learning in terms of industrial internships following the sophomore year, and a final capstone project that guides students through a process of design and innovation at the level of a professional engineer. Graduates of the program master the knowledge and tools they need to create the next generation of software solutions to ever more complex technological and societal problems.

1 Requirements are the same as those listed (p. 298) for the BS, except that students take SW 0550 and SW 0551 during year five, in lieu of EG 0390 and EG 0391 during the fourth year.
2 Elective courses may be selected from those presented below (at the appropriate level) or others listed in the graduate catalog or chosen in consultation with the academic advisor or chair.

Note: A minimum of 30 credits must be completed at the graduate level.

Changing from Undergraduate to Graduate Status

Students may request a change of status from the undergraduate to the undergraduate/graduate combined plan of study at any point after the following conditions are met, with approval from their academic advisor and the department chair:

- Completed 60+ credits toward the BS in Computer Science (accreditation track).
- Successfully completed 6 courses in Software Engineering or Computer Science with a GPA of 3.0 or higher.
- Have an overall GPA of 3.0 or higher.

Students will be awarded both the BS in Computer Science (accreditation track) and MS in Software Engineering simultaneously, when all the requirements of the combined degree curricula have been satisfied, usually at the end of the fifth year.

A minimum of 30 credits must be completed at the graduate level.

Computer Science and Software Engineering Electives

Electrical and Computer Engineering

The Electrical and Computer Systems Engineering department administers the ABET-accredited Bachelor of Science degree program in Electrical Engineering, as well as a graduate program granting the Master of Science in Electrical and Computer Engineering. The undergraduate electrical engineering program also offers a computer engineering option.

These programs support the mission of the University by providing students with appropriate curricula and educational experiences.

For the first year of study, all our engineering programs place major emphasis on the fundamentals of engineering and computer science,
mathematics, and the basic sciences to provide the background for later engineering science and design courses. Following preparatory work, the fundamentals of electrical, computer, mechanical, and materials engineering concepts are developed. Advanced courses in electrical and computer engineering further develop knowledge in these engineering disciplines. Students may specialize in a specific area of interest to them, and in accord with their specific career objectives, by taking elective courses that provide depth in that area.

**Programs**

- Electrical Engineering Major (p. 310)
  - Computer Engineering Option
- Electrical and Computer Engineering Five-Year Dual Degree Bachelor and Master of Science Program (p. 312)

**Courses**

**Computer Engineering**

**CR 0245 Digital Design I**

**Corequisite:** CR 0245L.

An introduction to computer hardware design. Topics include: digital design principles, Boolean algebra, combinational logic design, sequential logic design, registers, counters, memory, multiplexers, finite state machines, radix conversion, and programmable logic devices. Students learn to write, implement, and simulate elementary digital design.

**CR 0245L Digital Design I Lab**

**Fee:** $80 Engineering Lab Fee

**Corequisite:** CR 0245.

This lab course covers the practical aspects of digital logic design. Students design and implement logic circuits using techniques taught in CR 0245. Students gain experience using state of the art design software and development boards, which use modern field programmable gate array (FPGA) technology.

**CR 0246 Digital Electronics Design II**

**Prerequisite:** CR 0245.

This course examines computer architecture implemented using a hardware design language and programmable logic devices. Students learn the VHDL hardware description language, and learn to use modern design, simulation, and synthesis software. Students design, verify, build and test digital logic circuits using industry standard development boards, and field programmable gate array (FPGA) technology.

**CR 0320 Computer Networks**

**Prerequisites:** CS 0131, MA 0351.

This course covers principles of networking and network programming. Topics include OSI layers, elementary queuing theory, protocol analysis, multi-threading, command-line interpreters, and monitors. Students write a distributed computing system and check their performance predictions with experiments.

**CR 0325 Computer Graphics**

**Prerequisite:** CS 0131.

This course supports the visualization and computer systems domain, offering an introductory treatment to two-dimensional and three-dimensional computer graphics concepts. Students write computer games and employ their knowledge to imbue them with realism. High performance rendering uses the latest in cutting edge hardware-accelerated graphics processors.

**CR 0331 Biomedical Signal Processing**

**Prerequisites:** CS 0131 or CS 0142 or SW 0407; MA 0146.

This course presents an overview of different methods used in biomedical signal processing. Signals with bioelectric origin are given special attention and their properties and clinical significance are reviewed. In many cases, the methods used for processing and analyzing biomedical signals are derived from a modeling perspective based on statistical signal descriptions. The purpose of the signal processing methods ranges from reduction of noise and artifacts to extraction of clinically significant features. The course gives each participant the opportunity to study the performance of a method on real, biomedical signals.

**CR 0332 Biomedical Imaging**

**Prerequisite:** CR 0331.

The course presents the fundamentals and applications of common medical imaging techniques, for example: x-ray imaging and computed tomography, nuclear medicine, magnetic resonance imaging, ultrasound, and optical imaging. In addition, as a basis for biomedical imaging, introductory material on general image formation concepts and characteristics are presented, including human visual perception and psychophysics.

**CR 0333 Biomedical Visualization**

**Prerequisite:** CS 0131.

This course is an introduction to 3-D biomedical visualization. Various technologies are introduced, including UltraSound, MRI, CAT scans, PET scans, etc. Students will learn about spatial data structures, computational geometry and solid modeling with applications in 3-D molecular and anatomical modeling.

**CR 0346 Computer System Architecture**

**Prerequisite:** CR 0245.

This course introduces the machine language and various components of a computer hardware in modern computer systems. The course focuses on CPU, memory, bus, cache, I/O module, internal data representation, and instruction set design. It also covers pipelining, superscalar architecture, reduced instruction set computers, parallel architectures, and interconnection networks.

**CR 0382 Independent Study**

**Fee:** $80 Engineering Lab Fee

This course includes supervised reading and research. Available only by pre-arrangement with the instructor.

**Electrical Engineering**

**EE 0213 Introduction to Electric Circuits**

**Prerequisites:** MA 0146, PS 0116, PS 0116L.

This course introduces engineering students to the analysis of linear electric circuits. The course covers the basic laws of circuit behavior and analysis techniques, including descriptions of circuit elements and electronic variables, and considers circuit theorems and principles for insightful analysis of electrical circuits. The course introduces basic concepts and analysis of networks.

**EE 0213L Electric Circuits Lab**

**Fee:** $80 Engineering Lab Fee

**Corequisite:** EE 0213.

Students use common electrical laboratory instruments (oscilloscopes, meters, and signal generators) and elemental circuit components to construct and analyze basic electrical circuits. They study the application of circuit theorems and circuit elements (RL and RC); conduct experiments with transient, steady state, and frequency response; and use software applications to simulate and analyze circuit performance.
EE 0221 Frequency Domain Circuit Analysis 3 Credits
Prerequisites: MA 0245, EE 0213.
Students perform frequency domain analysis of passive and active circuits, study transient and AC circuit analysis manually and with computer-aided applications, and examine the transient response of first and second order circuits. The course introduces pole and zero concepts and applies them to circuit analysis, and introduces computer methods of circuit analysis and design.

EE 0231 Introduction to Electronics Circuits and Devices 3 Credits
Prerequisite: EE 0213.
This first course in electronics teaches basic principles and technologies to understand, analyze, and design electronic circuits. The course reviews the properties of semiconductor materials used in the fabrication of diodes, bipolar junction transistors, and field effect transistors. Students analyze amplifier biasing techniques and develop circuit models of semiconductor devices that are used to analyze and design electronic circuits. Computer simulations of circuits are used to illustrate the fundamental principles.

EE 0231L Electronics Circuits Lab 1 Credit
Fee: $80 Engineering Lab Fee
Corequisite: EE 0231.
Prerequisite: EE 0213L.
Students build and test circuits using diodes, bipolar junction transistors, and MOSFETs. They use the principles developed in EE 0231 to analyze, build, and test amplifier and oscillator circuits.

EE 0301 Signal and Systems I 3 Credits
Corequisite: MA 0251.
Prerequisite: EE 0221.
This course studies and classifies continuous and discrete signals and systems. It presents time domain and discrete analysis of signals using the Fourier series, Laplace transforms, Fourier transforms, z-transforms, and fast Fourier transforms (e.g., differential equations, convolution, concept and meaning of impulse response); and examines frequency domain analysis, the Fourier series, and the Fourier transform as an alternative to time domain analysis. Students gain further insights into signal and system properties through the Laplace transform methods and the concept of the transfer function.

EE 0315 Nanoelectronics I 3 Credits
Prerequisite: EG 0212.
Building on the two introductory courses in nanotechnology, this course is the first of two that describe how nanotechnology can be integrated into the electronics industry. The unique electrical, mechanical, and optical properties of structures in the nanometer range and how they may be applied to electronics products are discussed. Principles of electronic materials, semiconductor devices, and microfabrication techniques will be extended to the nanoscale. Students will increase their knowledge of electronic structure, quantum mechanics, and the behavior of optoelectronic and low-dimensional systems. Students make extensive use of the available literature to seek out potential applications of nanotechnology. Intended for students interested in the minor in nanotechnology/nanoelectronics track. Also open to interested graduate students in ECE.

EE 0331 Analog Electronics Design 3 Credits
Prerequisites: EE 0221, EE 0231.
This advanced course in electronics examines high frequency response of bipolar junction transistor and field-effect transistor amplifiers using hybrid two-port active device models. Students consider the effect of feedback and frequency compensation techniques on the amplifier response and study a variety of analog circuits with respect to their analysis and applications, including active filters, oscillators, waveform generation and shaping, voltage regulator, and communication circuits. The course introduces basic power electronics device components.

EE 0331L Analog Electronics Lab 1 Credit
Corequisite: EE 0331.
Prerequisite: EE 0231L.
This advanced lab provides insight into the functions of various application-specific electronic circuits. Experiments characterize functioning of various analog systems, such as oscillators, active filters, waveform generation and shaping circuits, and voltage regulator circuits.

EE 0335 Microelectronics 3 Credits
Prerequisite: EE 0331.
This course covers three methods of fabricating high-density interconnection structures for manufacturing microelectronic assemblies: thick films, thin films, and printed circuit boards. The thick and thin film technologies use substrates of metalized ceramic to make the interconnections between components and are capable of fabricating integrated resistors with high precision and stability. The printed circuit board technology uses organic materials with copper laminates to etch the interconnection patterns. The individual layers are laminated to produce the multilayer structure, but do not include integrated resistors. Each of the technologies is examined to determine the electrical and physical properties of the structures. Such parameters as distributed capacitance and how they affect circuit performance are discussed. In the laboratory accompanying the course, students have the opportunity to fabricate thick and thin film circuits and to examine the structure of printed circuit boards.

EE 0346 Embedded Microcontrollers 3 Credits
Prerequisite: CR 0245.
This course covers the architecture of microcontrollers, including how they are constructed internally and how they interface with external circuitry. Applications for microcontrollers in both complex and simple equipment are discussed. Students learn how to apply and how to select a microcontroller for a given application. Students will learn to program the microcontroller to develop programming skills. The software tools will be used to develop software code for practical applications such as servo motor control, sensor reading, and data display. An accompanying laboratory course covers the programming of microprocessors to do a specific task. An accompanying laboratory course covers the programming of microprocessors to do a specific task. This course covers the programming and application of the PIC microcontroller. Students are able to develop programming skills using assembly language and software tools such as MPLAB IDE and MultiSim MCU. These tools are used to develop software code for practical applications such as motor speed control and voltage regulation for power supplies.
EE 0346L Microcontroller Lab
Fee: $80 Engineering Lab Fee
Corequisite: EE 0346.
This laboratory covers the basic operation and applications of a microcontroller. Students learn to program a microcontroller to control applications, such as motor speed, by the use of an emulator connected to a PC. They design a circuit using a microcontroller for a specific application and write a program to control the circuit. On completion of the program, they use the emulator to program an actual microcontroller for use in their circuits.

EE 0355 Sensor Design and Applications
Prerequisite: EE 0213.
This course covers the design, fabrication, and properties of sensors intended to measure a variety of parameters, such as stress, temperature, differential pressure, and acceleration. Sensors of different types are used in a wide range of equipment, especially automated equipment, to detect changes in state and to provide the signals necessary to control various functions. Sensors are generally connected to electronics systems that process and distribute the signals. The support electronics must identify the signal, separate it from noise and other interference, and direct it to the appropriate point. These support electronics are a critical part of the sensor technology; students discuss their design and packaging in detail.

EE 0360 Power Electronics
Prerequisite: EE 0301, EE 0221.
This course covers the design and operation of power electronics circuits, such as power supplies and motor controls. Using electronic circuit models for transistors and diodes, students analyze and design power circuits. Particular attention is paid to power dissipation and packaging. The accompanying laboratory course, EE 0360L, provides practical experience in conjunction with the lecture material.

EE 0361 Green Power Generation
This course compares various methods of green power generation including solar power, wind power, water power, and several others. This course covers how power is generated from these sources, the startup costs, the efficiency, and the practicality. These methods are compared to the present most common method of using oil and gas to heat water into steam to turn turbines. The student does not necessarily need a background in engineering and any necessary background material will be covered to the understanding of all.

EE 0377 Power Security and Reliability
Prerequisite: EE 0385.
This course focuses on Power System Protection and Relaying to allow the design of robust and reliable power systems. After reviewing the need for protection of power system elements (motors, generators, transformers, and transmission/distribution lines), the course: Explores developments in the creation of smarter, more flexible protective systems based on advances in the computational power of digital devices and the capabilities of communication systems that can be applied within the power grid; Examines the regulations related to power system protection and how they impact the way protective relaying systems are designed, applied, set, and monitored; Considers the evaluation of protective systems during system disturbances and describes the tools available for analysis; Addresses the benefits and problems associated with applying microprocessor-based devices in protection schemes; Contains an expanded discussion of internal protection requirements at dispersed generation facilities. MatLab is used to solve homework problems and do team design projects.

EE 0378 Electromagnetic Compatibility
Prerequisites: EE 0231, EE 0301, PS 0271.
This course presents design techniques to minimize electromagnetic interference (EMI) from or to it. The various sources of Radio-frequency emissions from electronic systems, coupling paths for the transfer of undesired electromagnetic energy will be introduced. Electromagnetic Compatibility (EMC) requirements for electronic products will be presented along with techniques to measure EMI. High speed digital signal transmission integrity related issues and methods to overcome signal integrity will be introduced. Techniques to minimize conducted and radiated Emissions through filtering and grounding will be presented. System design for EMC will be presented.

EE 0379 Communication Systems
Prerequisite: EE 0301.
This course focuses on analog and digital communication systems and the effects of noise on those systems. It includes analog modulation and demodulation techniques (amplitude, frequency, and phase modulation) and digital Modulation and demodulation techniques (ASK, FSK, PSK, PCM, and delta modulation). It discusses performance analysis of analog and digital communication systems under noise with applications of probability theory to the analysis. It discusses information measure, source coding, error correcting codes and Spread spectrum systems.

EE 0385 Power Generation and Distribution
Prerequisite: EE 0221.
This course considers the generation and distribution of electrical power to large areas. Three-phase networks are described in detail, including both generators and loads. Methods of modeling distribution systems by per-unit parameters are covered, along with power factor correction methods. Fault detection and lightning protection methods are also described. Some economic aspects of power generation and distribution are presented.

EE 0386 Fault Analysis in Power Systems
Prerequisite: EE 0385.
This course covers three types of faults in electrical power grids: open lines, lines shorted to ground, and lines shorted to each other. Methods of locating faults are covered along with an analysis of the effects of such faults. Methods of protection and fault isolation are also covered.

Electrical Engineering Major

The electrical engineering BS program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org). The electrical engineering courses have a strong design component. Students learn the theory in the classroom and put it into practice in the laboratory, resulting in graduates who can practice in industry. The electrical engineering curriculum blends theoretical knowledge with hands-on experiential learning. An interdisciplinary team-based senior design project completes the technical education.

Students desiring to obtain a background in the next generation of computer technologies can pursue the Computer Engineering concentration within the Electrical Engineering program. That option produces high-demand engineers able to develop both hardware and software solutions. They learn computer design and computer science in addition to electrical engineering, signal processing, physics, mathematics, and the liberal arts.

Close interactions with industry result in employment of our graduates in all sectors of industry, government, and academe. They are active in the areas of power, electronics, robotics and automation, computer hardware and software design, and take the lead in the research and development of new systems and applications.

The Program Educational Objectives are broad statements that describe what alumni do within a few years following graduation. Within a few years of graduation the alumni of the Electrical Engineering Program are expected to:

1. Apply their in-depth understanding in areas of electrical systems to solve problems in a modern technological society as productive engineers and/or enter and succeed in a graduate program.
2. Function effectively, both individually and within multidisciplinary teams.
3. Continue as lifelong learners to develop their engineering design abilities, problem-solving skills, and aptitude for innovation.
4. Practice professional ethics with social responsibility through service in the framework of a global technical community.

Total Credits 53

3 Major Electives are courses that enable students to explore areas of interest and obtain hands-on exposure to additional topics. These courses are taken in consultation with a curriculum adviser. Options may include courses in the following areas: Power, Micro and Nanoelectronics, Systems Engineering, Communications Systems, Networking, Software and Programming, Advanced Electronics, and Digital Design.

Note: In addition to the undergraduate courses listed, advanced juniors and seniors may take appropriate graduate courses as electives with the permission of the department chair and the instructor.

**Computer Engineering Option**

Students interested in the computer engineering option should choose from the following courses for their electives within the EE program. Students are also encouraged to consider the Electrical and Computer Engineering 5-Year Dual Degree BS/MS (p. 312) for further specialization in Computer Engineering:

<table>

Electrical and Computer Engineering Five-Year Dual Degree Bachelor and Master of Science Program

Dual-degree programs reduce the time to a master's degree by at least one year and provide credentials that will serve the student throughout his/her adult professional career. Graduates of the dual-degree program are awarded an Electrical and Computer Engineering MS degree in addition to their Electrical Engineering BS degree. The dual-degree program encourages students to pursue a graduate degree in order to broaden their educational background and their career opportunities. A graduate engineering education is key to innovation and central to economic health. A graduate degree has become far more common in the work place and a master's level engineering education gives a great return on your investment. Students who complete all their requirements may receive their BS degree prior to completing their MS degree.

Requirements

Dual Degree Curriculum

Students must develop a plan of study for the MS portion of the degree with approval of their academic advisor, including the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 0411</td>
<td>Digital Signal Processing</td>
<td>3</td>
</tr>
<tr>
<td>ECE 0415</td>

Additional Graduate Elective Courses

Select three additional graduate-level electives in Electrical and Computer Engineering

<table>
<thead>
<tr>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>15</td>
</tr>
</tbody>
</table>

Note: A minimum of 30 credits must be completed at the graduate level.

Capstone or Thesis Option

Students have two options for a two-semester long required course sequence:

1. Requirements are the same as those listed for the BS, except that students must select at least two graduate-level electives to fulfill the major elective requirement.
2. Electives may be chosen from courses listed under Electrical and Computer Engineering, as well as ECE 0483 Independent Study.
1. Capstone Option: The Capstone projects are team-driven. Students in the Capstone class are typically organized into teams that contribute to a significant electrical and computer systems project. These projects are chosen to advance the student’s knowledge in topics related to the specialization areas. Students consult with their advisors and instructors to determine which projects will contribute most to their education. Students may also suggest projects if they are of sufficient complexity and will advance their knowledge in an area of interest. A capstone topic should be approved by the instructor and accepted by the director of the program prior to starting the capstone sequence.

2. Thesis Option: Students may choose the thesis option at the agreement of a faculty member and approval by the program director. In the event that a student in one option (Capstone or Thesis) wishes to switch to the other option, the course that was taken in one option will not count toward fulfilling the graduation requirement. Capstone or thesis classes can be taken only after the completion of 9 credits at the minimum.

**Changing from Undergraduate to Graduate Status**

Students may request a change of status from the undergraduate to the undergraduate/graduate combined plan of study at any point after the following conditions are met, with approval from their academic advisor and the department chair:

- Completed 60+ credits toward the BS in Electrical Engineering or Computer Engineering.
- Have an overall GPA of 3.0 or higher.
- Have approval of the faculty advisor.

Students will be awarded both the BS and MS in Electrical and Computer Engineering simultaneously, when all the requirements of the combined degree curricula have been satisfied, usually at the end of the fifth year.

**Electrical and Computer Engineering Electives**

Possible electives may include any courses from the ECE Elective Domains:

<table>
<thead>
<tr>

**Management of Technology**

The Management of Technology program (MSMOT) at Fairfield University serves the needs of professional technologists, engineers and managers in their progression into management-level positions. The program instructs and trains engineers and scientists, and motivated people from any discipline who have a need to make management decisions in a technology environment or will be involved in the management of such functions as technology research and development, product design, manufacturing, human and physical resources, product and system test, information and data analysis, and product and service support.

Engineering management professionals deal with the planning, organization, scheduling, monitoring and control of engineering projects, and can lead to any of the following careers:

- Technical Group Leadership: In fields such as design, manufacturing, testing, and quality.
- Technical Marketing: interface between engineers who design a product and the public who will need to understand what problems it solves and how it is used.
- Project Management: interfacing between the engineers who design a project, the workers who build it, the customer, vendors, and executive management. Initiate, monitor, and control subcontracts issued to domestic and international organizations.
- Computer Systems Engineering: engage in the evaluation, design and managing the installation of software, hardware, and other types of support equipment into a workable network that supports a variety of functions within an organization.
- Operations Management: design and manage products, processes, services and supply chains, and the utilization of resources that firms need to deliver goods and services.

Graduates may find employment in a broad variety of technology companies in fields that include telecommunications, financial services, manufacturing, healthcare, consulting, and information technology. The engineering manager applies the concepts and tools of engineering management such as project management, quality management, engineering economics, modeling and simulation, systems engineering and integration, and statistical tools to all of these disciplines.

A dual degree program offering broadens a student’s options is available. The dual degree permits students to pursue the combination of any existing Bachelor of Science in Engineering degree offered by Fairfield
University with a Master of Science in the Management of Technology and complete the effort in a five-year time frame. This combination enables students not only to understand engineering, management and business concepts, but also to understand their integration and how the intersection distinctively shapes our world and their careers.

**Management of Technology Five-Year Dual Degree Program**

This dual degree program offering broadens a student's options and permits them to pursue the combination of any existing Bachelor of Science in Engineering degree offered by Fairfield University with a Master of Science in the Management of Technology and complete the effort in a five-year time frame. This combination enables students not only to understand engineering, management and business concepts, but also to understand their integration and how the intersection distinctively shapes our world and their careers.

Students may receive a bachelor's degree in Bioengineering, Electrical Engineering, Mechanical Engineering, or Computer Science (accreditation track) and a master's degree in Management of Technology. The Management of Technology track integrates business and management knowledge into an engineering curriculum to prepare engineers for leadership roles in technology-based organizations. The dual degree engineering management curriculum combines breadth of knowledge of general engineering subject matter with depth of knowledge in a specific engineering discipline. Students achieve depth of knowledge by majoring in bioengineering, electrical engineering, mechanical engineering, or computer science (accreditation track). In addition, multi-disciplinary coursework prepares students for positions in fields that require human resource and project management, financial and business understanding, marketing, and communication skills to complement their engineering knowledge.

Graduates of this dual degree option will be prepared for an engineering design opportunity in their discipline as well as leadership positions in other engineering and business related settings. They will be comfortable with the international languages of engineering and business. Engineers and technology specialists with business skills allows them to address engineering and business issues from a variety of perspectives. The integrated engineering-business skills that students gain represents a sure-fire combination for career success.

**Requirements**

The five-year program incorporates every required course in the existing undergraduate program except for the senior project. The senior project course (EG 0390 and EG 0391) is replaced by the two-semester Management of Technology Capstone courses (MOT 0591 and MOT 0592).

Students must complete the following courses in the Management of Technology master's degree program:

<table>
<thead>
<tr>

Total Credits: 36

1. Replaces a General Elective
2. Replaces a Major Elective
3. Graduate courses from the Dolan School of Business may be taken during the fifth year only. A maximum of five graduate courses from the Dolan School of Business may be applied to the Management of Technology degree.
4. The four Management of Technology graduate elective courses may be taken in any discipline at the University. The selection of these graduate courses is intended to assist the student in meeting his/her career objectives. Care must be taken to meet the applicable prerequisite requirements. Refer to the Management of Technology graduate catalog ([https://catalog.fairfield.edu/graduate/engineering/programs/msmot/#programtext](https://catalog.fairfield.edu/graduate/engineering/programs/msmot/#programtext)) to obtain a complete list of elective courses.

At the end of the five-year program, students are awarded a Bachelor of Science in Bioengineering, Electrical Engineering, Mechanical Engineering, or Computer Science (accreditation track), as well as the Master of Science in Management of Technology.

**Plan of Study**

Completion of the required graduate-level courses may be accomplished by taking the MOT courses during the semesters shown below:

Mechanical Engineering

The mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET, abet.org (http://www.abet.org). This engineering discipline has a very broad spectrum of applications in all aspects of modern technology. Students undertake studies in statics and dynamics, CAD, materials science, strength of materials, machine design, thermodynamics, fluid mechanics, heat transfer, and system dynamics. A team-based senior design project completes the technical education.

The Program Educational Objectives (PEOs) are broad statements that describe what alumni do within a few years following graduation. The Mechanical Engineering Department is committed to graduating engineers who within a few years of their graduation are expected to:

1. Apply engineering science to analyze and design thermal and mechanical systems.
2. Pursue engineering careers or advanced studies in mechanical engineering or related technical fields.
3. Employ effective communication skills as team members or team leaders in an ethical and professional manner with a sense of social and global responsibility.
4. Engage in lifelong learning by contributing to their chosen field, actively participating in professional societies and broadening their professional knowledge with formal and/or informal continuing education.

The mechanical engineering curriculum is constructed to include abundant experiential learning. This is accomplished through the integration of synchronized laboratory experiences within the framework of the theoretical courses in the basic curriculum, and by making use of well-equipped laboratories and computing facilities.

Programs

• Mechanical Engineering Major (p. 318)
• Mechanical Engineering Five-Year Dual Degree Bachelor and Master of Science Program (p. 320)

Courses

ME 0201 Engineering Statics 3 Credits
Prerequisites: PS 0115, PS 0115L, MA 0146.
This introduction to rigid body mechanisms using vector representation covers free body diagrams and static equilibrium in two- and three-dimensional space; solves problems in trusses, frames, and simple mechanisms; and develops methods in problem-solving techniques using computer-based approaches. Students perform lab experiments to support lecture theories and prepare professional-level reports.

ME 0203 Kinematics and Dynamics 3 Credits
Prerequisites: ME 0201, MA 0245.
This course presents kinematics principles applied to particles and rigid body elements. Topics include analysis of forces and motion using Newton's second and third laws of motion; theory of kinetics of particles and rigid body elements under rectilinear and curvilinear motion, vector methods; principles of work, energy, and power; and momentum and impact.

ME 0206L Mechanics Lab PLG 1 Credit
Fee: $80 Engineering Lab Fee
Corequisite: ME 0201.
Students do mechanics experiments for two- and three-dimensional structures under static loading conditions. Concepts include vectors, equilibrium, moments, truss analysis, forces, and center of gravity of objects. This course includes topics in engineering materials, such as hardness, toughness, microscopic analysis, machinability and thermal properties. The course introduces strain gages, instrumentation and statistical data analysis. Students perform experiments and prepare laboratory reports.

ME 0207 Materials Science 3 Credits
Attributes: EVME Environmental Studies Major Elective, EVNS Environmental Studies: Natural Science, EVPE Environmental Studies Elective
Prerequisites: CH 0111, CH 0111L.
This course covers chemical and physical properties of metals, polymers, and ceramics. Subjects include atomic structure, crystallography, strengthening mechanisms, microstructure, chemical composition, diffusion, binary phase diagrams, transformation diagrams, corrosion and materials science protection. Importance of the interrelationship between a material’s processing, microstructure, and properties is discussed. The lab demo portion examines material science testing and microstructure analyses. Sample preparation and metallographic techniques are also learned.
ME 0241 Principles of Thermodynamics 3 Credits
Prerequisites: PS 0115, PS 0115L.
This course on macroscopic thermodynamics with applications covers conservation of energy for open and closed systems; equations of state and pure substances; first and second law of thermodynamics, including the concepts of internal energy, and enthalpy and entropy as applied to aero-thermodynamic systems. Tables of thermodynamic properties, ideal gases and elements of cycle analysis, and applications of thermodynamic cycles, such as Carnot and Rankine, are discussed.

ME 0307L Dynamics Systems Lab 1 Credit
Fee: $80 Engineering Lab Fee
Corequisites: ME 0203, ME 0308.
Students perform experiments covering the concepts of kinematics, dynamics, and mechanisms. Concepts included are: Newton's Laws, momentum, mechanical energy, impact, and friction. The course includes concepts in the area of strength of materials, such as: stress, strain, loading, modulus of elasticity, and fatigue. It also covers analysis of beams, photoelastic studies, and statistical data analysis. Students complete written lab reports.

ME 0308 Strength of Materials 3 Credits
Corequisite: ME 0203.
Prerequisites: ME 0201, MA 0245.
This course examines concepts of two-dimensional stress and strain, factors of safety, thermal strain, static indeterminacy, stress concentration, bending including normal and shearing stresses, torsion, direct shear, principal stresses; Mohr's Circle; thin-walled pressure vessels; beam theory including shear and bending moment diagrams; deflection; elastic curves; indeterminate beams; energy methods; the use of superposition; and impact effects and column theory. Lab experiments reinforce these aspects of theory. This course includes a design project.

ME 0310L Product Manufacturing Lab 1 Credit
This course is designed to be an introductory course in the Product Manufacturing field. The course provides theoretical concepts as well as the development of the knowledge and skills required in CNC programming, machine setup and operation, 3D printing, laser, manual machining and metrology. The laboratory portion emphasizes practical application of CNC machine tools, 3D printing, and manual machining, which involve set-ups and procedures for operation.

ME 0311 Machine Design 3 Credits
Prerequisite: ME 0308.
This course applies the fundamentals of mechanical engineering design to analyze, design, and/or select components typically used in the design of complete mechanical systems. The course covers the design process and analysis of stress and deflection; material properties and loading (steady state and variable) as they relate to failure prevention; and the procedures for design and analysis of common machine elements such as columns, cylinders, fasteners and springs. In team reverse-engineering projects, students apply the course topics to real hardware. The course emphasizes computer techniques and responsible design (safety factors and ethics).

ME 0318 Finite Element Analysis 3 Credits
Prerequisites: EG 0130, MA 0251, ME 0308.
An introduction to concepts in finite element analysis; this course covers one- and two- dimensional element formulation and structural analysis. This finite element analysis is extended to three dimensional problems in dynamic systems and control, design and manufacturing, mechanics and materials, and fluids and thermal systems. This course will provide an overview of the complimentary topic of computational fluid dynamics (CFD). Students solve problems both manually and with the use of modern computer finite element software, ANSYS and FLUENT.

ME 0319 Applications of Finite Element Analysis 3 Credits
Prerequisite: ME 0318.
This course examines applications of finite element analysis in modern engineering including structural analysis, fluid flow and heat transfer. It is an introduction to the concepts of dynamics as applied to structure. Finite element formulations covering 1-, 2-, and 3-dimensional elements as well as energy methods are developed. Students develop techniques for application of finite element method in structural design, dynamic system response, fluid and thermal analyses. Application of methodology to fluid flow is presented. Students solve example and design problems manually and using modern finite element analysis software, ANSYS and FLUENT.

ME 0321 Theory and Applications of Robot Kinematics 3 Credits
Prerequisite: ME 0203.
Topics in advanced kinematics include introduction to basic concepts and definitions related to kinematics, commonly used links and joints, kinematic analysis of mechanisms, introduction to robotic mechanisms, homogeneous transformations, Euler angles, Denavit-Hartenberg representation of forward kinematics of robots, inverse kinematics, solution of robots, degeneracy and dexterity, and differential motion and velocity relations. Industrial application of kinematics will also be covered and the course will include a laboratory or project component.

ME 0322 Advanced Dynamics 3 Credits
Prerequisite: ME 0203.
The topics in the area of dynamics include degrees of freedom, generalized coordinates, constraints, , physics of failure, flexures, and optomechanics. The course will focus on practical applications of advanced dynamics, including linkages, cams, and kinematic mechanisms, as well as computer applications and project design.

ME 0323 Thermal Management of Microdevices 3 Credits
This course addresses the thermal design in electronic assemblies which includes thermal characteristics, heat transfer mechanisms and thermal failure modes. Thermal design of electronic devices enables engineers to prevent heat-related failures, increase the life expectancy of the system, and reduce emitted noise and energy consumption. This course provides the required knowledge of heat transfer for such analysis and various options available for thermal management of electronics. This course also presents advanced methods of removing heat from electronic circuits, including heat pipes, liquid immersion and forced convection.

ME 0324 Micro and Nano Manufacturing 3 Credits
Prerequisites: CH 0111, ME 0207, PS 0116.
This course will introduce students to the latest advancements in micro and nano manufacturing. The course will enable students to become familiar with advanced manufacturing techniques in light of the global emphasis on micro and nano manufacturing. Topics to be covered include lithography, mechanical micromachining, laser fabrication, polymers and nanocomposites, and nano imprinting. The important topics of metrology and process control at the micro and nano scale will also be discussed. Students will conduct a class project integrating the different processes for an application in electromechanical or biomedical field. A lab component is also present where students get a hands-on experience with material processing and characterization tools. Open to seniors only.
ME 0325 Engineering Systems Dynamics 3 Credits
Prerequisites: MA 0251, ME 0318.
The student will become familiar with the analysis of the dynamic response of structures, structural components to transient loads, and foundation excitation. Course includes single-degree-of-freedom and multiple-degree-of-freedom systems, frequency response concepts, and introduction to modal analysis. Basic concepts of vibration control and control theory will be introduced.

ME 0327 Fracture Mechanics 3 Credits
Prerequisite: ME 0308.
This course covers fracture mechanics concepts for design, materials selection, and failure analysis. The fundamental principles of fracture toughness, thickness effect, plastic zone concept, and crack growth under cyclic loading and aggressive environment will be presented. Emphasis will be placed on the practical applications of fracture mechanics by incorporation of a failure investigation study where the students utilize the skills developed with the course to root cause a real-world failure. Taking a holistic approach each student will have their own case study and learn to incorporate fracture mechanics, material science, mechanics of materials, computer simulation and manufacturing techniques and knowledge into their project.

ME 0330 Mechanics of Composite Materials 3 Credits
Prerequisite: ME 0207.
While the use of man-made composites have existed for centuries for practical applications, engineered composite materials are finding increasing use in many high technology applications such as aerospace, electronics, sporting goods, and structural components for high-stability systems. This course is designed to provide a comprehensive understanding of classification, processing, properties, selection and failure of polymer, metal and ceramic based composite materials.

ME 0342 Applications of Thermodynamics 3 Credits
Prerequisite: ME 0241.
This course applies concepts learned in ME 0241. Topics include mixtures of ideal gases and vapors; psychrometry; combustion analysis of common power generating, refrigeration, and air conditioning cycles; figures of merit including thermal efficiency; continuity equation, basic energy relations for turbomachinery; fundamentals of compressor and turbine design; and application and synthesis of design using thermodynamic principles. This course includes a lab segment.

ME 0346 Energy Conversion 3 Credits
Prerequisite: ME 0347.
This course covers the major topics in energy conversion, including fuels used in energy conversion; solar energy; gas turbine engines and applications; internal combustion engines; heat pumps; classic and novel power and refrigeration cycles; system analysis; system economics; and environmental considerations. The course includes computer simulation of power plant performance to optimize energy conversion efficiency. Students will be required to conduct a research on the environmental impacts of the major current energy conversion systems.

ME 0347 Fluid Mechanics 3 Credits
Prerequisite: ME 0241.
Topics in this course include incompressible fluids at rest and in motion; Bernoulli's theorem and the principle of similarity flow through orifices, nozzles, and pipes; flow through open channels; energy relationships as applied to pipe lines, pumps, and turbines; acceleration of fluid masses; losses in fluid flow systems; fluid dynamics; the momentum theorem in turbomachinery; and introduction to compressible fluid flow. This course emphasizes design solutions using computer analysis and synthesis. The course includes a design project of a system that applies the principles of fluid flow.

ME 0348L Thermal and Fluids Lab 1 Credit
Fee: $80 Engineering Lab Fee
Corequisites: ME 0342, ME 0347.
This laboratory learning experience provides the opportunity to explore various components, such as the compressor, condenser, and evaporator, in a series of experiments using refrigeration equipment. Students investigate lift and drag in a wind tunnel, pressure losses in duct flow, and the Bernoulli principle. Also, students determine the efficiency of a centrifugal pump, plot PV diagrams for the Otto Cycle, and study a Pelton Wheel Hydraulic Turbine. The course emphasizes statistical analysis, test planning, data evaluation, and report writing.

ME 0349 Heat Transfer 3 Credits
Prerequisite: ME 0347.
This course covers one- and two-dimensional heat conduction, including solutions for finned surfaces and solutions for transient problems; convection heat transfer in laminar and turbulent flows; fundamental radiation concepts; laws of thermal radiation; radiation exchange geometrical factors and network methods; heat exchangers and electrical analogies. The course emphasizes design solutions using computer analysis and synthesis. In the lab, students investigate heat transfer in plane surfaces, enhanced heat transfer in extended surfaces, and heat exchanger effectiveness. This course includes a practical design project of a system that applies the principles of heat transfer.

ME 0350L Energy Transfer Lab 1 Credit
Fee: $80 Engineering Lab Fee
Corequisites: ME 0325, ME 0349.
A laboratory experience for engineering students utilizing hands-on experiments to explore energy transfer methods related to transmitted forces in vibrating systems, as well as thermal transfer gradients in mechanical, electrical, and electronic systems. Students use simulation and modeling software for many experiments, including conduction and convection heat transfer processes. The course emphasizes statistical analysis, instrumentation, and report writing.

ME 0353 Computational Fluid Dynamics 3 Credits
Prerequisites: EG 0145, ME 0347.
Introduction to computational methods used for the solution of advanced fluid dynamics problems. Emphasis on concepts in finite difference methods as applied to various ordinary and partial differential model equations in fluid mechanics, fundamentals of spatial discretization, numerical integration, and numerical linear algebra. A focus on the engineering and scientific computing environment. Other topics may include waves, advanced numerical methods (like spectral, finite element, finite volume), non-uniform grids, turbulence modeling, and methods complex boundary conditions.
ME 0354 Heat and Mass Transfer  
3 Credits  
Prerequisite: ME 0349.  
This course covers the concepts of conduction, convection, and radiation heat transfer as well as mass transfer. Boiling and condensation; design and performance of selected thermal systems (including heat exchangers); and laminar and turbulent flows as related to forced and free convection are all studied. Mathematical modeling of engineering systems using modern analytical and computational solution methods are also covered.

ME 0362 Turbomachinery  
3 Credits  
Prerequisite: ME 0347.  
The theoretical basis and the fundamentals of modern turbomachinery for aerospace (helicopter, aircraft) and power generation (marine, industrial) applications are studied. Brayton engine cycle analysis and performance improvement are reviewed. Applications of the principles of fluid mechanics and thermodynamics to the design of turbines and compressors are examined, as well as component analysis and velocity diagram for axial compressors, centrifugal compressors and axial turbines. Discussion of combustion and environmental emissions. This course carries a design/research project.

ME 0372 Applications of Theory of Elasticity  
3 Credits  
Prerequisite: ME 0308.  
This course covers theory of elasticity (stress, strain, and generalized Hooke's law), strain energy methods (Castigliano's theorem), thin shells of revolution (equilibrium equations, pressure vessels), thin plates (rectangular and circular plates, moment-curvature relations), beams of elastic foundations and buckling.

ME 0382 Independent Study: Advanced Mechanical Project  
1-3 Credits  
Prerequisite: Completion of non-elective mechanical engineering courses and at least one major elective.  
During this design course emphasizing individual creativity, students (working with a faculty mentor) develop project objectives and performance specifications. At review meetings, students present progress on the project including analytic and experimental results to date. A final report and presentation demonstrates the accomplishments and significant conclusions. Faculty involvement creates a realistic engineering development environment. Students may take this course as independent study once the prerequisites have been met. Enrollment by departmental approval only.

Bachelor of Science in Mechanical Engineering  
134 credits  
Core Curriculum  
Mechanical engineering majors follow the Engineering Core Curriculum with the following prescribed courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Area I: Mathematics and Natural Sciences</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MA 0145</td>
<td>Calculus I for Chemistry, Engineering, and Physics Majors</td>
<td>4</td>
</tr>
<tr>
<td>MA 0146</td>
<td>Calculus II for Chemistry, Engineering, and Physics Majors</td>
<td>4</td>
</tr>
<tr>
<td>MA 0245</td>
<td>Calculus III for Chemistry, Engineering, and Physics Majors</td>
<td>4</td>
</tr>
<tr>
<td>MA 0251</td>
<td>Ordinary Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>CH 0111</td>
<td>General Chemistry I &amp; General Chemistry I Lab</td>
<td>4</td>
</tr>
<tr>
<td>PS 0115</td>
<td>General Physics I &amp; General Physics I Lab</td>
<td>4</td>
</tr>
<tr>
<td>PS 0116</td>
<td>General Physics II &amp; General Physics II Lab</td>
<td>4</td>
</tr>
<tr>
<td>Area II: History and Social/Behavioral Sciences</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select one 100-level history course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Select one 200- or 300-level history course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EC 0011</td>
<td>Introduction to Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>Select one additional social science elective</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Area III: Philosophy and Religious Studies</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PH 0101</td>
<td>Introduction to Philosophy</td>

</tbody>
</table>
Area V: Modern and Classical Languages

Engineering majors are exempt from this requirement

Free Electives

Select two elective courses

Total Credits 75

1 EC 0275 Managerial Economics is recommended.
2 Writing courses (ENW) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement; see listings under Classical Studies (p. 86) as well as Modern Languages and Literatures (p. 163).

Major Requirements

For a 59-credit major in mechanical engineering, students complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EG 0031</td>
<td>Fundamentals of Engineering I</td>
<td>3</td>
</tr>
<tr>

Mechanical Engineering Five-Year Dual Degree Bachelor and Master of Science Program

This concentrated program prepares students for constantly evolving needs for innovation in engineering design and development, across all technological and economic sectors. Graduates of the program will be awarded a BS and an MS in Mechanical Engineering. The undergraduate degree, BSME, will maintain its ABET accreditation. Students follow the standard undergraduate curriculum for the first three years, and then complete the BS degree requirements during their fourth year while taking graduate courses. During the fifth year the students take an additional eight courses to complete their MS degree. Graduates of the program will have mastered the knowledge and tools they need to create the next generation of Mechanical Engineering solutions to technological and societal problems.

### Requirements

#### Dual Degree Curriculum

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Requirements for BS in Mechanical Engineering ¹</td>
<td>134</td>
</tr>
<tr>
<td>ME 0415</td>

</tr>
<tr>
<td></td>
<td>Select 7 additional graduate-level electives in Mechanical Engineering</td>
<td>21</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>158</td>
</tr>
</tbody>
</table>

¹ Requirements are the same as those listed (p. 318) for the BS, except that students must select at least two graduate-level electives to fulfill the major elective requirement.

**Note:** A minimum of 30 credits must be completed at the graduate level.

#### Changing from Undergraduate to Graduate Status

Students may request a change of status from the undergraduate to the undergraduate/graduate combined plan of study at any point after the following conditions are met, with approval from their academic advisor and the department chair:

- Completed 60+ credits toward the BS in Mechanical Engineering.
- Successfully completed 8 courses in Mechanical Engineering with a GPA of 3.0 or higher.
- Plan to enroll in at least two graduate-level courses during the fourth year.

---

1. Choose any appropriate Core course
2. Any Economics (EC) course may be substituted as advised
3. Core Social Science course may be filled by appropriate courses in Communication, Economics, Psychology, Politics, Sociology and Anthropology, etc. EC 0275 Managerial Economics is recommended.
4. Major electives are chosen from the department, but may be chosen with approval of advisor from among other courses offered in the School of Engineering
5. General Electives may be chosen from any courses offered at the university, and are frequently chosen to help fulfill requirements toward a chosen minor
6. Visual and Performing Art History courses can be chosen from Art History, Music, Film/Television/Media, Theater, etc. that fulfill the VPA History requirement
Have an overall GPA of 3.0 or higher.
Have approval of the faculty advisor.

Students will be awarded the BS in Mechanical Engineering when all requirements are met, usually at the end of the fourth year. The MS in Mechanical Engineering will be awarded when all graduate requirements of the combined degree curricula have been satisfied, usually at the end of the fifth year.

A minimum of 30 credits must be completed at the graduate level.

**Mechanical Engineering Electives**
Possible electives may include:

<table>

MARION PECKHAM EGAN SCHOOL OF NURSING AND HEALTH STUDIES

A Message from the Dean

On behalf of the entire faculty and staff, it is my great pleasure to welcome you to the Marion Peckham Egan School of Nursing and Health Studies (Egan School). We understand that you had many choices in selecting an educational program, and are thrilled that you have chosen Fairfield. In selecting Fairfield for your undergraduate education, you have chosen to join a community where excellent healthcare is valued, and kindness is embraced. In the Jesuit tradition, the Egan School strives for Cura Personalis or education of the whole person. The result of such an education is the development of professionals, who are morally reflective, working with consistent sensitivity to cultural differences and issues of social justice.

Advances in technology and access to healthcare have afforded society an unprecedented opportunity for extended quality and quantity of life. Our undergraduate programs are prepared to meet the challenges of the future with faculty recognized around the world for their expertise in addressing the broad issues that impact global health. These faculty provide every student with the necessary tools and resources to become successful.

You have selected Fairfield because of the excellence of our program and faculty. As you grow in the development of new knowledge and skills, you will witness first hand, the dedication our faculty have to your development. The relationships you build with your fellow classmates and faculty members will substantially impact your life and career. Moreover, you will find that the effects of your education at Fairfield will extend long past your days as a student here.

At Fairfield we strive to provide students with an educational experience rich in the Jesuit tradition of academic rigor and reflective practice. With a strong core steeped in ethics, communication, spirituality, care of vulnerable populations and service learning, students receive all the education necessary to become leaders. Our program also provides analysis of global health issues, with a strong focus on issues of social justice and equality to prepare our students as members of society capable of generating change from within.

Our ability to provide this exceptional educational opportunity is accomplished through our strong partnerships with over 100 partnering agencies, including acute care hospitals, community agencies, clinics, schools and long-term care facilities. Throughout these environments, students are provided the instruction to increase knowledge, skills and understanding of the issues that impact society. Practicum experiences begin early in the program and our individual attention to your education is unwavering throughout your years at Fairfield. Our school also offers a number of study abroad experiences to provide students with expertise and insight beyond our national borders. The end result is the graduation of competent and compassionate professionals who will make an impact across the world.

Thank you for choosing Fairfield for your undergraduate education. Throughout your years here, we are confident that you will receive the educational foundation necessary to support your personal objectives. We are pleased to join you on your lifelong journey toward professional development and encourage you to take advantage of all that Fairfield has to offer!

Meredith Wallace Kazer, PhD, CNL, APRN, AGPCNP-BC, FAAN
Dean and Professor, Marion Peckham Egan School of Nursing and Health Studies

Overview

The goal of the undergraduate program is to prepare students for professional practice. One of the unique features of all undergraduate programs at Fairfield is the strong liberal arts core that is integral to the curriculum. Through these courses, students develop the social awareness, historical consciousness, thinking skills, aesthetic sensibility, values orientation, and foundations in art, literature, and science that are hallmarks of undergraduate education. The program of study contributes to the development of a well-rounded person who is able to live effectively and productively in the world of today and tomorrow. Students grow personally and professionally to become committed and compassionate, capable of intervening professionally in whatever setting they encounter.

The curriculum of the Egan School provides students with educational experiences from which they gain a strong base in the humanities, mathematics, social sciences, and natural sciences as well as in professional theory and practice. Students are fully integrated into the University community and enroll in core courses with students of all majors.

Faculty members in the Egan School are exceptionally well qualified by academic and clinical preparation. The student-to-faculty relationship is an inherent component of the program, particularly as it relates to professional practice. Each student is assigned to a faculty advisor who works closely with students to monitor progression through the program. Academic counseling, individualized attention, and career mentoring are integral to the advisement process.

In the program, students participate in a variety of practicum settings. The Egan School has affiliations with more than 100 agencies, including small and large hospitals, community health agencies, in-patient and outpatient psychiatric institutions, and schools. Opportunities are available in urban and suburban settings, for students to work with people of different cultures, backgrounds, and needs.

The Egan School is housed in the Center for Nursing and Health Studies, which includes academic collaboration, state-of-the-art simulation, integrated learning classrooms, clinical learning environments, a task training laboratory space and classrooms to support our Integrated Health programs. The Center for Nursing and Health Studies reflects the interdisciplinary collaboration on campus of both faculty and students, and provides opportunities for enhanced collaboration through think-tanks, research initiatives, and shared teaching spaces.

Mission Statement

Consistent with the mission of Fairfield University to develop men and women for others, the Egan School of Nursing and Health Studies inspires students to become leaders. Students are actively engaged with faculty in practice, research, scholarship and service. As a Jesuit institution, a central focus is to improve health outcomes with particular attention given to the needs of the under-served or vulnerable populations.
Vision Statement

Our vision is to create providers who demonstrate clinical excellence. Building on a tradition of caring, our commitment is to provide evidence-based, culturally sensitive inter-professional healthcare education.

Transfer to the Egan School

Fairfield University students who are currently enrolled in any major have the opportunity to transfer their major to the Egan School.

Students with a GPA of 3.0 or above who have successfully completed Fairfield University core requirements and prerequisite courses with grades of B or better may be eligible to transfer into the Nursing program. Nursing classes will begin in the summer between junior and senior year. Students will join the accelerated nursing program students, maintaining their full-time undergraduate status, and graduate with a Bachelor of Science in Nursing in August following their senior year.

Students with a GPA of 2.5 or above may transfer into the Public Health program in consultation with the Assistant Dean and Public Health faculty.

Degrees

Bachelor of Science

- Nursing (p. 325)
  - Program Options for Adult Learners (p. 332)
  - RN to BSN Program (p. 333)
  - Second Degree BSN Program (p. 333)
- Public Health (p. 334)

University Honors Program

The Egan School participates in the University Honors Program (p. 143), an interdisciplinary course of study open to invited freshmen and sophomores and devoted to intellectual history, interdisciplinary studies, and advanced work in the student’s major field.

Nursing

Upon successful completion of the program, students receive a Bachelor of Science in Nursing. Nursing graduates are qualified to take the NCLEX examination for licensure as a registered nurse. The nursing program is accredited by the Commission on Collegiate Nursing Education and approved by the Connecticut Department of Higher Education and the Connecticut State Board of Examiners for Nursing.

Baccalaureate in Nursing Program Outcomes

1. Demonstrate effectiveness in planning and providing holistic evidence-based nursing care for diverse individuals and populations.
2. Create an environment for the provision of care within clinical microsystems with attention to quality, safety, information systems and health care ethics.
3. Use clinical reasoning, critical thinking, and ethical decision-making based on nursing science, related theory, and current evidence, to inform the delivery of care across the lifespan.
4. Participate in inter- and intra-professional communication and collaboration in partnership with individuals and populations to deliver evidence-based, patient-centered care.
5. Translate knowledge from research, benchmarking, quality improvement and other relevant sources into practice to address health related problems.
6. Synthesize knowledge from the humanities and sciences in planning and providing care that is guided by the values of altruism, autonomy, human dignity, integrity, global citizenship, and social justice.
7. Demonstrate professional growth, through the cultivation of self-awareness, responsibility, accountability, creativity, leadership and commitment to lifelong learning.
8. Advocate for patients, consumers, and the nursing profession through involvement in the political process, and health/patient care policies and practices.

CCNE Accreditation

The baccalaureate degree in nursing at Fairfield University is accredited by the:

Commission on Collegiate Nursing Education
One Dupont Circle NW, Suite 530
Washington, DC 20036
Phone: 202-887-6791

Bachelor of Science Curriculum

- Nursing Major (p. 330)
  - Program Options for Adult Learners (p. 332)
    - RN to BSN Program (p. 333)
    - Second Degree BSN Program (p. 333)

The four components of the Egan School undergraduate nursing program are:

Core Curriculum

Nursing students must complete the core curriculum (p. 27) that is required of all Fairfield undergraduates, except that nursing students may meet either the visual and performing arts or the language requirement. Students meet the U.S. diversity requirement through enrollment in NS 0112 Healthcare Delivery Systems, and students meet the World diversity requirement through NS 0330 Community, Public, and Global Health Nursing. Statistics is required for all nursing students; the minimum requirement is MA 0017 Introduction to Probability and Statistics.

Natural and Social Sciences

Students take one semester of chemistry and three semesters of biology that include anatomy and physiology, and microbiology. Because the social sciences form an important part of the foundation for nursing practice, students also take developmental psychology and a social science elective.

Nursing Courses

Classroom instruction in nursing theory begins in the freshman year and continues throughout the undergraduate program. Instruction in nursing skills begins in the sophomore year. Nursing courses include theoretical and clinical components. With each semester, clinical hours increase. To
Eligibility Requirements
The curricula leading to degrees in nursing from Fairfield University requires students to possess essential non-academic skills and functions required to engage in clinical practice. It is within the sole determination of Fairfield University and the Marion Peckham Egan School of Nursing and Health Studies to assess and determine whether a student meets these skills and functions. Eligibility requirements for participation and completion in the nursing program shall include, but are not limited to, the following six capabilities:

Critical Thinking
Critical thinking ability sufficient for clinical judgment; student must be able to examine, interpret, analyze, and synthesize material for problem solving and evaluation of patient situations and own performance.

- Ability to assess, plan, establish priorities, implement and evaluate patient outcomes.
- Ability to calculate appropriate dosages for specific medications.
- Ability to use good judgment in establishing priorities and making appropriate decisions in client care.

Interpersonal and Communication
Relationship and communication abilities appropriate for interacting sensitively with individuals, families, groups and inter-professional team members from a variety of social, cultural, and intellectual backgrounds. Ability to accurately and clearly communicate appropriate information regarding evidence-based practice, patient status and response to care, both orally and in writing.

- Interpersonal skills to communicate effectively with patients/families and members of the (inter-professional) healthcare team.
- Ability to gather and record patient data concerning history, health status and response to care.
- Ability to follow and give verbal and written reports, presentations and directions to patients, families, and members of the inter-professional health care team.

Sensory Abilities
Ability to observe, identify, and obtain information in order to assess, plan, provide and evaluate nursing interventions; student must possess adequate sensory abilities or be able to demonstrate appropriate and safe compensation for deficits.

- Visual acuity necessary to observe physical changes in health status, prepare and administer medications, and gather reference material and patient data from written and digital sources.
- Auditory ability to differentiate normal and abnormal heart, lung, & bowel sounds.
- Tactile ability to differentiate temperature and anomalies of the skin, as well as unsafe patient care devices.
- Cognitive ability sufficient to read and understand directions, assignments, and patient documents.

Motor Skills and Mobility
Sufficient mobility, including the gross and fine motors skills needed to provide safe and competent nursing care, both routine and emergency.

- Sufficient motor skills necessary to perform physical care such as ambulating, positioning, and assisting with activities of daily living as needed.
- Fine motor skills needed for basic assessment such as palpation, auscultation, and percussion.
- Mobility sufficient to carry out patient care procedures such as suctioning, positioning, and drawing up medication into a syringe.

Emotional Stability
Emotional stability for providing care safely to patients and their families within a rapidly changing and often stressful healthcare environment; the ability to monitor and identify one’s own and others’ emotions, and use the information to guide thinking and actions.

- Integrity needed to make ethical decisions and honor the professional code of nursing.
- Emotional ability to maintain calm in a crisis and emergency situation.
- Ability to develop mature relationships with the health care team and modify behavior in response to constructive feedback.

Physical Health and Abilities
Physical health and stamina sufficient to provide care to diverse patient populations.

- Sufficient energy and ability to manage a typical patient assignment in a variety of settings for a full seven hour clinical day.
- Physical health necessary to care for those who are immuno-compromised, incapacitated, and/or otherwise vulnerable.

Standards for Admission and Progression
in the Nursing Curriculum
Students are required to successfully complete clinical practica involving direct patient care. By accepting admission in the Marion Peckham Egan School of Nursing, the student understands the program eligibility and progression requirements. Nursing students must follow all University educational policies and general regulations including those regarding academic progress.

Prerequisites
The science and psychology courses are sequential and are prerequisites to designated nursing courses. Strong foundational knowledge in the science and psychology courses is critical to success in the nursing program. Thus, students may not progress to the next semester with an incomplete in a prerequisite course. BI 0107 Human Anatomy and Physiology I, BI 0108 Human Anatomy and Physiology II, BI 0151 Elements of Microbiology, CH 0084 General Chemistry for Health Science, and PY 0111 Developmental Psychology for Non-Majors must be completed successfully with a minimum grade of C (73) for students to
Students unable to complete these courses successfully are expected to repeat coursework in the next semester or the summer session immediately following or they will be dismissed from the Egan School. Students consistently achieving minimum passing grades in prerequisite courses will be placed on Academic Warning. Students who do not obtain a grade of C or better in a prerequisite course may repeat the course once. If a grade of C or better in the repeated class is not earned, then the student will be dismissed from the program. A grade of less than C in three or more prerequisite courses will result in dismissal from the nursing program in the Egan School.

Nursing Courses
Nursing courses are sequential, beginning with foundational courses and progressing to increasing levels of complexity and challenge throughout the program. As students move through the curriculum, new content is integrated and builds upon previously learned material. Thus, all students must earn the minimum grade of C+ (77) in all nursing courses to progress to the next semester and continue in the program.

Further, students may not progress to the next semester with an incomplete in any nursing course. Students who do not obtain a grade of C+ or better in a nursing course may repeat the course once. A grade of less than C+ in two nursing courses (including a repeated course) will result in dismissal from the Egan School. The clinical component of all clinical nursing courses is graded on a pass/fail basis. Students must pass the theory and clinical component of a course to pass the entire course, regardless of their grade in the theory component. Students who fail to earn the minimum grade in either component of a clinical course must repeat the entire course.

Health and Professional Requirements
All clinical agencies require documentation of various professional and health information. Nursing students must be certified in cardiopulmonary resuscitation (CPR) before starting clinical in their sophomore year and remain certified throughout the nursing program. Students must receive their certification through either the Health Care Provider course offered through the American Heart Association or the Professional Rescuer or CPR/AED for Lifeguard Certification course offered through the American Red Cross. All health requirements and OSHA training requirements must be met each year prior to clinical practica.

To attend clinical, students must have a physical examination, non-reactive Mantoux test, and proof of influenza vaccine yearly. Proof of immunization or immunity must be provided for the following: hepatitis, varicella, measles, mumps, rubella, and diphtheria-tetanus-pertussis. History of disease is not acceptable as proof of immunity; laboratory results of blood titer must be provided. CastleBranch.com is the immunization tracking system used by Fairfield University nursing students to house their health information. Students are responsible for uploading information and keeping all required information updated throughout their clinical experience. Students unable to comply with agency requirements will be dismissed from the program. All costs associated with agency requirements are the responsibility of the student.

Student Background Checks and Drug Testing
The undergraduate nursing program at Fairfield University requires the successful completion of the clinical component of the curriculum. Most clinical sites require students to complete a criminal background check and drug screening before participating in clinical placements. In addition, national certification agencies may determine that persons with criminal convictions are not eligible to sit for national certification examinations and state laws may restrict/prohibit those with criminal convictions from acquiring a professional license to practice following graduation. Therefore, it is the policy of the Egan School that all admitted students must satisfactorily complete a criminal background check and drug screens prior to participating in the clinical component of the curriculum. These will be completed at the student’s expense at a location designated by the University, and may be required more than once depending on the agency. Fairfield University and the Egan School have no obligation to refund tuition or otherwise accommodate students in the event that a criminal background check or drug screening renders the student ineligible to complete required courses or clinical placement(s).

Continuous Assessment
All nursing students participate in a comprehensive nationally standardized assessment program. This total testing program allows close monitoring of student progress and serves as the basis for individualized advisement. A testing fee will be included for all nursing students in appropriate semesters.

Licensure
All nursing students graduate with a bachelor of science degree in nursing. To obtain initial licensure as a Registered Nurse, students apply to the State Board of Nursing in the state in which they plan to practice. In addition, students register to take the National Council Licensure Examination (NCLEX) at a conveniently located testing center.

All students are expected to pass the licensure exam on the first try. Application procedures vary by state. Information may be obtained on the National Council of State Boards of Nursing website: http://www.ncsbn.org.

Graduation from the nursing major does not insure eligibility for state licensure. A candidate who has been convicted of a felony or another crime in any state may be required to submit documentation about this conviction to the State Board of Nursing in which licensure is sought. Each State Board of Nursing reserves the right to make a decision on whether to grant licensure to practice as a registered nurse.

Scholastic Honors
Sigma Theta Tau, International Honor Society
The Mu Chi Chapter of the Sigma Theta Tau International Honor Society of Nursing was established at Fairfield University in 1992. Since then, the Chapter has grown to nearly 1000 members. The Society is committed to fostering nursing leadership, research and creativity. Standards for membership include demonstrated excellence in scholarship and/or exceptional achievement in nursing.
NS 010 Introduction to Professional Nursing  3 Credits  
This course serves as a foundation to the development of the nurse as a professional person. Central to this is the awareness and acceptance of self. The process of clinical reasoning as an approach to the planning and delivery of nursing care to individuals, families, groups and communities is introduced. Discussion of nursing’s history and accomplishments serves as the cornerstone for professional behaviors, including: scholarship, communication, collaboration, personal responsibility, accountability, integration of evidence based practice and peer- and self-evaluation. 42 theory hours.

NS 0112 Healthcare Delivery Systems  3 Credits  
Attributes: EDCG Educational Studies Cognate, EDDV Educational Studies Diversity, HSTE Health Studies: Traditions, Delivery, and Ethics  
The health care delivery system is explored from a historical, economic, political, and health information technology perspective. Emphasis is given to social, ethical, and legal aspects of the current system that remain unresolved, such as access to care, health disparities, and equity. The history and progression of healthcare reform and its influence on our current healthcare system performance will be analyzed. Global health issues and their impact on the delivery of health care services are discussed, along with consumer use of complementary and alternative therapies. This course is designed to give an inter-professional perspective to students interested in health care from any field of study. 42 theory hours.

NS 0250 Dimensions of Professional Nursing  3 Credits  
Attributes: UDIV U.S. Diversity  
Prerequisites: Connecticut RN license or academic transcript and approval of advisor.  
This course is designed to facilitate career advancement of the registered nurse to the baccalaureate level. This is the first course in the RN/BSN completion program. Consideration of values, culture, philosophy and personal goals are examined as part of the student’s professional development. Communication, clinical reasoning and conflict resolution techniques will be utilized to foster positive inter-professional teams. Students will demonstrate an evidence based approach to analyze current healthcare issues including social justice and diversity in professional practice. 42 theory hours.

NS 0252 Health Assessment for Registered Nurses  3 Credits  
Prerequisite: Connecticut RN license.  
This course enhances knowledge and skills required to perform health assessments for patients throughout the lifespan. Health assessment focuses not only on physiological components, but also on the more holistic cultural, spiritual, developmental, nutritional, genetic, and mental status assessments. Clinical reasoning, communication and documentation using electronic medical records are also essential components of this course. Students expand their skills in interviewing while learning how to perform health histories, and complete physical examinations through course lectures, discussions, simulations, and supervised and individual practice in classroom and laboratory modules. 28 theory, 28 lab hours.

NS 0270 Health Assessment  4 Credits  
Prerequisites: BI 0107, BI 0108, CH 0084, NS 0110.  
This course introduces students to the knowledge and skills required to perform health assessments for patients throughout the lifespan. Health assessment focuses not only on physiological components, but also on the more holistic cultural, spiritual, developmental, nutritional, genetic, and mental status assessments. Clinical reasoning, communication and documentation using electronic medical records are also essential components of this course. Students expand their skills in interviewing while learning how to perform health histories, and complete physical examinations through course lectures, discussions, simulations, and supervised and individual practice in classroom and laboratory modules. 28 theory hours, 56 lab hours.

NS 0270L Health Assessment Lab  0 Credits  
NS 0272 Geriatric Nursing  4 Credits  
Prerequisites: BI 0151*, NS 0110, NS 0112, NS 0270*, PY 0111*.  
This course focuses on evidence-based nursing care of older adults living in long-term care settings. Normal physiological changes of aging and related assessment skills will be incorporated and evaluated using standardized assessment tools. Management of common geriatric care problems will be emphasized. Particular focus will be placed on the ethical and spiritual concerns of vulnerable older adult populations. Students will reflect upon how the nursing role merges with life goals, philosophy and meaning to develop professional behaviors consistent with these aspects of life. 42 theory hours, 42 clinical hours. (*indicates concurrency allowed)

NS 0272C Geriatric Nursing Clinical  0 Credits  
NS 0301 Health and Wellness  3 Credits  
Prerequisites: NS 0270, NS 0272*.  
This course explores factors that influence health and wellness throughout the lifespan. Epidemiology and evidence based practice provide a framework for the assessment of risk factors. How people make health-related decisions, what risks threaten their health, and reasons for adopting particular lifestyles are examined. Key elements considered essential to providing culturally competent care are reviewed, in addition to increasing awareness about health and healthcare disparities. Social determinants of health, communication, and other wellness concepts are explored. 42 theory hours. (*indicates concurrency allowed)

NS 0301C Health and Wellness Clinical  0 Credits  
NS 0303 Basic Pathophysiology and Pharmacology  3 Credits  
Prerequisites: BI 0107, BI 0108, CH 0084.  
This course focuses on the study of physiological and biological life processes with a focus on deviations from normal, including exemplar cases. Manifestations of disease and alterations in all body systems are discussed. Pharmacologic therapies commonly used to manage disease are presented, including content on the recognition of side effects, adverse effects, allergy, and overdose. 42 theory hours.
NS 0305 Mental Health Nursing 4 Credits
Prerequisites: BI 0151*, NS 0110, NS 0112, NS 0270*, NS 0303*, PY 0111.
The focus of this course is the nursing care of individuals with psychiatric disorders. A holistic approach based on theories of human behavior and personality as well as neurobiological, developmental, trauma-informed, and recovery-oriented models are used to plan and implement care in a variety of settings. Factors that may contribute to individual developing a psychiatric disorder are discussed and ethical, legal and cultural issues are considered when planning care. The development of a therapeutic nurse-patient relationship and use of communication techniques to promote healing are emphasized. 42 theory hours, 42 clinical hours. (*indicates concurrency allowed)

NS 0305C Mental Health Nursing Clinical 0 Credits

NS 0307 Fundamentals of Nursing Care 4 Credits
Prerequisites: MA 0016 or higher, NS 0270.
In this course, evidence based practice is used as a guide for students to learn how to provide safe and effective patient care across the lifespan. In the laboratory setting, students perform basic to advanced psychomotor skills related to nursing care. Students also learn to effectively use an electronic health record to document clinical findings and care. 28 theory hours, 56 lab hours.

NS 0307L Fundamentals of Nursing Care Lab 0 Credits

NS 0310 Foundations of Research for Evidence Based Practice 3 Credits
Prerequisite: MA 0017 or MA 0217.
This course provides an introduction to the research process and its application to scholarship in clinical practice. Students learn to be consumers of research through a review of the literature, critique of research, and identification of methods appropriate to study specific practice-related problems. An emphasis is placed on clinical reasoning and writing skills. Consideration is given to ethical, economic, technological, and statistical dimensions. Application is made to clinical research and evidence-based practice. 42 theory hours.

NS 0312 Medical Surgical Nursing I 5 Credits
Prerequisites: NS 0272, NS 0301*, NS 0303*, NS 0305*, NS 0307.
This course introduces the student to illnesses common in the adult population. The nursing process, theory, and evidence-based practice, are incorporated with clinical practice. An emphasis is placed on clinical reasoning and prioritizing patient care. Throughout the course, informatics is integrated as part of the documentation process for clinical experiences. 42 theory hours, 84 clinical hours. (*indicates concurrency allowed)

NS 0312C Medical Surgical Nursing I Clinical 0 Credits

NS 0314 Medical Surgical Nursing I Clinical 0 Credits

NS 0314C Medical Surgical Nursing I Clinical 0 Credits

NS 0314C Maternal and Newborn Nursing 0 Credits
Attributes: WSGF Women, Gender, and Sexuality Studies: Gender Focused
Prerequisites: NS 0301, NS 0303, NS 0305, NS 0307, NS 0312*.
This course is designed to provide students with the opportunity to assist the patient and family to cope with changes in reproductive and gynecological needs. The childbearing cycle including: pregnancy, childbirth, postpartum, lactation, care of the healthy newborn and perinatal complications, and theoretical models will be explored. Cultural, ethical and legal aspects of reproductive health across the lifespan will be examined. Emphasis is on development of clinical reasoning and evidence based practice skills related to the nursing care of women and childbearing families. 42 theory hours, 42 clinical hours. (*indicates concurrency allowed)

NS 0321 Professional Nursing Leadership 3 Credits
Prerequisites: NS 0250* or NS 0325*, NS 0310*.
This course immerses students in issues and concepts central to professional nursing. Political, social, and legal systems that affect the image of nursing and influence its role definition are examined. Organizational dynamics and theories of leadership are considered, with case studies and concurrent clinical experiences providing the foundation for theory integration. Focus is placed on patient safety and quality improvement. 42 theory hours. (*indicates concurrency allowed)

NS 0323 Pediatric Nursing 4 Credits
Prerequisites: NS 0301, NS 0303, NS 0305, NS 0307, NS 0312*.
This course utilizes a family centered care approach to provide an understanding of the unique anatomical, physiologic, and developmental differences among neonates, infants, children, adolescents, and young adults. Social and cultural influences on children and their families are discussed in addition to assessment, genetics, health promotion, injury prevention, acute and chronic illness, and palliative and end-of-life care. Students are challenged to implement effective communication techniques, clinical reasoning skills, and evidenced based practices when planning holistic and safe care for children and their families in a wide variety of clinical settings. 42 theory hours, 42 clinical hours. (*indicates concurrency allowed)

NS 0323C Pediatric Nursing Clinical 0 Credits

NS 0325 Medical Surgical Nursing II 5 Credits
Prerequisite: NS 0310*, NS 0312.
This course continues the study of nursing care for patients with illnesses common in the adult population. The theoretical framework of the nursing process is used to demonstrate effectiveness in planning and providing holistic evidence-based nursing care for diverse individuals and populations. Professional communication and interprofessional collaboration will be utilized in the delivery of patient-centered care. 42 theory hours, 84 clinical hours. (*indicates concurrency allowed)

NS 0325C Medical Surgical Nursing II Clinical 0 Credits

NS 0330 Community, Public, and Global Health Nursing 4 Credits
Attributes: HSTE Health Studies: Traditions, Delivery, and Ethics, LCEL LACS Minor: Elective, WDIV World Diversity
Prerequisites: NS 0250* or NS 0325*.
This course focuses on the care of people in their homes, in communities, and around the world. Principals of disease prevention, risk reduction, and health promotion are applied to diverse populations in the USA and worldwide. Students synthesize prior experience and learning with public health theory to provide collaborative, quality care across the lifespan. Using an ecological model, students engage in evidence based care for individuals, families, groups, communities and populations. Global issues related to the impact of social policies on healthcare and health equity, and needs of vulnerable populations are also examined. 42 theory hours, 42 clinical hours. (*indicates concurrency allowed)

NS 0330C Community, Public, and Global Health Nursing Clinical 0 Credits

NS 0330C Community, Public, and Global Health Nursing Clinical 0 Credits
NS 0332 Transition to Professional Nursing  
**Prerequisites:** NS 0314, NS 0321*, NS 0323, NS 0325, NS 0330*.  
This capstone course addresses provision of holistic, evidence-based care to patients and families in a variety of health care settings. Students have the opportunity to work as a member of the health care team with an individual agency preceptor across the course. The focus is on fostering student growth in clinical reasoning, clinical reasoning and leadership development to promote autonomous professional nursing practice within the clinical setting. Students develop a Capstone Project based on an identified learning need, for the patient, the patient's family, or for the nursing staff. 168 clinical hours. (*indicates concurrency allowed)

NS 0332C Transition to Professional Nursing Clinical  
0 Credits

NS 0340 Introduction to Global Public Health for Non-Nurses  
**Attributes:** HACA Humanitarian Action Minor Context Course, HSTE Health Studies: Traditions, Delivery, and Ethics, LCEL LACS Minor: Elective  
This course examines the social, economic and cultural factors impacting the health of societies worldwide and identifies key global health conditions. Principals of disease prevention, risk reduction, and health promotion are applied to diverse populations in the USA and worldwide. Students will analyze current and emerging global health priorities, including emerging infectious diseases, poverty, obesity, health inequities and conflicts and crises. Global issues related to the impact of social policies on healthcare and equity, and needs of vulnerable populations are also examined.

NS 0356 Transition Seminar for Professional Nursing  
**Prerequisites:** Connecticut RN license, NS 0310, NS 0321*, NS 0330*.  
This capstone course challenges the RN student to facilitate change in a clinical setting and positively influence patient outcomes. Students engage in collaborative interprofessional work with members of the healthcare team, and reflect on their own role as a professional nurse. Through this course, students demonstrate evidence-based practice, leadership, and clinical reasoning to make the transition to an autonomous professional level of practice. 42 theory hours. (*indicates concurrency allowed)

NS 0360 Critical Care Nursing  
**Prerequisite:** NS 0325.  
This elective course is an introduction to critical care nursing. The focus is placed on nursing diagnoses and evidence-based practice in the care of the critically ill patient. Common issues such as ethical dilemmas, psychosocial challenges, and symptom management are discussed. Relevant nursing implications for the care of critically ill patients are addressed. Students also gain skills in advanced critical care, hemodynamic monitoring, and ventilator management. 42 theory hours.

NS 0399 Independent Study  
**Credits:** 1-6  
Through individually designed projects or activities, students work with a faculty member to study a specific area in depth. Enrollment by permission only.

NI 0330 or NI 0330C | Community, Public, and Global Health Nursing or Community, Public, and Global Health Nursing Clinical | 4
NI 0332 or NI 0332C | Transition to Professional Nursing or Transition to Professional Nursing Clinical | 4

**Spring**
NI 0301 | Health and Wellness | 3
NI 0305 or NI 0305C | Mental Health Nursing or Geriatric Nursing | 4
NI 0312 | Medical Surgical Nursing I | 5
NI 0314 or NI 0314C | Maternal and Newborn Nursing or Maternal and Newborn Nursing Clinical | 4
NI 0323 or NI 0323C | Pediatric Nursing or Pediatric Nursing Clinical | 4
NI 0325 or NI 0325C | Medical Surgical Nursing II or Medical Surgical Nursing II Clinical | 5
NI 0330 or NI 0330C | Community, Public, and Global Health Nursing or Community, Public, and Global Health Nursing Clinical | 4
NI 0332 or NI 0332C | Transition to Professional Nursing or Transition to Professional Nursing Clinical | 4

**Fourth Year**

**Fall**
NS 0323 | Pediatric Nursing or Maternal and Newborn Nursing | 4
Nursing for full time undergraduates, second degree, and RN-BSN nursing students from Universidad Centroamericana (UCA) to address health problems. This experience fulfills the required public health clinical hours for NS 0330. Students commit to group meetings prior to and following Spring Break. Additional opportunities for Nicaragua travel may be available in winter and summer sessions.

Non-Nursing Study Abroad Options
The University offers many intersession and summer programs that offer exceptional learning opportunities beyond the classroom. An overall GPA of 2.8 is required to study abroad in short-term and summer programs. Students can choose to study in a variety of countries in South or Central America, Europe, the United Kingdom, Middle East, Asia, Africa, or Australia.

Program Options for Adult Learners
The programs for adult learners are designed to draw on previous education and experience and allow students to earn the bachelor’s degree by different routes. A program of study for individuals who hold an associate degree in nursing allows students to pursue a BS in nursing. Another option for adult learners is an accelerated format for persons holding a bachelor’s degree in another field.

Admission
Students interested in pursuing a bachelor’s degree in nursing in the RN to BSN program may attend on a part-time basis. Classes are available during the academic year and in the summer. Registered nurses must have successfully completed an associate degree or diploma program and possess a RN license.

Students interested in the Second Degree program, a 15-month full time accelerated program, must hold a bachelor’s degree in any field. Core and prerequisite courses must be completed prior to the start of the program. Admission is competitive and all students must have a minimum GPA of 3.0 to declare a nursing major. Students must complete an application to begin nursing courses.

Matriculation
Matriculation is official enrollment in a degree program. Students in the RN to BSN Program are matriculated after successful completion of NS 0112 Healthcare Delivery Systems, NS 0250 Dimensions of Professional Nursing, or NS 0252 Health Assessment for Registered Nurses.

Core Requirements
Adult learners must meet the University’s core course requirements. Course requirements in the liberal arts and required supportive courses can be met by challenge examinations, transfer credits from other academic institutions, or enrollment in specific courses. Courses are accepted in transfer from other accredited colleges and universities on the basis of a satisfactory (C or better) academic record and course equivalency.

Prerequisite Course Requirements
The Egan School suggests that all prerequisite courses be completed within 10 years prior to the first nursing course. Applicants normally have completed science courses with grades of A or B in the last three to five years. Acceptance of credit is at the discretion of the Program Director and Dean. Students are expected to review course material to

### Spring
- **NS 0321** Professional Nursing Leadership 3
- **NS 0330** Community, Public, and Global Health Nursing 4
- **NS 0332** Transition to Professional Nursing 4
- Free Electives 6

### Total Credits: 17

1. Students may choose two courses from either: Intermediate Level Modern Language or Visual and Performing Arts. Note: One VPA must have a history designation. VPA courses include: Art History; Film, Television, and Media Arts; Music; Studio Art; and Theatre.

2. Writing courses (ENW) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement; see listings under Classical Studies (p. 86) as well as Modern Languages and Literatures (p. 163).

3. Social Sciences include: Anthropology, Economics, Politics, Sociology, Psychology, CO 0100, and CO 0130.

#### Nursing Study Abroad
The Egan School offers study abroad opportunities for short-term and semester-long study at Fairfield University affiliated programs.

#### Nursing Semester Study Abroad Options
The Nursing Semester Study Abroad Program is open to Fairfield University nursing students who meet the University Study Abroad criteria. Normally, a maximum of 12 students will be permitted to study abroad in any semester.

Full-time undergraduate students enroll in liberal arts, healthcare and professional nursing courses in an international setting in the spring of the junior year. While abroad or upon return, students will be required to complete selected ATI subject area tests.

#### National University of Galway, Ireland
The Galway semester runs from January-May. Upon return, students complete a medication and skills review, enroll in a 6-week medical-surgical summer course on campus from mid-May to mid-July, and continue in the traditional nursing progression with some minor curricular adjustments. Students are responsible for the cost of the summer course and housing.

#### Australian Catholic University at Brisbane
Students who select the ACU Brisbane option have a semester running from February-June. Medical-surgical theory and clinical will be part of the required curriculum in Brisbane. Students continue in the traditional nursing progression with some minor curricular adjustments.

#### Managua, Nicaragua
A Nursing Study Abroad program is offered during spring break for full time undergraduates, second degree, and RN-BSN nursing students enrolled in NS 0330 Community, Public, and Global Health Nursing. Students collaborate with community leaders and social work students in Nicaragua travel may be available in winter and summer sessions.
ensure that their knowledge of the subject matter is current. Students can maximize their potential for success in the nursing program with a strong foundation that is provided by these courses.

Residency Requirement

A minimum of 60 credits, including credits in nursing, must be completed at Fairfield University. In addition, the last 30 credits for the degree must be taken at Fairfield University.

Partnership Programs

Fairfield University's Egan School has a partnership with the Connecticut Community College Nursing Program, Bridgeport Hospital School of Nursing, and St. Vincent's College. This program provides a seamless transition from associate to bachelor's degree in nursing and grants 34 credits in Advanced Placement nursing.

Credit from International Programs

Students completing coursework outside the United States must submit certified English transcripts and course-by-course evaluation of all academic records. Information may be obtained from World Education Services (800-937-3895 or info@wes.org).

Diversity Requirements

RN to BSN students meet the U.S. diversity requirement through enrollment in NS 0250 Dimensions of Professional Nursing and meet the world diversity requirement with NS 0112 Healthcare Delivery Systems and NS 0330 Community, Public, and Global Health Nursing.

Public Health

The Marion Peckham Egan School of Nursing and Health Studies offers a major and minor in public health. These programs aim to prepare students to address health inequity through graduating “change agents” who can lead and advocate for improved health conditions worldwide. The foundational course for the program provides a glimpse into critical local, national, and global health system structures, disease and injury prevention, and the public health roles of assessment, policy development, and assurance that will be discussed in more detail in subsequent courses. In collaboration with the nursing program, the major features a unique inter-professional and social justice-oriented framework.

Outcomes

Public Health Program Outcomes

Graduates of the Fairfield University Public Health major will have a comprehensive foundation in the theory and practice of Public Health with a strong emphasis on inter-professional collaboration, social justice, health equity, evidence-based problem solving and policy.

The learning outcomes reflect the accreditation requirements of the Council on Education in Public Health (CEPH). In addition the didactic and field preparation will prepare graduates to sit for the Certification in Public Health exam and to be competitive for diverse entry-level positions in domestic and global public health or to pursue graduate programs in Public Health or related subspecialties.

Program Outcomes: Upon completion of the Bachelor of Science in Public Health, graduates will be able to:

1. Synthesize knowledge of the history, essential principles, and philosophy of public health to improve care of diverse populations across the lifespan with attention to social justice and ethical practices.
2. Apply the principles of assessment, planning, intervention, implementation and evaluation to identify and address public health needs of communities and populations.

3. Implement the use of evidence-based data collection and analytic skills (methods, quantitative and qualitative techniques) to influence health policy and impact population health outcomes.

4. Translate knowledge of the fundamental concepts of the biological, environmental, behavioral, and social determinants of health and mental health, inequities and access to care, in line with a social ecological approach, to impact health outcomes for groups of people. Analyze how diverse national and global governance mechanisms influence the organization and operations of health care systems with a focus on economic, legal, ethical and regulatory policy dimensions.

5. Analyze how diverse national and global governance mechanisms influence the organization and operations of health care systems with a focus on economic, legal, ethical and regulatory policy dimensions.

6. Demonstrate effective and innovative communication and collaboration methods to enhance public health through community empowerment and mobilization of partnerships.

7. Demonstrate leadership to inform and advocate for health promotion and disease and injury prevention for diverse populations.

Programs

- Public Health Major (p. 335)
- Public Health Minor (p. 339)

Courses

PB 0101 Public Health and Social Justice 3 Credits
Health is broadly considered a human right and universal access to care is a core target of Public Health. Improving health often requires population-level interventions. As such, addressing disparities is to a significant extent a public health challenge. This course illuminates the social justice dimension of public health practice. It will familiarize the student with key documents that support public health action to address health disparities and equip students to more effectively advance public health through not only public health practice, but also through other health disciplines, health law, health economics, diplomacy, and government.

PB 0201 Public Health, Disease, and Injury 3 Credits
Public health requires familiarity with the epidemiology, pathology, prevention, and treatment of a wide range of infectious, non-communicable, mental, reproductive, and nutritional conditions, as well as violence and unintentional injuries. This course offers a population-focused survey of abnormal human health with an emphasis on leading global causes of morbidity and mortality, key personal risk factors, and broader social determinants of health. The student will gain an understanding of principles for endemic disease and injury control and establishes the foundation for courses that follow.

PB 0203 Public Health Program Planning and Evaluation 3 Credits
Prerequisite: PB 0101.
This course provides the foundation for developing culturally competent community-based health interventions. Students learn the process of public health programming, including assessment, design, planning, implementation, and evaluation. This course integrates theory to examine interventions at various levels (individual, community, policy).

PB 0305 Public Health Seminar 3 Credits
Prerequisites: PB 0201, PB 0203.
This seminar assists students to apply evidence-based skills achieved throughout the program in order to better understand public health readings and reports. Through weekly readings, discussions, and debate, students will mobilize public health knowledge and examine implications for health policy while modeling the discourse that occurs in professional public health settings.

PB 0310 Public Health Capstone 3 Credits
Prerequisites: PB 0201, PB 0203.
This capstone course is designed to provide a platform for the development of strategic plans to address current public health problems in defined populations. Within the course, students develop a culminating project incorporating skills in needs assessment, statistics and epidemiology, program planning and evaluation, policy development, and advocacy.

PB 0315 Public Health Internship 6 Credits
Prerequisites: PB 0201, PB 0203.
The public health internship may be completed in a local public health agency or overseas with the permission of the program director. The internship experience exposes students to the elements of the core functions of public health and the application of these core functions in public health settings. While not all internships will allow for extensive exposure to all of the essential services, students are expected to discuss how the agency addresses those services.

Public Health Major

Bachelor of Science Curriculum

Core Curriculum
Public health students must complete the core curriculum (p. 27) that is required of all Fairfield undergraduates, with specific courses required to meet major and core curricular requirements.

Natural and Social Sciences
Students take one semester of Chemistry and two semester sequence of Biology. Because communication and social sciences form an important part of the foundation for Public Health practice, students also take specific courses in these areas.
Public Health Courses

Classroom instruction in Public health theory begins in the freshman year and continues throughout the undergraduate program. Public Health courses include theoretical and field requirements. To ensure that students obtain the breadth and depth of field experiences needed, the school has associations with a diverse range of health facilities, organizations, and public health departments. Students provide their own transportation to internships experiences, and all costs associated with these placements. Travel, parking, background checks, and health and professional requirements, are the responsibility of the student.

Approved concentrations within this major include Domestic, Global, and Nutrition. All concentrations depend upon course and faculty availability. The Global concentration also depends upon the availability of safe, pre-approved international internship placements. Students should consult with a faculty advisor prior to choosing a concentration to ensure requirements can be met in a timely manner.

Electives

Free electives in the curriculum provide students with an opportunity to explore topics of interest including the liberal arts and sciences, advanced public health topics, and minor options.

Eligibility Requirements

The curricula leading to a degree in Public Health from Fairfield University requires students to possess essential non-academic skills and capabilities necessary for professional practice. It is within the sole determination of Fairfield University and the Egan School to assess and conclude whether a student has these skills and capabilities. Eligibility requirements for participation and completion of the Public Health program shall include, but are not limited to, the following six capabilities:

Critical Thinking

Critical thinking ability sufficient for professional judgement; student must be able to examine, interpret, analyze, and synthesize material for problem solving and evaluation of professional situations and their own performance.

Interpersonal and Communication

Relationship and communication abilities appropriate for interacting sensitively with individuals, families, and groups from a variety of professional, social, cultural, and intellectual backgrounds. Ability to accurately and clearly communicate appropriate information for lay and professional audiences, both orally and in writing.

Sensory Abilities

Ability to observe, identify, and obtain information in order to assess, plan, provide and evaluate public health situations and interventions; student must possess adequate sensory abilities or be able to demonstrate appropriate and safe compensation for deficits.

Motor Skills and Mobility

Sufficient mobility, including the gross and fine motor skills needed to function in professional public health environments.

Emotional Stability

Emotional stability sufficient to function within rapidly changing and often stressful professional environments; the ability to monitor and identify one’s own and others’ emotions, and use the information to guide thinking and actions.

- Integrity needed to make ethical decisions and honor the professional code of Public Health.
- Emotional ability to maintain calm in crisis and emergency situations.
- Ability to develop mature relationships with the other professionals and modify behavior in response to constructive feedback.
- Respect for diversity as well as regard and respect for others.
- Knowledge about and commitment to the values and ethics of the profession.
- Self-awareness and insight with sufficient capacity for self-evaluation and ability to take part in the supervisory process.

Physical Health and Abilities

Physical health and stamina sufficient to function in public health environments.

- Sufficient energy and ability to manage public health responsibilities in a variety of settings for a full internship day.
- Physical health necessary to interact with those who may be immunocompromised, incapacitated, and/or otherwise vulnerable populations.

Standards for Admission and Progression in the Public Health Curriculum

Students are required to successfully complete all core, required courses and internship experiences. By accepting admission in the Egan School, the student understands the program eligibility and progression requirements. Public Health students must follow all University educational policies and general regulations including those regarding academic progress.

Prerequisites

The science and math courses are sequential and are prerequisites to designated Public Health courses. Strong foundational knowledge in the science and math courses is critical to success in the Public Health program. Thus, students may not progress to the next semester with an incomplete in prerequisite courses. Biology, Chemistry, Math, and Public Health courses must be completed successfully with a minimum grade of C (73) for students to progress to the next semester in the course sequence for the Public Health major. The final grade for CH 0084 is calculated based from grades for both the lab and theory portion.

Students unable to complete these courses successfully are expected to repeat coursework in the next semester or the summer session immediately following or they will be dismissed from the Egan School. Students who do not obtain a grade of C or better in a prerequisite course (including a repeated course) may repeat the course once. A grade of less than C in three or more prerequisite courses will result in dismissal from the Egan School.

Public Health Courses

Public Health courses are sequential, beginning with foundational courses and progressing to increasing levels of complexity and challenge throughout the program. As students move through the curriculum, new content is integrated and builds upon previously learned material. Thus, all students must earn the minimum grade of C (73) in all Public health courses to progress to the next semester and continue in the program.

Further, students may not progress to the next semester with an incomplete in any Public Health course. Students who do not obtain a grade of C or better in a Public Health course may repeat the course once.
A grade of less than C in two Public Health courses (including a repeated course) will result in dismissal from the Egan School. The internship component of the Public Health program is graded on a pass/fail basis. Students must pass the theory component. Students who fail to earn the minimum grade in either component of a course must repeat the entire course.

Health and Professional Requirements

Some public health field placements require documentation of particular professional and health information. Public health students must be certified in cardiopulmonary resuscitation by January 1 of the junior year and remain certified throughout the Public Health Program. Students must receive their certification through either the Health Care Provider course offered through the American Heart Association or the Professional Rescuer or CPR/AED for Lifeguard Certification course offered through the American Red Cross. Any health requirements and OSHA training requirements must be met prior to the programmed field experience.

To attend some internship experiences, students must have a physical examination and non-reactive Mantoux tuberculosis skin test. Proof of immunization or immunity must be provided for the following: hepatitis A and B, varicella, measles, mumps, rubella, flu, and diphtheria-tetanus. History of disease is not acceptable as proof of immunity; laboratory results of blood titers must be provided. CastleBranch.com is the immunization tracking system used by Fairfield University Public Health students to house their health information. Students are responsible for uploading information and keeping all required information updated. Students unable to comply with field placement requirements will be dismissed from the program. All costs associated with these requirements are the responsibility of the student.

Student Background Checks and Drug Testing

The undergraduate public health program at Fairfield University requires the successful completion of the internship component of the curriculum. Some internship sites may require students to complete a criminal background check and drug screening before participating beginning the internship. Therefore, it is the policy of the Egan School that all admitted students must satisfactorily complete a criminal background check and drug screens prior to participating in the internship component of the curriculum. These will be completed at the student’s expense at a location designated by the University. Fairfield University and the Egan School have no obligation to refund tuition or otherwise accommodate students in the event that a criminal background check or drug screening renders the student ineligible to complete required courses or field placement(s).

Seamless Progression to Graduate Study

Master of Public Administration (MPA)

Graduates of the Bachelor of Science in Public Health are provided with the opportunity for advanced placement in the Health Track of Fairfield’s Master of Public Administration (https://catalog.fairfield.edu/graduate/arts-sciences/programs/mpa-public-administration/mpa-public-administration) (MPA) program. In as little as sixteen months, students can complete an MPA degree program designed to examine pressing social, ethical, and professional health issues, while developing strong leadership abilities for career advancement. Pursuing advanced coursework in administration and management, students will learn theory, research, and application for future roles in local, state, and federal healthcare organizations. Students are also able to work with dedicated faculty from across the University with a wide range of healthcare backgrounds to tailor their curriculum to their personal, professional, and academic goals.

Requirements

The major in Public Health includes required courses in epidemiology and public health, environmental studies, communication, applied ethics, biostatistics, management, and community mental health. These are complemented by related electives and foundational courses in biology and chemistry. In addition, the major requires a six credit public health field internship that may be done locally, elsewhere in the U.S., or in the setting of a developing country.

For a major in Public Health, students will complete the following:

Administration

Meredith Kazer, PhD, APRN, FAAN
Dean and Professor

Audrey Beauvais, DNP, MBA, MSN, RN
Associate Dean for Undergraduate Studies

Suzanne Chaplik, PhD, RN
Assistant Dean

Carole A. Pomarico, MSN, RN, MA
Adult Program Director

Faculty

Meredith Kazer
Dean and Professor
BSN, Boston University
MSN, Yale University
PhD, New York University

Diane Avery
Assistant Professor, VANAP
BS, MA, Sacred Heart University

Susan Bartos
Assistant Professor
BSN, Moravian College
MSN, PhD, University of Connecticut

Cynthia Bautista
Associate Professor
BSN, Salem State College
MSN, Louisiana State University
PhD, University of Rhode Island

Audrey Beauvais
Associate Dean and Associate Professor
BSN, Fairfield University
MBA, MSN, Sacred Heart University

Karen Burrows
Assistant Professor of the Practice
BS, Quinnipiac University
DNP, MSN, Sacred Heart University

Suzanne Chaplik
Assistant Dean and Assistant Professor of the Practice
BSN, Molloy College
MSN, University of Connecticut
PhD, University of Utah

Jaclyn Conelius
Associate Professor
BS, Fairfield University
MSN, Yale University
PhD, University of Connecticut

Christa Esposito
Visiting Instructor
BSN, Western Connecticut State University
MS, Stony Brook University Midwifery

Sally O'Toole Gerard
Associate Professor
BS, Pace University
MSN, College of New Rochelle
DNP, Case Western University

Danielle Hall
Visiting Assistant Professor
BSN, University of Scranton
MSN, Yale University
DNP, Case Western Reserve University

Rose Iannino-Renz
Assistant Professor of the Practice
BSN, Sacred Heart University
MSN, Southern Connecticut University
DNP, Quinnipiac University

Patrick W. Kelley
Distinguished Fellow
MD, University of Virginia
MPH, DrPH, Johns Hopkins

Alison Kris
Associate Professor
BS, University of Pennsylvania
MSN, PhD, University of California, San Francisco

Deborah List
Visiting Assistant Professor
AB, Brown University
MA, Columbia University
MPH, Harvard University
PhD, Johns Hopkins University

Jenna LoGiudice
Assistant Professor
BS, Fairfield University
MSN, Yale University
PhD, University of Connecticut

Karen Burrows
Assistant Professor of the Practice
BS, Quinnipiac University
DNP, MSN, Sacred Heart University

Suzanne Chaplik
Assistant Dean and Assistant Professor of the Practice
BSN, Molloy College
MSN, University of Connecticut
PhD, University of Utah

Jaclyn Conelius
Associate Professor
BS, Fairfield University

Jenna LoGiudice
Assistant Professor
BS, Fairfield University
MSN, Yale University
PhD, University of Connecticut
Kathleen Lovanio  
Assistant Professor of the Practice  
BSN, Southern Connecticut State University  
MSN, DNP, Fairfield University

Diana Mager  
Associate Professor  
MSN, Western Connecticut State University  
DNP, Case Western Reserve University

Mary Murphy  
Assistant Professor, VANAP  
BSN, Western Connecticut State University  
MSN, Florida Atlantic University  
PhD, University of Utah

Eileen O'Shea  
Professor  
BSN, Boston College  
MSN, University of Pennsylvania  
DNP, Case Western Reserve University

Kathryn Phillips  
Assistant Professor  
BS, State University of New York  
MSN, PhD, Boston College

Jessica Planas  
Associate Professor  
BSN, MSN, PhD, University of Connecticut  
MPH, Southern Connecticut State University

Carole A. Pomarico  
Assistant Professor  
BSN, Carlow College  
MSN, University of Pittsburgh  
MA, Fairfield University

Linda Roney  
Assistant Professor  
BSN, Villanova University  
MSN, EdD, Southern Connecticut State University

Katherine Saracino  
Instructor of the Practice  
BS, Fairfield University  
MSN, University of Phoenix

Jennifer Schindler-Ruwisch  
Assistant Professor  
CPH, Columbia University  
DrPH, George Washington University

Joyce M. Shea  
Associate Professor  
BS, Fairfield University  
MSN, DNSc, Yale University School of Nursing

Kelly Sullivan  
Visiting Assistant Professor  
BS, Fairfield University  
MSN, DNP, Fairfield University

Kathleen A. Wheeler  
Professor  
BS, Cornell University  
MA, PhD, New York University

Advisory Board

Robin B. Kanarek ’96, BS, RN  
Chair, Advisory Board  
President  
The Kanarek Family Foundation  
Greenwich, CT

Gail T. Berardino  
Greenwich, CT

Mary Ann Christopher ’79, MSN, RN, FAAN  
President  
Christopher STH Consulting  
Avon, NJ

Moreen Donahue P’96, DNP, RN, NEA-BC, FAAN  
Senior Vice President & System Chief Nursing Officer  
Western Connecticut Health Network  
Trumbull, CT

Craig M. Haba ’91  
Partner  
Northwestern Mutual Life Insurance Company  
Franklin, MA

Linda Huston  
Greenwich, CT

Marsel Huribal, ’84, MD, FACS  
Vascular Surgeon, Founder, President and Sr. Partner  
Southern CT Vascular Center LLC  
Easton, CT

Patrick Kelley ’76, P’12, MD, PH  
Director, Board on Global Health and African Science Academy  
Development  
The Institute of Medicine  
The National Academies  
Silver Spring, MD

Gerald Kerins, P’16, P’18, MD, FACP  
Associate Chief of Geriatrics for Education  
Geriatric Medicine Fellowship Program Director  
Associate Clinical Professor of Medicine  
Yale University School of Medicine  
Yale New Haven Hospital  
Madison, CT
