CERTIFICATE IN CLASSROOM TECHNOLOGY INTEGRATION

As the integration of technology into the classroom has become more common, the need for an understanding of how to effectively employ it has moved beyond the purview of a single educational technology professional. This program is designed to provide a foundational understanding of technology integration, its principles, and its practices to teachers seeking to strengthen their educational technology skills. On its own, the certificate will educate candidates on today's technology as well as the methods for assessing new teaching and learning technologies. The certificate is structured to allow students to continue on to the Master of Arts or Sixth Year Certificate programs if they choose, applying all four courses to that degree program. This certificate is offered entirely online. Students can earn their ISTE Educator Certificate while in this program.

Code	Title	Credits
