

# FINANCIAL TECHNOLOGY MINOR

---

Financial technology is changing the way all financial services are offered. The innovations from FinTech are improving the delivery of banking and payment services as well as creating innovative offerings that bring new ideas to the market. The Finance industry needs professionals who understand this technology and can make decisions about how these advances will impact the market. The FinTech Minor prepares students to encounter new technology in Finance and make the important assessments about how it is applied to drive new services. The FinTech Minor brings Finance and Data Analytics together to provide a more complete understanding of the impact that technologies, including blockchain, have on the creation of new banking, payment, and financial services.

For a 15-credit minor in financial technology, students complete the following:

Code	Title	Credits
FNCE 2101	Introduction to Finance	3
FNCE 3235	Financial Technology	3
DATA 3260	Database Systems	3
DATA 3235	Python Apps for Business Analytics	3
Select one course from the following:		3
FNCE 4305	Financial Trading and Strategic Simulations (FNCE 3215 pre-requisite is waived for minors in FinTech)	
FNCE 3210	Principles of Investment	
FNCE 3200	Global Capital Markets	
<b>Total Credits</b>		<b>15</b>

Financial technology minors must maintain a GPA of at least a 2.50 in financial technology.
